SUUNTO QUEST
USER GUIDE

1 SAFETY

Types of safety precautions:

⚠ **WARNING:** - is used in connection with a procedure or situation that may result in serious injury or death.

⚠ **CAUTION:** - is used in connection with a procedure or situation that will result in damage to the product.

✎ **NOTE:** - is used to emphasize important information.

Safety precautions:

⚠ **WARNING:** ALLERGIC REACTIONS OR SKIN IRRITATIONS MAY OCCUR WHEN PRODUCT IS IN CONTACT WITH SKIN, EVEN THOUGH OUR PRODUCTS COMPLY WITH INDUSTRY STANDARDS. IN SUCH EVENT, STOP USE IMMEDIATELY AND CONSULT A DOCTOR.

⚠ **WARNING:** ALWAYS CONSULT YOUR DOCTOR BEFORE BEGINNING AN EXERCISE PROGRAM. OVEREXERTION MAY CAUSE SERIOUS INJURY.

⚠ **CAUTION:** DO NOT APPLY SOLVENT OF ANY KIND TO THE PRODUCT, AS IT MAY DAMAGE THE SURFACE.

⚠ **CAUTION:** *DO NOT APPLY INSECT REPELLENT ON THE PRODUCT, AS IT MAY DAMAGE THE SURFACE.*

⚠ **CAUTION:** *DO NOT THROW THE PRODUCT AWAY, BUT TREAT IT AS ELECTRONIC WASTE TO PRESERVE THE ENVIRONMENT.*

⚠ **CAUTION:** *DO NOT KNOCK OR DROP THE DEVICE, AS IT MAY BE DAMAGED.*

2 WELCOME

Thank you for choosing Suunto Quest!

This User Guide is here to help you get the most out of your training session with Suunto Quest. Read it through to make using your new Suunto Quest even more enjoyable.

There's nothing like it. Being out amongst nature, doing the sport you love best. Constantly searching for the perfect trail. Training for your next big event. Enjoying every moment of it. It's what you live for. It's what you were built for.

The robustly designed Suunto Quest lets you:

_PLAN

_Create tailor-made training plans or choose from existing plans online.

_PLUG

_Download training program to Suunto Quest.

_Upload training data to Movescount.com.

_Customize display and settings at Movescount.com.

_PLAY

_Get heart rate and speed based information during training, and recovery time.

_PROGRESS

_Analyze your performance online and share your achievements with the community at Movescount.com.

Continue your training experience online and get even more out of every move at Movescount.com. With Suunto Movestick you can connect your Suunto Quest to Movescount.com, upload training logs, share your progress with friends, and exchange emotions and thoughts. You can also download a training program straight to your Suunto Quest. Check out Movescount.com today and sign up.

📝 *NOTE: Be sure to register your device at www.suunto.com/register to get the full range of Suunto support.*

3 DISPLAY ICONS AND SEGMENTS

Icon	Description
✔	target reached
🔔	alarm
▲	up/increase

🔇	sounds off
ᴘᴍ	12 h time
🔒	button lock
➡	lower button indicator
▼	down/decrease
◄	progress indicator
▭	battery low

9
4 USING BUTTONS

By pressing the following buttons, you can access various features:

START STOP:

- select custom mode 1 (**training**), custom mode 2 (**running**), custom mode 3 (**cycling**), **recovery time**, **prev. Move**, **web connect**
- start/stop a training session
- increase a value/move up

Read more about the custom modes in *Section 11.2 Customizing displays in Movescount on page 35*.

NEXT:

- switch views
- keep pressed to enter/exit settings
- accept/move to the next step

LIGHT LOCK:

- activate the backlight

- keep pressed to lock the **START STOP** button
- decrease a value/move down

5 GETTING STARTED

Start by adjusting your personal settings. Many of the calculations use these settings, so it is important that you are as accurate as possible when defining the values. Through the **personal** settings, you tune your Suunto Quest according to your physical traits and activity.
To set the initial settings:

1. Press any button to activate the device. Wait until the unit wakes up and says **hold 2 sec**. Keep **START STOP** pressed to enter the first setting.
2. Press **START STOP** or **LIGHT LOCK** to change values.
3. Press **NEXT** to accept a value and to move to the next setting. Press **LIGHT LOCK** to return to the previous setting.
4. When you are ready, select **yes** (**START STOP**) to confirm all settings. If you want to modify the settings, select **no** (**LIGHT LOCK**).

