Errata, Additional Information, and Modification Information

Thank you very much for your purchase of this product.

The following descriptions need to be modified, added, or changed in the User's Guide <Quick Guide for Fiery Color Server>, <Quick Guide for IC-602>, <Safety Information>, and HTML version of the User's Guide. Please make the corrections given in the tables below.

Please keep this document with care so that it is readily available for reference.

KONICA MINOLTA, INC.

Directory of User's Guide	Added description
<HTML User's Guide> <Quick Guide for Fiery Color Server> <Quick Guide for IC-602>	<ul style="list-style-type: none"> • This machine does not support these operating systems. Windows 2003, Windows 2003 R2, Windows 8, Mac OS X 10.5, Mac OS X 10.6 • Printer drivers, Color Centro, and Job Centro support Windows 10. • Printer drivers support Mac OS X 10.11.

<Additional Information 5>

Directory of User's Guide	Added description
<HTML User's Guide> <Quick Guide for IC-602>	<ul style="list-style-type: none"> • Upgrade Kit UK-206 is not available. • Although the design of some screens may differ, that does not interrupt your operation. • Within the process to install Color Centro, you can install .NET Framework 3.5 also.

<Additional Information 6>

Directory of User's Guide	Added description
<HTML User's Guide>	<ul style="list-style-type: none"> • On the [Connect Printer] screen of Job Centro, you can add a maximum of 50 printers to the list. • On Color Centro, a new colorimeter FD-9 is available. • Color Centro has modes only for bizhub PRESS C71hc. For details, refer to the following description.

Color Centro: Modes only for bizhub PRESS C71hc

By using special modes, you can utilize the unique gamut of bizhub PRESS C71hc.
These modes reproduce vivid colors by emphasizing colors.

Mode	Color space	Characteristics
Saturation mode	RGB	Remarkable vividness (A little bit bold)
	CMYK	Impressive and clear vividness (Bold only in high-chroma areas)
Soft mode	RGB	High visibility in detail in very dark shadow areas
	CMYK	Similarity to offset printing Adherence to color values

To use these modes, import respective color configurations.
The [Color Configuration Management] screen - [File] - [Import/Export]
My Documents\KONICA MINOLTA\Color Centro\Color Configuration

Mode	Color configuration	
	For Exact Color	For G7 Calibration
Saturation mode	C71hc_Saturation_Mode	C71hc_Saturation_Mode G7
Soft mode	C71hc_Soft_Mode	C71hc_Soft_Mode G7

Select a color configuration, according to the advanced calibration that you use.
A false selection may cause problems in color reproduction.

Use the prepared color configurations for any type of paper.
These color configurations can reproduce vivid colors for any type of paper by using the same settings.

<Additional Information 10>

Directory of User's Guide	Added description
<p><HTML User's Guide> Home > Settings and Adjustments > Utility/Counter > Administrator Setting > Controller Administrator Setting > System Setting > Software Switch Setting: Setting the Software Switch</p>	<p>Switches have been added to Software Switch Setting in Administrator Setting (Controller Administrator Setting). Also, the Switch 78 has been modified as described below.</p>

Switch No.	Problem/Requirement	Solution reached when turned On
78	The quality of thumbnails displayed by Job Centro has been improved for clear display. However, the HDD space may decrease when the file capacity increases. An option to suppress quality improvement should be provided.	Setting value: Off: Improve the quality On: Do not improve the quality If turned On, the characters and lines of thumbnails may not fully legible.
97	Unnecessary tab paper should be output during Printgroove printing.	Setting value: Off: Do not output On: Output
98	The spine should not be blank when [Cover Print 2 in 1] is selected in perfect binding.	Setting value: Off: Blank On: Not blank
103	The texts of color setting information should be printed in black only.	Setting value: Off: Do not print all texts in black On: Print all texts in black
112	In addition to the Switch 40 setting, the print position setting (Lead/Center/Rear) of PageScope Direct Print should be allowed.	Setting value: Off: Do not follow the print position setting. On: Follow the print position setting. [Restrictions] <ul style="list-style-type: none"> • Switch 40 needs to be turned On. • This setting is available for PS and PDF. • The "Full Bleed" printing is always selected.
113	When using EQUIOS, returning the job results for proof printing should be enabled.	Setting value: Off: Disabled On: Enable
114	To specify the fold function, the feed direction is fixed to Short Edge in the current specification. However, Long Edge should also be enabled if it is in the fold enable range.	Setting value: Off: Fixed to Short Edge. On: Enables Long Edge only in the fold enable range.
115	When a job is saved in the following setting and the result is checked using a job ticket, etc., [Image Position] is set to OFF. <ul style="list-style-type: none"> • [Image Position] is set to [Center]. • [Print Mode] is set to [Hold]. [Center] should be held without changing the setting to OFF.	Setting value: Off: Sets [Image Position] to OFF. On: Holds [Image Position] to [Center]. [Restrictions] <ul style="list-style-type: none"> • This function is only applied when the PS Plug-in driver, Job Centro, or PageScope Direct Print is used. • Setting to On may slightly displace an image to the right.
116	When importing a PDF file using APPE, images should be generated on the basis of print area sizes.	Setting value: Off: On the basis of PDF original sizes On: On the basis of print area sizes (same as for CPSI) [Restrictions] <ul style="list-style-type: none"> • This setting is available for standard-size originals only.

