

Dear VIZIO Customer,

Congratulations on your new VIZIO VO47L FHDTV30A LCD Television purchase. Thank you for your support. For maximum benefit of your set, please read these instructions before making any adjustments, and retain them for future reference. We hope you will experience many years of enjoyment from your new VIZIO VO47L FHDTV30A Television.

For assistance, please call (877) 668-8462 or visit us at www.vizio.com.

To purchase or inquire about accessories and installation services for your VIZIO LCD HDTV, please visit our website at www.vizio.com or call toll free at 888-VIZIOCE (888-849-4623).

We recommend you register your VIZIO VO47L FHDTV30A either at our website www.vizio.com or fill in your registration card and mail it in. For peace of mind and to protect your investment beyond the standard warranty, VIZIO offers on-site extended warranty service plans. These plans give additional coverage during the standard warranty period. Visit our website or call us to purchase a plan.

Write down the serial number located on the back of your VO47L FHDTV30A.

Important Safety Instructions

This product is designed and manufactured to operate within defined design limits, and misuse may result in electric shock or fire. To prevent the product from being damaged, the following rules should be observed for the installation, use and maintenance of the product. Read the following safety instructions before operating the display. Keep these instructions in a safe place for future reference.

- To reduce the risk of electric shock or component damage, switch off the power before connecting other components to the VO47L FHDTV30A.
- Unplug the power cord before cleaning the VO47L FHDTV30A LCD. A damp cloth is sufficient for cleaning the VO47L FHDTV30A. Do
 not use a liquid or a spray cleaner for cleaning the product. Do not use abrasive cleaners.
- Always use the accessories recommended by the manufacturer to insure compatibility.
- When moving the VO47L FHDTV30A from an area of low temperature to an area of high temperature, condensation may form on the housing. Do not turn on the VO47L FHDTV30A immediately after this to avoid causing fire, electric shock or component damage.
- Do not place the VO47L FHDTV30A on an unstable cart, stand, or table. If the VO47L FHDTV30A falls, it can injure a person and
 cause serious damage to the appliance. Use only a cart or stand recommended by the manufacturer or sold with the VO47L
 FHDTV30A
- A distance of at least 3 feet should be maintained between the VO47L FHDTV30A and any heat source, i.e. radiator, heater, oven, amplifier etc. Do not install the product close to smoke. Operating the product close to smoke or moisture may cause fire or electric shock.
- Slots and openings in the back and bottom of the cabinet are provided for ventilation. To ensure reliable operation of the VO47L FHDTV30A and to protect it from overheating, be sure these openings are not blocked or covered. Do not place the VO47L FHDTV30A in a bookcase or cabinet unless proper ventilation is provided.
- Never push any object into the slot on the VO47L FHDTV30A cabinet. Do not place any objects on the top of the product. It could short circuit parts causing a fire or electric shock. Never spill liquids on the VO47L FHDTV30A.
- The VO47L FHDTV30A should be operated only from the type of power source indicated on the label. If you are not sure of the type of power supplied to your home, consult your dealer or local power company.
- The power cable must be replaced when using different voltage from that specified in the User Manual. For more information, contact your dealer.
- The VO47L FHDTV30A is equipped with a **three-pronged grounded plug, a plug with a third (grounding) pin.** This plug will fit only into a grounded power outlet as a safety feature. If your outlet does not accommodate the three-wire plug, have an electrician install the correct outlet, or use an adapter to ground the appliance safely.

Do not defeat the safety purpose of the grounded plug.

- · Appliance inlet (or AC inlet) is used as the disconnect device.
- Use only with the cart, stand, tripod, bracket or table specified by manufacturer, or sold with the
 apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid
 injury from tip-over.

- The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of not isolated dangerous voltage within the inside of the product that may be sufficient magnitude to constitute a risk of electric shock to persons.
- The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and servicing instructions in the literature accompanying the appliance.
- Do not overload power strips and extension cords. Overloading can result in fire or electric shock.
- The wall socket shall be installed near the equipment and shall be easily accessible.
- Only the marked power source can be used for the product. Any power source other than the specified one
 may cause fire or electric shock.
- . Do not touch the power cord during lightning. To avoid electric shock, avoid handling the power cord during electrical storms.
- Unplug the unit during a lightening storm or when it will not be used for long period of time. This will protect the VO47L FHDTV30A from damage due to power surges.
- Do not attempt to repair or service the product yourself. Opening or removing the back cover may expose you to high voltages, the risk
 of electric shock, and other hazards. If repair is required, please contact your dealer and refer all servicing to qualified service personnel.
- Keep the product away from moisture. Do not expose this appliance to rain or moisture. If water penetrates into the product, unplug
 the power cord and contact your dealer. Continuous use in this case may result in fire or electric shock.
- Do not use the product if any abnormality occurs. If any smoke or odor becomes apparent, unplug the power cord and contact your dealer immediately. Do not try to repair the product yourself.
- Avoid using dropped or damaged appliances. If the product is dropped and the housing is damaged, the internal components may function abnormally. Unplug the power cord immediately and contact your dealer for repair. Continued use of the product may cause fire or electric shock
- Do not install the product in an area with heavy dust or high humidity. Operating the product in environments with heavy dust or high humidity may cause fire or electric shock.
- Follow instructions for moving the product. Ensure that the power connector and any other cables are unplugged before moving the
 product.
- Hold the power connector when removing the power cable. Pulling the power cable itself may damage the wires inside the cable and cause fire or electric shock. When the product will not be used for an extended period of time, unplug the power connector.
- To reduce risk of electric shock, do not touch the connector with wet hands.

- Insert batteries in accordance with instructions. Incorrect polarities may cause damage and leakage of the batteries, operator injury and contamination the remote controller.
- If any of the following occurs please contact the dealer:
 - The power connector fails or frays.
 - Liquid sprays or any object drops into the VO47L FHDTV30A.
 - The Display is exposed to rain or other moisture.
 - The Display is dropped or damaged in any way.
 - The performance of the Display changes substantially.
- Operating environment. Temperature: 40°F ~ 95°F, Humidity: 20% ~ 80% non-condensing, Altitude: 0 ~ 6500ft (0 ~ 2000m)

Television Antenna Connection Protection

External Television Antenna Grounding

If an outside antenna/satellite dish or cable system is to be connected to the TV, make sure that the antenna or cable system is electrically grounded to provide some protection against voltage surges and static charges.

Article 810 of the National Electrical Code, ANSI/NFPSA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of the grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements of the grounding electrode.

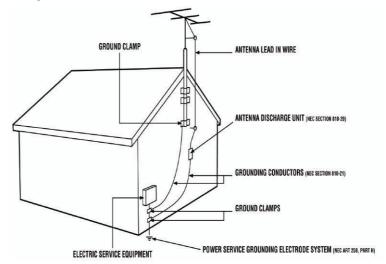

Lightning Protection

For added protection of the TV during a lightning storm or when it is left unattended or unused for long periods of time, unplug the TV from the wall outlet and disconnect the antenna or cable system.

Power Lines

Do not locate the antenna near overhead light or power circuits, or where it could fall into such power lines or circuits.

Remember, the screen of the coaxial cable is intended to be connected to earth in the building installation.

FCC Bulletin for New TV Owners

After February 17, 2009, a television receiver with only an analog broadcast tuner will require a converter box to receive full power over-the-air broadcasts with an antenna because of the Nation's transition to digital broadcasting. Analog-only TVs should continue to work as before to receive low power, Class A or translator television stations and with cable and satellite TV services, gaming consoles, VCRs, DVD players, and similar products.

Information about the DTV transition is available from http://www.DTV.gov or this manufacturer at 877 MY VIZIO (877-698-4946), and from http://www.dtv2009.gov or 1-888-DTV-2009 for information about subsidized coupons for digital-to-analog converter boxes.

Your VIZIO TV comes with a built-in tuner capable of processing digital broadcasts, making it easier for you, the end user, to receive this type of signal without the need of an extra converter box.

Opening the Package

Your VIZIO VO47L FHDTV30A and it accompanying accessories are carefully packed in a cardboard carton that has been designed to protect it from transportation damage. Now you have opened the carton check that the VO47L FHDTV30A is in good condition and that all of the accessories are included.

The VO47L FHDTV30A weighs approximately 58 lbs and about 44" wide x 30" tall we strongly advise that you have at least 2 people to unpack and install the HDTV.

The glass surface can easily be scratched or broken so please handle the product gently and never place the HDTV with the glass facing downwards on a surface without protective padding.

IMPORTANT: Save the carton and packing material for future shipping.

Caution: Do not apply pressure or throw objects at your HDTV. This may compromise the integrity of the display. The manufacturer's warranty does not cover user abuse or improper installations.

Additional Certified Accessories for the VIZIO VO47L FHDTV30A are sold separately

Wall Mounts
High Definition Cables
Extra or replacement Remote

VIZIO also offers Installation Services and Extended Warranty Services for your VIZIO VO47L FHDTV30A.

To purchase or inquire about additional accessories and services for your VIZIO product, visit our web site at www.vizio.com or call us toll free at 888-VIZIOCE (888-849-4623)

Installation Preparation

Please read this user manual carefully before installing your VIZIO HDTV.

The power consumption of the TV is about 157W (average); please use the power cord designated for TV. When an extension cord is required, use one with the correct power rating. The cord must be grounded and the grounding feature must not be defeated.

The TV should be installed on a flat surface to avoid tipping. For proper ventilation, you must allow space between the back of the TV and the wall. If you would like to mount your TV on the wall, please see below 'Preparing Your LCD HDTV for Wall Mounting' for additional information. Avoid installing the TV in places with high humidity, dust or smoke so as not to shorten the service life of the electronic components. Install the TV in landscape orientation; any 90° clockwise or counter-clockwise installation may induce poor ventilation and excessive component damage.

VIZIO offers professional installation services. Please contact VIZIO for more information on these services at 888-VIZIOCE (888-849-4623) or www.vizio.com.

Attaching the Safety Strap

For when the VO47L FHDTV30A is not mounted on the wall with a Wall Mount, a Safety Strap has been included to attach the HDTV to the wall to reduce the chance of the HDTV being pulled over. The Safety Strap should be used with common sense practice such as ensuring that children (or adults) do not climb up, grabbing the top of the HDTV and pulling it onto themselves.

- 1. Fix one end of the strap to the wall. If you have a drywall finish it is preferable to fix it to a stud, using a washer underneath the screw head. If you have a solid wall you should use a lag bolt, again using a washer under the nut.
- Fix the other end of the Safety Strap to one of the upper wall mounting holes on the back of the HDTV, using a washer under the screw head.

Preparing Your LCD HDTV for Wall Mounting

The VIZIO VO47L FHDTV30A can either be kept on the stand base or mounted on the wall for viewing. If you choose to mount the VO47L FHDTV30A on the wall, please follow the instructions below for removing the stand base.