You can set the following initial settings:

- **language**: English, Deutsch, français, español, português, italiano, Nederlands, svenska, suomi
- **units**: metric / imperial
- **time**: 12 / 24 h, hours and minutes

- **date**
- **personal settings**: year of birth, sex, weight

📝 *NOTE: Once you have entered your year of birth, your device automatically sets the maximum heart rate (max. HR) using the formula 207 – (0.7 x AGE) published by the American College of Sports Medicine. If you know your real max. HR, you should adjust the automatically given value to the known value.*

Remember to adjust additional personal values in **personal settings** before you start training with Suunto Quest, see *Chapter 10 Adjusting settings on page 27*.

📖 *TIP: In the time view, press the **NEXT** button to see the date, dual time, and seconds with the time. If you choose the seconds view, the display returns to show only date or dual time after 2 minutes to save battery life.*

5.1 Using backlight and button lock

Press **LIGHT LOCK** to activate the backlight.
Keep **LIGHT LOCK** pressed to lock or unlock the **START STOP** button. When the **START STOP** button is locked, 🔒 is shown on the display.

📝 *NOTE: Lock the **START STOP** button to avoid accidentally starting or stopping your stopwatch. When the **START STOP** button is locked during a training session, you can still change the views by pressing the **NEXT** button.*

📝 **NOTE:** *During training, keep the* **NEXT** *button pressed to activate the button lock and deactivate the tapping feature.*

📝 **NOTE:** *To save the battery life, the backlight blinks when activated during training.*

5.2 Testing your rest HR

Rest HR is your heart rate at rest. Improving your fitness level usually lowers the rest HR.

To test your rest HR:

1. Moisten the contact areas and put on the HR belt.
2. Make sure your device receives the HR signal.
3. Lie down and relax for three minutes.
4. Check your heart rate from the device and adjust it accordingly in the **personal settings**.

📎 **TIP:** *The best time to perform the rest HR test is after a good night's sleep. If you just had coffee, feel tired or stressed, do the test later.*

6 PUTTING ON HR BELT

📝 **NOTE:** *Suunto Quest is compatible only with Suunto Dual Comfort Belt.*

Adjust the strap length so that the HR belt is tight but still comfortable. Moisten the contact areas with water or gel and put on the HR belt. Ensure the HR belt is centered on your chest and the red arrow is pointing up.

⚠️ **WARNING:** *People who have a pacemaker, defibrillator, or other implanted electronic device use the HR belt at their own risk. Before starting the initial use of the HR belt, we recommend an exercise test under a doctor's supervision. This ensures the safety and reliability of the pacemaker and HR belt when being used simultaneously. Exercise may include some risk, especially for those who have been inactive. We strongly advise you to consult your doctor prior to beginning a regular exercise program.*

📝 **NOTE:** *HR belts with ANT icon (⊡) are compatible with ANT compatible Suunto wristop computers and with Suunto ANT Fitness Solution, while HR belts with IND icon (⊡) are compatible with most exercise equipment with inductive heart rate reception. Your Suunto Dual Comfort Belt is both IND and ANT compatible.*

15

📝 **NOTE:** *Suunto Quest cannot receive the HR belt signal under water.*

💬 **TIP:** *Machine-wash the heart rate belt regularly after use to avoid unpleasant odor.*

7 STARTING TRAINING SESSION

After the initial settings, you can start training. You can get full advantage of Suunto Quest by customizing it to best suit your needs. For information about settings, displays, and training customization options, see *Chapter 10 Adjusting settings on page 27* and *Section 11.2 Customizing displays in Movescount on page 35*. This section describes how to start a training session using Suunto Quest default settings.

To start training:

1. Moisten the contact areas and put on the HR belt.
2. In the time view, press **START STOP** and select one of the following: **training**, **running**, or **cycling**.
3. Press **NEXT** to confirm.
   If the training program is activated and a training session is scheduled for the current day, you will see a recommendation screen showing HR or speed range before the training session begins. In this case, press **NEXT** to move to the next screen.
4. As soon as Suunto Quest finds the HR belt or POD, you will see a notification screen. Press **START STOP** to start recording your training session.
(≣) *TIP: Warm up before and cool down after training.*

7.1 Troubleshooting: No HR signal

If you lose the HR signal, try the following:
- Check that you are wearing the HR belt correctly.
- Check that the electrode areas of the HR belt are moist.
- Replace the battery of the HR belt and/or the device, if problems persist.

