Owner's Manual

□ SAFETY PRECAUTIONS

CAUTION:

TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. **REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.**

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

T

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

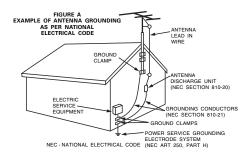

WARNING:

TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

- before the product is operated
- 2. Retain Instructions The safety and operating instructions should be retained for future reference.
- 3. Heed Warnings - All warnings on the product and in the operating instructions should be adhered to.
- 4 Follow Instructions - All operating and use instructions should be followed.
- 5. Cleaning – Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners.
- 6. Attachments Do not use attachments not recommended by the product manufacturer as they may cause hazards.
- 7. Water and Moisture – Do not use this product near water – for example, near a bath tub, wash bowl, kitchen sink, or laundry tub; in a wet basement: or near a swimming pool; and the like.
- 8. Accessories – Do not place this product on an unstable cart, stand, tripod. bracket, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the product. Any mounting of the product should

follow the manufacturer's instructions, and should use a mounting accessory recommended by the manufacturer.

- 9. A product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.
- 10. Ventilation Slots and openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should not be placed in a built-in or the manufacturer's instructions have been adhered to.
- 11. Power Sources This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operating instructions.
- 12. Grounding or Polarization This product may be equipped with a polarized alternating-current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.

- 1. Read Instructions All the safety and operating instructions should be read 13. Power-Cord Protection Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.
 - 15. Outdoor Antenna Grounding If an outside antenna or cable system is connected to the product, be sure the antenna or cable system is grounded so as to provide some protection against voltage surges and built-up static charges. Article 810 of the National Electrical Code, ANSI/NFPA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See Figure A.
 - 16. Lightning For added protection for this product during a lightning storm. or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the product due to lightning and power-line surges.
 - Power Lines An outside antenna system should not be located in the 17. vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep from touching such power lines or circuits as contact with them might be fatal.
 - 18. Overloading Do not overload wall outlets, extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.
 - 19 Object and Liquid Entry - Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.
 - 20. Servicing Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.
 - installation such as a bookcase or rack unless proper ventilation is provided 21. Damage Requiring Service Unplug this product from the wall outlet and refer servicing to gualified service personnel under the following conditions:
 - a) When the power-supply cord or plug is damaged,
 - b) If liquid has been spilled, or objects have fallen into the product,
 - c) If the product has been exposed to rain or water.
 - d) If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to its normal operation,
 - e) If the product has been dropped or damaged in any way, and
 - f) When the product exhibits a distinct change in performance this indicates a need for service.
 - 22. Replacement Parts When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.
 - 23. Safety Check Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.
 - 24. Wall or Ceiling Mounting The product should be mounted to a wall or ceiling only as recommended by the manufacturer.
 - Heat The product should be situated away from heat sources such as 25. radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.

FCC INFORMATION (For US customers)

1. COMPLIANCE INFORMATION

Product Name: AV Surround Receiver Model Number: AVR-3808CI

This product complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this product may not cause harmful interference, and (2) this product must accept any interference received, including interference that may cause undesired operation.

Denon Electronics (USA), LLC (a D & M Holdings Company)

100 Corporate Drive Mahwah, NJ 07430-2041 Tel. (800) 497-8921

2. IMPORTANT NOTICE: DO NOT MODIFY THIS PRODUCT

This product, when installed as indicated in the instructions contained in this manual, meets FCC requirements. Modification not expressly approved by DENON may void your authority, granted by the FCC, to use the product.

3. NOTE

This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

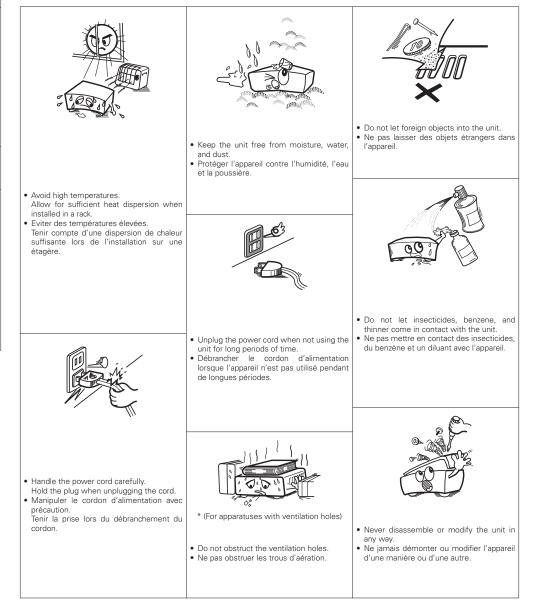

This product generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the product OFF and ON, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the product into an outlet on a circuit different from that to which the receiver is connected.
- Consult the local retailer authorized to distribute this type of product or an experienced radio/TV technician for help.

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

Getting Started

Thank you for purchasing this DENON product. To ensure proper operation, please read this owner's manual carefully before using the product.

After reading them, be sure to keep them for future reference.

Accessories

Check that the following parts are supplied with the product.

Cautions on Handling

• Before turning the power switch on

Check once again that all connections are correct and that there are no problems with the connection cables.

 Power is supplied to some of the circuitry even when the unit is set to the standby mode. When traveling or leaving home for long periods of time, be sure to unplug the power cord from the power outlet.

• About condensation

If there is a major difference in temperature between the inside of the unit and the surroundings, condensation (dew) may form on the operating parts inside the unit, causing the unit not to operate properly.

If this happens, let the unit sit for an hour or two with the power turned off and wait until there is little difference in temperature before using the unit.

• Cautions on using mobile phones

Using a mobile phone near this unit may result in noise. If so, move the mobile phone away from this unit when it is in use.

Moving the unit

Turn off the power and unplug the power cord from the power outlet.

Next, disconnect the connection cables to other system units before moving the unit.

 Note that the illustrations in these instructions may differ from the actual unit for explanation purposes.

Cautions on Installation

Note:

For proper heat dispersal, do not install this unit in a confined space, such as a bookcase or similar enclosure.

× Note × 0.00 ×

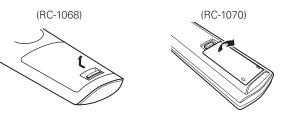

About the Remote Control Unit

In addition to the AVR-3808CI, the included main remote control unit (RC-1068) can also be used to operate the equipment listed below. ① DENON system components

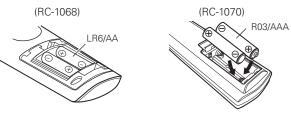

- Non-DENON system components
 - By setting the preset memory (12 page 59 ~ 61)
 - By using the learn function (2 page 62)

Inserting the Batteries

① Lift the clasp and remove the rear lid.

② Load the two batteries properly as indicated by the marks in the battery compartment.

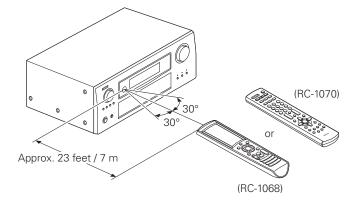

3 Put the rear cover back on.

NOTE

- Replace the batteries with new ones if the set does not operate even when the remote control unit is operated close to the unit.
- The supplied batteries are only for verifying operation.
- When inserting the batteries, be sure to do so in the proper direction, following the " Φ " and " Θ " marks in the battery compartment.
- To prevent damage or leakage of battery fluid:
- Do not use a new battery together with an old one.
- Do not use two different types of batteries.
- Do not attempt to charge dry batteries.
- Do not short-circuit, disassemble, heat or dispose of batteries in flames.
- If the battery fluid should leak, carefully wipe the fluid off the inside of the battery compartment and insert new batteries.
- Remove the batteries from the remote control unit if it will not be in use for long periods.
- When replacing the batteries, have the new batteries ready and insert them as quickly as possible.

Operating Range of the Remote Control Unit

Point the remote control unit at the remote sensor when operating it.

NOTE

The set may function improperly or the remote control unit may not operate if the remote control sensor is exposed to direct sunlight, strong artificial light from an inverter type fluorescent lamp or infrared light.

Information

Troubleshooting

Connections

Connections for all compatible audio and video signal formats are described in these operating instructions. Please select the types of connections suited for the equipment you are connecting. With some types of connections, certain settings must be made on the AVR-3808Cl. For details, refer to the instructions for the respective connection items below.

NOTE

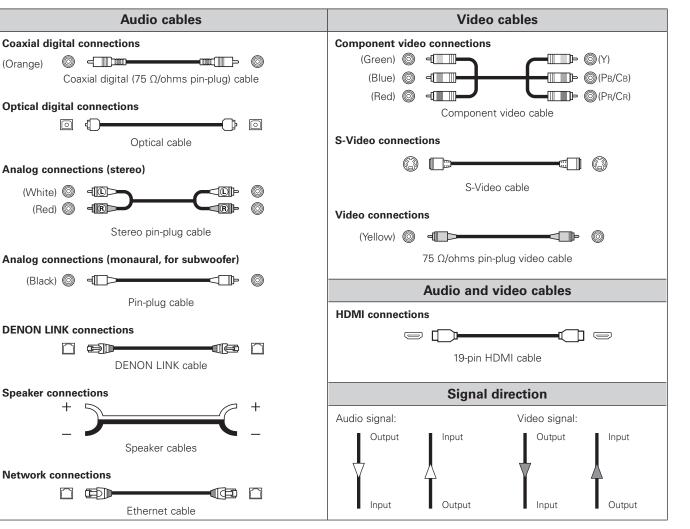

- Do not plug in the power cord until all connections have been completed.
- When making connections, also refer to the operating instructions of the other components.
- Be sure to connect the left and right channels properly (left with left, right with right).
- Do not bundle power cords together with connection cables. Doing so can result in humming or noise.

Preparations

(Orange)

Cables Used for Connections

Select the cables according to the equipment being connected.

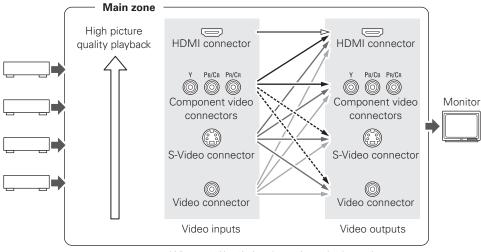

Video Conversion Function

- This function automatically converts various formats of video signals input to the AVR-3808Cl into the format used to output the video signals from the AVR-3808Cl to a monitor.
- The AVR-3808CI's video input/output circuitry is compatible with the following four types of video signals:

Digital video signals: HDMI

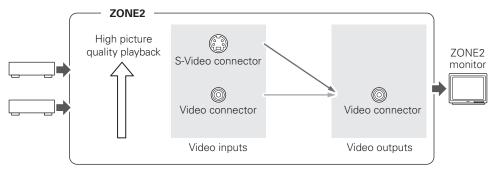

Analog video signals: Component video, S-Video and Video

(Flow of video signals inside the AVR-3808CIG

----: When 480i/576i signals are input in the main zone

(Flow of video signals for ZONE2G

- When not using this function, connect a monitor output with the same type of connector as the video input connector.
- The resolution of the HDMI input-compatible monitor connected to the AVR-3808CI can be checked at GUI menu "Information" "HDMI Information" "Monitor" (1977) page 45).

NOTE

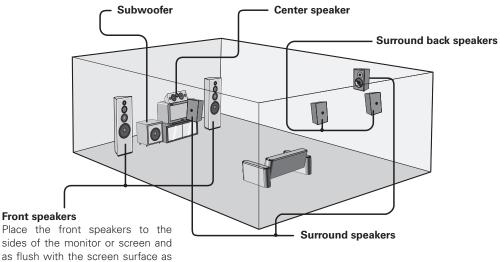

- HDMI signals cannot be converted into analog signals.
- 1080p component input video signals cannot be output to anything other than component video connectors.
- 480p/576p, 1080i and 720p component video input signals cannot be converted into S-Video or Video format.
- When a non-standard video signal from a game machine or some other source is input, the video conversion function might not operate.

Getting Started

Speaker Connections

Speaker Installation

The illustration below shows a basic example of installation of the amplifier combined with 8 speakers and a monitor.

Front speakers

sides of the monitor or screen and as flush with the screen surface as possible.

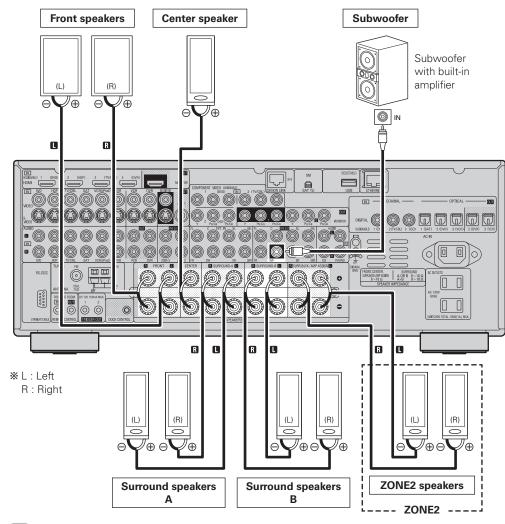

Troubleshooting

The table below shows a typical speaker configuration for the AVR-3808CI.

| | Fro | ont | | Surround A | | Surround B | | Surround back | | | |
|--------------------------------|-----|-----|--------|------------|---|------------|---|---------------|---|-----------|-----------|
| | L | R | Center | L | R | L | R | L | R | 1 only | Subwoofer |

| 3.1-channels | 0 | 0 | 0 | - | - | - | - | - | - | - | 0 |
| 2.1-channels | 0 | 0 | - | - | - | - | - | - | - | - | 0 |
| 2-channels | 0 | 0 | _ | - | - | - | - | _ | - | - | _ |

Speaker Connections

Example: 5.1-channels (Surround A+B) and ZONE2 use

P

When using just one surround back speaker, connect it to the left channel (SBL).

NOTE

By default, the AVR-3808Cl's "Amp Assign" setting is set to "ZONE2". To use as the surround back speaker for the main zone, change the "Amp Assign" setting (P page 68, 69).

Connecting the Speaker Cables

Carefully check the left (L) and right (R) channels and + (red) and – (black) polarities on the speakers being connected to the AVR-3808CI, and be sure to interconnect the channels and polarities correctly.

1 Peel off about 0.03 ft/10 mm of sheathing from the tip of the speaker cable, then either twist the core wire tightly or terminate it.

2 Turn the speaker te counterclockwise to loosen it.

رے

3 Insert the speaker cable's core wire to the hilt into the speaker terminal.

4 Turn the speaker terminal clockwise to C

When using a banana plug

Tighten the speaker terminal firmly before inserting the banana plug.

NOTE

- Use speakers with an impedance of 6 to 16 Ω /ohms. When using surround A and B speakers simultaneously, use speakers with an impedance of 8 to 16 Ω /ohms.
- Connect the speaker cables in such a way that they do not stick out of the speaker terminals. The protection circuit may be activated if the core wires touch the rear panel or if the + and – sides touch each other (1277 "Protection circuit").
- Never touch the speaker terminals while the power supply is connected. Doing so could result in electric shock.

Protection circuit

If speakers with an impedance lower than specified (for example 4 Ω /ohms speakers) are used for an extended period of time with the volume turned up high, the temperature may rise, activating the protection circuit.

When the protection circuit is activated, the speaker output is shut off and the power indicator flashes red. If this happens, unplug the power cord, then check the speaker cable and input cable connections. If the set is extremely hot, wait for it to cool off and improve ventilation around it. Once this is done, plug the power cord back in and turn the set's power back on.

If the protection circuit is activated again even though there are no problems in the ventilation around the set nor in the connections, the set may be damaged. Turn the power off, then contact a DENON service center.

Getting Started

Connecting Equipment with HDMI connectors

With HDMI connections, the video and audio signals can be transferred with a single cable.

- * The AVR-3808CI is equipped for HDMI version 1.3a. This version is compatible with other versions, allowing connection to all components equipped with an HDMI connector.
- * The AVR-3808CI is compatible with 30- and 36-bit Deep Color.

| Compatible audio format | Details | Discs (examples) |
|--|---------------------------------|-----------------------------|
| 2-channel linear PCM | 2ch 32-192 kHz 16/20/24 bits | CD, DVD-Video, DVD-Audio |
| Multi-channel linear PCM | 8ch 32-192 kHz 16/20/24 bits | DVD-Audio |
| Dolby Digital, DTS | Bitstream | DVD-Video |
| DSD | 2/5.1ch 2.8224 MHz 1 bit | SACD |
| Dolby Digital Plus, Dolby TrueHD, DTS-HD | Bitstream | HD DVD, Blu-ray Disc |

Copyright protection system (HDCP)

In order to play the digital video and audio signals of a DVD-Video or DVD-Audio disc using HDMI/DVI connections, both the connected DVD player and monitor must be equipped for a copyright protection system called "HDCP" (Highbandwidth Digital Content Protection).

HDCP is a copy protection technology consisting of data encoding and mutual identification of the devices. The AVR-3808Cl is HDCP-compatible. For details on the

DVD player or monitor you are using, refer to its operating instructions.

- By default, the HDMI audio signals are output from the speakers connected to the AVR-3808CI.
- To output the sound from the TV, make the settings at GUI menu "Manual Setup" "HDMI Setup"
- "Audio" "TV" (😰 page 30).