Switch No.	Problem/Requirement	Solution reached when turned On
118	When the Envelope Fusing Unit is installed, color chart printing should be enabled.	Setting value: Off: Disables color chart printing. On: Enables color chart printing.
124	In PageScope Direct Print, the "Fit to Paper Size" function should be enabled for reduction only.	Setting value: Off: Reduced or enlarged according to the paper size On: Reduced according to the paper size (not enlarged) [Restrictions] • A specific condition is required to use this function. For details, contact your service representative.
125	In PageScope Direct Print, fitting to the print area should also be available when using the "Fit to Paper Size" function.	Setting value: Off: Fit to the paper size On: Fit to the print area [Restrictions] • A specific condition is required to use this function. For details, contact your service representative.
126	2-Sided printing should be enabled in Poster Printing.	Setting value: Off: 2-Sided printing is not enabled On: 2-Sided printing is enabled [Restrictions] • A specific condition is required to use this function. For details, contact your service representative.
127	I want to print transparent objects of Microsoft Office applications in high resolution. When printing in high resolution, it should be possible to reduce the conspicuousness of the dots that appear according to the transparency percentage.	Setting value: Off: Disables high resolution. On: Enables high resolution. [Important] Setting to On necessarily spools jobs for PostScript printing regardless of the MFP setting. [Restrictions] This setting is applied only to diagrams or shapes. This setting does not affect the transparency of images or pictures.
128	JPEG files should be supported in PageScope Direct Print (and PageScope Mobile).	Setting value: Off: Does not support JPEG files. On: Supports JPEG files. [Important] After changing this setting, you need to turn off the sub power switch and then turn it back on in order to retain the setting.
129	Only A3-size sheets should be folded in half when an original containing both A3 and A4 sizes is output.	Setting value: Off: Disables half-fold and output. On: Enables half-fold and output only for A3-size sheets.
130	The number of copies and the number of pages for a job should be printed on a banner page in the PS Plug-in driver.	Setting value: Off: Does not print the number of copies and the number of pages for a job on a banner page. On: Prints the number of copies and the number of pages for a job on a banner page. [Restrictions] • This setting is available only for PS, PDF, and TIFF. • This setting cannot be combined with booklet splitting.

Switch No.	Problem/Requirement	Solution reached when turned On
131	Banner pages in the PS Plug-in driver are output before normal jobs, but should be output after such jobs are completed.	Setting value: Off: Prints data in the following order: banner pages > jobs. On: Prints data in the following order: jobs > banner pages.
132	The following two conflicting functions can be set simultaneously for a PCL job. <ul style="list-style-type: none"> • Specify Text Margin • Horizontal Motion Index <p>By default, [Specify Text Margin] has priority in the PCL-compliant specifications, but [Horizontal Motion Index], the HP-compatible specification, should be set to be given priority.</p>	Turn this switch on to change to the HP-compatible specifications. Setting value: Off: Prioritizes [Specify Text Margin]. (PCL-compliant specifications) On: Prioritizes [Horizontal Motion Index]. (HP-compatible specifications)
135	When the front door is open and no paper is loaded, the status remains set to [Ready] in Printgroove.	Changing to On may return to the normal status.
136	When a job to which the paper type link is set to ON is imported while Composite Overprint for APPE is enabled (other than OFF) in Job Centro, an error occurs.	Changing to On may prevent this error from occurring.
138	If the paper size over the maximum printing area is specified when poster printing is conducted using PageScope Direct Print, the image is displaced approximately 3 mm and printed. The displacement should be cleared by setting the left margin to "0".	Changing to On may prevent the displacement from occurring. [Restrictions] <ul style="list-style-type: none"> • This function is only applied when poster printing (Partial, Divided, or Central Divided) is specified.
142	When special colors included in a specific PDF file on Job Centro (2.0) are processed using CPSI, this processing may be stopped during RIP processing.	Changing to On may prevent this error from occurring. However, CMM (Color Management Module) is not applied, so special color processing is canceled.