(≣) *NOTE: Suunto Quest cannot receive the HR belt signal under water.*

8 DURING TRAINING

Suunto Quest gives you additional information during training. You can define what information you want to see on the display. For information about settings, displays, and training customization options, see *Chapter 10 Adjusting settings on page 27* and *Section 11.2 Customizing displays in Movescount on page 35*. This section describes how to scroll through additional information during a training session using Suunto Quest default settings.

Here are some ideas on how to use the device during training:

● Press **NEXT** to see additional information in real time.
● Keep **LIGHT LOCK** pressed to lock the **START STOP** button to avoid accidentally stopping your stopwatch.
● Press **START STOP** to pause the training session.

The additional information varies depending on what information is available and also on your personal choice and preference. As a default, if both HR and POD are available, the following information is displayed:

In the default **training** custom mode:

● view 1: heart rate and stopwatch
● view 2: heart rate and calories in real time
● view 3: heart rate percentage and heart rate zone

- view 4: stopwatch
- view 5: speed and distance in real time

In the default **running** custom mode:

- view 1: heart rate and stopwatch
- view 2: pace and distance
- view 3: pace and average running cadence
- view 4: distance and time
- view 5: stopwatch

In default **cycling** custom mode:

- view 1: heart rate and stopwatch
- view 2: heart rate and distance
- view 3: speed and distance
- view 4: speed and stopwatch
- view 5: distance and average speed

In addition, during training you will see arrows on the outer rim of the display.

The arrows represent your current recovery time (in hours). The recovery time is the time you need to fully recover from the training to be ready for the next training session. The numbers on the rim show how many hours your recovery time is so far. Recovery time will also be visible in one of the summary views after training and as a seperate item in the training menu.

📝 **NOTE:** To save battery life, the backlight will blink when activated during training.

📝 **TIP:** Switch the sounds on or off (🔇) during exercise by keeping **NEXT** pressed. You cannot switch the sounds on, if you have set sounds to **all off** in the general settings, see Chapter 10 Adjusting settings on page 27.

8.1 During guided training

You can create your own training program at www.movescount.com and download the program to your Suunto Quest. When the training program is on, Suunto Quest guides you to reach your daily training target. When the arrow on the display is pointing up, you should increase the intensity or speed. When the arrow is pointing down, you should decrease the intensity or speed.

📝 **NOTE:** When planning a training session in Movescount, you can define its duration, intensity, and distance. Unless distance is defined, Suunto Quest will give you intensity guidance.

21

📝 **NOTE:** *You can set the outer rim arrows to represent the percentage of training completion in Movescount. You can read the percentage value using the digits on the rim of the device.*

📝 **NOTE:** *During training the guiding arrow is only visible in the displays showing speed or HR data.*

When you have reached your target, ⊘ is shown. If you do not want to follow a training program, make sure to turn it off in the **training settings**. When the training program is disabled, you can still receive guidance related to personally set heart rate or speed limits. Remember to enable the heart rate or speed limits by selecting limits **on** in the **training settings**.

9 AFTER TRAINING

9.1 After training

1. Press **START STOP** to pause or stop the training session.
2. Select **stop** to confirm stopping and to view the summary, or select **continue** to continue training.
3. Press **NEXT** to browse through the different views of the summary.
4. Keep **NEXT** pressed to return to the time view.
 NOTE: If your peak HR during training has exceeded your maximum HR set in the device settings, the device automatically asks if you want to update your maximum HR.

 TIP: You can skip the summary by keeping **NEXT** pressed in the first summary view. To view the previous training summary later, press **START STOP** in the time view and select **prev. Move**.

⊜ **TIP:** Machine-wash the heart rate belt regularly after use to avoid unpleasant odor.

9.2 Recovery time

After each training session, Suunto Quest shows how long it takes for you to fully recover and when you are ready to train with full intensity within your personal activity class. Check your recovery time at any time in **recovery time**, see *Section 9.3 Reviewing recovery time and previous Move on page 25*. If the recovery time is more than 24 hours, we recommend you to have a rest day to avoid overtraining. Suunto Quest calculates up to 120 hours of recovery time.