NOTE

• Use a CPPM-compatible DVD player to play DVD-Audio discs that are copyright-protected by CPPM.

- \bullet The AVR-3808CI cannot be controlled from another device via the HDMI cable.
- The audio signals output from the HDMI connector (sampling frequency, bit rate, etc.) may be restricted by the connected device.
- Video signals are not output properly when using devices that are not HDCP-compatible.
- Video signals are not output if the input video signals do not match the monitor's resolution. In this case, switch the DVD player's resolution to a resolution with which the monitor is compatible.
- If the GUI menu "Manual Setup" "HDMI Setup" "Audio" setting (12) page 30) is set to "Amp", the sound may be interrupted when the monitor's power is turned off.
- Use a cable on which the HDMI logo is indicated (a certified HDMI product) for connection to the HDMI connector. Normal playback may not be possible when using a cable other than one on which the HDMI logo is indicated (a non-HDMI-certified product).
- If the monitor or DVD player does not support deep color, deep color signal transfer is not possible.
- If the monitor or DVD player does not support xvYCC, xvYCC signal transfer is not possible.
- If the monitor does not support "Auto Lipsync Correction" function, this function will not work.

- When the AVR-3808CI and DVD player are connected using an HDMI cable, also connect the AVR-3808CI and monitor using an HDMI cable.
- If the connected monitor or DVD player only has a DVI-D connector, use an HDMI/DVI converter cable. When using a DVI cable, no audio signals are transmitted.
- Use a Deep Color compatible cable for connection to Deep Color compatible devices.

When connecting with an HDMI/DVI converter cable (adapter)

• HDMI video signals are theoretically compatible with the DVI format.

When connecting to a monitor, etc., equipped with a DVI-D connector, connection is possible using an HDMI/DVI converter cable, but depending on the combination of components in some cases the video signals will not be output.

• When connecting using an HDMI/DVI converter adapter, the video signals may not be output properly due to poor connections with the connected cable, etc.

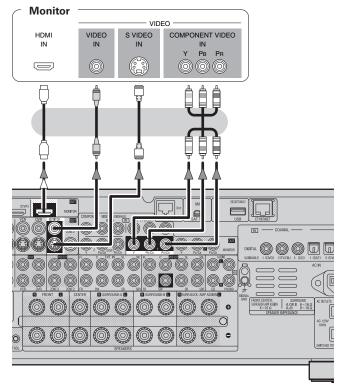

Getting Started

Connections

Setup

Connecting the Monitor

- Connect the cables to be used (127 page 8 "Video Conversion Function").
- With HDMI connections, the video and audio signals can be transferred with a single cable.
- To output the audio signals to the monitor with HDMI connections, set GUI menu "Manual Setup" "HDMI Setup" "Audio" to "TV" (127) page 30).

NOTE

- The component video connectors may be indicated differently on your monitor. For details, see the monitor's operating instructions.
- The audio signals output from the HDMI connectors are only the HDMI input signals.

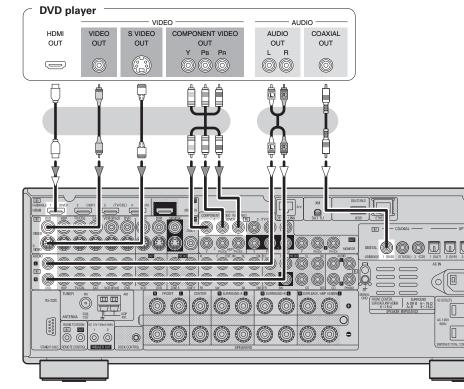

Connecting the Playback Components

Carefully check the left (L) and right (R) channels and the inputs and outputs, and be sure to interconnect correctly.

DVD Player

<u>_</u>

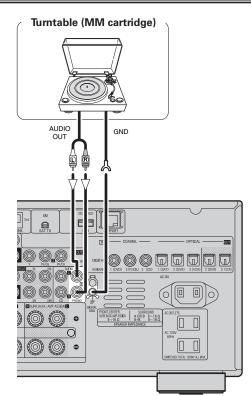

- Connect the cables to be used.
- With HDMI connections, the video and audio signals can be transferred with a single cable.

• Connect an HDP (High-Definition Player) in the same way.

• When using an optical cable for the digital audio connection, make the settings at GUI menu "Source Select" – "DVD" – "Assign" – "Digital" (1277 page 39).

Record Player

6

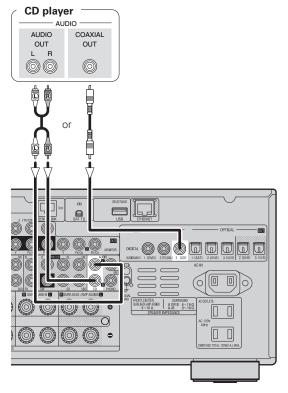

- When connecting a record player with an MC cartridge, use a commercially available MC head amplifier or a step-up transformer.
- Induction humming (a booming sound) may be produced from the speakers if the volume is raised with no record player connected.
- With some record players, noise may be generated when the ground wire is connected. If so, disconnect the ground wire.

NOTE

The AVR-3808CI's SIGNAL GND terminal is meant to reduce noise when a record player is connected. This is not a safety ground terminal.

CD Player

Connect the cables to be used.

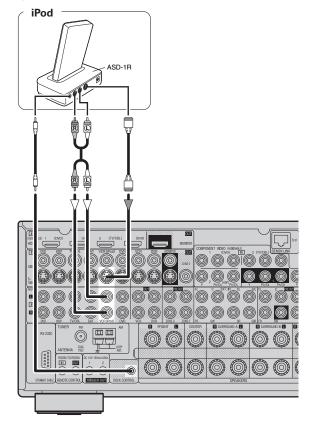

When using an optical cable for the digital audio connection, make the settings at GUI menu "Source Select" - "CD" - "Assign" - "Digital" (CP page 39).

iPod®

Use a DENON Control Dock for iPod (ASD-1R, sold separately) to connect the iPod to the AVR-3808CI. For instructions on the Control Dock for iPod settings, refer to the Control Dock for iPod's operating instructions.

Example :

• With the default settings, the iPod can be used connected to the VCR (iPod) connector.

• To assign the iPod to a connector other than VCR (iPod), make the settings at GUI menu "Source Select" - "(input source to which iPod dock assigned)" - "Assign" - "iPod dock" (P page 39).

Getting Started

Connections

Setup

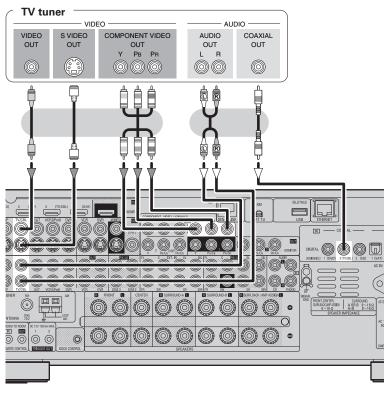

Playback

Remote Control

Multi-Zone

TV/CABLE Tuner

Connect the cables to be used.

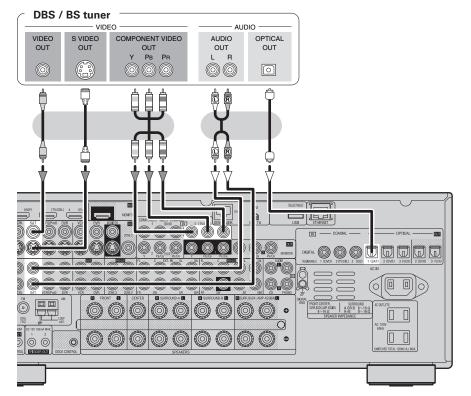

ø

When using an optical cable for the digital audio connection, make the settings at GUI menu "Source Select" - "TV/CBL" - "Assign" - "Digital" (127) page 39).

Satellite Receiver

Connect the cables to be used.

- When using a coaxial digital cable for the digital audio connection, make the settings at GUI menu "Source Select" "SAT" "Assign" "Digital" (127) page 39).
- When using a component video cable for the video connection, make the settings at GUI menu "Source Select" "SAT" "Assign" "Component" (127) page 39).

Getting Started

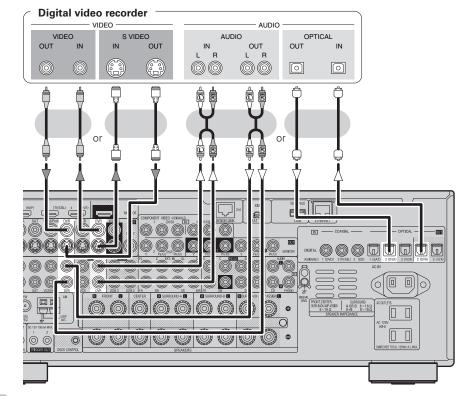

Connections

Connecting the Recording Components

Carefully check the left (L) and right (R) channels and the inputs and outputs, and be sure to interconnect correctly.

Digital Video Recorder

Connect the cables to be used.

- Make analog connections if you wish to record analog audio signals.
- When recording to a digital video recorder, it is necessary that the type of cable used with the playback source equipment be the same type that is connected to the AVR-3808CI DVR OUT connector.

Example: TV IN \rightarrow S-Video cable : DVR OUT \rightarrow S-Video cable

TV IN \rightarrow Video cable : DVR OUT \rightarrow Video cable

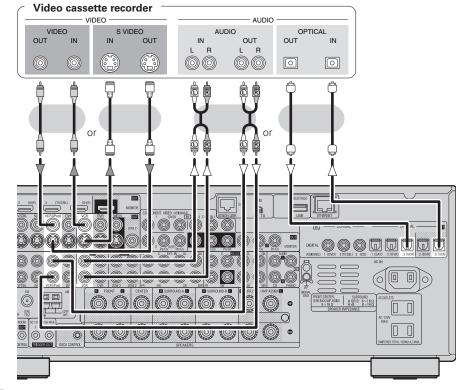

• When using a component video cable for the video connection, make the settings at GUI menu "Source Select" – "DVR" – "Assign" – "Component" (P page 39).

NOTE

Do not connect the output of the component connected to the AVR-3808CI's OPTICAL2 output connector to any input connector other than OPTICAL2.

Video Cassette Recorder

Connect the cables to be used.

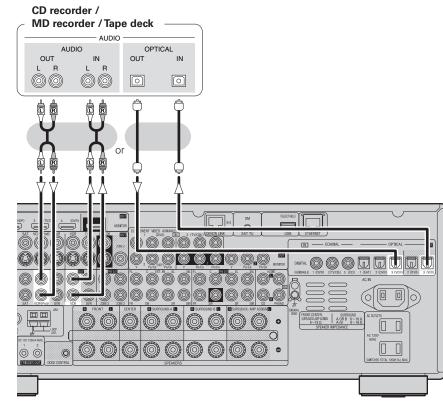

- When recording to a VCR, it is necessary that the type of cable used with the playback source equipment be the same type that is connected to the AVR-3808CI VCR OUT connector.
- **Example:** TV IN \rightarrow S-Video cable : VCR OUT \rightarrow S-Video cable TV IN \rightarrow Video cable : VCR OUT \rightarrow Video cable
- When using a component video cable for the video connection, make the settings at GUI menu "Source Select" "VCR" "Assign" "Component" (12) page 39).

NOTE

Do not connect the output of the component connected to the AVR-3808CI's OPTICAL3 output connector to any input connector other than OPTICAL3.

CD Recorder / MD Recorder / Tape Deck

Make analog connections if you wish to record analog audio signals, or digital connections if you wish to record digital audio signals, depending on the types of connectors on the components being used.

NOTE

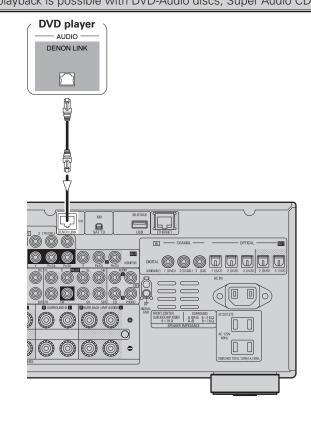

Do not connect the output of the component connected to the AVR-3808CI's OPTICAL3 output connector to any input connector other than OPTICAL3.

Connections to Other Devices

Ó

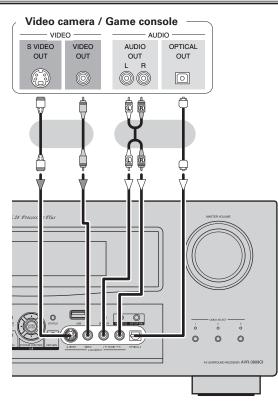

Carefully check the left (L) and right (R) channels and the inputs and outputs, and be sure to interconnect correctly.

Components Equipped with a DENON LINK connector Multi-channel playback is possible with DVD-Audio discs, Super Audio CD, etc.

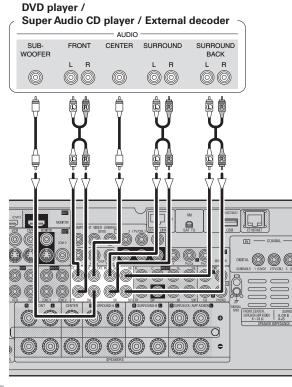

To use with DENON LINK connections, make the settings at GUI menu "Source Select" – "Assign" – "Digital" – "DENON LINK" (27) page 39).

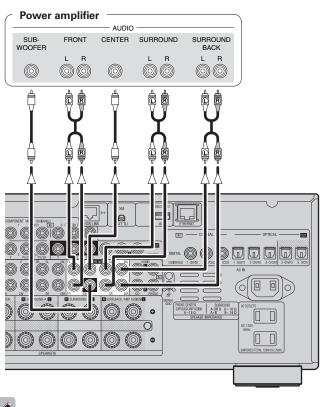

Video Camera / Game Console

Component with Multi-channel Output connectors

External Power Amplifier

6

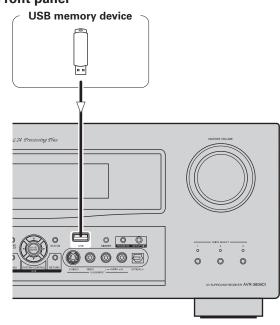

- To play the analog input signals input to the EXT. IN connectors, press the **INPUT MODE** button on the main unit or **INPUT** button on the main remote control unit and select "EXT. IN" or make the settings at GUI menu "Source Select" "(input source)" "Input Mode" "Input Mode" "EXT. IN" (12) page 37).
- The video signal can be connected in the same way as a DVD player (127 page 12).
- To play copyright-protected discs, connect the AVR-3808CI's EXT. IN connector with the DVD player's analog multi-channel output connector.

When using just one surround back speaker, connect it to the left channel (SBL).

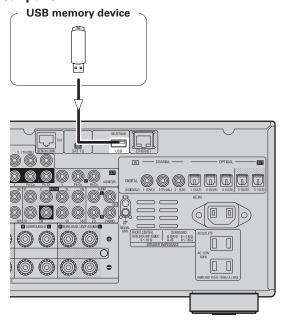

Getting Started

USB Port

Front panel

Rear panel

ø

- In the initial status, USB memory devices can be used by connecting them to the USB port on the front panel.
- To change the port to be used, see "USB Select" on page 39.
- For instructions on playing the files on a USB memory device, see page 54.

NOTE

- Set to the USB port you want to use.
- The AVR-3808CI is equipped with two USB ports, one each on the front and rear panels. It is not possible to use the set with USB memory devices connected to both the ports at the same time. Select the USB port you want to use at the "Source Select" – "NET/USB" – "Playback Mode" – "USB Select" menu.
- Do not use the extension cable for connecting the USB memory deveice to the AVR-3808CI's USB port. Use of the extension cable may cause harmful interference.

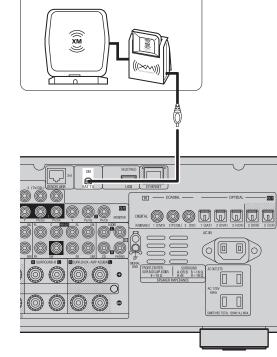

XM connector

- The AVR-3808CI is an XM Ready[®] receiver. You can receive XM[®] Satellite Radio by connecting to the XM Mini-Tuner and Home Dock (includes home antenna, sold separately) and subscribing to the XM service.
- Plug the XM Mini-Tuner and Home Dock into the XM connector on the rear panel.
- Position the Home Dock antenna near a south-facing window to receive the best signal.

For details, see "Listening to XM Satellite Radio Programs" (© page 48, 49).

When making connections, also refer to the operating instructions of the XM Mini-Tuner and Home Dock.

XM Mini-Tuner and Home Dock

NOTE

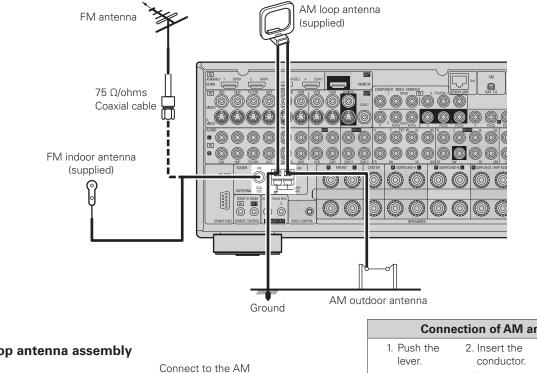

Keep the power cord unplugged until the XM Mini-Tuner and Home Dock connection have been completed.