To remove the stand base

- 1. Unplug all of the cables and cords from your VO47L FHDTV30A.
- 2. Place the VO47L FHDTV30A face down on a soft and flat surface (blanket, foam, cloth, etc) to prevent any damage to the TV.
- 3. Remove the eight (8) screws holding the base to the VO47L FHDTV30A .
- 4. Carefully remove the stand base.

Now, the VO47L FHDTV30A can fit securely to a mount (sold separately) by utilizing the mounting holes in the center of the back panel of the TV. Please make sure to read the instructions of your specific mount to properly hang the VO47L FHDTV30A .

The pitch of the mounting holes is 600mm horizontally and 200mm vertically. The screw type required is metric M8, 1.25mm pitch. The length of the screws will depend on the thickness plate being attach to the TV set; our brackets come with different length screws.

To find the perfect mount for the VIZIO VO47L FHDTV30A , browse VIZIO's certified mount selection at www.VIZIO.com or call directly 888-VIZIOCE (888-849-4623).

POWER 'VIZIO' LIGHT— The VIZIO name lights white when powered on and orange when powered off.

REMOTE CONTROL SENSOR – This is the window through which all of the remote control signals pass to the sensor. Point the remote control directly at this window for the best response to the remote signal.

Right Side Panel Controls

POWER (\circlearrowleft) – Switch the VO47L FHDTV30A on by pressing the button once. Press the button again to turn the VO47L FHDTV30A off.

MENU – This button activates the On Screen Display (OSD). If a sub-menu is active, pressing this button will return to the previous menu level.

CHANNEL +/- – Use these buttons to step up or down the TV channels. While the OSD is active, these buttons function as up and down controls in the OSD menus.

VOLUME +/- – Use these buttons to increase or decrease to the speaker volume. While the OSD is active, these buttons function as left and right controls in the OSD menus.

INPUT (ENTER) - Repeated pressing of this buttons steps through the input

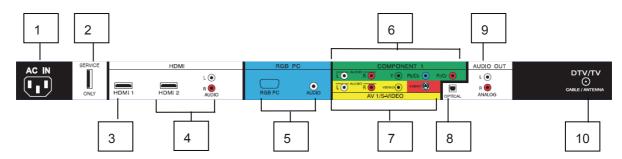

sources in the following sequence: TV, AV1(S-Video), AV2, Component 1, Component 2, RGB, HDMI1, HDMI2, HDMI3 and HDMI4. Once you have stepped through the entire sequence, you will return to the beginning.

Additionally, when the OSD is active, this button confirms the menu function to be adjusted. When the OSD is not active, pressing this button will display the current input mode.

Rear Panel Connections

- 1. **AC IN** Plug-in the supplied AC Power Cord here.
- 2. SERVICE This custom communication port is for factory service only. Use of this input for any purpose other than factory authorized service will void the manufacturer's warranty of this equipment.
- 3. **HDMI 1** Connect the primary source for digital video such as a DVD multimedia player or set top box through this all digital connector. The white color band on the rear of the TV indicates this connection.
- 4. HDMI 2 Connect a secondary source for digital video such as a DVD multimedia player or set top box through this all digital connector. The white color band on the rear of the TV indicates this connection. For users who want to connect to a DVI enabled device, use a DVI-HDMI cable and connect the Analog Audio output of the device to the L+R AUDIO here. Your VIZIO Certified HDMI and HDMI-DVI cables are available for purchase from www.VIZIO.com or by calling 888-VIZIOCE (888-849-4623).
- 5. **RGB PC** Connect the video and audio from a computer here. The blue color band on the rear of the TV indicates this connection. A cable with a 1/8" mini plug stereo connector at the end connecting to the TV is needed if sound is also transmitted with this signal.
- 6. **COMPONENT 1 (YPb/CbPr/Cr with Audio L/R)** Connect the primary source for component video devices such as a DVD Player or set top box here. From left to right, use white for left audio and red for right audio, green for Y, blue for Pb (or Cb), and red for Pr (or Cr) inputs. The green color band on the rear of the TV indicates this connection.
- 7. **AV1/S-VIDEO IN** Connect the primary source for composite video devices, such as a VCR or video game. Use the white and red connectors to connect the external audio from the same source. The yellow color band on the rear of the TV indicates this connection.
- 8. **OPTICAL AUDIO OUT** When the DTV input is selected for viewing, the audio associated with the programming will be available on this SPDIF Optical connector for connection to your home theatre system. The white color band on the rear of the TV indicates this connection.
- 9. **ANALOG AUDIO OUT** Connect the audio from the LCD HDTV to an external device, such as a home theatre system, external amplifier or stereo. Speakers can not be connected directly to here. The white color band on the rear of the TV indicates this connection.
- 10. **DTV/TV** Connect to an antenna or digital cable (no Cable Box) for Digital or Analog TV.*

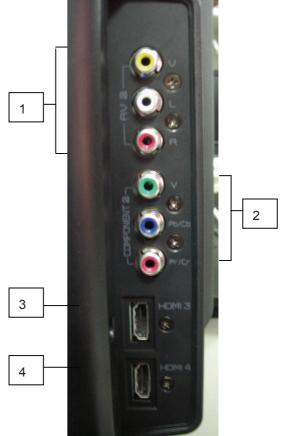

V

^{*} For digital TV stations in your area visit www.antennaweb.org.

Right-Side Panel Connection

- AV2 Connect the secondary source for composite video devices, such as a VCR or video game. Use the white and red connectors to connect the external audio from the same source, then use the yellow connector to connect the external video from the same source. Note: The red and white audio connectors are shared between AV2 and COMPONENT2.
- COMPONENT2 (YPb/CbPr/Cr with Audio L/R) Connect the secondary source for component video
 devices such as a DVD Player or set top box here. From
 top to bottom, left to right, use green for Y, blue for Pb (or
 Cb), red for Pr (or Cr), then connect white for left audio
 and red for right audio inputs. Note: The red and white
 audio connectors are shared between AV2 and
 COMPONENT2.
- 3. **HDMI 3 -** Connect the third source for digital video such as a DVD multimedia player or set top box through this all digital connector.
- 4. **HDMI 4 -** Connect the fourth source for digital video such as a DVD multimedia player or set top box through this all digital connector.

Your VIZIO Certified HDMI and HDMI-DVI cables are available for purchase from www.VIZIO.com or by calling 888-VIZIOCE (888-849-4623).

VIZIO Universal Remote Control

The VIZIO Universal Remote Control is a comprehensive remote that can be used to control up to four different components. The remote button functions are explained on the following pages.

This button starts all programming of the Remote Control.

Press this button to turn the TV on from the Standby mode. Press it again to return to the Standby mode.

Repeated pressing of this button will switch between HDMI 1, HDMI 2, HDMI 3 and HDMI 4 inputs.

Repeated pressing of this button will switch between Component 1 and Component 2 inputs

Repeated pressing of this button will switch between AV1 and AV2 inputs.

Press this button to select TV programming.

Use these buttons to select a channel or enter a password.

This button allows the user to cycle through the inputs.

This DASH button is for the DTV mode. When selecting a digital channel directly use this button for the separation of main and subchannels. For example, channel 28-2 would be selected by the button sequence 2 8 DASH 2.

NOTE: This is a programmable remote supporting up to 4 devices (see TV, RCVR, CABLE, DVD buttons at the bottom of the remote). If the remote is not working with your VIZIO TV, press the TV button on the remote to set the functions back to TV.

Use this button for the On-Screen Display (OSD) menus.

LAST – This button recalls the previously viewed channel.

Use the Navigation Wheel to operate the On-Screen Display (OSD) after it has been activated by pressing the MENU button.

Use the button to select your chosen option in On-Screen Display (OSD) menus.

GUIDE – This button displays program information. Note: This function is only available on DTV.

EXIT – This button exits the On-Screen Display (OSD) menus.

VOL (+ or -) – These buttons turn the volume up or down.

5.1 Surround Sound - This function is not available on this model and pressing this button has no effect.

MUTE - This button turns the sound on and off.

CH (+ or -) – These buttons change the channels up or down.

When CABLE is selected and the code to match your Cable (or Satellite) Box has been entered, this button will operate the Cable (or Satellite) Box the same as this button on your Cable (or Satellite) Remote. When TV is selected, this button activates Picture-in-Picture mode.

When CABLE is selected and the code to match your Cable (or Satellite) Box has been entered, this button will operate the Cable (or Satellite) Box the same as this button on your Cable Remote.

When TV is selected, press this button to select the size of the PIP screen from one of the following: small, medium or large

When CABLE is selected and the code to match your Cable Box (or Satellite) has been entered, this button will operate the Cable Box (or Satellite) the same as this button on your Cable Remote

(or Satellite). When TV is selected, press the button to choose the PIP input. Note: The TV must be in PIP mode for this button to be functional.

When CABLE is selected and the code to match your Cable Box (or Satellite) has been entered, this button will operate the Cable Box

(or Satellite) the same as this button on your Cable Remote (or Satellite). When TV is selected, this button is used to select the channels within the PIP screen when DTV/TV is the PIP input selected

Press this button to "Freeze-Frame" the current screen. Press this button again to continue playing.

While in PIP/POP mode; pressing SWAP will switch the displays from the main screen to the sub-screen or vice versa.

Use this button to change the picture mode from Custom, Standard, Movie, Game, Vivid, Football, Golf, Basketball and Baseball.

This button displays the image and system information display.

Press this button to switch the audio from the main screen to the sub-screen while in PIP or POP mode.

This button will select the Closed Caption mode. The options are OFF, CC1, CC2, CC3, CC4 and if Digital Cable Service is the

signal; you would get Service1 through Service6, depending on your local company.

This button selects a programmed DVD player.

This button selects a programmed Audio Receiver/Amp/Home Theater System.

This button selects a programmed cable TV set-top box or a satellite TV set-top box.

This button has been pre-programmed to select the codes to operate the VIZIO HDTV.

Insertion of Batteries in the Remote Control

Insert two AAA batteries into the remote control. Make sure that you match the (+) and (-) symbols on the batteries with the (+) and (-) symbols inside the battery compartment. Re-attach the battery cover.

Precautionary Tips for Inserting the Batteries:

Only use the specified AAA batteries.

Do not mix new and old batteries. This may result in cracking or leakage that may pose a fire risk or lead to personal injury.

Inserting the batteries incorrectly may also result in cracking or leakage that may pose a fire risk or lead to personal injury.

Dispose of the batteries in accordance with local laws and regulations.

Keep the batteries away from children and pets.

Remote Control Range

Point the remote control at the remote control sensor to transmit the commands.

Do not place any obstacles between the remote control and the receiver window.

The effective range of the remote control is approximately 30 feet (10 meters) from the front of the receiver window, 30° to the left and right, 20° up and down.

VIZIO Universal Remote Control Precautions

The remote control should be kept dry and away from heat sources. Avoid humidity.

If the TV responds erratically to the remote control or does not respond at all, check the batteries. If the batteries are low or exhausted, replace them with fresh batteries.

When not using the remote control for a long period of time, remove the batteries.