⊜ **NOTE:** *Consult a professional trainer to learn more about how to utilize recovery times (exercise and rest ratio) to reach your targets.*

⊜ **NOTE:** *The arrows appearing on the outer rim of the display during training represent your recovery time. The arrows are shown during and after training in the time view.*

📝 **NOTE:** *The recovery time is calculated based on HR information and it is only available when you are training with an HR belt.*

9.3 Reviewing recovery time and previous Move

To review recovery time and previous Move:

1. In the time view, press **START STOP**.
2. Select **recovery time** or **prev. Move** with **START STOP** or **LIGHT LOCK**.
3. Confirm your selection with **NEXT**.
4. Press **NEXT** to browse through the views. After you have browsed through all the views, the device returns to the time view.

📝 **TIP:** *Keep* **NEXT** *pressed to return to the time view.*

The arrows appearing on the outer rim of the display during training represent your recovery time. The arrows are shown during and after training in the time view. In the time view the arrows gradually disappear, as you recover.
9.4 Previous Move

In **prev. Move** you can view the information of your previous training session.

You can only view the details of your previous training session from the device. However, Suunto Quest stores training details from previous sessions, which you can view in more detail when you transfer the logs to Movescount.com.

📝 **NOTE:** *Remember to transfer your training logs to Movescount.com regularly to avoid overwriting log memory.*

10 ADJUSTING SETTINGS

You can adjust the settings in the time view.

During training, you can:

- set the sounds on or off by keeping **NEXT** pressed.
- lock the **START STOP** button and the tapping feature by keeping the **LIGHT LOCK** button pressed.

To adjust the settings:

1. In the time view, keep **NEXT** pressed to enter the settings.
2. Press **NEXT** to enter the first setting. You can browse through the setting steps with **START STOP** and **LIGHT LOCK**.
3. Press **START STOP** or **LIGHT LOCK** to change the values. Press **NEXT** to confirm and to move to the next setting.
4. When you are ready, select **yes** (**START STOP**) to confirm all settings. If you still want to modify the settings, select **no** (**LIGHT LOCK**) to return to the first setting.
You can adjust the following settings:

Time and personal settings

- **time**: hours and minutes

27

- **alarm**: on/off, hours, minutes
- **dual time**: hours and minutes
- **date**: year, month, weekday
- **personal settings**: weight, activity class, maximum HR (max. HR), rest HR

Training settings

- **program**: on/off - allows you to use a default Suunto Quest program or a personal training program downloaded from Movescount.com.
- **limits**: off, HR, speed - allows you to select heart rate limit or speed limit guidance, if you are not using a training program.
- **autolap**: on/off
- **timer 1**: off/on, minutes, seconds
- **timer 2**: off/on, minutes, seconds

TIP: You can adjust the personal values for the HR and speed limits in Movescount. In Movescount you can also define limits per custom mode.

TIP: Autolap is triggered by distance. The default values per POD are 1 (km/mile) for Foot POD Mini and 1 (km/mile) per Bike POD. You can adjust the values for each POD and custom mode you are using in Movescount.com.

General settings

sounds:

- **all on**: all sounds are on
- **buttons off**: you will hear all other sounds, except button presses
- **all off**: all sounds are off (when the sounds are off, ♪ is shown on the display during training)

- **tap sensitivity**: off, very low, low, medium, high, very high
- **distance unit** (with optional speed and distance POD): km/mi

Pairing

- **skip**: skip pairing
- **belt**: pair HR belt
- **Foot POD**: pair a Foot POD or Foot POD Mini
- **Bike POD**: pair a Bike POD
- **Speed POD**: pair a POD - we recommend you pair Suunto GPS POD under this name.

10.1 Estimating your activity class

The activity class is a rating of your current activity level. Use the following classifications to help you determine your activity class.

Easy going

If you do not participate regularly in recreational sports or heavy physical activity, use 1.

Recreational

If you participate regularly in recreational sports or do physical work and your weekly exercise is:

- less than 1 hour, use 2.
- more than 1 hour, use 3.

Fitness

If you participate regularly in sports or other physical activity and you engage weekly in heavy exercise:

- under 30 minutes, use 4.
- 30-60 minutes, use 5.
- 1-3 hours, use 6.
- over 3 hours, use 7.

Endurance or professional

If you train on a regular basis or participate in competitive sports and your weekly exercise is:

- 5-7 hours, use 7.5.
- 7-9 hours, use 8.
- 9-11 hours, use 8.5.
- 11-13 hours, use 9.
- 13-15 hours, use 9.5.
- over 15 hours, use 10.