- The XM name and related logo are registered trademarks of XM Satellite Radio Inc. All rights reserved.
- XM Ready is a registered trademark of XM Satellite Radio Inc. All rights reserved.

Antenna terminals

An F-type FM antenna cable plug can be connected directly.

Direction of broadcasting station

AM loop antenna assembly

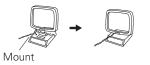

out the connection line.

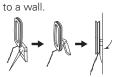

Remove the vinyl tie and take

a. With the antenna on top of (4) any stable surface.

b. With the antenna attached

Installation hole Mount on wall, etc.

Connection of AM antennas 3. Return the lever.

- Do not connect two FM antennas simultaneously.
- Even if an external AM antenna is used, do not disconnect the AM loop antenna.
- Make sure the AM loop antenna lead terminals do not touch metal parts of the panel.

Note to CATV system installer:

This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC which provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

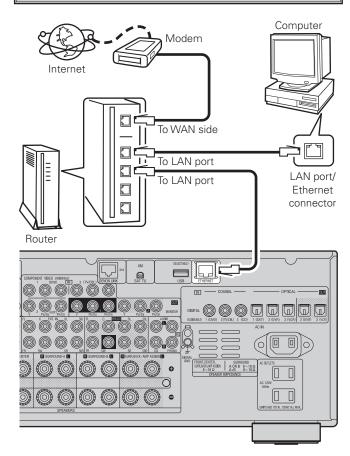

Information

Troubleshooting

Getting Started

Network Audio

Required system

□ Broadband Internet connection

A broadband line connection to the Internet is required in order to use the AVR-3808CI's Internet radio function and firmware update.

Modem

This is a device that is connected to the broadband line to communicate with the Internet. Some are integrated with the router.

Router

When using the AVR-3808Cl, we recommend you use a router equipped with the following functions:

• Built-in DHCP (Dynamic Host Configuration Protocol) server This function automatically assigns IP addresses on the LAN.

• Built-in 100 BASE-TX switch When connecting multiple devices, we recommend a switching hub with a speed of 100 Mbps or greater.

L Ethernet cable (CAT-5 or greater recommended)

- The AVR-3808CI does not come with an Ethernet cable.
- Some flat type Ethernet cables are easily affected by noise. We recommend using a normal type cable.
- If the sound is broken in an environment in which there is much power supply noise from electric products or in a noisy network environment, use a shielded type Ethernet cable.

Computer

A computer with the following specifications is required to use a music server:

• OS

Windows® XP Service Pack2, Windows Vista

- Software (Prepare one of the following.)
- · .NET Framework 1.1 and Windows Media Connect (Windows XP)
- · Windows Media Player ver.11
- · DLNA-compatible server software
- Internet browser
- Microsoft Internet Explorer 5.01 or later
- LAN port
- 300 MB or more free disk space

% Free disk space is required to store music files. The following sizes are approximate.

| Format | Bit rate | Per minute | Per hour |
|------------|-----------|----------------|----------------|
| | 128 kbps | Approx. 1 MB | Approx. 60 MB |
| MP3 / WMA | 192 kbps | Approx. 1.5 MB | Approx. 90 MB |
| MPEG-4 AAC | 256 kbps | Approx. 2 MB | Approx. 120 MB |
| | 392 kbps | Approx. 3 MB | Approx. 180 MB |
| WAV (LPCM) | 1400 kbps | Approx. 10 MB | Approx. 600 MB |
| FLAC | 1080 kbps | Approx. 7.7 MB | Approx. 464 MB |

For connections to the Internet, contact an ISP (Internet Service Provider) or a computer shop.

NOTE

- A contract with an ISP is required to connect to the Internet. No additional contract is needed if you already have a broadband connection to the Internet.
- The types of routers that can be used depend on the ISP. Contact an ISP or a computer shop for details.
- Depending on the server, video files may be displayed, but they cannot be played on the AVR-3808CI.

Others

- If you have an Internet provider contract for a line on which network settings are made manually, make the settings at GUI menu "Manual Setup" – "Network Setup" (27) page 32).
- With the AVR-3808CI, it is possible to use the DHCP and Auto IP functions to make the network settings automatically.
- When using a broadband router (DHCP function), the AVR-3808CI sets the IP address, etc., automatically.

When using the AVR-3808CI connected to a network with no DHCP function, make the settings for the IP address, etc., at GUI menu "Manual Setup" – "Network Setup" (1997 page 32).

- The AVR-3808CI is not compatible with PPPoE. A PPPoE-compatible router is required if you have a contract for a line of the type with which the PPPoE is set.
- Depending on the ISP with which you have your contract, it may be necessary to make proxy server settings to use the Internet radio function. If you made proxy server settings on the computer to connect to the Internet, make the proxy server settings on the AVR-3808Cl in the same way.

Getting Started

Connections

Setup

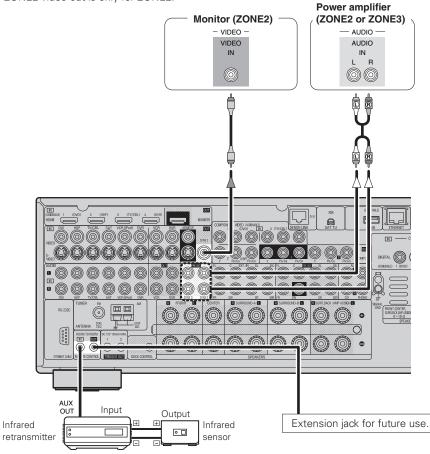

Playback

Multi Zone

ZONE2 or ZONE3 Pre-out Connections

- If another power amplifier or pre-main (integrated) amplifier is connected, the ZONE2 or ZONE3 pre-out (variable or fixed level) connectors can be used to play a different program source in ZONE2 or ZONE3 the same time (12) page 68 ~ 71).
- When using an S-Video cable or a video cable for connection between the AVR-3808CI and an input device, connect to the video connectors.
- The ZONE2 video out is only for ZONE2.

NOTE

- For the audio output, use high quality pin-plug cords so that no induction humming or noise is produced.
- For instructions on installing and operating separately sold devices, refer to the respective devices' operating instructions.
- To conduct multi-zone playback, see "Amp Assign / Multi Zone Connections and Operations" (127 page 68 ~ 71).

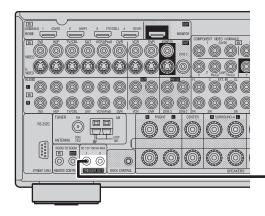

External Controller

RS-232C connector This connector is used for an external controller. ** If you wish to control the AVR-3808Cl from an external controller using the RS-232C connector, perform the operation below beforehand. ① Turn the AVR-3808Cl's power. ② Turn off the AVR-3808Cl's power from the external controller.

- (3) Check that the AVR-3808CI is in the standby mode.
- When using in combination with an RF Remote Controller (RC-7000Cl, sold separately) or RF Remote Receiver (RC-7001RCl, sold separately) two-way communication with an RF Remote Controller is possible.

The AVR-3808Cl's status information as well as iPod and Internet audio music files can be browsed watching the RF Remote Controller's display. For details, refer to the operating instructions of the respective devices.

• When used in combination with an RF Remote Controller or RF Remote Receiver, make the settings at GUI menu "Manual Setup" – "Option Setup" – "2Way Remote" – "Used" (1277 page 35).

Trigger output jacks

The power of an external device equipped with a trigger input jack can be turned on and off in association with operations on the AVR-3808CI. For details, see GUI menu "Manual Setup" – "Option Setup" – "Trigger Out 1" or "Trigger Out 2" (@ page 35).

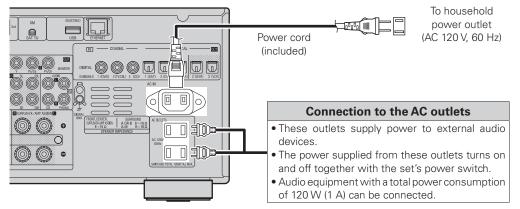

- Output level: 150 mA/12 V
- Check the trigger input conditions of the connected device.
- If the trigger input level of the connected device is higher than 150 mA/12 V and depending on the short-circuiting conditions, the AVR-3808Cl's protection circuit may be activated, in which case "TRIGGER PROTECT" appears on the display. If this happens, turn off the AVR-3808Cl's power and disconnect the connected device.

Getting Started

Connections

Connecting the Power Cord

Wait until all connections have been completed before connecting the power cord.

NOTE

- Insert the AC plugs securely. Incomplete connections could cause noise.
- Only use the AC outlets to plug in audio devices. Do not use them as power supplies for hairdryers or anything other than audio equipment.

Once Connections are Completed

Turning the Power On (repage 46)

s

GUI Menu Operations

With the AVR-3808CI, settings and operations for most functions can be performed by operating while looking at the GUI menus displayed on the monitor screen.

The GUI cannot be superimposed when xvYCC signals and component 1080p signal, computer's resolution (e.g.VGA) are input.

Example of the Display of the GUI Mark at a Title

Items for which this mark is indicated at the title can be operated from the GUI.

We recommend performing such operations from the GUI.

GUI

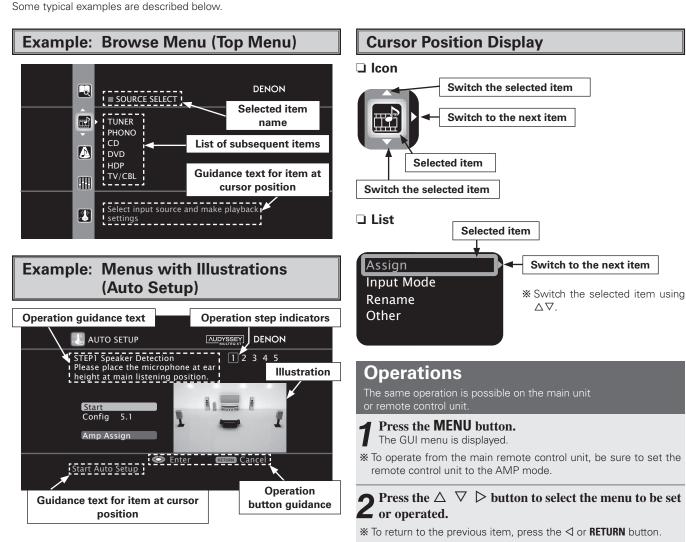

This is the GUI icon for this setting item or for the menu series to which this item belongs.

Example of Display of Default Values

In lists of selectable items or adjustable ranges, the item surrounded by a border is the default value.

Examples of GUI Screen Displays

$\Delta \nabla$. The same operation is possible on the main unit * To operate from the main remote control unit, be sure to set the remote control unit to the AMP mode. \frown Press the $\triangle \nabla \triangleright$ button to select the menu to be set * To return to the previous item, press the ⊲ or **RETURN** button.

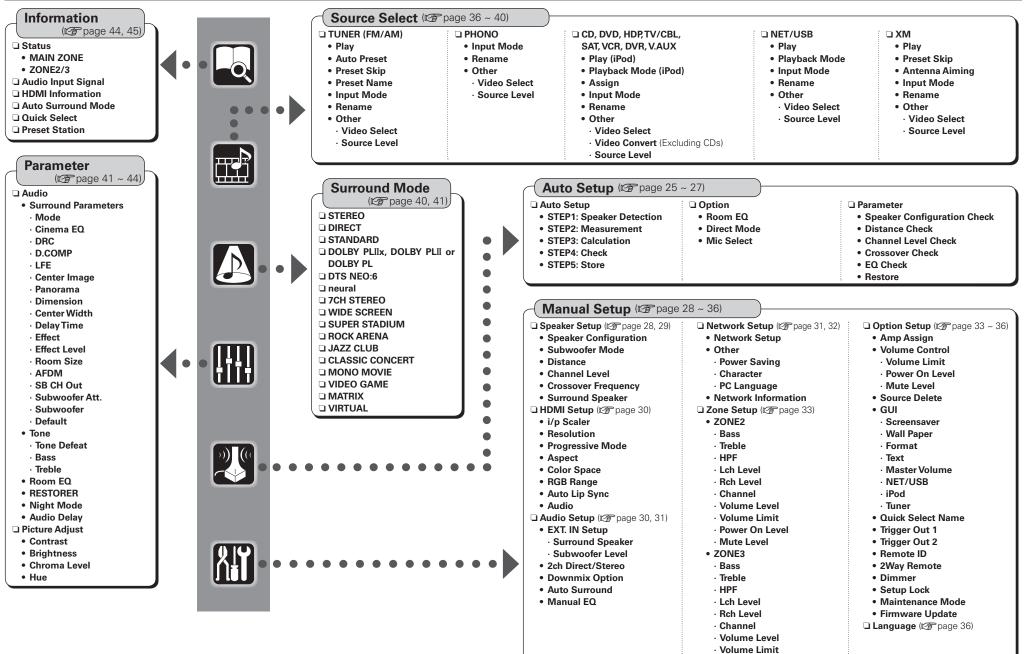

Switch to the next item

• Press the **ENTER** button to enter the setting.

Press the **MENU** button to finish.

When "Screensaver" is set to "ON", the screensaver is activated if no operation is performed for about 3 minutes.

Information

Troubleshooting

Troubleshooting

• Audyssey MultEQ® XT a

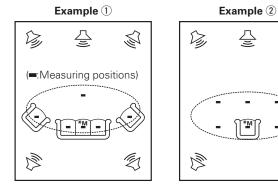

<u></u>

2

- Audyssey MultEQ[®] XT automatically measures the acoustical problems in the listening environment to create the best audio experience for your home theater.
- It optimizes a large listening area where one or more listeners are seated.

Measurements are performed by placing the calibrated microphone (DM-A405) successively at multiple positions throughout the listening area as shown in **Example** ①. For best results, it is strongly recommended to measure 6 or more positions so that the measurements have the proper spatial weighting.

Even if the listening environment is small as shown in **Example** (2), measuring at multiple points throughout the listening environment results in more effective correction.

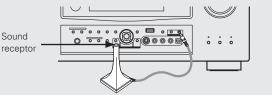

About the main listening position (*M)

The main listening position refers to the most central position where one would normally sit within the listening environment. MultEQ XT uses the measurements from this position to calculate speaker distance, level, polarity, and the optimum crossover value for the subwoofer.

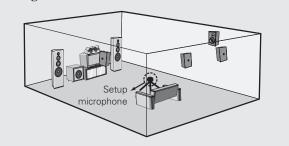

To make manual adjustments to the settings, see pages 28, 29.

Preparations

1 Connect the included calibrated setup microphone to the SETUP MIC jack on the main unit. The auto setup screen appears automatically.

2 Place the microphone at ear height on a tripod or stand with the microphone pointing directly up towards the ceiling.

It is not recommended to hold it in your hand. Be sure that the path from microphone to the speakers is not blocked by objects. Avoid placing the microphone close to a seat back or wall as sound reflections may give inaccurate results.

When using a subwoofer, make the following settings before starting the auto setup procedure:

- Defeat the volume and crossover controls if possible
- If this is not possible then set
- Volume: "12 o'clock" position
- Crossover frequency: "Maximum/Highest Frequency"
- · Low pass filter: "Off"
- · Standby mode: "Off"

- Do not disconnect the setup microphone until the auto setup procedure is completed.
- When using headphones, unplug the headphones before starting the auto setup procedure.

Auto Setup

Optimize settings for speakers in use.

Menu tree

| Auto Set | up | |
|----------|------------|---|
| | Auto Setup | |
| 2 | Option | |
| | _ | - |

3 Parameter

1 Auto Setup

The settings are performed automatically.

| GAuto setup flowG |
|---------------------------------------|
| STEP1: Speaker Detection |
| |
| STEP2: Measurement (2 to 8 positions) |
| • |
| STEP3: Calculation |
| • |
| STEP4: Check |
| |
| STEP5: Store |

Start

Start Auto Setup.

The Audyssey MultEQ XT Auto Setup process automatically calculates the size, level, distance, bass management crossover frequency, and optimal settings for each speaker and subwoofer. Audyssey MultEQ XT corrects acoustical distortions within the listening area. Before starting, connect and position all your speakers.

Once started, MultEQ XT will play a series of test tones through each speaker.

6

If an error message appears during the measurements, check "Error Messages" ($\Box p$ page 27), take the advised action, then start the measurements again.

Configuration

The speaker system to be measured can be selected ahead of time here

[Selectable items] 7.1 (B) 7.1 5.1

NOTE

"Amp Assign" is initially set to "ZONE2", so "7.1 (B)" and "7.1" cannot be selected. To use "7.1 (B)" or "7.1", change the "Amp Assign" setting Imp page 68 ~ 70).

GUI

Setting the correct speaker configuration can reduce the time required to measure during the auto setup procedure as the system will not have to look for speakers that are not connected.

Amp Assign

Advanced setting : changes power amplifier assignment.

NOTE

The items selectable at "Config." differ according to the "Amp Assign" settings.