Do not take the batteries apart, heat them, or throw them into a fire.

Do not subject the remote control to undue physical stress, such as striking or dropping it.

Do not attempt to clean the remote control with a volatile solvent. Wipe it with a clean, damp cloth.

Chapter 2 Connecting Equipment Which Video Connection Should I Use?

The VIZIO VO47L FHDTV30A has six different ways to connect your video equipment from a basic connection to the most advanced for digital displays.

	connection to the most advanced for digital displays.					
Connection Quality (type)	Connector	Rear Panel Color Codes	Description			
Best (digital)		White and Side of TV	HDMI (High-Definition Multimedia Interface) - It is the first and only industry-supported, uncompressed, all-digital audio/video interface. HDMI provides an interface between any audio/video source, such as a set-top box, DVD player, or A/V receiver and an audio and/or video monitor, such as a digital television (DTV), over a single cable.			
Best (digital) Good (analog)		Black	DTV Coaxial RF. When used for MPEG2 encoded bit streams from ATSC broadcast programming, this input takes advantage of the High Definition content. TV Coaxial RF. This is the connection for standard NTSC TV using antenna or cable.			
Best (analog)	2000	Blue	RGB PC (VGA) – This video input has separate red, green and blue color components. The signal carries horizontal and vertical sync information on the green signal. This is most commonly used for PC input.			
Better (analog)		Green and Side of TV	Component 1/2 - The video signal is separated into three signals, one containing the black-and-white information and the other two containing the color information. This enhancement over S-Video takes advantage of the superior picture provided by progressive scan DVD players and HDTV formats.			
Good (analog)	SHADEO	Red	S-Video (AV1)- The video signal is separated into two signals, one containing the black-and-white information and the other containing the color information. Separating the color in this way avoids 'cross color' effects where closely spaced black and white lines are erroneously displayed in color. It also enables text to be displayed more sharply.			
Good (analog)		Yellow and Side of TV	AV1/2(Composite) - The complete video signal is carried through this single pin connector. This is the most commonly used video connection.			

Note: For more info refer to the Quick Start Guide

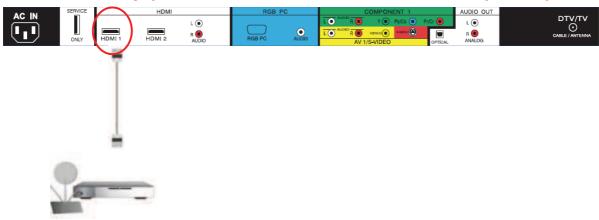

Connecting Your Cable or Satellite Box

Using HDMI

Cable and Satellite Boxes that have a HDMI digital interface should be connected to the HDMI input of the LCD HDTV for optimal results.

Note: To maintain the display quality, use a VIZIO certified HDMI cable. Length is available up to 10 meters. See www.vizio.com or call 1-888-VIZIOCE (1-888-849-4623) for details.

Connecting your Cable or Satellite Box (Best)

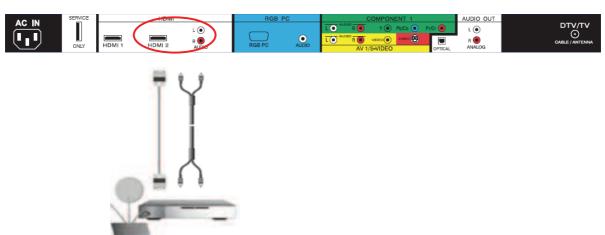

- 1. Turn off the power to the LCD HDTV and HDTV Set-Top Box.
- 2. Connect a HDMI cable to the HDMI output of your HDTV Set-Top Box and the other end to the HDMI Input (white color area) at the rear of the LCD HDTV.
- 3. Turn on the power to the LCD HDTV and HDTV Set-Top Box.
- 4. Select HDMI using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the HDMI button on the Remote Control.

- a) The HDMI input on the LCD TV supports High-bandwidth Digital Content Protection (HDCP). HDCP encrypts the transmission between the video source and the digital display for added security and protection.
- b) If you are already using the HDMI 1 input for another component, or you do not want to use the HDMI 1 input for the Set-Top Box, you can connect the Set-Top Box to the HDMI2, HDMI3 or HDMI4 connection.
- c) Refer to your HDTV Set-Top Box user manual for more information about the video output requirements of the product or consult your cable or satellite operator.

For Cable or Satellite Boxes with DVI:

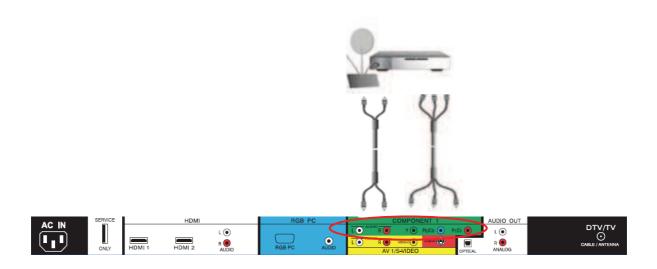

- 1. Turn off the power to the LCD HDTV and HDTV Set-Top Box.
- 2. Using a HDMI-DVI cable, connect the DVI end to your HDTV Set-Top Box and the HDMI end to the HDMI2 Input (white color area) at the rear of the LCD HDTV.
- 3. Using an audio cable (white and red connectors), connect the cable to the audio output connectors associated with the DVI output on your HDTV Set-Top Box and connect the other end to the audio connectors associated with the HDMI input (white area) at the rear of the LCD HDTV.
- 4. Turn on the power to the LCD HDTV and HDTV Set-Top Box.
- 5. Select HDMI2 using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the HDMI button on the Remote Control.

- a) The HDMI input on the LCD TV supports High-bandwidth Digital Content Protection (HDCP). HDCP encrypts the transmission between the video source and the digital display for added security and protection.
- b) If you are already using the HDMI 2 input for another component, or you do not want to use the HDMI 2 input for the Set-Top Box, you can connect the Set-Top Box to the HDMI1, HDMI3 or HDMI4 connection. The LCD TV will recognize the DVI connection and obtain audio information from the audio connectors near HDMI2 input.
- c) Refer to your HDTV Set-Top Box user manual for more information about the video output requirements of the product or consult your cable or satellite operator.

Using Component Video

Connecting your Cable or Satellite Box (Better)

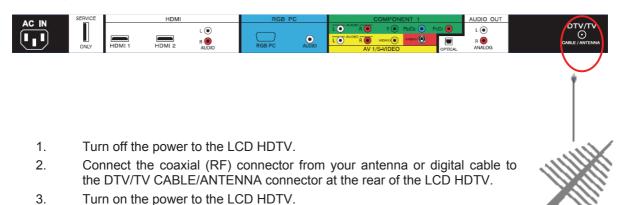

- 1. Turn off the power to the LCD HDTV and HDTV Set-Top Box.
- 2. Connect the Y (green color) connector on your HDTV Set-Top Box to the corresponding Y (green color) connector in the Component 1 group (green color area row of connectors nearest to you when viewing from the rear of the TV) at the rear of the LCD HDTV.
- 3. Connect the PbCb (blue color) connector on your HDTV Set-Top Box to the corresponding Pb (blue color) connector in the Component 1 group (green color area row of connectors nearest to you when viewing from the rear of the TV) at the rear of the LCD HDTV.
- 4. Connect the PrCr (red color) connector on your HDTV Set-Top Box to the corresponding Pr Cr (red color) connector in the Component 1 group (green color area row of connectors nearest to you when viewing from the rear of the TV) at the rear of the LCD HDTV.
- 5. Using an audio cable (white and red connectors), connect the cable to the audio output connectors associated with the Component output on your HDTV Set-Top Box and connect the other end to the audio connectors associated with the Component 1 input (green color area) at the rear of the LCD HDTV.
- 6. Turn on the power to the LCD HDTV and HDTV Set-Top Box.
- 7. Select Component 1 using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the Component button on the Remote Control.

- a) If you are already using the Component 1 input for another component, or you do not want to use the Component 1 input for the Set-Top Box, you can connect the Set-Top Box to the Component 2.
- b) Refer to your HDTV Set-Top Box user manual for more information about the video output requirements of the product or consult your cable or satellite operator.

Connecting Coaxial (RF)

Using Your Antenna or Digital Cable for DTV

Select DTV using the INPUT button on the remote or side of the LCD

HDTV, or directly by pressing the TV button on the Remote Control.

Note:

4.

- a) Not all digital TV broadcasts are High Definition (HD). Refer to the program guides, or consult your cable, satellite or TV station operator.
- b) Digital broadcasts are not available in all areas. Refer to www.antennaweb.org for detailed information
- c) Make sure the antenna and coaxial cable are correctly grounded.

Using Your Antenna or Cable for TV

- 1. Turn off the power to the LCD HDTV.
- 2. Connect the coaxial (RF) connector from your antenna or cable to the DTV/TV CABLE/ANTENNA connector at the rear of the LCD HDTV
- 3. Turn on the power to the LCD HDTV.
- 4. Select TV using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the TV button on the Remote Control.

Using the Antenna or Cable through your VCR

- 1. Turn off the power to the LCD HDTV and VCR.
- 2. Connect the "Output to TV", "RF Out" or "Antenna Out" connector on the rear of your VCR to the DTV/TV CABLE/ANTENNA connector at the rear of the LCD HDTV.
- 3. Turn on the power to the LCD HDTV and VCR.
- Select TV using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the TV button on the Remote Control.

Note: If you have an off-air antenna or cable TV, connect it to the "Antenna In" connector on the rear of your VCR.

Connecting Your DVD Player

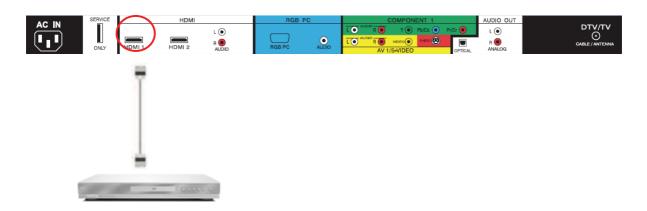

You have several options for connecting your DVD player to your VO47L FHDTV30A – HDMI, Component, S-Video and Composite (AV) inputs. Based on your home theater configuration, you can decide which option is the right one for you.

Using HDMI

DVD players that have a digital interface such as HDMI (High Definition Multimedia Interface) should be connected to the HDMI input of the VIZIO VO47L FHDTV30A for optimal results.

Note: To maintain the display quality, use a VIZIO certified HDMI cable. Length is available up to 10 meters. See www.VIZIO.com or call 1-888-VIZIOCE (1-888-849-4623) for details.