10.2 Sleep mode and initial settings

📝 **NOTE:** *It is recommended to change the initial settings in Movescount.com.*

To change the initial settings without access to Movescount.com, you have to put the device into sleep mode.

To put the device into sleep mode:

1. After the last step of general settings, when the device asks you to confirm that the setting changes are done, keep **NEXT** pressed until the device goes into sleep mode.
2. Press any button to activate the device again.
3. Set the initial settings, see *Chapter 5 Getting started on page 12*.

🖹 *NOTE: When replacing the battery, only the time and date change. The device remembers your previous initial settings and recorded exercises.*

Example: adjusting alarm settings

When the alarm is on, ♦ is shown on the display.

To set the alarm on/off:

1. In the time view, keep **NEXT** pressed to enter the settings.
2. Browse to **alarm** with **START STOP** and confirm with **NEXT**.
3. Set the alarm **on** or **off** with **START STOP** and **LIGHT LOCK**. Confirm with **NEXT**.
4. Set the alarm time with **START STOP** and **LIGHT LOCK**. Confirm with **NEXT**.
When the alarm sounds, press **stop** (**LIGHT LOCK**) to turn it off.

After you have stopped the alarm, it sounds the same time the following day.

10.3 Changing language

If you want to change the device's language or you have chosen the wrong language when setting up the device, the device needs to be put to sleep. For information on how to put the device to sleep, see *Section 10.2 Sleep mode and initial settings on page 30*.

Alternatively, you can adjust the language in Movescount.com

📝 **NOTE:** *The device remembers your previous initial settings and recorded training sessions.*

11 CUSTOMIZING SUUNTO QUEST

11.1 Connecting to web

Movescount.com is an online sports community that offers you a rich set of tools to manage your daily activities and create engaging stories about your experiences. It also allows you to customize your Suunto Quest to best meet your training needs.

Transfer your recorded logs with Suunto Movestick Mini to Movescount.com. Download settings and customized plans from Movescount.com to your Suunto Quest.

⚠ *CAUTION: Do not plug in Movestick Mini before installing Moveslink!*

To install Moveslink:

1. Go to www.movescount.com/moveslink.
2. Download, install, and activate Moveslink.

www.movecount.com/moveslink
📝 *NOTE: A Moveslink icon is visible on your computer's display when Moveslink is active.*

NOTE: *Moveslink is compatible with PC (Windows XP, Windows Vista, Windows 7) and MAC (Intel-based, running OS X version 10.5 or later).*

To register to Movescount:
1. Go to www.movescount.com.
2. Create your account.

To transfer data:
1. Plug Suunto Movestick Mini into your computer's USB port.
2. Make sure that Moveslink is activated.
3. In Suunto Quest, press **START STOP** to enter the training menu, scroll to **web connect**, and confirm by pressing **NEXT**.
4. Follow the instructions shown on your computer to view your moves in Movescount.
TIP: Suunto Quest can store between 20 and 30 logs, depending on the data you want to record during training. After that it starts to overwrite the oldest log. To avoid losing training logs and to view the log details, transfer them to Movescount.com.

NOTE: The first time Suunto Quest is connected to Movescount.com, all information (including the device settings) is transferred from Suunto Quest to Movescount. The next time you connect Suunto Quest to Movescount.com, changes in settings, training programs, displays, and custom modes you made in Movescount.com and in the device will be synchronized.

11.2 Customizing displays in Movescount

Suunto Quest lets you choose the information you want to see on the display during training. Take full advantage of Suunto Quest by customizing the displays and creating your own training program in Movescount.com.
You can customize three different areas on the display:

● The outer rim arrows can be customized to show the recovery time in hours, heart rate percentage, or percentage of training completion. When showing the completion and recovery time, the outer rim arrows are visible during

training and after training in the time mode. When showing the heart rate percentage, the outer rim arrows are only visible during training. Use the digits on the rim of the device to interpret outer rim arrows. The digits represent hours (for recovery time) or percentage (for heart rate % and for training completion).

- Row 1 displays training information in the middle of the screen.
- Row 2 displays training information at the bottom of the screen.