STEP1 : Speaker Detection

The speaker connection and polarity are detected at the first measurement position. The following attributes are also determined at this time: "Speaker Size," "Speaker Distance," "Channel Level," "Crossover Frequency."

Once the measurements are completed, the results are displayed.

NOTE

- Loud test tone may be played during Audyssey MultEQ XT Automatic Speaker Setup. This is part of normal operation. If there is background noise in room, these test tones will increase in volume.
- Do not stand between the speakers and setup microphone or allow obstacles in the path while the measurements are being made. This will cause inaccurate readings.
- Quiet the listening environment before beginning measurements and refrain from talking. Turn off air conditioning units or other devices that emit noise if at all possible as measurements may be affected by these sounds.
- Operating the **MASTER VOLUME** knob on the main unit or the **VOL** +/- buttons on the remote control unit during the measurements will cancel the measurements.
- Do not change the speaker connections or subwoofer volume after "STEP1".

STEP2: Measurement

After completing a measurement position, move the microphone to the next position.

6

Measure at least 6 positions (main listening position and at least 5 other surrounding positions). For best results it is recommend measuring **6** or more positions (with a maximum of 8 positions).

STEP3: Calculation

When "Calculate" is selected at "STEP2", the measurements taken are analyzed automatically to determine how the speaker system interacts with the room.

<u>e</u>

The time required for this analysis depends on the number of speakers connected. The higher the number of speakers, the longer the time required for analysis.

STEP4: Check

Once the auto setup procedure is complete, a measuring result check screen appears.

Select any item whose results you want to check to review the results.

Values that are different from the actual distance may be set for speakers with built-in filters (subwoofers, etc.). This is because filters add electrical delay to the signal that should be compensated.

STEP5: Store

The auto setup measurement results are stored in the AVR-3808CI.

NOTE

Do not turn the power off while the settings are being stored.

Getting Started

Error Messages

If the auto setup procedure could not be completed due to speaker installation, the measuring environment, etc., an error message is displayed. If this happens, check the relevant items, be sure to take the necessary measures, then perform the auto setup procedure over again.

| Error messages (examples) | Cause | Measures |
|--|--|--|
| No microphone or speaker | Included setup microphone is not connected. | Connect the included setup microphone to the SETUP MIC jack on the main unit. |
| | Not all speakers could be detected. | Check the speaker connections. |
| Ambient noise is too high or Level is too low | Too much noise in the room for accurate measurements to be made. | Either turn off any device generating noise or move it away. |
| | | Try again when the surroundings are quieter. |
| | Speaker or subwoofer sound is too low for | Check the speaker installation and the direction in which |
| | accurate measurements to be made. | the speakers are facing. |
| | | Adjust the subwoofer's volume. |
| None | Displayed speaker could not be detected. The front L and front R speakers were not properly detected. Only one channel of the surround (A) and surround (B) speakers was detected. Sound was output from the R channel when only one surround back speaker was connected. The surround back or the surround (B) speaker was detected, but the surround (A) speaker was not detected. | |
| Phase | Displayed speaker connected with the polarities reversed. | Check the polarities of the displayed speaker. For some speakers, this error message may be displayed even if the speaker is properly connected. If you are sure that the wiring is correct, select "Skip". |

Select "Retry" to make the measurements again.

NOTE Be sure to turn the power off before checking the speaker connections.

2 Option

Select settings for room EQ, mic, etc.

Room EQ

Select room EQ setting method.

Direct Mode

Select room EQ use for DIRECT or PURE DIRECT mode.

[Selectable items] ON OFF

Mic Select

Select the microphone type if not using supplied mic. The microphone connected to V.AUX Lch is used.

[Selectable items] Mic V.AUX L

Only a professionally certified installer should ever connect a professionally-calibrated microphone to the V.AUX L input on the front panel.

3 Parameter Check

Check auto setup measurement results. This is displayed after the auto setup procedure is completed.

[Items to be checked] Spkr Config Check Distance Check

Ch. Level Check Crossover Check

Ġ

The auto setup results can be reset to what was originally calculated by MultEQ XT when "Restore" is selected.

|------------------|-------|---|-----|---|-------|
| | | | | | |

Representation of the main remote control unit

Adjusting with the main remote control unit using the test tones is only possible in the "Auto" mode and only effective in the STANDARD mode. The adjusted levels for the different modes are automatically stored in the memory.

GAdiusting using test tonesG

- (1) Press the **TEST** button.
- Test tones are output from the various speakers.
- (2) Use the $\triangleleft \triangleright$ button to adjust so that the volume is equal for all speakers.
- ③ When the adjustments are completed, press the **TEST** button again.

<u>_</u>

- When the GUI menu "Speaker Configuration" "Surround Back" setting (rappage 28) is set to "1spkr", the surround back speaker display is set to "Surround Back".
- Speakers set to "None" in the "Speaker Configuration" settings are not displayed.
- "Surround" can be set when GUI menu "Speaker Configuration" -"Surround A" or "Surround B" is set to "Large" or "Small" (P page 28).
- When using surround speakers, be sure to adjust the volume of the different speakers.
- When "Channel Level" is adjusted, the adjusted values are set for all the surround modes. To adjust the channel level separately for the different surround modes, use the operation see page 56.

Default

Resets the settings to the default values.

5 Crossover Frequency

Select crossover frequency from which subwoofer handles low range signal.

[Selectable items]

Only the portion of the bass sound of the various speakers output from the subwoofer that has a frequency below the frequency set here is output.

Set this according to the low frequency reproduction capabilities of the speakers you are using.

Advanced

Set the crossover frequency separately for the different speakers.

- The "Crossover Frequency" can be set when there are speakers that have been set to "Small" at GUI menu "Speaker Configuration" or when "Subwoofer" is set to "Yes" (12 page 28).
- If GUI menu "Subwoofer Mode" (Pr page 28) is set to "LFE". speakers set to "Small" at "Speaker Configuration" can be set. If set to "LFE+Main", this can be set regardless of the size of the speaker.
- For speakers set to "Small" sound below the crossover frequency
- is cut from the sound output. The cut bass sound is output from the subwoofer or front speakers.
- Always set the crossover frequency to "80 Hz". When using small speakers, however, we recommend setting the crossover frequency to a higher frequency.

6 Surround Speaker

Select surround speakers to use for each surround mode.

[Selectable items] R

Operating from the main remote control unit Press the SPKR button.

- This can be set when GUI menu "Speaker Configuration" "Surround A" and "Surround B" are used (B) page 28).
- When using the pre-out connectors, select and use either "Surround A" or "Surround B".
- Make the surround speaker settings when the input mode is set to "EXT. IN" at GUI menu "Manual Setup" - "Audio Setup" - "EXT. IN Setup" (B page 30).

About Speaker Type Setting when Using Both Surround speakers A and B

If "Small" is set for either surround speakers A or B, the output is the same as when "Small" is set for both A and B.

Getting Started

6 Trigger Out 1

Select the conditions to turn on the trigger out 1 with respect to the zone, input source, surround mode. For details about the trigger out function, see page 21.

7 Trigger Out 2

This sets the conditions to turn on the trigger out 2, in the same way as "Trigger Out 1" above.

[Selectable items] ON ---

Setting with Respect to the Zone

- \bullet When the power of the zone turned on/off, the trigger out turns on.
- Associated with the power supply of zones set to "ON".

Setting with Respect to the Input Source

- When the input source set to on is selected, the trigger out turns on.
- Associated with respect to the input source for zones set to "ON" at "Setting with Respect to the Zone".

Setting with Respect to the Surround Mode

- When the surround mode set to on is selected, the trigger out turns on.
- Associated with respect to surround modes that are set to "ON".
- This can be set if the "MAIN ZONE" setting at "Setting with Respect to the Zone" is set to "ON".
- Associated when an input source for which "Setting with Respect to the Input Source" is set to "ON" is selected.

8 Remote ID

Set remote control ID.

Match the ID setting of the remote control unit and the receiver.

[Selectable items] 1 2 3 4

- When changing the remote ID, also change the AMP, iPod, TU and NET/DTU modes of the main remote control unit at the same time (127 page 62).
- When changing the remote ID, also change the sub remote control unit at the same time (12) page 67).

9 2Way Remote

Make setting for 2-way remote control unit.

[Selectable items] Used Not Used

When using a 2-way remote control unit (RC-7000Cl and RC-7001RCl, sold separately), set this to "Used".

10 Dimmer

Adjust display brightness of the receiver.

[Selectable items] Bright Dim Dark OFF

Press the **DIMMER** button.

Bright Dim OFF Dim OFF

III Setup Lock

Protect settings from inadvertent change.

[Selectable items] ON OFF

- When "Setup Lock" is set to "ON", the settings listed below can no longer be changed. Also, "SETUP LOCKED!" is displayed if you attempt to operate related buttons.
- · GUI menu operations
- · RESTORER
- · Night Mode
- · Parameter
- · Room EQ
- · Channel Level
- · Audio Delay
- To cancel the setting, press the **MENU** button to re-display the "Setup Lock" screen, then change the setting to "OFF".

12 Maintenance Mode

This sets the function for maintenance by a DENON serviceperson or installer. (For professional use only.)

This function allows a DENON serviceperson or installer to check the AVR-3808Cl's status and make settings via the Internet.

NOTE

Only use this function if so instructed by a DENON serviceperson or installer.

Getting Started

13 Firmware Update

Update the firmware of the receiver.

[Selectable items]

Start :

Execute the update process.

When updating starts, the power indicator lights red. "Updating *** * *** " is shown on the display during updating. Once updating is completed, "Updating complete" is displayed.

"Latest firmware" is displayed when the firmware is the latest version.

* If the display reads as shown below, check the settings and network environment, then update again.

| Display | Description |
|-------------------|--|
| Updating failed | Updating failed. |
| Login failed | Failure to log into server. |
| Server is busy | Server is busy. Wait a while then try again. |
| Connection failed | Failure connecting to server. |
| Regist failed | Failure registering to server. |

NOTE

- Connection to the network and specific settings are required to update the firmware. For details, see page 20, 32.
- Do not turn off the power until updating is completed.
- Normally there is no need to use this function, aside from the cases described below.
- · The Firmware Update function is only used for updating the firmware (free or for a charge) via the Internet, for example for the purpose of adding functions to the AVR-3808CI in the future.
- · Information regarding the Firmware Update function will be announced on the DENON web site each time related plans are defined
- · A broadband connection to the Internet is required to use this function (page 20).
- Even with a broadband connection to the Internet, approximately 1 hour is required for the updating procedure to be completed. Once updating starts, normal operations on the AVR-3808CI cannot be performed until updating is completed.

Furthermore, updating the firmware may reset the backup data for the parameters, etc., set for the AVR-3808CI.

Language

This sets the language used on the display

This can be selected for input sources for which "Assign" is assigned at the "iPod dock" setting.

9 Assign

Assign input sources to input connectors.

HDMI

A

Getting Started

Connections

Select HDMI connector to assign to this source.

| | | | DVD DVR | HDP T | V/CBL | SAT V | CR |
|--------------------|----------|-------|------------|-------|-------|-------|-------|
| [Select | able ite | ms] | 1 2 | 3 4 | None | | |
| Input source | DVD | HDP | TV/CBL | SAT | VCR | DVR | V.AUX |
| Default setting | HDMI1 | HDMI2 | HDMI3 | None | None | HDMI4 | None |

- With HDMI, the video and audio signals are transferred simultaneously. When HDMI is assigned to an input source, the audio signal switches to HDMI along with the video signal. To use with the digital audio input connectors assigned, set GUI menu "Input Mode" to "Digital" (CF page 37, 38).
- When the AVR-3808CI and monitor are connected with an HDMI cable, if the monitor is not compatible with HDMI audio signal playback, only the video signals are output to the monitor.
- The audio signals input from the analog, digital and EXT. IN connectors are not output to the monitor.

This cannot be set for input sources for which "iPod dock" is assigned.

Digital

Select digital input connector to assign to this source.

- *3: This is displayed when the input signal is "DTS 96/24".

DSP Simulation Playback

The desired mode according to the program source and viewing situation can be selected from among 10 DENON original surround modes.

The surround parameters can be adjusted (1) page 77, 78) to achieve an even more realistic, powerful sound field.

[Selectable items]

| 7CH STEREO | : This mode is for enjoying stereo sound from all speakers. |
|-----------------|--|
| WIDE SCREEN | : This mode is for enjoying the atmosphere of viewing a movie on a large screen. |
| SUPER STADIUM | : This mode is suited for viewing sports programs. |
| ROCK ARENA | : This mode is for enjoying the atmosphere of a live concert in an arena. |
| JAZZ CLUB | : This mode is for enjoying the atmosphere of a live concert in a jazz club. |
| CLASSIC CONCERT | : This mode is for appreciating classical concert programs. |
| MONO MOVIE * | This mode is for playing monaural movie sources with surround sound. |
| VIDEO GAME | : This mode is suited for achieving surround sound with video games. |
| MATRIX | : This mode lets you add a sense of expansion to stereo music sources. |
| VIRTUAL | : This mode is for enjoying surround effects |

using only the front speakers or headphones.
 * When playing sources recorded in monaural in the MONO MOVIE mode, the sound will be off balance with a single channel (left or right), so input to both channels.

• To select these surround modes using the buttons on the main remote control unit, press the **SIMU** button. The mode switches each time the button is pressed.

• Depending on the program source being played, it may not be possible to achieve a satisfactory surround effect. In this case, try other modes to achieve a sound field suited to your tastes.

Stereo Playback

[Selectable items]

STEREO

This is the mode for playing in stereo. The tone can be adjusted. Sound is output from the front left and right speakers and subwoofer.

Direct Playback

[Selectable items]

DIRECT

In this mode the signals bypass the tone control circuitry for high quality sound.

The sound is output to the same channels as the input signal.

The display when the DIRECT mode is selected depends on the input signal.

For multi-channel sources, the display depends on the surround back output's play mode.

| Input signal | Display |
|---------------------------------|-------------------------|
| Analog signal / | |
| PCM (2ch) / | |
| Dolby Digital source / | DIRECT |
| DTS source / | |
| Other 2-channel digital signals | |
| DSD (2ch) | DSD DIRECT (*) |
| | MULTI CH DIRECT |
| PCM (multi ch) | M DIRECT + PLIIX CINEMA |
| | M DIRECT + PLIIX MUSIC |
| | M DIRECT 7.1 |
| DSD (multi ch) | DSD MULTI DIRECT (*) |

 When DSD signals are converted to PCM signals as set by the audio parameters and speaker settings, "DIRECT" or "MULTI CH DIRECT" is displayed.

For details, see page 78.

Playback in the Pure Direct Mode

This is the mode that recreates the original sound most faithfully, providing extremely high quality sound.

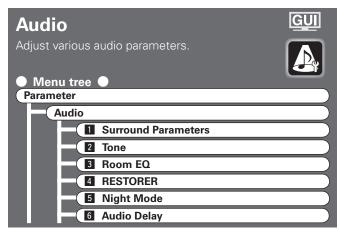

Press the **PURE DIRECT** button.

- When in the PURE DIRECT mode, the GUI screen is not displayed and the display on the main unit is turned off.
- If the HDMI input connector is selected, video outputs are output in the PURE DIRECT mode.
- The channel level and surround parameters in the PURE DIRECT mode are the same as in the DIRECT mode.

Parameters can be called out directly by pressing the **PARA** button on the main remote control unit.

GUI

1 Surround Parameters

Adjust surround sound parameters. The adjustable parameters differ for the different surround modes (27 page 75, 76).

Mode

Select the mode according to the playback source.

[Selectable items]

In the PLIIx or PLII mode:

Pro Logic *

In the DTS NEO:6 mode:

Cinema Music Game

*: Can be selected in the PLII mode.

•

The "Music" mode is also effective for movie sources including a lot of stereo music.

Delay Time

Adjust delay time to control sound stage size.

[Variable range] 0 ms

Effect

Switch effect signal for multi-surround speakers on and off.

[Selectable items] ON OFF

Effect Level

Adjust effect signal level.

[Variable range] 1 ~ 10

Set to a lower level if the positioning and sense of phase of the surround signals seems unnatural.

Room Size

Determine size of acoustic environment.

[Selectable items] Small Medium small Medium Medium large Large

NOTE

"Room Size" does not indicate the size of the room in which sources are played.

AFDM

Auto-select surround mode by source.

This function only works for software containing a special identification signal.

If the software being played is recorded in Dolby Digital EX or DTS-ES, it is played in 6.1-channels. If not, it is played in 5.1-channels.

Example : Playing Dolby Digital software (with EX flag)

- When "AFDM" is set to "ON", the surround mode is automatically set to the DOLBY D + PLIIx C mode.
- To play in the DOLBY DIGITAL EX mode, set "AFDM" to "OFF" and "SB CH Out" to "MTRX ON".

ø

Some Dolby Digital EX sources do not include EX flags. If the playback mode does not switch automatically even when "AFDM" is set to "ON", set "SB CH Out" to "MTRX ON" or "PLIIX CINEMA".

SB CH Out (for Multi-channel sources)

Select playback mode for surround back channels.

[Selectable items]

- *****3: This can be selected when playing DTS sources.
- *4: This can be selected when playing DTS sources including a discrete 6.1-channel signal identification signal.