Connecting your DVD Player (Best):

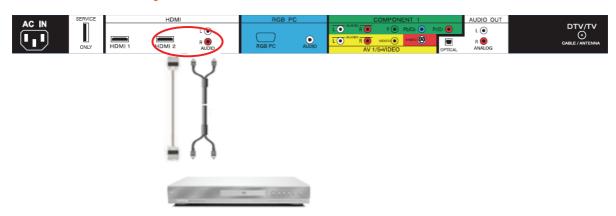

- 1. Turn off the power to the LCD HDTV and DVD player.
- 2. Connect a HDMI cable to the HDMI output of your DVD player and the other end to the HDMI Input (white color area) at the rear of the LCD HDTV.
- 3. Turn on the power to the LCD HDTV and your DVD player.
- 4. Select HDMI using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the HDMI button on the Remote Control.

- a) If you are already using the HDMI1 input for another component, or you do not want to use the HDMI 1 input for the DVD player, you can connect the DVD player to the HDMI2, HDMI3 or HDMI4 connection.
- b) Refer to your DVD player user manual for more information about the video output requirements of the product.

For DVD Players with DVI:

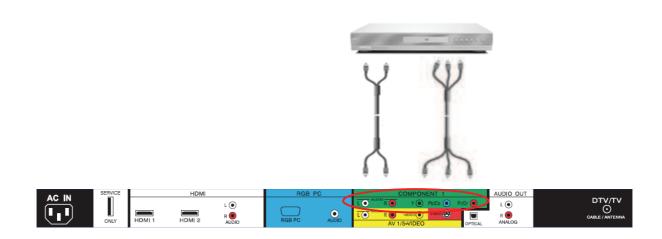

- 1. Turn off the power to the LCD HDTV and DVD player.
- 2. Using a HDMI-DVI cable, connect the DVI end to your DVD player and the HDMI end to the HDMI2 Input (white color area) at the rear of the LCD HDTV.
- 3. Using an audio cable (white and red connectors), connect the cable to the audio output connectors associated with the DVI output on your DVD player and connect the other end to the audio connectors associated with the HDMI input (white area) at the rear of the LCD HDTV.
- 4. Turn on the power to the LCD HDTV and your DVD player.
- 5. Select HDMI2 using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the HDMI button on the Remote Control.

- a) If you are already using the HDMI 2 input for another component, or you do not want to use the HDMI 2 input for the DVD Player, you can connect the DVD player to the HDMI1, HDMI3 or HDMI4 connection. The LCD TV will recognize the DVI connection and obtain audio information from the audio connectors near HDMI2 input.
- b) Refer to your DVD player user manual for more information about the video output requirements of the product.

Using Component Video

Connecting your DVD Player (Better):

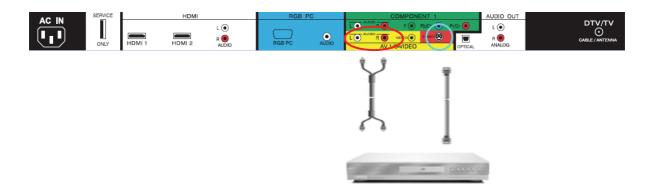

- 1. Turn off the power to the LCD HDTV and DVD player.
- 2. Connect the Y (green color) connector on your DVD player to the corresponding Y (green color) connector in the Component 1 group (green color area row of connectors nearest to you when viewing from the rear of the TV) at the rear of the LCD HDTV.
- 3. Connect the PbCb (blue color) connector on your DVD player to the corresponding PbCb (blue color) connector in the Component 1 group (green color area row of connectors nearest to you when viewing from the rear of the TV) at the rear of the LCD HDTV.
- 4. Connect the PrCr (red color) connector on your DVD player to the corresponding PrCr (red color) connector in the Component 1 group (green color area row of connectors nearest to you when viewing from the rear of the TV) at the rear of the LCD HDTV.
- 5. Using an audio cable (white and red connectors), connect the cable to the audio output connectors associated with the Component output on your DVD player and connect the other end to the audio connectors associated with the Component 1 input (green color area) at the rear of the LCD HDTV.
- 6. Turn on the power to the LCD HDTV and DVD player.
- 7. Select Component 1 using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the Component button on the Remote Control.

- a) If you are already using the Component 1 input for another component, or you do not want to use the Component 1 input for the DVD player, you can connect the DVD player to the Component 2.
- b) Refer to your DVD player user manual for more information about the video output requirements of the product.

Using S-Video (AV1)

Connecting your DVD Player (Good):

- 1. Turn off the power to the LCD HDTV and DVD player.
- 2. Connect the S-Video jack on the rear of your DVD player to the S-Video jack in the AV1 at the rear of the LCD HDTV.
- 3. Using an audio cable (white and red connectors), connect the cable to the audio output connectors associated with the S-Video output on your DVD player and connect the other end to the audio connectors associated with the AV1 input at the rearof the LCD HDTV.
- 4. Turn on the power to the LCD HDTV and DVD player.
- 5. Select AV1 using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the AV button on the Remote Control.

Note: Refer to your DVD player user manual for more information about the video output requirements of the product.

Using Composite (AV) Video

Connecting your DVD Player (Good):

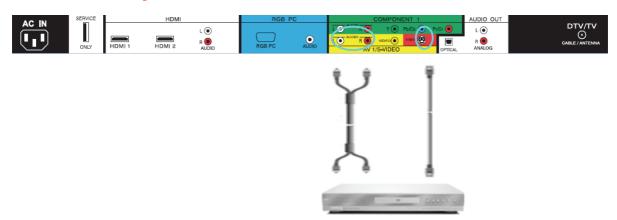

- 1. Turn off the power to the LCD HDTV and DVD player.
- 2. Connect the Video (yellow color) connector on your DVD player to the Video (yellow color) connector in the AV1 input row (yellow color area) of connectors at the rear of the LCD HDTV.
- 3. Connect the R (red color) and L (white color) audio connectors on your DVD player to the corresponding R (red color) and L (white color) audio input connectors in the AV input (yellow color area) row of connectors at the rear of the LCD HDTV.
- 4. Turn on the power to the LCD HDTV and DVD Player.
- 5. Select AV1 using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the AV button on the Remote Control.

Note:

Refer to your DVD player user manual for more information about the video output requirements of the product.

Connecting Your VCR or Video Camera

- 1. Turn off the power to the LCD HDTV and VCR or Video Camera.
- 2. Connect the S-Video jack on the rear of your VCR or Video Camera to the S-Video jack in the AV1 group (red area color) at the back of the LCD HDTV.
- Using an audio cable (white and red connectors), connect the cable to the audio output connectors associated with the S-Video output on your VCR or Video Camera and connect the other end to the audio connectors associated with the AV1 input (red color area) at the rear of the LCD HDTV.
- 4. Turn on the power to the LCD HDTV and VCR or Video Camera.
- 5. Select AV1 using the INPUT button on the remote or side of the LCD HDTV, or directly by pressing the AV button on the Remote Control.

Note: Refer to your VCR or Video Camera user manual for more information about the video output requirements of the product.

Audio

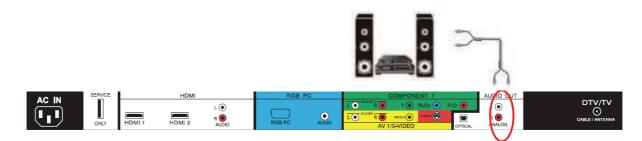

On

PCM

Fixed

●/◆ Select MENU Back

Connecting an external Receiver/Amp

Audio Mode

Digital Audio Out

Analog Audio Out

Reset Audio Mod

Equalizer

Balance SRS TSXT

Lip Sync

- 1. Turn off the power to the LCD HDTV and Receiver/Amp.
- Using an audio cable (white and red connectors), connect the cable to the audio input connectors on the Receiver/Amp and connect the other end to the ANALOG OUT (white area) audio connectors at the rear of the LCD HDTV.
- 3. Turn on the power to the LCD HDTV and Receiver/Amp.

- 5. Press ▶ on the remote control to select the Audio menu.
- 6. Press ▼ on the remote control to select SPEAKERS.
- 7. Press ▶ on the remote control to select OFF so that the sound from the LCD HDTV will now be routed through your Receiver/Amp system.

Note:

- a) Refer to your Receiver/Amp user manual to select the corresponding audio input.
- b) The audio output is not amplified and cannot be connected directly to external speakers.

Optical Output of Audio received with Programs

If your sound system has a SPDIF (optical) digital audio input you can connect it to the Optical AUDIO OUT (white area) at the rear of the LCD HDTV. This is active when receiving audio with the program being viewed no matter what input is being used.

V

Connecting a PC Computer

- 1. Turn off the power to the LCD HDTV and PC Computer.
- 2. Connect a 15-pin D-Sub RGB (VGA) cable to the RGB output of your pc computer and the other end to the RGB PC input (blue area) at the rear of the LCD HDTV.
- 3. Connect the Audio Out on your pc computer to the RGB PC Audio input (blue area) at the rear of the LCD HDTV.
- 4. Turn on the power to the LCD HDTV and PC Computer.
- 5. Select RGB using the INPUT button on the remote or side of the LCD HDTV.

- a) For the best picture quality, please refer to the pc or graphic card's user guide to find out if it is capable of an output of 1920x1080 at 60Hz resolution when using the parameters and values given in Chapter 2 of this User's Manual by way of VESA Reduce Blanking timing.
- b) Refer to your pc computer user manual for more information about the video output requirements of the product.
- c) A RGB (VGA) cable and stereo mini jack cable are not included and can be purchased at an electronics store.

Preset PC Resolutions

If connecting to a PC through the RGB PC input, set the TV timing mode to VESA 1920x1080 at 60Hz for the best picture quality (refer to the graphic card's user guide for questions on how to set this timing mode). Please see the table below for the factory preset resolutions. Also see chart in Chapter 2, for the best resolution that can be obtained through RGB PC input when video card supports 1920x1080 resolution.

Mode No.	Resolution	Refresh Rate (Hz)	Horizontal Frequency (KHz)	Vertical Frequency (Hz)	Horizontal Sync Polarity (TTL)	Vertical Sync Polarity (TTL)	Pixel Rate (MHz)	Remark
1	640 x 480	60	31.46	59.94	Ν	Ν	25.17	Windows
2	640 x 480	75	37.50	75.00	N	N	31.50	Windows
3	800 x 600	60	37.87	60.31	Р	Р	40.00	Windows
4	800x600	72	48.07	72.18	Р	Р	50.00	Windows
5	800x600	75	46.87	75.00	Р	Р	49.50	Windows
6	1024x768	60	48.36	60.00	N	N	65.00	Windows
7	1024x768	70	56.47	70.06	N	N	75.00	Windows
8	1024x768	75	60.02	75.02	Р	Р	78.75	Windows
*9	720x400	70	31.46	70.08	N	Р	28.32	DOS
**10	1920 x 1080	60	66.65	60.00	Р	Р	136.50	Windows

NOTES: N = Negative, P = Positive, * = In DOS Mode only, ** = Primary Mode.