📝 **NOTE:** *Remember to connect Suunto Quest to your Movescount.com account every time you transfer your training data, or would like to transfer changes made in Suunto Quest settings to the device.*

📝 **NOTE:** *Recovery time and heart rate percentage will only be displayed when training with a heart rate belt. Training completion will only be shown if you take a training program into use.*

📝 **NOTE:** *Some information, for example the interval timer, lap time, and heart rate zone can only be shown in row 2.*

You can create up to 5 custom modes to your Suunto Quest, name them, and define up to 5 views for each mode. You can also define whether Suunto Quest should connect to a heart rate belt or POD, as well as the autolap distance per POD.

⊜ **TIP:** *By selecting the stopwatch to row 2 and leaving row 1 empty, the stopwatch will be displayed in large digits on the display.*

12 TRAINING WITH CUSTOM TRAINING PROGRAM

You can create your own training program in Movescount.com and download the program to your Suunto Quest. When the training program is on, Suunto Quest guides you to reach your daily training target.

This section describes how to take the default program into use. Remember that the default program is only an example and may not fully meet your training needs.

12.1 Activating training program

To activate the default training program:

1. Keep **NEXT** pressed to enter the settings.
2. Scroll to **training settings** with **START STOP** and confirm with **NEXT**.
3. Select **program on** and confirm with **NEXT**.
4. Keep **NEXT** pressed to exit the settings and return to the time view.
12.2 Taking program into use

Suunto Quest default training program lasts 15 weeks, with training sessions varying in duration and intensity. The program is designed for activity class 6 (1-3 hours of heavy exercise weekly).

Suunto Quest default program offers you intensity guidance during your training. To create your own training program, visit Movescount.com.

📝 **NOTE:** *Remember to connect Suunto Quest to your Movescount.com account every time you transfer your training data, or would like to transfer changes made in Suunto Quest settings to the device.*

When the training program is on, Suunto Quest shows you a **training day** reminder in the time view for the day with the scheduled training session. Press **NEXT** to see the daily target recommendation. Press **NEXT** again to confirm and to return to the time view.

12.3 Training guidance

When the training program is on, Suunto Quest shows your progress and guides you to reach your daily training target. Depending on the type of training selected, Suunto Quest provides intensity (heart rate based) or speed (distance based) guidance. In the default program only intensity guidance is shown. When the arrow on the display close to heart rate or speed value is pointing up, you should increase the intensity or speed. When the arrow is pointing down, you should decrease the intensity or speed. When you have reached your target, ✅ is shown.

📝 **NOTE:** The guiding arrow during training is only visible in the displays showing speed or HR data.

📝 **NOTE:** Unless distance is defined, Suunto Quest will give you intensity guidance. If you train without a heart rate belt, you will not receive intensity guidance during your training session.

📝 **NOTE:** If you do not want to follow a training program, make sure to turn it off in the general settings and in Movescount.

🗐 **TIP:** If the training program is disabled, you can still receive guidance related to personally set heart rate or speed limits. Remember to turn the limits on in the device settings. You can adjust the limits in Movescount.

📝 **NOTE:** Suunto Quest creates a daily target. If you plan several training sessions per day, their durations and intensities are combined into a daily target.

12.4 Making laps during training

You can set Suunto Quest to take autolaps when training. Autolaps are driven by distance. You can select different autolap distances for each POD and custom mode.

🗐 **TIP:** You can use three custom modes in Suunto Quest: **running**, **walking**, and **cycling**. In Movescount.com you can set your Suunto Quest to take autolaps

every 1 km (mile) for running, every 0.5 km (mile) for walking, and every 10 km (miles) for cycling.

You can also take manual laps during training. When training, tap on the display to take a lap.

You can adjust the tapping sensitivity in the general settings:

1. In the time mode, keep **NEXT** pressed to enter the settings.
2. Scroll to **general settings** with **START STOP** and confirm with **NEXT**.
3. Press **NEXT** to enter the **tap sensitivity** settings.
4. Press **START STOP** to adjust the tap sensitivity to the desired level – you can tap the display when scrolling through the levels to check the sensitivity level. When a tap is registered, **tapped!** message will be displayed.
5. Press **NEXT** to confirm the setting.
6. Keep **NEXT** pressed to exit the settings and return to the time mode.

TIP: Laps will be automatically created when using interval timers and when a training session is paused or stopped.

13 PAIRING POD/HR BELT

Pair Suunto Quest with optional Suunto PODs (Suunto Foot POD Mini, GPS POD, or Bike POD) to receive additional speed and distance information during training. Suunto Quest is compatible with Suunto Dual Comfort Belt.