SB CH Out (for 2-channel sources)

Determine whether to use surround back speakers.

[Selectable items] ON OFF

Getting Started

Subwoofer Att.

Attenuate subwoofer level when using EXT. IN mode.

[Selectable items] ON OFF

ø

Getting Started

Set this to "ON" if the subwoofer channel level seems too high when playing Super Audio CD.

Subwoofer

Turn subwoofer output on and off.

[Selectable items] ON OFF

Default

Resets the settings to the default values.

2 Tone

Adjust the tonal quality of the sound.

Tone Defeat

Turn tone adjustments off.

[Selectable items] ON OFF

The tone cannot be adjusted when in the DIRECT mode.

Bass

Adjust low frequency range (bass).

[Variable range] –6dB ~ +6dB

Treble

Adjust high frequency range (treble).

[Variable range] –6dB ~ +6dB

ø

"Bass" and "Treble" can be set when "Tone Defeat" is set to "OFF".

3 Room EQ

Select room equalizer for current environment.

[Selectable items]

A

| Audyssey | : Optimize frequency response of all speakers. | | |
|-------------------|--|--|--|
| Audyssey Byp. L/R | : Optimize frequency response of speakers except front L and R speakers. | | |
| Audyssey Flat | : Optimize frequency response of all speakers to flat response. | | |
| Manual | : Apply frequency response set with "Manual EQ". | | |
| OFF | : Turn equalizer off. | | |

Coperating from the main unit or main remote control unit

Press the R00M EQ button on the main unit or the EQ button on the main remote control.

→ Audyssey → Audyssey Byp. L/R

- OFF 🗕 Manual 🛥 Audyssey Flat 🛥
- When "Audyssey" is selected, "MULTEQXT" lights.

When "Audyssey Byp. L/R" or "Audyssey Flat" is selected, or when the auto setup measuring results have changed, " Audyssey " lights.

6

- "Audyssey", "Audyssey Byp. L/R" and "Audyssey Flat" can be selected after the auto setup procedure has been performed.
- If the settings of the speakers for which "None" has been determined at "Auto Setup" are changed, "Audyssey", "Audyssey Byp. L/R" and "Audyssey Flat" cannot be selected and measurements have to be taken again to include the newly-added speakers.
- When using headphones, "Room EQ" is always set to "OFF".

4 RESTORER

This function restores compressed audio signals to how they were before compression and corrects the sense of volume of the bass to obtain richer playback sound.

[Selectable items]

OFF

Mode1 (RESTORER 64)

Mode2 (RESTORER 96)

Mode3 (RESTORER HQ)

The default setting for "NET/USB" and "iPod" is "Mode3". All others are set to "OFF".

Coperating from the main unit or main remote control unit

During playback, press the **RESTORER** button on the main unit or the **RSTR** button on the main remote control unit.

When set to something other than "OFF", "RESTORER" is displayed.

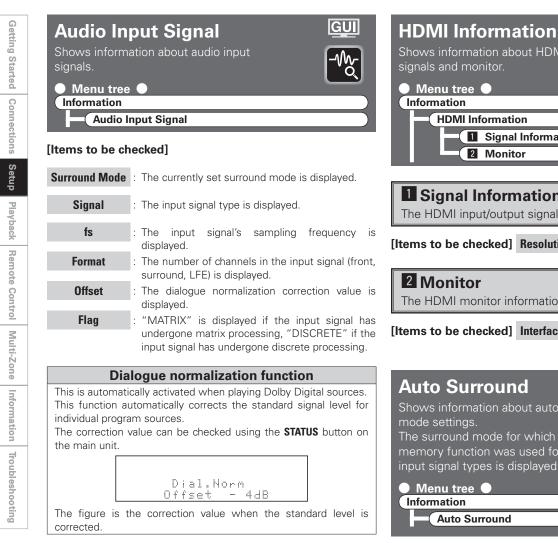

About the RESTORER function

- Such compressed audio formats as MP3, WMA (Windows Media Audio) and MPEG-4 AAC reduce the amount of data by eliminating signal components that are hard for the human ear to hear. The RESTORER function generates the signals eliminated upon compression, restoring the sound to conditions near those of the original sound before compression. It also corrects the sense of volume of the bass to obtain richer sound with compressed audio signals.
- This is displayed on the GUI menu and can be set when the input source is set to "XM" or "NET/USB", or when analog signals (including AM/FM signals) or PCM signals (fs = 44.1/48 kHz) are input.

Playback

Preparations

Turning the Power On

Press <**POWER**>.

The power indicator lights red and the power is set to the standby mode.

• Press <**ON/STANDBY**> or [**POWER ON**].

Let The power indicator flashes green and the power turns on.

MASTER VOLME

To operate the AVR-3808CI using the main remote control unit, set the remote control unit to the AMP mode (27 page 59 "Remote Control Unit Operations").

Turning the Power Off

①Press <ON/STANDBY> or [POWER OFF].

- The power is set to the standby mode.
- 2 Press <POWER>.

The power indicator turns off, and so does the power.

NOTE

Power continues to be supplied to some of the circuitry even when the power is in the standby mode. When leaving home for long periods of time or when traveling, either press **<POWER>** to turn off the power, or unplug the power cord from the power outlet.

Operations During Playback

Adjusting the Master Volume

Either turn <MASTER VOLUME> or press [MASTER VOLUME].

Turning Off the Sound Temporarily (Muting)

Press [MUTE].

To cancel, press **[MUTE]** again. Muting can also be canceled by adjusting the master volume.

Listening with Headphones

Plug the headphones into **<PHONES>**.

The sound from the speakers and pre-out connectors is automatically cut.

NOTE

Be careful not to set the volume too high when using headphones.

Playing Video and Audio Equipment

Basic Operation

Prepare the equipment.

①Load the DVD, CD or other software in the player.
(12) See the operating instructions of the respective devices.)
② To play a video device, switch the monitor input.
(12) See the monitor's operating instructions.)

2 To operate using the main remote control unit, set the remote control unit to the AMP mode.

(🖙 page 59 "Remote Control Unit Operations")

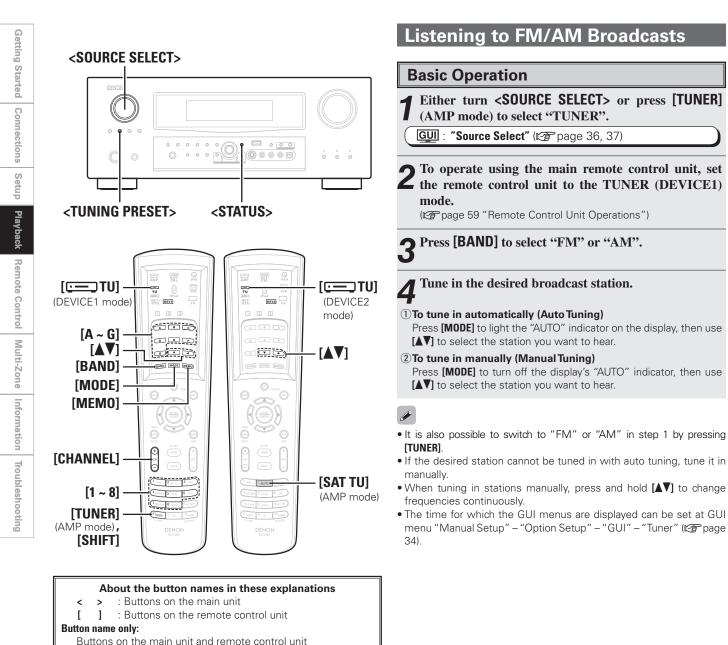

3 Use SOURCE SELECT to select the input source.

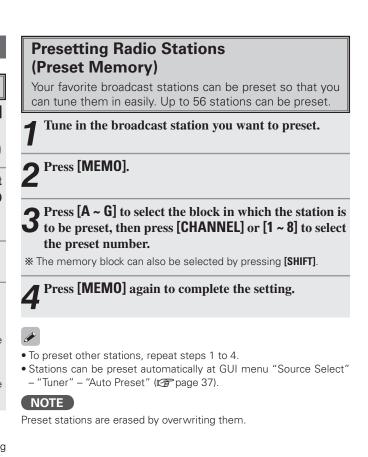

GUI : "Source Select" (12 page 36, 37)

Start playback.

(CF See the operating instructions of the respective devices.)

46

Listening to Preset Stations

Operation on the Main Unit

Press <TUNING PRESET>, then turn <SOURCE SELECT> to select the preset radio station.

Operation on the Main Remote Control Unit

Press [A ~ G] to select the memory block.

Press [CHANNEL] or [1 ~ 8] to select the desired preset **C** channel.

Default settings

Listening to XM Satellite Radio **Programs**

About XM Satellite Radio

XM Satellite Radio offers an extraordinary variety of commercial-free music, plus the best in sports, news, talk and entertainment, XM is broadcast in superior digital audio from coast to coast. From rock to reggae, from classical to hip hop, XM has something for every music fan. XM's dedication to playing the richest selection of music is matched by its passion for live sporting events, talk radio, up-tothe-minute news, stand-up comedy, children's programming, and much more. For U.S. customers, information about XM Satellite Radio is available online at www.xmradio.com. For Canadian customers, information about XM Canada is online at www.xmradio.ca.

XM Ready[®] Legal

Hardware and required monthly subscription sold separately. Other fees and taxes, including a one-time activation fee may apply. Subscription fee is consumer only. All fees and programming subject to change. Channels with frequent explicit language are indicated with an XL. Channel blocking is available for XM radio receivers by calling 1-800-XMRADIO (US residents) and 1-877-GET-XMSR (Canadian residents). For a full listing of the XM commercial-free channels and advertisingsupported channels, visit lineup.xmradio.com (US residents) or xmradio.ca (Canadian residents).

Subscriptions subject to Customer Agreement available at xmradio.com (US residents) and xmradio.ca (Canadian residents). Only available in the 48 contiguous United States and Canada. ©2006 XM Satellite Radio Inc. All rights reserved. All other trademarks are the property of their respective owners.

XM Ready[®] Subscriptions

Once you have installed the XM Mini-Tuner Dock, inserted the XM Mini-Tuner, connected the XM Dock to your XM Ready® home audio system, and installed the antenna, you are ready to subscribe and begin receiving XM programming. There are three places to find vour eight character XM Radio ID: on the XM Mini-Tuner, on the XM Mini-Tuner package, and on XM Channel 0. Record the Radio ID in the following eight squares for reference.

Note: The XM Radio ID does not use the letters "I", "O", "S" or "F". Activate your XM Satellite Radio service in the U.S. online at http://activate.xmradio.com or call 1-800-XM-RADIO (1-800-967-2346). You will need a major credit card. XM will send a signal from the satellites to activate the full channel lineup. Activation normally takes 10 to 15 minutes, but during peak busy periods you may need to keep your XM Ready home audio system on for up to an hour. When you can access the full channel lineup on your XM Ready home audio system you are done. For more information or to subscribe in Canada. visit XM on the Web at www.xmradio.ca or call XM's Listener Care at 1-877-GET-XMSR (1-877-438-9677).

Basic Operation

✓ Either turn <SOURCE SELECT> or press [SAT TU] (AMP mode) to select "XM".

GUI : "Source Select" (Pr page 36, 37)

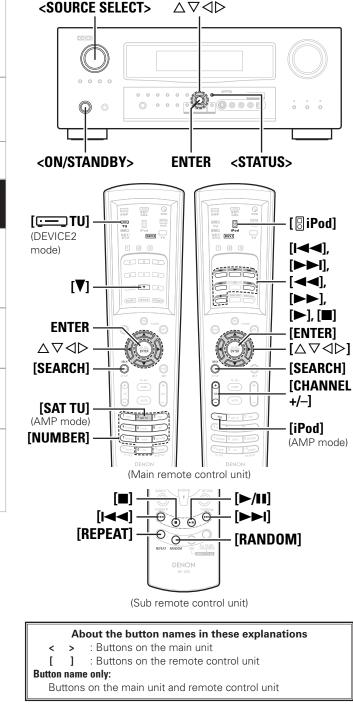

To operate using the main remote control unit, set L the remote control unit to the TUNER (DEVICE2) mode.

(C page 59 "Remote Control Unit Operations")

3 Use **[AV]** to select the station. When the station is tuned in, the name of the track and artist are displayed.

()

- The channel switches continuously when [V] is pressed and held.
- XM Radio stations can be preset using the same procedure as for FM/AM stations (Presetting Radio Stations (Preset Memory)" and "Listening to Preset Stations").
- The artist name, track name, category and reception level can be checked by pressing **<STATUS>**.
- The time for which the GUI menus are displayed can be set at GUI menu "Manual Setup" – "Option Setup" – "GUI" – "Tuner" (F page 34).

Checking the XM Signal Strength and Radio ID

Either turn <SOURCE SELECT> or press [SAT TU]

Either turn <SOURCE SELECT> or press [SAT TU (AMP mode) to select "XM".

2 Press **<STATUS>** until "SIGNAL" appears on the display.

The display will switch as shown below, depending on the reception conditions.

| Display | GUI | Status |
|----------|----------|-----------------------------|
| GOOD | T | Signal strength is good |
| MARGINAL | ¥. | Signal strength is marginal |
| WEAK | Y | Signal strength is weak |
| NO | Y | No signal |

3 Adjust the position of the antenna until "SIGNAL: GOOD" is shown on the display.

4 Press **<STATUS>** until the station you want to check (example: "XM001") is displayed.

5 Press **[V]** and select channel 0 (XM000). The radio ID is shown on the display.

> XM000 RADIO ID ******* - Radio ID

ø

The strength of both the XM satellite and terrestrial signals can be checked at GUI menu "Source Select" – "XM" – "Antenna Aiming" (2) page 40).

| XM040 DeepTrks CAT: Rock | — Channel category | | |

2 Use $\triangleleft \triangleright$ to select the category, then use $\triangle \bigtriangledown$ to select the desired station.

Accessing XM Radio Stations Directly

Press [SEARCH].

• Press [NUMBER] then input the station's channel.

Example: Accessing station "XM123": $[1] \rightarrow [2] \rightarrow [3]$

If no button is pressed within several seconds, the station automatically switches to the one whose number has been input.

Press ENTER to set that station.

Reception switches to the selected station.

- "LOADING" is displayed while stations or data are being received.
- "UPDATING" is displayed while the encoding code is being updated.
- "XM - -" is displayed if the selected channel cannot be used.

iPod[®] Playback

The music on an iPod can be played by using the Control Dock for iPod (ASD-1R, sold separately).

The operation can also be performed using the buttons on the main unit or remote control unit while watching the GUI menus.

■ Made for iPod iPod is a trademark of Apple Inc., registered in the U.S. and other countries.

* The iPod may only be used to copy or play contents that are not copyrighted or contents for which copying or playback is legally permitted for your private use as an individual. Be sure to comply with applicable copyright legislation.

Basic Operation

Set the iPod in the DENON Control Dock for iPod.
 See the Control Dock for iPod's operating instructions.)
 Assign the Control Dock for iPod's input.

GUI: "Source Select" – "(input source)" – "Assign"– "iPod dock" (@ page 39)

2 Either turn <SOURCE SELECT> or press [iPod] (AMP mode) to select the input source assigned in step 1-2 above.

% If the screens above are not displayed, the iPod may not be properly connected. Try connecting again.

GUI: "Source Select" – "(input source)" – "Play" (☞ page 37)

3 To operate using the main remote control unit, set the remote control unit to the iPod mode. (© page 59 "Remote Control Unit Operations")

- With the default settings, the iPod can be used connected to the VCR (iPod) connector.
- Use the RESTORER mode to expand the low and high frequency components of compressed audio files and achieve a richer sound. The default setting is "Mode3".
- Press **<ON/STANDBY>** and set the AVR-3808CI's power to the standby mode before disconnecting the iPod. Also switch the input source to one to which the GUI menu "iPod dock" is not assigned before disconnecting the iPod.

NOTE

- Depending on the type of iPod and the software version, some functions may not operate.
- DENON will accept no responsibility whatsoever for any loss of iPod data.

Listening to Music

1 Use $\triangle \nabla$ to select the menu, then press ENTER or \triangleright to select the music file to be played.

Press ENTER or ▷. Playback starts.

Stopping playback temporarily

During playback, press **ENTER** or **[►]**. Press again to resume playback.

Fast-forwarding or fast-reversing

During playback, either press and hold Δ (to fast-reverse) or ∇ (to fast-forward), or press [$\blacktriangleleft \blacksquare$] or [$\blacktriangleright \triangleright$].

To cue to the beginning of a track

During playback, either press Δ (to cue to the previous track) or ∇ (to cue to the next track), or press **[I**

To stop

During playback, either press and hold ENTER or press [I].

Playing repeatedly

Press [CHANNEL –] or [REPEAT] on the sub remote control unit.

[Selectable items] All One OFF

(GUI): "Source Select" – "(input source)" – "Playback Mode (iPod)" – "Repeat" (🖅 page 38)

Shuffling playback

Press [CHANNEL +] or [RANDOM] on the sub remote control unit.

[Selectable items] Albums Songs OFF

"Source Select" - "(input source)" -GUI "Playback Mode (iPod)" - "Shuffle" (CP page 38)

Searching up or down pages Press [SEARCH], then press ⊲ (down) or ▷ (up).