Resolution (1920x1080) through RGB (15-Pin VGA) Input

If your PC supports VESA Reduce Blanking timing via the VGA card drive program (usually offered by the VGA Card Manufacturer), your TV set is equipped to have the 1920X1080 resolution display through this connection using the following timing 136.5MHz. The following parameters are often the values required by the software or programs to set up the display:

Parameters	Horizontal Values (Pixels)	Vertical Values (Lines)
Address	1920	1080
Front Porch	32	1
Sync Width	32	3
Back Porch	64	27
Total	2048	1111
Frequency	66.7 kHz	60 Hz
Sync Polarity	N	N
Pixel Rate (MHz)	136.5	
Refresh Rate (Hz)	60	

Chapter 3 Setting Up to Watch Television

For 'Preparing Your LCD HDTV for Wall Mounting', see page 6.

Basic LCD HDTV Start Up

1. Connecting the Power Cable

Connect the power cord to the power cord connector on the back of the HDTV, and then plug the power cord into an AC wall socket.

2. Connect Audio and Video Cables to the HDTV

(see pages 16 ~ 29 for detailed steps)

3. Turning Power On

Once all the components are connected, press the Power ON button on the side of the HDTV, or press the Power ON (Red) button on the remote control.

4. Initial Setup

After powering on the TV set, the *Initial* Setup screen will come up; please press

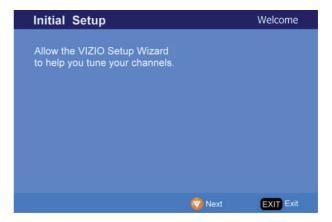

The Language choice screen will be displayed; the default English option is highlighted. If you wish to change the OSD language to Español or Français, press the ▼ button on the remote control to select the language you want.

Press the button on the remote to go to the next screen.

The next screen will display the options to select between **Home Mode** and **Retail Mode**, selecting Home Mode will give you an opportunity to save energy.

Press the button on the remote to go to the next screen.

If **Retail Mode** is selected by mistake; the next option will allow you to switch your selection back to **Home Mode**.

Press the button on the remote to go to the next screen.

Note: At this point, if a set-top box from your cable or satellite service company is being used; please press the **LAST** button on the remote control and skip to Step 5.

Otherwise continue with next step:

 The *Tuner* screen will be displayed. If you are using Cable Service (with no box), press the ▼ button on the remote control to choose CABLE.

Press the button on the remote to go to the next screen.

2. The Channel Scan screen will be displayed; default choice is Scan.

Press the button on the remote control to commence the search for available channels to be stored into memory.

If you do not want to scan for channels at this time, press the ▼ button on the remote to highlight Skip Scan and then press the button.

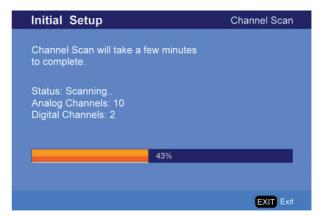

Note: If you select Skip Scan, next time that you decide to complete this procedure; you will need to select the TV as input (through the Input key) and then go through the Menu option to select the Tuner setup to get the option of scanning the channels again.

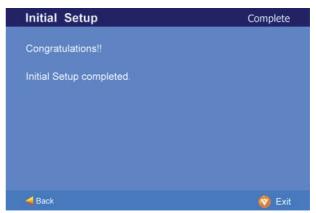

3. The screen will now change to show the progress of the search for Analog (NTSC) and Digital (ATSC) channels.

Note: DTV digital broadcast is not available in all areas. Refer to www.antennaweb.org to get information about availability in your area, type of antenna and in which direction to point your antenna. The channel availability through cable depends upon which channels your cable operator supplies in Clear QAM; consult your cable operator for more information.

 When finished, the Complete screen will be displayed to inform you that the HDTV has completed the Initial Setup

Press the button on the remote control to exit and begin watching TV.

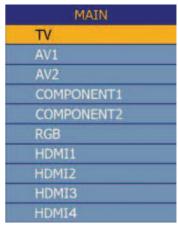

5. Select Input Source

Select the Input Source for the HDTV by pressing the **INPUT** button on the side of the TV or using the Input button on the remote control. Pressing this button will cycle you through the following options: TV, AV1/S-VIDEO, AV2, Component1, Component2, RGB, HDMI1, HDMI2, HDMI3 and HDMI4.

Now follow the procedure below to display channels from a different signal (External TV Tuner, VCR, Cable Box or Satellite Receiver) source, using different inputs at the back of your TV set.

- a. Select the correct input connection; RF (DTV/TV) connector, Composite (Yellow, Red and White) connectors, Component (Red, Green, Blue plus Red and White) connectors, HDMI connectors or Separate-Video (S-Video) plus Red and White connectors (if applicable). Make the physical connection or hook up.
 - b. If you have an HD service you must use the HDMI (best) or Component connection.

Note: Composite (AV) and S-Video Cables can only be used for SD (480i) pictures.

- c. Turn on your Cable Box, VCR, External TV Tuner or Satellite Receiver and you will see a picture on your TV set. If there is not picture, make sure you have selected the correct input on the TV set.
- d. If the selected input is RF, you should be aware that the TV set needs to be on either channel 3 or channel 4 matching the channel which has been selected on the back of the VCR, Cable Box, External TV Tuner or Satellite Receiver; please refer to Owner or User's Manual of such equipment for details.

Note: The TV set will be displaying any television station or program selected by the Cable Box, VCR, External Tuner or Satellite Receiver. The TV set will not be able to change programs or channels; this is controlled by the equipment sending the signal. If the service being used is the one which setup includes a box with two different outputs for two different (distant) rooms, then scanning channels would help you to find the signal. Be aware that the channel to be selected varies from provider to provider; meaning that, you may have to call your provider company so they could provide you the specific channel when using high definition made TV sets. Some examples of these channels are: 105, 106, 115 and 116.

6. Fine Tuning your TV set for Home Use.

After completing Procedure 4 or Procedure 5; please follow the steps below to optimize your TV set display:

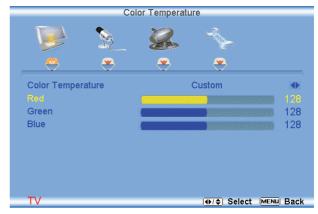

a. Press the **MENU** key to bring up the Menu display. Use the ▲ or ▼ button to scroll to the Advanced Video option.

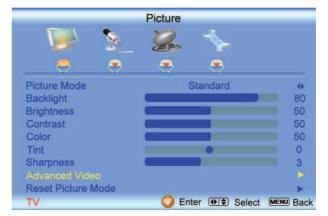

Picture

- b. Press the button to select it.
- c. Use the ▲ or ▼ button to scroll to the Color Temperature option.

- d. Press the ▶button to select it.
- e. Press either ◀ or ▶ button to change setting to Normal, and then press the **MENU** key again to go back to previous screen.
- f. Press either ▲ or ▼ button to select the Picture Mode option.
- g. Press either ◀ or ▶ button to change the Picture Mode option to Standard.
- h. Press the **EXIT** key to exit the on screen display Menu.

Note: If Procedure 4 had been done, you would like to do the following to ensure that the correct program times are shown when pressing the Guide key:

Press the \mathbf{MENU} key, this will bring up the picture mode menu.

Press either ◀ or ▶ button scroll across to the icon showing the little satellite dish or antenna. The next screen will appear showing Time Zone.

Press either ▲ or ▼ button to select it.

Press either ◀ or ▶ button to choose the proper Time Zone of your area.

Press the **MENU** key once to return to the previous screen or press **EXIT** to return to your program if task has been completed.

Your new TV set is now ready to automatically reproduce the best picture quality out of the input signal which is been fed into it. Enjoy your TV watching!!

Watching a TV Program

Before you start watching TV, please make sure that any cable, satellite or off-air antenna connections are secure. Also, verify that the power cord is plugged into a correctly grounded electrical outlet or surge protector.

- 1. Press the power button on the remote or on the side of the HDTV. The VIZIO logo on the front will change from orange to white.
- 2. There are 3 options for selecting your programming:
 - a. If you are using an antenna or cable connected through the DTV/TV CABLE/ANTENNA input, you can select TV directly by pressing the TV button on the remote, or by pressing the INPUT button on the remote or on the side of the HDTV.
 - b. If you are watching broadcasts through a cable or satellite set-top box connected by an HDMI cable, select HDMI directly by pressing the **HDMI** button on the remote, or by pressing the **INPUT** button on the remote or on the side of the HDTV.
 - c. If you are watching broadcasts through a cable or satellite set-top box connected by a Component (YPbPr) cable, select Component directly by pressing the **COMP** button on the remote, or by pressing the **INPUT** button on the remote or on the side of the HDTV.

Note: You should be able to see a picture. If you do not, make sure that all of the HDTV connections are secure and you have selected the correct video input source.

3. When using option 2a, press the Channel buttons on the remote or the **CH+** / **CH-** buttons on the side of the HDTV to change the channel. Note: The Channel buttons, on the side of the HDTV and on the remote, control will not work if you are watching a program using HDMI.

Component and AV inputs. You can also press the button on the remote control to bring up the channel list.

Press either ▲ or ▼ button to select the desired channel.

N IN

Adjusting Basic HDTV Settings

Volume

To adjust the volume, press and hold the **VOL+** or **VOL-** button on the side of the LCD HDTV or remote control until the desired level is reached.

TV Channels

To step up or down through the available TV channels, press the **CH+** or **CH-** button on the side of the HDTV or remote control once for the next or previous channel, or hold it depressed until the desired channel is reached. Note: Channel up and down will only operate in DTV and TV modes.

You can also press the button on the remote control to bring up the channel list.

Press either ▲ or ▼ button to select the desired channel.

Wide

Using this feature, you can watch video content in different size modes on the HDTV.

Press the **MENU** button on the remote control to bring up the OSD screen.

Press either the ◀ or ▶ button to select Setup (wrench icon) options.

Press the V button scroll down to Wide and select it.

Press either the ◀ or ▶ button to select among the modes.

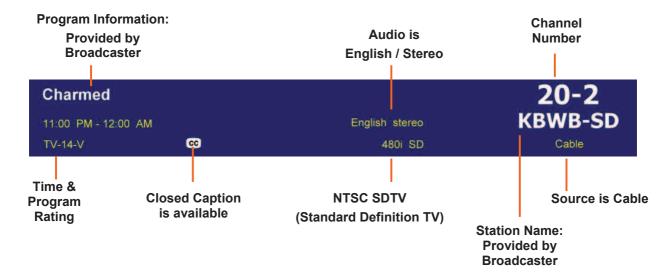

Fore more information see Viewing Modes, on page 68.

Program Information

When you change TV channels or inputs, an Information Banner is displayed for a few seconds to tell you the status of the LCD HDTV.

Chapter 4 Advanced Adjustment of HDTV Using the On Screen Display (OSD)

The remote control or the control buttons on the right hand side of the TV can control all the function settings. The On Screen Display (OSD) allows you to adjust the save contrast, brightness and other settings. The TV will save changes made to the settings, even if the TV is turned off.