The HR belt and/or POD included in your Suunto Quest package are already paired. Pairing is required only if you want to use a new HR belt or a speed POD with the device.

You can pair up to three Suunto speed and distance PODs. If you pair more than three PODs, only the latest three will be paired.

To pair a POD or an HR belt:

1. In the time view, keep **NEXT** pressed to enter the settings.
2. Scroll up by pressing **START STOP** to reach the pairing options and press **NEXT** to enter the pairing menu.
3. Select **POD** or **belt** with **START STOP** and **LIGHT LOCK**. Confirm with **NEXT**.
4. Turn on your POD or HR belt (see the instructions below). See the POD manual for more information. Wait for the message **paired**.
5. If the pairing fails, press **NEXT** to return to the pairing setting.
Example: Pairing Suunto Dual Comfort Belt

1. Remove the HR belt battery.
2. Reset the HR belt by inserting the battery positive side down.
3. In your Suunto Quest, follow the steps 1-3 from the instructions above.
4. Re-insert the belt battery positive side up and close the belt cover. Wait for the message **paired**.
5. If the pairing fails, press **NEXT** to return to the pairing setting.

📝 *NOTE: When **turn on POD** or **turn on belt** text is shown on the display, Suunto Quest waits for the pairing signal from the HR belt or POD for 15 seconds, during which the corresponding HR belt or POD should be turned on.*

13.1 Troubleshooting

If HR belt pairing fails, try the following:

1. Remove the battery from the belt.
2. Re-insert the battery upside down to reset the HR belt and remove the battery again.
3. Scroll to the device's pairing option.
4. Insert the battery in the HR belt the right side up.

13.2 Calibrating PODs

You can calibrate Suunto Foot POD Mini or Suunto Bike POD with Suunto Quest for accurate speed and distance measurement. Perform the calibration on an accurately measured distance, for instance, on a 400 m running track.

To calibrate Suunto Foot POD Mini with Suunto Quest:

1. Attach Suunto Foot POD Mini to your shoe. For more information, see Suunto Foot POD Mini Quick Guide.
2. Choose a custom mode to connect Suunto Quest with Suunto Foot POD Mini.
3. Start running at your usual pace. When you cross the starting line, press **START STOP** to start the recording.
4. Run a distance of 800–1000 m (about 0.500–0.700 miles) at your usual pace (for example two laps on a 400 m track).
5. Press **START STOP** when you reach the finish line.
6. Scroll with **NEXT** through summary views, until you reach the distance summary. Adjust the distance shown on the display to the actual distance you ran with **START STOP** and **LIGHT LOCK**. Confirm with **NEXT**.
7. Confirm the POD calibration by pressing **START STOP**. Your Foot POD Mini has now been calibrated. You can also calibrate your Suunto Bike POD in a similar way.

14 CARE AND MAINTENANCE

Handle the unit with care – do not knock or drop it.

Under normal circumstances the device will not require servicing. After use, rinse it with fresh water, mild soap, and carefully clean the housing with a moist soft cloth or chamois.

Do not try to repair the unit yourself. Contact an authorized Suunto service, distributor or retailer for any repair. Use only original Suunto accessories - damage caused by non-original accessories is not covered by warranty.

📝 *NOTE: Never push the buttons while swimming or in contact with water. Pressing the buttons while the unit is submerged could cause the unit to malfunction.*

14.1 Replacing battery

If ▭ is displayed, a battery replacement is recommended.

Replace the battery with extreme care to ensure your Suunto Quest remains water resistant. Careless replacement may void the warranty.

Replace the battery as illustrated here:
 NOTE: *Carefully ensure that the plastic O ring is properly placed so that the wristop computer remains water-resistant. Careless battery replacement may void the warranty.*

 NOTE: *Be careful with the spring in the battery compartment (see illustration). If the spring is damaged, please send your device to an authorized Suunto representative for service.*

 NOTE: *When replacing the battery, only the time and date change. Previous initial settings and recorded exercises are restored.*

14.2 Replacing HR belt battery

Replace the battery as illustrated here:
📝 **NOTE:** *Suunto recommends that the battery cover and the O ring are changed simultaneously with the battery to ensure that the HR belt remains clean and water resistant. Replacement covers are available with replacement batteries from your authorized Suunto dealer or web shop.*