Press **[SEARCH]**, then press \triangleleft (down) or \triangleright (up) To cancel, press $\triangle \nabla$ or **[SEARCH]**.

To switch between the Browse and Remote modes Either press and hold [SEARCH].

- The title name, artist name and album name can be checked by pressing **<STATUS>** during playback.
- On the AVR-3808CI, folder and file names can be displayed as titles. Any characters that cannot be displayed are replaced with " . (period)".
- The time for which the GUI menus are displayed can be set at GUI menu "Manual Setup" "Option Setup" "GUI" "iPod" (CP page 34).

Viewing Still Pictures or Videos on the iPod

Photo and video data on the iPod can be viewed on the monitor. (Only for iPod equipped with slideshow or video functions.)

Press and hold [SEARCH] to set the Remote mode. "Remote iPod" is displayed on the AVR-3808CI's display.

2 Watching the iPod's screen, use $\Delta \nabla$ to select "Photos" or "Videos".

3 Press ENTER until the image you want to view is displayed.

"TV Out" at the iPod's "Slideshow Settings" or "Video Settings" must be set to "On" in order to display the iPod's photo data or videos on the monitor. For details, see the iPod's operating instructions. **Getting Started**

Troubleshooting

Playing Network Audio or USB Memory Devices

This procedure can be used to play Internet radio stations or music files stored on a computer or USB memory device.

□ About the Internet radio function

• Internet radio refers to radio broadcasts distributed over the Internet. Internet radio stations from around the world can be tuned in.

The AVR-3808CI is equipped with the following Internet radio functions:

- $\cdot\,$ Stations can be selected by genre and region.
- \cdot Up to 56 Internet radio stations can be preset.
- \cdot Internet radio stations in MP3 and WMA (Windows Media Audio) format can be listened to.
- Your favorite radio stations can be registered by accessing an exclusive DENON Internet radio URL from a Web browser on a computer.
- * The function is managed for individual users, so you must provide your MAC or e-mail address.

Exclusive URL: <u>http://www.radiodenon.com</u>

- * The radio station database service may be suspended without notice.
- The AVR-3808CI's Internet radio station list is created using a radio station database service (vTuner). This database service provides a list edited and created for the AVR-3808CI.

vTuner services may be discontinued without notice.

□ Music server

This function lets you play music files and playlists (m3u, wpl) stored on a computer (music server) connected to the AVR-3808CI via a network.

With the AVR-3808Cl's network audio playback function, connection to the server is possible using one of the technologies below.

- Windows Media Player Network Sharing Service
- Windows Media Player Network Sharii
 Windows Media DRM10

Installing Windows Media Player ver. 11

- If Windows XP Service Pack 2 has not yet been installed, either download it free of charge from Microsoft or install it via a Windows update installer.
- ② Download the latest version of Windows Media Player ver. 11, either directly from Microsoft or using a Windows update installer.
- * When using Windows Vista, there is no need to download a new version of Windows Media Player.

USB memory devices

- A USB memory device can be connected to the AVR-3808Cl's USB port to play music files stored on the USB memory device.
- Only USB memory devices conforming to mass storage class and MTP (Media Transfer Protocol) standards can be played on the AVR-3808CI.
- \cdot The AVR-3808CI is compatible with USB memory devices in "FAT16" or "FAT32" format.

[Compatible formats]

| | Internet radio | Music server [※] | USB [%] |
|--|-------------------|---------------------------|------------------|
| WMA (Windows Media Audio) | 0 | 0 | •* |
| MP3 (MPEG-1 Audio Layer-3) | 0 | 0 | 0 |
| WAV * | _ | 0 | 0 |
| MPEG-4 AAC | - | * | * |
| FLAC (Free Lossless Audio Codec) | _ | 0 | 0 |

- A server or server software compatible with distribution in the corresponding formats is required to play music files via a network.
- *: Only files that are not protected by copyright can be played on the AVR-3808CI.

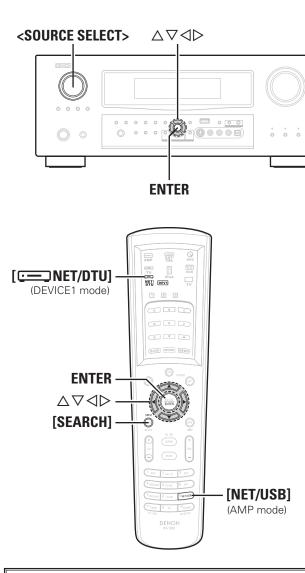

Contents downloaded from pay sites on the Internet are copyright protected. Also, files encoded in WMA format when ripped from a CD, etc., on a computer may be copyright protected, depending on the computer's settings.

- ✗ Music server and USB
- \cdot The AVR-3808Cl is compatible with MP3 ID3-Tag (Ver. 2) standards.
- $\cdot\,$ The AVR-3808CI is compatible with WMA META tags.

[Playable formats]

| | Sampling frequency | Bit rate | Extension | |
|--|-----------------------|-------------|----------------|--|
| WMA (Windows Media Audio) | 32/44.1/48 kHz | 48~192 kbps | .wma | |
| MP3 (MPEG-1 Audio Layer-3) | 32/44.1/48 kHz | 32~320 kbps | .mp3 | |
| WAV | 32/44.1/48 kHz | _ | .wav | |
| MPEG-4 AAC | 32/44.1/48 kHz | 16~320 kbps | .aac/.m4a/.mp4 | |
| FLAC (Free Lossless Audio Codec) | 32/44.1/48 kHz | _ | .flac | |

WAV format Quantization bit rate: 16 bits.

About the button names in these explanations

- < > : Buttons on the main unit
- [] : Buttons on the remote control unit

Button name only:

Buttons on the main unit and remote control unit

Basic Operation

1 Make the necessary preparations.

- ① Check the network environment, then turn on the AVR-3808Cl's power. (@page 20 "Network Audio")
- If settings are required, make the network settings.
 (12) page 31, 32 "Network Setup")
- ③ Prepare the computer. (C Computer's operating instructions) Install "Windows Media Player ver. 11".

2 Either turn **<SOURCE SELECT>** or press [NET/USB] (AMP mode) to select "NET/USB".

GUI: "Source Select" -"NET/USB" -"Play" (© page 37)

3 To operate using the main remote control unit, set the remote control unit to the NET/DTU (DEVICE 1) mode.

(C page 59 "Remote Control Unit Operations")

4 Use $\triangle \nabla$ to select the menu, then press **ENTER** or \triangleright to select the file you want to play.

5 Press ENTER or \triangleright . Playback starts.

Stopping playback temporarily During playback, press **ENTER**.

Press again to resume playback.

To stop

During the play or pause mode, press and hold ENTER.

Searching up or down pages

Press **[SEARCH]**, then press \triangleleft (down) or \triangleright (up). To cancel, press $\triangle \nabla$ or **[SEARCH]**.

Searching by first letter (Character search)

This operation is convenient for choosing items from the menu screens for Internet radio stations or files stored on the computer.

- (1) When the menu screen is displayed, press [SEARCH] twice.
- (2) Use $\triangleleft \triangleright$ to select the first letter you want to search for.
 - If there are multiple items starting with the selected letter, they are displayed in alphabetical order.
 - If it is not possible to search the list, "Unsorted list..." is displayed.

- Use the RESTORER mode to expand the low and high frequency components of compressed audio files and achieve a richer sound. The default setting is "Mode3".
- The time for which the GUI menus are displayed can be set at GUI menu "Manual Setup" "Option Setup" "GUI" "NET/USB" (@page 34).
- The display can be switched between the artist name, track name, album name.

Listening to Internet Radio

2 Use $\triangle \nabla$ to select the item you want to play, then press ENTER or \triangleright .

The station list is displayed.

3 Use $\triangle \nabla$ to select the station, then press ENTER or \triangleright .

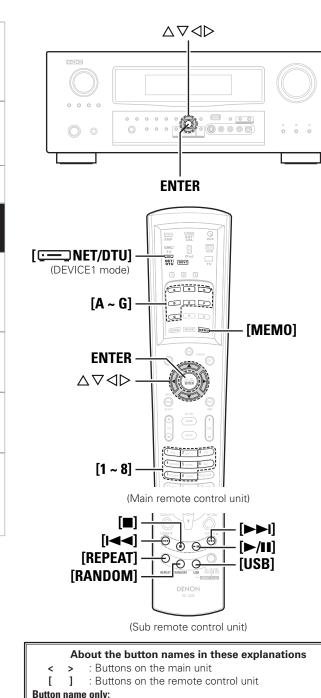

Playback starts once buffering reaches "100%".

• There are many Internet radio stations on the Internet, and the quality of the programs they broadcast as well as the bit rate of the tracks varies widely.

Generally, the higher the bit rate, the higher the sound quality, but depending on the communication lines and server traffic, the music or audio signals being streamed may be interrupted.

Inversely, lower bit rates mean a lower sound quality but less tendency for the sound to be interrupted.

- "Server Full" or "Connection Down" is displayed if the station is busy or not broadcasting.
- On the AVR-3808CI, folder and file names can be displayed as titles. Any characters that cannot be displayed are replaced with " . (period)".

Buttons on the main unit and remote control unit

Recently Played Internet Radio Stations

Recently played internet radio stations can be selected from "Recently Played" in top menu.

Use $\Delta \nabla$ to select "Recently Played", then press **ENTER** or \triangleright .

 \frown Use $\triangle \nabla$ to select the item you want to play, then \checkmark press ENTER or \triangleright .

Up to 20 stations stored in "Recently Played".

Presetting Internet Radio Stations Preset Internet radio stations can be selected directly.

While the Internet radio station you want to preset is plaving, press [MEMO].

Use $\Delta \nabla$ to select "Preset", then press ENTER.

• Press [A ~ G], then press [1 ~ 8] to select the desired preset number.

The Internet radio station is now preset.

If registered at a number that has already been preset, the previously registered setting is cleared.

Listening to Preset Internet Radio Stations

With the input source set to "NET/USB", press [A ~ G], then press [1 ~ 8].

The AVR-3808CI automatically connects to the Internet and playback begins.

Registering Internet Radio Stations as Your Favorites

Favorites are listed at the top of the menu screen, so when a station is registered as a favorite it can be tuned in easily.

Press [MEMO] while the Internet radio station you want to register is playing.

 \frown Use $\triangle \nabla$ to select "Favorites", then press ENTER.

B Press I to select "Yes". The Internet radio station is registered.

If you do not want to register it, press \triangleright .

Listening to Internet Radio Stations Registered in Your Favorites

Use $\Delta \nabla$ to select "Favorites", then press ENTER or \triangleright .

 \frown Use $\triangle \nabla$ to select the Internet radio station, then \checkmark press ENTER or \triangleright .

The AVR-3808CI automatically connects to the Internet and playback begins.

Clearing Internet Radio Stations from Your Favorites

4 Use $\Delta \nabla$ to select "Favorites", then press ENTER or \triangleright .

- \frown Use $\Delta \nabla$ to select the Internet radio station you want **Z** to clear, then press [MEMO].
- **3** Press <a> to select "Delete". The selected Internet radio station is cleared. To cancel the operation without clearing the station, press \triangleright .

Getting Started

Playing Files Stored on a Computer

Use this procedure to play music files or playlists.

Use $\Delta \nabla$ to select the host name of the computer on which the music file you want to play is located, then press **ENTER** or \triangleright .

 \frown Use $\triangle \nabla$ to select the search item or folder, then press \checkmark ENTER or \triangleright .

3 Use $\Delta \nabla$ to select the file, then press ENTER or \triangleright . Playback starts once buffering reaches "100%".

Selecting tracks

During playback, either press Δ (previous track) or ∇ (next track).

- Connections to the required system and specific settings must be made in order to play music files (r page 20).
- · Before starting, you must launch the computer's server software and set the files as server contents. For details, see the operating instructions of your server software.

Playing files that have been Preset or Registered in **Your Favorites**

Files can be preset, registered in your favorites and played using the same operations as for Internet radio stations.

- Presettings are erased by overwriting them.
- When the operation described below is performed, the music server's database is updated and it may no longer be possible to play preset or favorite music files.
- When you guit the music server and then restart it.
- When music files are deleted or added on the music server.
- When using an ESCIENT server, place "ESCIENT" before the server name.

Playing Files Stored on USB Memory Devices

Only USB memory devices conforming to mass storage class and MTP (Media Transfer Protocol) standards can be played on the AVR-3808CI.

Basic Operation

Make the necessary preparations.

• Set the USB port to be used.

GUI : "Source Select" - "NET/USB" - "Playback Mode" -"USB Select" (Pr page 39)

• Connect the USB memory device to the set USB port.

 \frown Use $\triangle \nabla$ to select "USB", then press ENTER or \triangleright .

3 Use $\triangle \nabla$ to select the search item or folder, then press ENTER or \triangleright .

Use $\triangle \nabla$ to select the file, then press **ENTER** or \triangleright . **4** Use $\Delta \nabla$ to select the file, then press **b** Playback starts once buffering reaches "100%".

By default, the front panel's USB port will be used.

Playing repeatedly

Press [REPEAT] on the sub remote control unit.

[Selectable items] All One OFF

GUI : "Source Select" - "NET/USB" - "Playback Mode" -"Repeat" (CP page 39)

Playing in random order

Press [RANDOM] on the sub remote control unit.

| | [Selectable items] | ON | OFF |
|--|--------------------|----|-----|
|--|--------------------|----|-----|

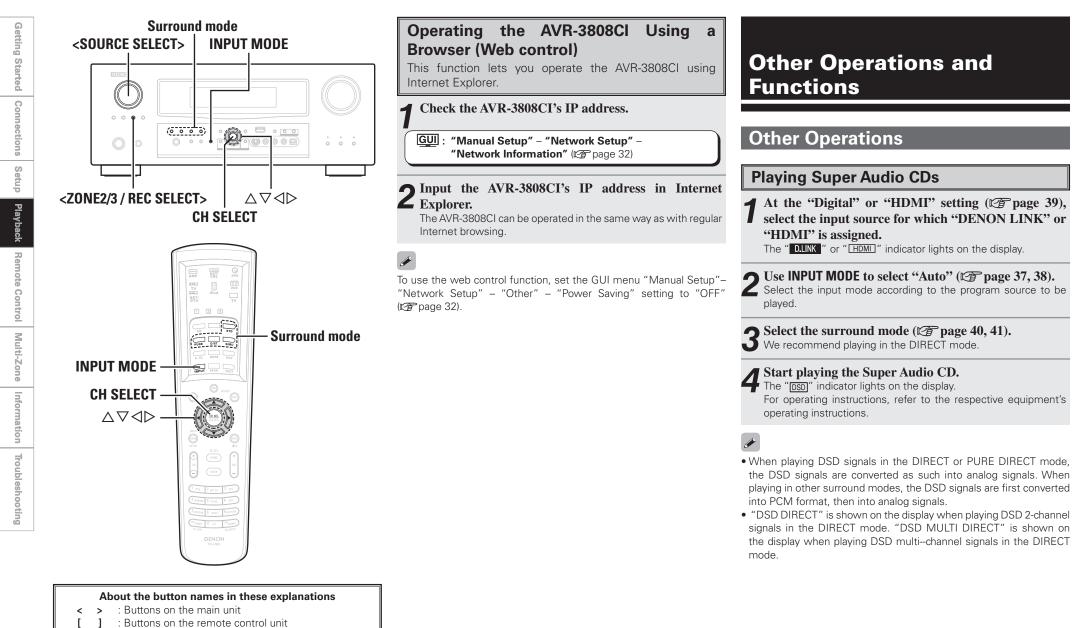

Selecting tracks

During playback, either press Δ (previous track) or ∇ (next track).

- If the USB memory device is divided into multiple partitions, only the top partition can be selected.
- The AVR-3808CI is compatible with MP3 files conforming to "MPEG-1 Audio Layer-3" standards.
- If [USB] on the sub remote control unit is pressed when the USB memory device or folder is selected, all the tracks on the USB memory device or in the folder are played.

- The AVR-3808CI is equipped with two USB ports, one each on the front and rear panels. It is not possible to use the set with USB memory devices connected to both the ports at the same time. Select the USB port you want to use at the "Source Select" - "NET/ USB" – "Playback Mode" – "USB Select" menu.
- DENON will accept no responsibility whatsoever for any loss or damage to data on USB memory devices when using the USB memory device connected to the AVR-3808CI.
- USB memory devices will not work via a USB hub.
- DENON does not guarantee that all USB memory devices will operate or receive power. When using a USB connection type portable hard disk of the type for which power can be supplied by connecting an AC adapter, we recommend using the AC adapter.
- It is not possible to connect and use a computer via the AVR-3808CI's USB port using a USB cable.
- The AVR-3808Cl is not compatible with the iPod shuffle.

Button name only:

Buttons on the main unit and remote control unit

Recording on an External Device (REC OUT mode)

You can listen to one program source while recording a different program source.

Press <**ZONE2/3** / **REC SELECT**>.

"ZONE2 SOURCE" is shown on the display.