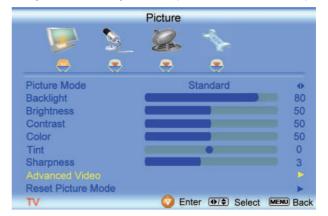

The OSD consists of several menu options: Picture Adjust, Audio Adjust, Setup and TV Tuner Setup.

The main menu options may very depending on your selected input source.

Note: Some of the main menu options may have additional submenus, i.e. the TV Rating submenu for Parental Controls.

Press the **MENU** button on the remote control or the side of the TV and the Picture Adjust menu will be shown on the screen.

Press the < or > button on the remote control or the **VOL+** or **VOL-** button on the side of the HDTV to select one of the other menu options.

Once the menu option is displayed, press the ▲ or ▼ button on the remote control or the CH+ or CH-button on the side of the TV to select one of the items to adjust.

Press the ▶ button on the remote control or the **VOL-** button on the side of the HDTV to begin adjustment of the item.

Press **MENU** when finished.

Press the **MENU** key once to return to the previous screen or press **EXIT** to return to your program if task has been completed.

DTV / TV Input Picture Adjustment

Picture Mode

When the **MENU** button is pressed, the On Screen Display (OSD) appears on the PICTURE adjustment page.

Press the ▼ button to highlight the Picture Mode selection.

Use the ◀ or ▶ button to choose from Custom, Standard, Movie, Game, Vivid, Football, Golf, Basketball and Baseball.

Picture Adjustments are available for you to set them to your preferred settings.

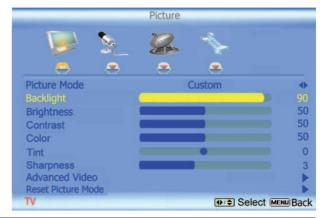

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Backlight

Press the V button to highlight the Backlight selection.

Press the button to start adjusting the brightness of the Backlight and the menu page will disappear and be replaced by a small Backlight Indicator Bar so you can see the light level between the minimum and maximum available levels.

Use the ◀ or ▶ button to adjust the level.

Backlight

25

The Backlight level does not affect the Brightness (black level) or Contrast (white level) of the picture, it adjusts the lamp current and this affects the overall brilliance of the picture.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Note: This setting will be unavailable if Enhanced Contrast Ratio is turned on. To access, scroll down to Advanced Video and set Enhanced Contrast Ratio to OFF.

V

Version 11/20/2008

Brightness

Press the V button to highlight the Brightness selection.

Press the ▶ button to start adjusting the brightness and the menu page will disappear and be replaced by a small Brightness Indicator Bar so you can see the brightness level between the minimum and maximum available levels.

Use the ◀ or ▶ button to adjust the level.

The Brightness adjusts the black levels in the picture. If the brightness is too low you will not be able to see the detail in darker parts of the picture and if the brightness is too high the picture will look washed out.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Contrast

Press the ▼ button to highlight the Contrast selection.

Press the ▶ button to start adjusting the contrast and the menu page will disappear and be replaced by a small Contrast Indicator Bar so you can see the contrast level between the minimum and maximum available levels.

Use the ◀ or ▶ button to adjust the level.

The Contrast adjusts the white levels in the picture. If the contrast is too low the picture will look washed out and if the contrast is too high you will not be able to see any detail in the bright parts of a picture.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Color

Press the ▼ button to highlight the Color selection.

Press the button to start adjusting the color and the menu page will disappear and be replaced by a small Color Indicator Bar so you can see the color level between the minimum and maximum available levels.

Use the ◀ or ▶ button to adjust the level.

The Color adjusts the amount of color in the picture.

Tint

Press the ▼ button to highlight the Tint selection.

Press the button to start adjusting the tint and the menu page will disappear and be replaced by a small Tint Indicator Bar so you can see the tint adjustment to the left or right of the nominal position.

Use the ◀ or ▶ button to adjust the level.

The Tint adjusts the hue of the picture. The easiest way to set tint is to look at flesh tones and adjust for a realistic appearance. In most cases, the default middle position is correct. If people's faces look too orange try reducing the level of color first as the case of this is often too much color.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Sharpness

Press the ▼ button to highlight the Sharpness selection.

Press the ▶ button to start adjusting the sharpness and the menu page will disappear and be replaced by a small Sharpness Indicator Bar so you can see the sharpness level between the minimum and maximum available levels. Use the ◀ or ▶ button to adjust the level.

The Sharpness adjusts the sharpness of the picture.

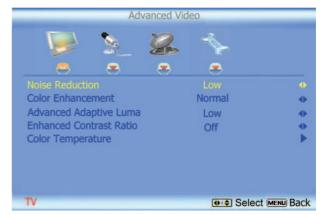

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Advanced Video Features

Press the ▼ button to highlight the option for Advanced Video selection and press either the ▶ button to select it. A new menu will be displayed showing the advanced functions available for fine tuning of the picture.

Noise Reduction (SNR)

Press the ▼ button to highlight Noise Reduction (SNR). Use this feature to diminish picture artifacts caused by the digitizing of image motion content that may be present in the picture. Press the ◀ or ▶ button to choose from the Off, Low, Medium or Strong setting.

Color Enhancement

Press the vegetation button to highlight Color Enhancement. Use this feature to increase the picture reproduction performance of the picture.

Press the ◀ or ▶ button to choose from Off, Normal, Rich Color, Green/Flesh and Green/Blue setting. Once the adjustments are completed press the **EXIT** button to exit the OSD.

Advanced Adaptive Luma

Press the volume button to highlight Advanced Adaptive Luma. Large areas of darkness in a picture will result in a loss of details; activation of this feature will counteract this effect.

Press the ◀ or ▶ button to choose from the Off, Low, Medium, Strong or Extend setting.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Enhanced Contrast Ratio (DCR)

Press the button to highlight Enhanced Contrast Ratio. This feature can be set to On or OFF to allow the TV set to adjust its backlight to display dark and bright scenes with a more vivid or intense quality.

Press the ◀ or ▶ button to turn this feature On or Off

Note: Backlight setting is disabled if this option is set to On.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Color Temperature

Press the veg button to highlight the option for Color Temperature selection.

The default is COOL; this is the 9300K setting.

Press the ◀ or ▶ button if you want to choose the Normal, Warm or Custom option.

A new menu will be displayed showing the primary color items, Red, Green and Blue.

Press the ▼ button to highlight the color you wish to adjust.

Press the button to start adjusting the color and the menu page will disappear and be replaced by a small Color (Red, Green or Blue) Indicator Bar as before.

Use the ◀ or ▶ button to adjust the color.

attenuation. For example if you want to boost the bass you would highlight 120Hz and turn it up.

Balance

Press the ▼ button to highlight the Balance selection.

Press the ▶ button to start adjusting the balance and the menu page will disappear and be replaced by a small Balance Indicator Bar, as before, so you can see the balance adjustment to the left or right of the nominal position.

Use the ◀ or ▶ button to adjust the left/right balance.

Once the adjustments are completed press the EXIT button to exit the OSD.

SRS TSXT

Press the ▼ button to highlight the SRS TSXT selection.

Press the ▶ button to select for the true surround sound feature to be On or Off.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Digital Audio Out

Press the ▼ button to highlight the Digital Audio Out selection.

Press the ◀ or ▶ button to make the proper selection. The options are OFF, Dolby Digital and PCM.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Speakers

Press the ▼ button to highlight the Speakers selection.

Press either ◀ or ▶ button to turn the internal speakers On or Off. You may want to turn-off the internal speakers when listening to the audio through your Home Theatre System.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Audio Out

Press the ▼ button to highlight the Audio Line Out selection.

Press either ◀ or ▶ button to turn the audio out signal to Fixed or Variable. When it is set to variable, volume from the external speakers will change according to the volume setting on the TV. If it is fixed, the volume can only be changed by the settings on the external stereo system.

Lip Sync

Included with the advanced technology of your TV, a feature which will compensate the shortcomings of signal transmission called audio sync (Lip Sync). Lip Sync is designed to adjust the audio of the program being viewed so that it matches the movement of the lips of someone talking on the screen. This feature is built into your set, and it can be applied to all inputs. To use this feature, follow the steps below.

Press the **MENU** key to bring up the OSD.

Using either the ◀ or ▶ button scroll across to the microphone icon, the Audio menu will be displayed.

Press either ▼ or ▲ button to scroll either up or down to Lip Sync.

Press either ◀ or ▶ button to make the appropriated adjustment.

Once the adjustments are completed press the **EXIT** button repeatedly to exit the OSD.

Note: Lip Sync settings are independent on each channel and signal source.

Press the ▼ button to highlight the option for Reset Audio Mode selection

Press ▶ button to return on Audio settings to factory default.

Once the adjustments are completed press the EXIT button repeatedly to exit the OSD.

Note: Only settings under the audio adjustment tab will be reset.

Audio

DTV / TV Tuner Setup

When you first used your HDTV you will have setup your TV for DTV / TV channels using the Initial Setup screens. If you did not do this or if your setup has changed, you can do this from the TV TUNER SETUP menu.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Tuner Mode

When the button is pressed, the On Screen Display (OSD) appears on the PICTURE adjustment page. Press the button to display the TV page.

Press the ▼ button to highlight the Tuner Mode selection.

Press the button to choose Cable or Air (Antenna) depending upon which equipment you have attached to the DTV / TV Input.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Auto Search

Press the ▼ button to highlight the Auto Search selection.

Press the button to Auto Search for TV channels available. The TV will automatically search for analog and digital channels.

Partial Channel Search

If you believe channels are missed from the auto search, you can do a partial channel search to look for channel in a certain channel range again. Press the volume button to highlight the Partial Channel Search selection.

Press the button to enter the submenu.

Press the ▶ button to select scan mode to look for Analog, Digital, or both Analog/Digital channels.

Press the ▼ button to highlight the "To" and "From" selection. Press the ▶ button to select the range of channel numbers you want to start searching in.

Press to start channel search.

Press to start channel search.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

After the TV has stored all of the available DTV channels in memory you will find that some channels will be too weak to watch comfortably or they may be channels you do not want to see. Select the channel you wish to remove, press the MENU and ▶ buttons to open the TV TUNER SETUP menu and then press the ▼ button to highlight SKIP CHANNEL. Press the ▶ button to select this channel to be skipped when using the CH+ or CH- button. You will still be able to select this channel using the number buttons on the remote control.

MTS

This feature allows you, the user to select the different languages in which the signal provider or broadcaster is transmitting the audio with the program you are watching. This signal is usually or in most cases Spanish language.

Press the V button as many times as it takes to scroll down to this option and get it highlighted.

Press either ◀ or ▶ button to go through the settings of this feature to make your selection.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Time Zone

Setting the correct Time Zone for your area will ensure that the correct program times are shown after pressing the GUIDE button on the remote control.

Press the ▼ button to highlight the Time Zone selection.

Press the button to select your area.

Daylight Saving

As for Time Zone, setting the daylight saving time for your area will ensure that the correct program times are shown after pressing the GUIDE button on the remote control.

Press the ▼ button to highlight the Daylight Saving selection.