15 SPECIFICATIONS

15.1 Technical specifications

General
- Operating temperature: -10° C to +50° C / +14° F to +122° F
- Storage temperature: -30° C to +60° C / -22° F to +140° F
- Weight (device): 40 g / 1.41 oz
- Weight (HR belt): max. 55 g / 1.95 oz
- Water resistance (device): 30 m / 100 ft (ISO 2281)
- Water resistance (HR belt): 20 m / 66 ft (ISO 2281)
- Transmission frequency (belt): 5.3 kHz inductive, gym equipment and 2.465 GHz Suunto-ANT compatible
- Transmission range: ~ 2 m / 6 ft
- User-replaceable battery (device / HR belt): 3V CR2032
- Battery life (device / HR belt): approximately 1 year in normal use (2.5 h / week exercise with HR and POD)

Log recorder/stopwatch
- Maximum log time: 20 hours
- Resolution: 0.1 second accuracy

Heart rate
- Display: 30 to 240
- Rest HR: estimated at 60 bpm, adjustable from 30 to 100 bpm

Personal settings

- Birth year: 1910 - 2009
- Weight: 30 - 200 kg or 66 - 400 lb

15.2 Trademark

Suunto Quest, its logos, and other Suunto brand trademarks and made names are registered or unregistered trademarks of Suunto Oy. All rights are reserved.

15.3 FCC compliance

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Repairs should be made by authorized Suunto service personnel. Unauthorized repairs will void warranty. This product has been tested to comply with FCC standards and is intended for home or office use.

15.4 CE

The CE mark is used to mark conformity with the European Union EMC directives 89/336/EEC and 99/5/EEC.

15.5 ICES

This Class [B] digital apparatus complies with Canadian ICES-003.

15.6 Copyright

15.7 Patent notice

This product is protected by pending patent applications and their corresponding national rights: US 11/432,380, US 11/169,712, US 12/145,766, US 7,526,840, US 11/808,391, USD 603,521, USD 29/313,029. Additional patent applications have been filed.

16 WARRANTY

SUUNTO LIMITED WARRANTY

Suunto warrants that during the Warranty Period Suunto or a Suunto Authorized Service Center (hereinafter Service Center) will, at its sole discretion, remedy defects in materials or workmanship free of charge either by a) repairing, or b) replacing, or c) refunding, subject to the terms and conditions of this Limited Warranty. This Limited Warranty is only valid and enforceable in the country of purchase, unless local law stipulates otherwise.

Warranty Period

The Limited Warranty Period starts at the date of original retail purchase. The Warranty Period is two (2) years for display devices. The Warranty Period is one (1) year for accessories including but not limited to PODs and heart rate transmitters, as well as for all consumable parts.

Exclusions and Limitations

This Limited Warranty does not cover:

1. a) normal wear and tear, b) defects caused by rough handling, or c) defects or damage caused by misuse contrary to intended or recommended use;
2. user manuals or any third-party items;
3. defects or alleged defects caused by the use with any product, accessory, software and/or service not manufactured or supplied by Suunto;
4. replaceable batteries.

This Limited Warranty is not enforceable if item:

1. has been opened beyond intended use;

2. has been repaired using unauthorized spare parts; modified or repaired by unauthorized Service Center;
3. serial number has been removed, altered or made illegible in any way, as determined at the sole discretion of Suunto;
4. has been exposed to chemicals including but not limited to mosquito repellents.

Suunto does not warrant that the operation of the Product will be uninterrupted or error free, or that the Product will work with any hardware or software provided by a third party.

Access to Suunto warranty service

You must have proof of purchase to access Suunto warranty service. For instructions how to obtain warranty service, visit www.suunto.com/warranty, contact your local authorized Suunto retailer, or call Suunto Help Desk +358 2 2841160 (national or premium rates may apply).

Limitation of Liability

To the maximum extent permitted by applicable mandatory laws, this Limited Warranty is your sole and exclusive remedy and is in lieu of all other warranties, expressed or implied. Suunto shall not be liable for special, incidental, punitive or consequential damages, including but not limited to loss of anticipated benefits, loss of data, loss of use, cost of capital, cost of any substitute equipment or facilities, claims of third parties, damage to property resulting from the purchase or use of the item or arising from breach of the warranty, breach of contract, negligence, strict tort, or any legal or equitable theory, even if Suunto knew of the likelihood of such damages. Suunto shall not be liable for delay in rendering warranty service.