ZONE2 SOURCE - ZONE2 TUNER - ZONE2 XM

2 Turn **<SOURCE SELECT>** until "RECOUT SOURCE" is displayed.

The "**REC**" indicator lights.

3 Turn **<SOURCE SELECT>** to choose the input source to be recorded.

Play the program source.

For operating instructions, refer to the respective equipment's operating instructions.

To record FM or AM broadcasts, select the broadcast (12) page 47).

Start recording.

• For operating instructions, refer to the respective equipment's operating instructions.

- To cancel, press <**ZONE2/3 / REC SELECT>**, then turn **<SOURCE SELECT>** until "ZONE2 SOURCE" is displayed.
- Make a test recording before starting the actual recording.
- Signals are only output to the analog REC OUT connectors when the digital signals input to the digital input connectors (OPTICAL/ COAXIAL) are PCM (2-channel) signals.
- Digital audio signals input to the DENON LINK or HDMI connectors are not output to the REC OUT connectors, so connect using the OPTICAL or COAXIAL connectors.
- Sources selected with the REC OUT mode are output from ZONE2 as well.
- In the REC OUT mode, the remote control unit's ZONE2 mode buttons cannot be operated.
- The "XM" digital audio output signals are not output from the OPTICAL2 or OPTICAL3 output connectors. Also, network audio signals (Internet radio, music server, USB) are not output if they are copyright-protected.

NOTE

P

- Recordings you make are for your personal enjoyment and should not be used for other purposes without permission of the copyright holder.
- When "DENON LINK" is assigned at the GUI menu "Assign" setting, the PCM signals, network audio signals (Internet radio, music server and USB), XM signals input from the digital input connectors cannot be output from the analog REC OUT connectors.
- Input sources for which "Delete" is selected at "Source Delete" cannot be selected.

Convenient Functions

Channel Level

You can adjust the channel level either according to the playback sources or to suit your taste, as described below.

Press CH SELECT.

2 Use $\Delta \nabla$ or CH SELECT to select the speaker. The speaker that can be set switches each time one of the

The speaker that can be set switches each time one of the buttons is pressed.

3 Use $\triangleleft \triangleright$ to adjust the volume.

* "OFF" can be set by pressing < when the subwoofer's volume is set to −12 dB.

Fader Function

This function lets you adjust (fade) the sound from all the front or rear speakers at once.

Press CH SELECT.

9 Press $\triangle \nabla$ or CH SELECT to select "Fader".

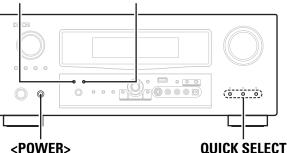

3 Use $\triangleleft \triangleright$ to adjust the volume of the speakers. (\triangleleft : front, \triangleright : rear)

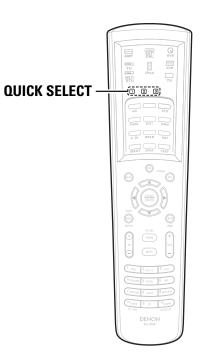

Í

• The fader function does not affect the subwoofer.

• The fader can be adjusted until the volume of the speaker adjusted to the lowest value is -12 dB.

<STANDARD> <DSP SIMULATION>

About the button names in these explanations

- < > : Buttons on the main unit
- [] : Buttons on the remote control unit

Button name only:

Buttons on the main unit and remote control unit

Quick Select Function

With this function, the currently playing input source, input mode, surround mode, room EQ settings and volume can be stored in the memory.

4 Set the input source, input mode, surround mode,

room EQ settings and volume to the conditions you want to store.

• Press and hold the desired QUICK SELECT.

Keep pressing the button until the quick select indicator lights.

[Quick Select Defaults]

| | Input Source | Volume |
|----------------|--------------|--------|
| Quick Select 1 | DVD | -40 dB |
| Quick Select 2 | TV/CBL | -40 dB |
| Quick Select 3 | VCR | -40 dB |

• To call out the settings, press **QUICK SELECT** at which the desired settings were stored.

• The Quick Select name can be changed (12) page 34).

(NOTE)

Input sources stored with the quick select function cannot be selected if they have been deleted at GUI menu "Manual Setup" – "Option Setup" – "Source Delete" (Page 34). In this case, store them again.

Personal Memory Plus Function

This function sets the settings (input mode, surround mode, etc.) last selected for the individual input sources. When you switch to an input source, the settings are automatically set to the ones that were set the last time that input source was used.

The surround parameters, tone control, room EQ settings and the volumes of the different speakers are stored for the individual surround modes.

Last Function Memory

This stores the settings as they were directly before the standby mode was set.

When the power is turned back on, the settings are restored to as they were directly before the standby mode was set.

Backup Memory

The various settings are backed up for about 1 week, even if the power is turned off or the power cord is disconnected.

① Only one component can be preset for each mode. If a new code is preset, the previous code is automatically cleared.

③ The CD, VCR or DVD buttons (one only set) can be assigned to the monitor, satellite receiver and cable TV (pp page 63 "Punch Through Function").

Troubleshooting

Setting the Remote ID

When using multiple DENON AV receivers in the same room, make this setting so that only the desired AV receiver operates.

1 Press [AMP] to set the main remote control unit to the AMP mode.

2 Press and hold in [RC SETUP] for at least 3 seconds. The signal transmission indicator flashes twice.

- **•** Refer to the table at the right, and use [NUMBER] to
- input the 5-digit number corresponding to the remote ID to be changed.

The signal transmission indicator flashes twice.

4 Press **[TU]**, **[iPod]** or **[NET/DTU]** to select the mode to be set.

5 Repeat steps 2 to 4 to set the remote IDs for all modes.

| MODE SELECTOR | | TUT | NER | | NET/DTU |
|------------------|---------------|------------------------------|-----------------|-------|------------------------------------|
| Remote ID | AMP (MAIN) | DEVICE1 (Analog TUNER) | DEVICE2 (XM) | iPod | DEVICE1 (Net Audio / USB) |
| 1 (Default) | 81001 | 52863 | 52864 | 72815 | 62865 |
| 2 | 82001 | 52795 | 52812 | 72816 | 62837 |
| 3 | 83001 | 52800 | 52813 | 72817 | 62838 |
| 4 | 84001 | 52805 | 52814 | 72818 | 62839 |

NOTE

- When changing a setting, be sure to set the same remote ID as the AVR-3808CI's (1) page 35).
- When changing the AMP mode's remote ID, also change the "TUNER", "iPod" and "NET/DTU" remote ID at the same time.
- Set the remote ID of an analog tuner for "TUNER" "DEVICE1", the XM remote ID for "DEVICE2".

Learning Function

If your AV devices are of a brand other than DENON or if they cannot be operated with the preset memory function, their remote control signals can be transfered to stored in the AVR-3808CI's main remote control unit.

1 Press [MODE SELECTOR] for the device you want to set.

2 Press and hold in [RC SETUP] for at least 3 seconds. The signal transmission indicator flashes twice.

• Press [9], [7] and [5], in that order.

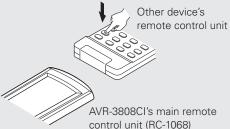

The signal transmission indicator flashes twice and the learning mode is set.

Press the button to be set.

4 The main remote control unit's display turns off.

 $\ensuremath{\mathbbmm}$ If a button that cannot be learned is pressed, the signal transmission indicator lights but the signal is not learned.

5 Point the main remote control units directly at each other and press and hold the button on the other device's remote control unit that you want to learn. Once learning is completed normally, the display lights and the signal transmission indicator flashes twice.

※ If you want to learn other buttons, repeat steps 4 and 5.
※ The mode can be switched by pressing [MODE SELECTOR].
※ The signal transmission indicator lights once for a long time if learning was not possible

Press and hold in [RC SETUP] for at least 3 seconds.

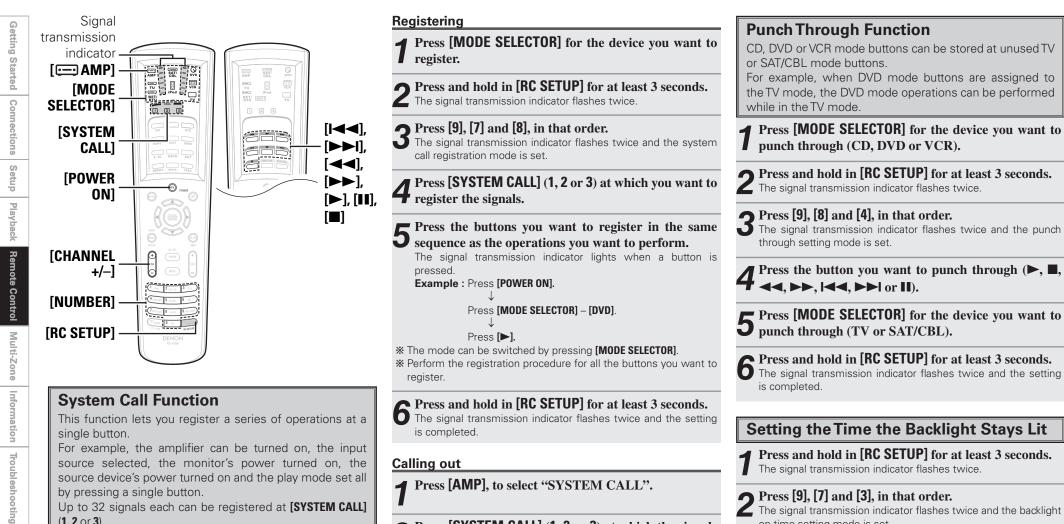

• The signal transmission indicator flashes twice and the setting is completed.

- With some remote control units, the signals cannot be learned or the device will not operate properly even when the signals have been learned. In this case, use the device's own remote control unit.
- Learned buttons have priority over the preset memory. If you no longer need the learned setting, reset the learning function (1277) page 64).

NOTE

- [HOME] cannot be learned.
- Do not learn any remote control signals at [RC SETUP].
- The AMP, ZONE2, ZONE3, ZONE4 and SYSTEM CALL modes cannot be learned.

Getting Started

Up to 32 signals each can be registered at [SYSTEM CALL] (1.2 or 3).

• Press [SYSTEM CALL] (1, 2 or 3) at which the signals were registered.

The registered signals are transmitted in the registered sequence.

on time setting mode is set.

3 Set the light on time. The signal transmission indicator flashes twice. [Settable times] : [1] : 5 sec.

[2]: 10 sec. (Default)

The signal transmission indicator flashes twice and the backlight

- [3]: 15 sec.
- [4]: 20 sec. [5]: 25 sec.

Getting Started Connections Setup Playback **Remote Control**

Adjusting the Backlight's Brightness

The display's brightness can be adjusted in 5 steps. (Default: Step 3)

Press and hold in [RC SETUP] for at least 3 seconds. The signal transmission indicator flashes twice.

▲ Press [CHANNEL +] or [CHANNEL –]. The display gets one step brighter when [+] is pressed. The display gets one step darker when [-] is pressed.

3 Press [**RC SETUP**] to complete the setting.

Resetting the Main Remote Control Unit

Punch Through Function

Press [MODE SELECTOR] for the device you want to reset (TV or SAT/CBL).

• Press and hold in [RC SETUP] for at least 3 seconds. Z The signal transmission indicator flashes twice.

3 Press [9], [8] and [4], in that order. The signal transmission indicator flashes twice.

Press and hold in [RC SETUP] for at least 3 seconds. **4** The signal transmission indicator flashes twice.

All Settings

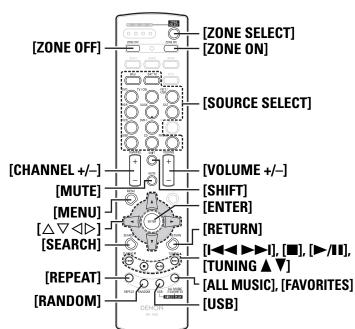

Press and hold in [RC SETUP] for at least 3 seconds. 4 The signal transmission indicator flashes twice.

Press [9], [8] and [1], in that order. The signal transmission indicator flashes 4 times. All the settings are restored to their defaults.

Sub Remote Control Unit Operations

- The sub remote control unit is equipped with frequently used buttons, so it can be used for simple remote control unit operations.
- The sub remote control unit can also be used for multizone, so you can use it to control the AVR-3808Cl from other rooms.
- The operations listed below can be performed with the sub remote control unit.
- Switching the input source
- Adjusting the volume
- Tuner (AM/FM), XM and iPod operations
- NET/USB direct play
- GUI menu and ZONE2 on-screen display operations
 Zone power on/off
- It is not possible to operate devices other than the amplifier.

Switching Zones

Use this procedure to select the zone to be operated by the sub remote control unit.

Press [ZONE SELECT].

The currently selected multi-zone indicator lights.

2 While the multi-zone indicator is light, press [ZONE SELECT] to select the zone to be operated. The currently selected multi-zone indicator lights.

Setting the Zone for Which the Sub Remote Control Unit is Used (ZONE SELECT LOCK Mode)

We recommend always using the sub remote control unit for the same room. When this is done, the unit can be set so that the zone does not switch when buttons are operated.

1 Use the tip of a pen to press [ADVANCED SETUP]. All the multi-zone indicators light.

9 Select the multi-zone to be set.

The selected multi-zone indicator lights.

① To set to main zone: Press [REPEAT].② To set to ZONE2: Press [RANDOM].③ To set to ZONE3: Press [USB].

3 Use the tip of a pen to press [ADVANCED SETUP]. The multi-zone indicator turns off.

To Cancel

1 Use the tip of a pen to press [ADVANCED SETUP]. The currently selected multi-zone indicator lights.

Press [ZONE SELECT]. All the multi-zone indicators light.

3 Use the tip of a pen to press [ADVANCED SETUP]. The multi-zone indicator turns off.

Setting the Remote ID

When using multiple DENON AV receivers in the same room, make this setting so that no AV receiver other than the desired one operates.

1 While pressing [MENU], press [ADVANCED SETUP] with the tip of a pen.

The multi-zone indicator corresponding to the currently selected remote ID flashes.

9 Select the remote ID to be set.

 To set to 1 : Press [REPEAT]. The "M" indicator flashes.
 To set to 2 : Press [RANDOM]. The "Z2" indicator flashes.
 To set to 3 : Press [USB]. The "Z3" indicator flashes.
 To set to 4 : Press [ALL MUSIC/FAVORITES]. The "Z4" indicator flashes.

2 While pressing [MENU], press [ADVANCED SETUP]

5 with the tip of a pen. The multi-zone indicator turns off.

NOTE

When changing a setting, be sure to set the same remote ID as the AVR-3808CI's (\square page 35).

Resetting the Settings

While pressing [ZONE OFF], press [ADVANCED SETUP] with the tip of a pen.

All the multi-zone indicators flash 4 times, then all the settings are restored to their defaults.

Getting Started

Connections

Setup

Playback

Amp Assign / Multi Zone Connections and Operations

The AVR-3808CI is compatible with the following types of playback:

- Multi-zone playback (ZONE2 & ZONE3)
- Bi-amp playback (front speaker)

NOTE

- For bi-amp playback, use speakers compatible with that type of connection.
- When conducting bi-amp playback, remove the short-circuiting boards (or wires) from the speaker terminals.

Multi-Zone Settings with the Amp Assign Function

The amp assign function lets you assign the amplifiers for the different channels built into the AVR-3808CI to the speaker outputs for the different zones.

Select the desired playback environment from among "Setting 1" to "Setting 4" then set the corresponding "Amp Assign" mode at GUI menu "Manual Setup" – "Option Setup" – "Amp Assign" (12) page 33).

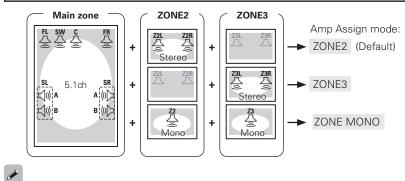

Connect the speakers as described at "Amp Assign mode settings and speakers connected to the various speaker terminals".

"Setting 3" is possible to switch the Amp Assign mode between the 5.1-channel mode and 2-channel mode without changing the speaker connections.

Setting 1 :

Multi-zone playback

- 5.1-channel playback + ZONE2 or ZONE3 stereo playback
- 5.1-channel playback + ZONE2 or ZONE3 monaural playback

- "STEREO" or "MONO" depends on the setting at GUI menu "Manual Setup" "Zone Setup" "Channel" (27) page 33).
- Both A and B can be installed for SR and SL.

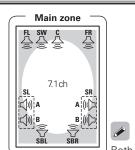

□ Amp Assign mode setting and speakers connected to the various speaker terminals

Multi-Zone Settings and Operations with Zone Pre-out Output

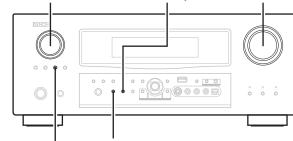

Prepare power amplifiers for ZONE2 and ZONE3.

| | Connectors for audio output | Audio signals | Connectors for video output |
|-------|-----------------------------|---------------|-----------------------------|
| ZONE2 | ZONE2 PRE OUT | Stereo | ZONE2 VIDEO OUT |
| ZONE3 | ZONE3 PRE OUT | Stereo | _ |

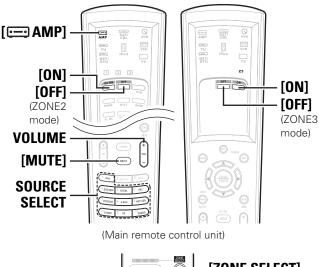

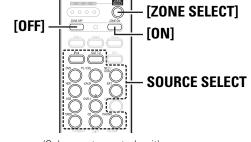

When only using one speaker for ZONE2 or ZONE3, set to "Mono". In this case, the ZONE2 (ZONE3) monaural output is output from the ZONE2 (ZONE3) pre-out L and R connectors, so connect as desired.
 Separate power amplifiers are needed for ZONE2 and ZONE3.