Press the button to select On or Off.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

DTV / TV Input Setup

Language

When the **MENU** button is pressed, the On Screen Display (OSD) appears on the PICTURE adjustment page. Press the ▶ button until the SETUP page is displayed.

Press the ▼ button to highlight the Language selection. The default is English.

Press the ▶ button to select Español or Français.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

PIP (Picture-in-Picture)

Press the ▼ button to highlight the PIP(Picture-in-Picture) selection.

Press the ▶ button. A separate menu will appear with the following PIP settings.

PIP Mode

Press the ▼ button to highlight the PIP mode selection.

Press the \triangleleft or \triangleright button to select Off, PIP or POP(Picture-outside picture). In the PIP mode a smaller sub screen will be displayed on top of the main screen. For the POP mode the main screen and sub screen will be of equal size and be positioned side by side.

PIP Source

When PIP or POP is selected, Press the ▼ button to highlight the PIP Source selection.

Press the \triangleleft or \blacktriangleright button to choose the input source for the sub screen. The input sources available will vary according to which input is used for the main screen; see the table below to find which inputs can PIP/POP with each other.

See below for detailed information regarding the PIP sources.

18 ans+- Adults only

Press the ▲ or ▼ button to navigate through the Movie rating options.

Press the wbutton to block (locked) or allow (unlocked).

Check for DTV Rating

This option is designed to update the TV or Movie table of different ratings for programs being viewed in your local or regional area. It will allow the parental guidance control feature in your TV to have the most current parental control database for a digital signal. This option may be available in the future for activation. This option works as follows: Whenever you decide to use the Parental Control feature and this option has been activated in your area, the Check for New DTV Rating will be a solid color indicating that an update is available for any rating tables. After entering the password, the Parental menu will appear on the screen, and then do the following.

Observe the status of the **DTV Rating**. If option is faded out, no update is available (the option is not activated in your area).

If it is not faded out, press either ▲ or ▼ button to select this option.

Press button to execute this operation. Please follow the on screen instructions to complete this procedure.

Press either ▲ or ▼ to select and then adjust any other option in this menu.

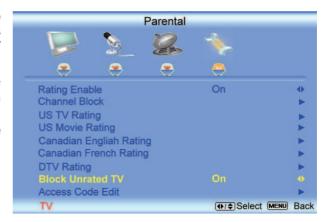

Block Unrated Programming

Follow the procedure in the previous section to display the Parental Control menu and then press the ▼ button to highlight the Block Unrated TV selection.

Press the button to turn-on or turn-off the blocking of programming that does not have a rating.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Change the Password

Press the ▼ button to highlight the Access Code Edit selection.

Press the ▶ button and the new Password panel will be displayed.

Enter the new, 4-digit password using the number buttons on the remote. Enter it a second time to confirm you entered it correctly.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Note: Make sure you write down and store the new password in a secure place. The System Reset feature does NOT reset the password.

System Reset

Press the ▼ button to highlight the System Reset selection.

Press the ▶ button to reset the TV to the default factory settings.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

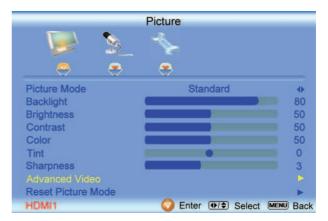

Note: This does NOT reset the Parental Control Password.

HDMI Input Picture Adjustment

The Picture Adjust menu operates in the same way for the HDMI Input as for the DTV / TV input section. Once the adjustments are completed press the **EXIT** button to exit the OSD.

HDMI Input Audio Adjustment

The Audio Adjust menu operates in the same way for the HDMI Input as for the DTV / TV input section.

HDMI Input Setup

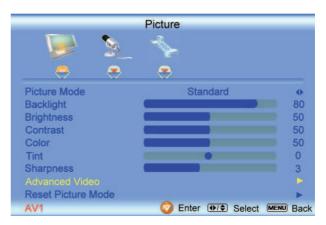

The Setup menu operates in the same way for the HDMI Input as for the DTV / TV input section. The menu difference is that there is no DTV / TV or Parental Control adjustments.

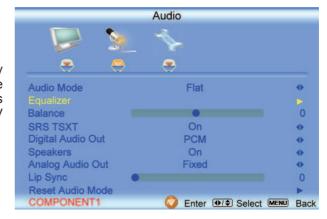

Video Input Picture Adjustment

The Picture Adjust menu operates in the same way for Video Inputs (Component and AV) as for the DTV / TV input section. The menu difference is that there is no icon along the top for DTV / TV adjustments.

Video Input Audio Adjustment

The Audio Adjust menu operates in the same way for Video Inputs (Component and AV) as for the DTV / TV input section. The menu difference is that there is no icon along the top for DTV / TV adjustments.

Video Input Setup

The Setup menu operates in a similar way for Video Inputs (Component and AV) as for the DTV / TV input section. The menu difference is that there is an auto phase setting under the H/V Position submenu when using Component input.

Auto Phase (for Component input)

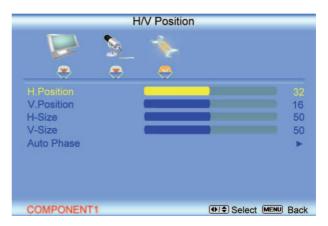

Press the ▼ button to highlight the H/V Position.

Press the button and the new H/V Position submenu will be displayed.

Press the V button to highlight Auto Phase.

Press the ▶ button to execute this option. The TV will automatically look for the phase of the signal to fine tune the picture.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Video Input Parental Control

The Parental Control menu operates in the same way for Video Inputs (Component and AV) as for the DTV / TV input section. The menu difference is that there is no icon along the top for DTV / TV adjustments.

PC Input Picture Adjustment

The Picture Adjust menu operates in the same way for the PC Input as for the DTV / TV input section for Backlight, Contrast, Brightness and Color Temperature.

Auto Adjust

When the **MENU** button is pressed, the On Screen Display (OSD) appears on the PICTURE adjustment page.

Press the ▼ button to highlight the Auto Adjust selection.

Press the ▶ button for the LCD HDTV to adjust to the PC signal timing automatically.

Backlight

Press the ▼ button to highlight the Backlight selection.

Press the ▶ button to start adjusting the brightness of the Backlight and the menu page will disappear and be replaced by a small Backlight Indicator Bar so you can see the light level between the minimum and maximum available levels.

Use the ◀ or ▶ button to adjust the level.

The Backlight level does not affect the Brightness (black level) or Contrast (white level) of the picture, it adjusts the lamp current and this affects the overall brilliance of the picture.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Brightness

Press the ▼ button to highlight the Brightness selection.

Press the ▶ button to start adjusting the brightness and the menu page will disappear and be replaced by a small Brightness Indicator Bar so you can see the brightness level between the minimum and maximum available levels.

Use the ◀ or ▶ button to adjust the level.

The Brightness adjusts the black levels in the picture. If the brightness is too low you will not be able to see the detail in darker parts of the picture and if the brightness is too high the picture will look washed out

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Contrast

Press the ▼ button to highlight the Contrast selection.

Press the ▶ button to start adjusting the contrast and the menu page will disappear and be replaced by a small Contrast Indicator Bar so you can see the contrast level between the minimum and maximum available levels.

Use the ◀ or ▶ button to adjust the level.

The Contrast adjusts the white levels in the picture. If the contrast is too low the picture will look washed out and if the contrast is too high you will not be able to see any detail in the bright parts of a picture.

Color Temperature

Press the veg button to highlight the option for Color Temperature selection.

The default is the 9300K (Cool) setting.

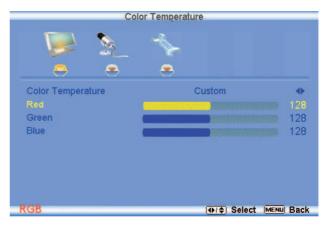

Press the ◀ or ▶ button if you want to choose the 9300, 6500 or Custom option.

A new menu will be displayed showing the primary color items, Red, Green and Blue. Press the ▼ button to highlight the color you wish to adjust.

Press the ▶ button to start adjusting the color and the menu page will disappear and be replaced by a small Color (Red, Green or Blue) Indicator Bar as before. Use the ◀ or ▶ button to adjust the color.

Press the **MENU** button when finished. Repeat the procedure to adjust the other colors if desired.

H-SIZE

Press the ▼ button to highlight the H-Size selection.

Press the button to start adjusting the horizontal size of the picture.

Use the ◀ or ▶ button to adjust the horizontal size.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

H. Position

Press the ▼ button to highlight the Horizontal Shift selection.

Press the ▶ button to start adjusting the horizontal position of the picture.

Use the ◀ or ▶ button to adjust the horizontal position.

Once the adjustments are completed press the **EXIT** button repeatedly to exit the OSD.

V. Position

Press the ▼ button to highlight the Vertical Shift selection.

Press the ▶ button to start adjusting the vertical position of the picture.

Use the ◀ or ▶ button to adjust the vertical position.

Once the adjustments are completed press the **EXIT** button to exit the OSD.

Fine Tune

Press the ▼ button to highlight the Fine Tune selection.

Press the button to start tuning the to the PC signal.

Use the ◀ or ▶ button to adjust the tuning.

PC Input Audio Adjustment

The Audio Adjust menu operates in the same way for the PC Input as for the DTV / TV input section. The menu difference is that there are no icons along the top for DTV / TV and Parental Control adjustments.

PC Input Setup

The Setup menu operates in the same way for the PC Input as for the DTV / TV input section. The menu difference is that there is no icon along the top for TV adjustments and no Closed Caption.

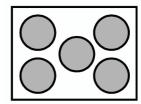

Understanding Viewing Features

Your HDTV features the following viewing modes. You can switch viewing modes using the remote control, please follow the instructions in page 37.

Viewing Modes

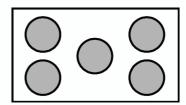

Normal Mode

The original 4:3 aspect ratio (1.33:1 source) is preserved, so black bars are added to the left and right of the display image. Standard TV broadcasts are displayed with a 4:3 Aspect Ratio. Movies in 4:3 Aspect Ratio may be referred to as pan-and-scan or full frame. These movies were originally filmed in 16:9 (widescreen), and then modified to fit a traditional TV screen (4:3).

Wide Mode

When watching a standard broadcast or full-frame movie in this mode, the display image is stretched proportionately to fill the TV screen. When watching a widescreen (1.78:1 source) program or movie, the display image fills the TV screen. If you are watching a widescreen (1.85:1 or 2.35:1 source) program or movie, there will still be black bars at the top and bottom.

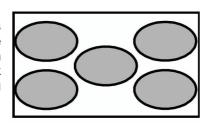

Zoom Mode

When watching a widescreen (1.78:1, 1.85:1, or 2.35:1 source) program or movie, the display image is zoomed proportionally to fill the width of the screen. The top and bottom are cut off to remove most of the source material's black bars. This mode is good for programs or movies with sub-titles.