<SOURCE SELECT> <ZONE3 ON/OFF> <VOLUME>

<ZONE2 ON/OFF> <ZONE2/3 / REC SELECT>

Multi-Zone Operations

Turning the Power On and Off

Operation on the main unitG

Press <ZONE2 ON/OFF>. <ZONE3 ON/OFF> for the zone to be operated. When the power turns on, the multi-zone indicator lights on the display.

Operation on the remote control unitG

In the zone mode you want to operate, press [ON] or [OFF].

Selecting the Input Source

Operation on the main unitG

(1) Press <**ZONE2/3 / REC SELECT>** and select the zone to be adjusted. (2) Turn <SOURCE SELECT>.

Operation on the remote control unitG

In the zone mode you want to operate, press [SOURCE SELECT].

Adjusting the Volume

Operation on the main unitG

1) Press <ZONE2/3 / REC SELECT> and select the zone to be adjusted. 2 Turn **<VOLUME>** to adjust.

Operation on the remote control unitG

In the zone mode whose volume you want to adjust, press [VOLUME].

[Variable range] --- -70dB ~ -40dB ~ +18dB

The volume can be adjusted when GUI menu "Manual Setup" - "Zone Setup" - "(select the zone)" - "Volume Level" is set to "Variable". The volume can be increased up to the value set at GUI menu "Manual Setup" - "Zone Setup" - "(select the zone)" - "Volume Limit" (🕼 page 33).

Turning off the Sound Temporarily

In the zone mode for which you want to mute the sound, press [MUTE].

The sound is reduced to the level set at GUI menu "Manual Setup" - "Zone Setup" - "(select the zone)" - "Mute Level" (@ page 33). To cancel, either adjust the volume or press [MUTE] again. The setting is canceled when the zone's power is turned off.

- The source selected for ZONE2 is also output from the recording output connectors.
- For ZONE2, the "Zone Setup" can be made while watching the onscreen display. Also, when ZONE3 is operated, the on-screen display appears on the ZONE2 monitor, so operation can be performed watching this on-screen display.

| ZONE2 MENU | |) | |
|--|---|---|---|
| INPUT : DVD SIGNAL : ANALOG VOL. : -40dB >Bass Treble HPF Lch Lev. Rch Lev. | 0 d B 0 d B 0 d B 0 d B 0 d B 0 d B 0 d B | ZONE2 MENU Channel Vol. Lev. Vol. Limit P. On Lev. Mute Lev. | <pre> STEREO VAR VAR LAST FULL </pre> |

- When the input source to which the digital input connectors (OPTICAL/COAXIAL) are assigned is selected in ZONE2 or ZONE3, playback is only possible if the digital signal being input is in PCM (2-channel) format.
- Digital audio signals input from the DENON LINK or HDMI connectors cannot be played in multi-zone.
- When certain digital signals are being input, noise may be output from the ZONE2 and ZONE3 audio output connectors.
- When "DENON LINK" is assigned at the GUI menu "Assign" setting, the PCM signals, network audio signals (Internet radio, music server and USB). XM signals input from the digital input connectors cannot be output from the ZONE2 and ZONE3 audio output connectors.

Other Information

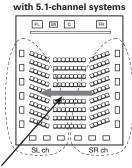

About Speaker Installation

Surround back speakers

Sound positioning directly to the rear can be achieved easily by adding a surround back speaker to a 5.1-channel system.

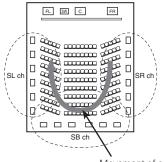

In addition, the acoustic image extending between the sides and the rear is narrowed, thus greatly improving the expression of the surround signals for sounds moving from the sides to the back and from the front to the point directly behind the listening position.

Change of positioning and acoustic image

Movement of acoustic image from SR to SL

Change of positioning and acoustic image with 6.1-channel systems

Movement of acoustic image from SR to SB to SL

In addition to sources recorded in 6.1-channels, the surround effect of conventional 2- to 5.1-channel sources can also be enhanced.

Number of surround back speakers

We recommend using 2 speakers. When using dipolar speakers in particular, be sure to use 2 speakers.

Placement of the surround left and right channels when using surround back speakers

We recommend installing the speakers for the surround "L" and "R" channels a bit forward.

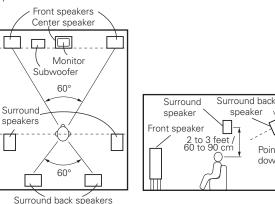

Examples of speaker layouts

Below we introduce examples of speaker layouts. Refer to these to arrange your speakers according to their type and how you want to use them.

GIOUsing surround back speaker(s)

1) When mainly playing movies

Recommended when your surround speakers are single or 2-way speakers.

GAs seen from aboveG

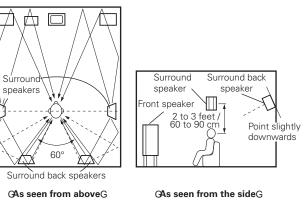

Point slightly

downwards

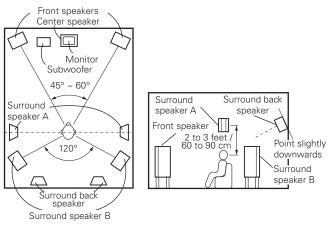

② Setting for primarily watching movies using diffusion type speakers for the surround speakers

For the greatest sense of surround sound envelopment, diffuse radiation speakers such as bipolar types, or dipolar types, provide a wider dispersion than is possible to obtain from a direct radiating speaker (monopolar). Place these speakers at either side of the prime listening position, mounted above ear level.

Path of the surround sound from the speakers to the listening position

③ When playing movies and music

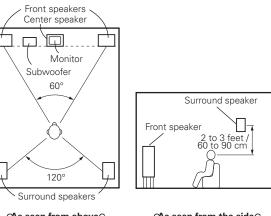

GAs seen from aboveG

GAs seen from the sideG

Troubleshooting

GAs seen from the sideG

Surround

The AVR-3808Cl is equipped with a digital signal processing circuit that lets you play program sources in the surround mode to achieve the same sense of presence as in a movie theater.

Dolby Surround

Dolby Digital

Dolby Digital is a multi-channel digital signal format developed by Dolby Laboratories.

A total of 5.1-channels are played: 3 front channels ("FL", "FR" and "C"). 2 surround channels ("SL" and "SR") and the "LFE" channel for low frequencies.

Because of this, there is no crosstalk between channels and a realistic sound field with a "three-dimensional" feeling (sense of distance. movement and positioning) is achieved.

A real, overpowering sense of presence is achieved when playing movie sources in AV rooms as well.

Dolby Digital Plus

Dolby Digital Plus is an improved Dolby Digital signal format that is compatible with up to 7.1-channels of discrete digital sound and also improves sound quality thanks to extra data bit rate performance. It is upwardly compatible with conventional Dolby Digital, so it offers greater flexibility in response to the source signal and the conditions of the playback equipment.

Dolby TrueHD

Dolby TrueHD is a high definition audio technology developed by Dolby Laboratories, using lossless coding technology to faithfully reproduce the sound of the studio master.

This format is compatible with a maximum sampling frequency of 96 kHz and up to 7.1-channels, so it is used for applications particularly prioritizing sound quality.

Dolby Pro Logic II

Dolby Pro Logic II is a matrix decoding technology developed by Dolby Laboratories.

Regular music such as that on CDs is encoded into 5-channels to achieve an excellent surround effect.

The surround channel signals are converted into stereo and full band signals (with a frequency response of 20 Hz to 20 kHz or greater) to create a "three-dimensional" sound image offering a rich sense of presence for all stereo sources.

Dolby Pro Logic IIx

Dolby Pro Logic IIx is a further improved version of the Dolby Pro Logic II matrix decoding technology.

Audio signals recorded in 2-channels are decoded to achieve a natural sound with up to 7.1-channels.

There are 3 modes: "Music" suited for plaving music. "Cinema" suited for playing movies, and "Game" which is optimized for playing dames.

*** Sources recorded in Dolby Surround**

Sources recorded in Dolby Surround are indicated with the following logo marks.

Dolby Surround support mark : DO DOLBY SURROUND

Manufactured under license from Dolby Laboratories. "Dolby", "Pro Logic" and the double-D symbol are trademarks of Dolby Laboratories.

DTS Surround

DTS Digital Surround

/DTS Digital Surround is the standard digital surround format of DTS, Inc., compatible with a sampling frequency of 44.1 or 48 kHz and up to 5.1-channels of digital discrete surround sound.

DTS-HD High Resolution Audio

DTS-HD High Resolution Audio is an improved version of the conventional DTS, DTS-ES and DTS 96/24 signals formats, compatible with sampling frequencies of 96 or 48 kHz and up to 7.1-channels of discrete digital sound. High data bit rate performance provides high quality sound. This format is fully compatible with conventional products, including conventional DTS digital surround 5.1-channel data.

DTS-HD Master Audio

DTS-HD Master Audio is DTS. Inc's lossless audio format compatible with up to 96 kHz/7.1-channels. The lossless audio coding technology faithfully reproduces the sound of the studio master. It is fully compatible with conventional products, including conventional DTS digital surround 5.1-channel data.

DTS-ES[™] Discrete 6.1

DTS-ES[™] Discrete 6.1 is a 6.1-channel discrete digital audio format adding a surround back (SB) channel to the DTS digital surround sound. Decoding of conventional 5.1-channel audio signals is also possible according to the decoder.

DTS-ES[™] Matrix 6.1

DTS-ES™ Matrix 6.1 is a 6.1-channel discrete digital audio format inserting a surround back (SB) channel to the DTS digital surround sound through matrix encoding. Decoding of conventional 5.1-channel audio signals is also possible according to the decoder.

DTS NEO:6[™] Surround

DTS NEO:6[™] is a matrix decoding technology for achieving 6.1channel surround playback with 2-channel sources. It includes "DTS NEO:6 CINEMA" suited for plaving movies and "DTS NEO:6 MUSIC" suited for playing music.

Setup

DTS 96/24

DTS 96/24 is a digital audio format enabling high sound quality playback in 5.1-channels with a sampling frequency of 96 kHz and 24 bit quantization on DVD-Video.

Manufactured under license under U.S. Patent #'s: 5,451,942; 5,956,674; 5,974,380; 5,978,762; 6,226,616; 6,487,535 & other U.S. and worldwide patents issued & pending. DTS is a registered trademark and the DTS logos, Symbol, DTS-HD and DTS-HD Master Audio are trademarks of DTS, Inc.[©] 1996-2007 DTS, Inc. All Rights Reserved.

Neural Surround

Neural Surround[™], a breakthrough in audio technology, will bring the excitement of surround music to more of America's listening audience. It provides the rich envelopment and discrete image detail of surround sound in a format 100 % compatible with stereo. With superior spectral resolution and channel separation, Neural Surround[™] draws the brain's attention to sonic details in musical instruments, vocals, and ambience that are typically masked by other playback systems. This allows the listener to fully experience the richness and subtleties in recorded performance as never before. As the chosen format for XM Satellite Radio's new XM HD surround programming, Neural Surround will help deliver more surround music to more listeners than any other broadcast format, XM Satellite Radio will be the first radio company to broadcast surround sound on the radio 24 hours a day and will offer three channels fully dedicated to Neural Surround™ music. This alone will amount to more than 25.000 hours of Neural Surround™ music each year.

This product is manufactured under license from Neural Audio Corporation.

D&M Holdings Inc. hereby grants the user a non-exclusive, nontransferable, limited license right exercisable to use the NA SURROUND Technology and other US and World Wide Patents Pending technology.

"Neural" and "Neural Audio" and "Neural Surround" are trademarks of Neural Audio Corporation. All Rights Reserved.

Audyssey MultEQ® XT

Audyssey MultEQ[®] XT is a technology designed to provide the optimum listening environment for multiple listeners within the listening area. Test data collected from multiple listening points is analyzed comprehensively and equalization that improves the sound quality for the entire listening area is performed.

Audyssey MultEQ XT not only corrects frequency response problems in large listening areas, it also fully automates the surround system setup.

For a detailed description, see page 25.

Audyssey MultEQ[®] XT is a trademark of Audyssey Laboratories. It is licensed under US and National Patent Applications 20030235318 and 10/700,220. Additional U.S. and Foreign Patents pending. MultEQ XT and the Audyssey MultEQ XT logo are trademarks of Audyssey Laboratories, Inc.. All rights reserved.

HDCD[®] (High Definition Compatible Digital[®])

HDCD[®] is an encoding/decoding technology that greatly reduces the distortion that occurs upon digital recording while maintaining compatibility with the conventional CD format, thus expanding the dynamic range and achieving a high resolution.

Conventional CDs and HDCD compatible CDs are identified automatically to select the optimum digital processing.

LCCD[®], HDCD[®], High Definition Compatible Digital[®] and Microsoft[®] are either registered trademarks or trademarks of Microsoft Corporation, Inc. in the United States and/or other countries. HDCD system manufactured under license from Microsoft Corporation, Inc. This product is covered by one or more of the following: In the USA: 5,479,168, 5,638,074, 5,640,161, 5,808,574, 5,838,274, 5,854,600, 5,864,311, 5,872,531, and in Australia: 669114. Other patents pending.

DENON LINK

DENON LINK is a unique digital, balanced transfer type interface developed by DENON. It offers high speed, high quality transfer of digital audio data with low signal loss. It can be used together with DENON DVD players equipped with a special DENON LINK connector using a single cable to enable playback with high sound quality. It allows digital transfer of the 192 kHz/24 bit 2-channel digital signals of DVD-Audio discs, PCM multi-channel signals, etc. Full-spec digital transfer of the audio contents of Super Audio CD is possible by connecting a player equipped for DENON LINK 3rd Edition.

AL24 Processing Plus

AL24 Processing for All Channels

DENON has further developed its proprietary AL24 Processing, an analog waveform reproduction technology, to support the 192 kHz sampling frequency of DVD-Audio. AL24 Processing Plus, thoroughly suppresses quantization noise associated with D/A conversion of LPCM signals to reproduce the low-level signals with optimum clarity that will bring out all the delicate nuances of the music.

Equipped foe not only front left and right channels but also for the surround left and right, center and subwoofer channels.

HDMI (High-Definition Multimedia Interface)

HDMI is a digital interface standard for next generation TVs based on DVI (Digital Visual Interface) standards and optimized for use in consumer equipment.

Non-compressed digital video and multi-channel audio signals are transmitted with a single connection.

HDMI is also compatible with HDCP (High-bandwidth Digital Contents Protection), a technology for protecting copyrights that encrypts digital video signals in the same was as with DVI.

Deep Color

Eliminates on-screen color banding, for smooth tonal transitions and subtle gradations between colors.

Enables increased contrast ratio.

Can represent many times more shades of gray between black and white.

At 30-bit pixel depth, a four times improvement would be the minimum, and the typical improvement would be eight times or more.

xvYCC

Next-generation "xvYCC" color space supports 1.8 times as many colors as existing HDTV signals. Lets HDTVs display colors more accurately. Enables displays with natural, vivid colors.

Lip Sync

Because consumer electronics devices are using increasingly complex digital signal processing to enhance the clarity and detail of the content, synchronization of video and audio in user devices has become a greater challenge and could potentially require complex enduser adjustments. HDMI 1.3 incorporates an automatic video/audio synching capability that allows devices to perform this synchronization automatically with total accuracy.

"HDMI," "HDMI logo" and "High-Definition Multimedia Interface" are trademarks or registered trademarks of HDMI Licensing LLC.

 - *3 : Only displayed when the **MENU** button is pressed
 - *4 : If the input signal is in SECAM format, it is converted to PAL for output
- * : Output according to "Resolution" setting (i/p Scaler : When "A to H" is set) (12 page 30).

: Wallpaper or set background color displayed

: Output according to "Resolution" setting (i/p Scaler : When "H to H" is set) (1) page 30).

: GUI menu not displayed

• The main zone video conversion function is compatible with the following formats: NTSC, PAL, SECAM, NTSC4,43, PAL -N, PAL -M and PAL -60.

- When SECAM signals of video input are up-converted, the signals are output in PAL format from the S-Video connector.
- If the input signal is a component 1080p signal, up-converting to HDMI is not possible.

• The GUI menu display cannot be superimposed when xvYCC signals and component 1080p signal, computer's resolution (e.g. VGA) are input.

Troubleshooting

If a problem should arise, first check the following:

- 1. Are the connections correct?
- 2. Is the set being operated as described in the owner's manual?
- 3. Are the other components operating properly?

If this unit does not operate properly, check the items listed in the table below. Should the problem persist, there may be a malfunction.

In this case, disconnect the power immediately and contact your store of purchase.

GeneralG