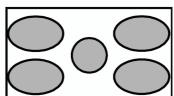

Stretch Mode

When watching a widescreen program (1.78:1 source) with black bars on the sides, the display image will stretch to fill the TV screen. People will appear wider than they really are. If you are watching a widescreen (1.85:1 or 2.35:1 source) program or movie, there will still be black bars at the top and bottom. This mode is available only when watching a widescreen program.

Panoramic Mode

When watching a standard broadcast or full frame movie in this mode, the 4:3 Aspect Ratio (1.33:1 source) display image is stretched horizontally on the left and right sides to fill the TV screen. The center of the image is not stretched.

Picture-In-Picture (PIP) Mode

Your TV features PIP mode so you can watch two pictures at the same time. When PIP is turned on, you can display two pictures at one time. One picture is displayed as the full screen (main screen) and the other picture is displayed in a small window (sub screen). The sub-screen can be set to small, medium or large.

See below for detailed information regarding the PIP sources.

SUB	DTV	TV	AV1	AV2	Component 1	Component 2	HDMI1	HDMI2	HDMI3	HDMI4	RGB
DTV					✓	✓	✓	✓	✓	✓	✓
TV					✓	✓	✓	✓	✓	✓	✓
AV1					✓	✓	✓	✓	✓	✓	✓
AV2					✓	✓	✓	✓	✓	✓	✓
Component 1	✓	✓	✓	✓			✓	✓	✓	✓	
Component 2	✓	✓	✓	✓			✓	✓	✓	✓	
HDMI 1	✓	✓	✓	✓	✓	✓					✓
HDMI 2	✓	✓	✓	✓	✓	✓					✓
HDMI 3	✓	✓	✓	✓	✓	✓					✓
HDMI 4	✓	✓	✓	✓	✓	✓					✓
RGB	✓	✓	✓	✓			✓	✓	✓	✓	

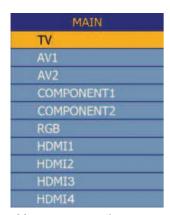

[&]quot;\rightarrow" – Indicates which inputs are available for PIP and POP modes.

Adjusting Basic PIP Settings

The PIP channel is independent of the main TV channel. To change the PIP channel, press the **P.CH** button on the remote control. Alternatively, you can change the PIP channel by pressing the **CH+** or **CH-**

button.

Repeated pressing of the **PIP** button will turn on, turn off the PIP mode.

Press the **P.SIZE** button to alternate between Small, Medium and Large PIP sizes.

Repeated pressing of the **P. INPUT** button will cycle through

the inputs for PIP. This button has no effect when PIP is off.

You can swap the program that is in the main picture with the program in the PIP sub-picture. To swap the main picture program with the PIP sub-picture program, press **SWAP** on the remote control. If you press **SWAP** again, it will return the program to the main picture.

Programming the VIZIO Universal Remote Control

You can program the remote control to work with up to four (including TV) different pieces of equipment including your VIZIO VO47L FHDTV30A . Listed below are the steps for programming your VCR or DVD, Cable or Satellite Box and Audio Receiver/Amplifier.

Programming for Audio Receiver

- 1. Manually turn on the audio receiver.
- 2. Press the **RCVR** button on the remote control.
- 3. Press and hold the **SET** button until the LED LIGHT flashes twice. If it flashes 5 times replace the batteries.
- Find the programming code for your audio receiver in the code list in the back of this book and enter it using the Number Buttons. If the code is accepted, the LED flashes twice after the last digit is entered.
 - If the LED does not flash twice, repeat Steps 2 through 4 with the next code listed for the component and manufacturer.
- 5. Point the remote control at the audio receiver and press the **POWER** button. The receiver will turn off.

Note:

- a) If your audio receiver does not respond, try all the codes for your audio receiver brand. If the codes do not work, or your brand is not listed, see "Searching for Component Codes."
- b) Sometimes a code listed will only include limited functions. Try other codes that may include more functionality.

Programming for Cable or Satellite Set-Top Box

- 1. Manually turn on the Cable or Satellite Box.
- 2. Press the **CABLE** button on the remote control.
- 3. Press and hold the **SET** button until the LED LIGHT flashes twice. If it flashes 5 times replace the batteries.
- 4. Find the programming code for your Cable or Satellite Box in the code list in the back of this book and enter it using the Number Buttons. If the code is accepted, the LED flashes twice after the last digit is entered. If the LED does not flash twice, repeat Steps 2 through 4 with the next code listed for the component and manufacturer.
- 5. Point the remote control at the Cable or Satellite Box and press the **POWER** button. The Cable Box will turn off.
 - If the LED does not flash twice, repeat Steps 2 through 4 with the next code listed for the component and manufacturer.

Note:

- a) If your Cable or Satellite Set-Top Box does not respond, try all the codes for your brand. If the codes do not work, or your brand is not listed, see "Searching for Component Codes."
- b) Sometimes a code listed will only include limited functions. Try other codes that may include more functionality.

Programming for VCR/DVD Player

- 1. Manually turn on the VCR or DVD Player.
- 2. Press the **DVD** button on the remote control.
- 3. Press and hold the **SET** button until the LED LIGHT flashes twice. If it flashes 5 times replace the batteries.
- 4. Find the programming code for your VCR or DVD player in the code list in the back of this book and enter it using the Number Buttons. If the code is accepted, the LED flashes twice after the last digit is entered. If the LED does not flash twice, repeat Steps 2 through 4 with the next code listed for the component and manufacturer.
- 5. Point the remote control at the VCR or DVD Player and press the **POWER** button. The VCR or DVD Player will turn off.

Note:

- a) If your VCR or DVD player does not respond, try all the codes for your brand. If the codes do not work, or your brand is not listed, see "Searching for Component Codes."
- b) Sometimes a code listed will only include limited functions. Try other codes that may include more functionality.

Searching for Component Codes

If you cannot find the manufacturer in the component list or the program code does not work, you can use the remote control to search for the correct component code.

To search for a component code:

- 1. Turn on the component.
- 2. Press the matching component button on the remote control.
- Press and hold the SET button until the LED flashes twice. If the LED flashes 5 times replace the batteries.
- 4. Press 9 1. The LED flashes twice.
- 5. If the component is a cable or satellite set top box press 0, if it is a DVD player press 2, if it is an audio receiver or amplifier press 3.
- 6. Point the remote control at the component and then alternate between pressing the **POWER** button and the **CH+** button on the remote control until the component turns off. When it turns off press the **SET** button to save the current code. The LED will flash twice.

Using a Cable or Satellite Remote

To use a cable or satellite remote to work the LCD HDTV, refer to your cable or satellite remote user guide for more information on how to program the remote. If your cable or satellite remote uses a 5-digit code (like most Direct TV units), first try 11758 and then, if that does not work, try 01377 and 10178. If your cable or satellite remote uses a 4-digit code, try 1758 and then 0178 as an alternative. If your cable or satellite remote uses a 3-digit code (Echostar or Dish Network for example), use code 627.

Note: Some buttons may not function as expected on your cable or satellite remote. Typically power, volume and mute will work.

Chapter 5 Maintenance and Troubleshooting

Maintenance

Important

- Make sure that the power cable is removed from the socket before cleaning the TV.
- 2. Do not use volatile solvent (such as toluene, rosin and alcohol) to clean the TV. Such chemicals may damage the housing, screen glass and remote control, and cause paint to peel.

Cleaning the Housing and Remote Control

- 1. Use a soft cloth for cleaning.
- 2. If the housing or remote control is seriously contaminated, use a soft cloth moistened with diluted neutral cleaner to clean the display. Wring water out of the cloth before cleaning to prevent water from penetrating into the housing. Wipe the display with a dry cloth after cleaning.

Cleaning the Screen

- 1. Use a soft cotton cloth to gently clean the screen.
- 2. The screen glass is very fragile. Do not scrape it with any sharp object. Do not press or tap the screen to avoid cracking. When the screen is seriously contaminated, use a soft cloth moistened with diluted neutral cleaner to clean the display. Wring water out of the cloth before cleaning to prevent water from penetrating into the housing. Wipe the display with a dry cloth after cleaning.

Troubleshooting Guide

If the TV fails or the performance changes dramatically, check the display in accordance with the following instructions. Remember to check the peripherals to pinpoint the source of the failure. If the display still fails to perform as expected, contact the VIZIO for assistance by calling 1-877-MYVIZIO(877-698-4946) or e-mail us at techsupport@vizio.com.

Problem	Solution	
No power.	Make sure the power button is ON (White VIZIO Logo).	
	Make sure AC power cord is securely connected to the AC socket.	
	Plug another electrical device (like a radio) to the power outlet to verify that the outlet is supplying the proper voltage.	
No sound.	Check your audio connection	
	Press MUTE on the remote control again, so that MUTE disappears from the screen	
	Check your audio settings, your TV audio may be set to SAP, min or speakers off.	
	Press the Volume + (Up) key on your remote control	
	Make sure that headphones are not connected	
If the screen is black.	Check your input connections.	
Power is ON but no screen image.	Make sure the video cable supplied with the TV is secured to the correct video output port on the back of the VCR and the TV. Make any cable you have attached	

Problem	Solution	
	to the TV is secured to the correct output your Set-Top Box, DVD, etc. Adjust brightness and contrast. Check Source settings.	
Wrong or abnormal colors appear.	If any colors (red, green, or blue) are missing, check the video cable to make sure it is securely connected.	
Control buttons do not work.	Press only one button at a time.	
Remote Control does not work.	Make sure batteries are inserted correctly Batteries could be weak. Make sure you have selected TV on the remote.	
There appears to be image quality issues.	For best image quality, view HD wide screen programs where possible. If HD content is not available view "Standard Definition" from a digital source. Standard, analog TV will always be noticeably inferior to HD because your digital flat panel TV has video that is many times better than old TV's and so you can see interference and deficiencies you did not know you had.	
You cannot see a picture.	Make sure that the power cord is plugged into a grounded electrical outlet. Make sure that the power button is turned on. Make sure that the selected input source is connected to a working input source. If your TV is connected to your computer in RGB or HDMI mode, press any key on your keyboard to "wake" your computer.	
You see a distorted picture or hear unusual sound.	You may be getting interference from electrical appliances, cars, motorcycles, or fluorescent lights. If you have not mounted it on the wall, try moving your TV to another location to see if this is the cause of the problem.	
The picture has abnormal patterns.	al Make sure that the input source cable is attached securely and correctly to the back of your TV. Make sure that the video input source is within the range of your TV. Compare the video input source's specifications with your TV specifications.	
The display image does not cover the entire screen.	Display (OSD) are set correctly. If you are using TV, AV1, AV2 or Component with 480i input, use the WIDE button on the remote control to scroll through various screen modes. Make sure that the volume is not turned down. Make sure that the sound is not muted. Make sure that your audio input source cables are connected securely and correctly. Your LCD HDTV is manufactured using an extremely high level of precision technology, however, sometimes some pixels of your LCD HDTV may not display. Pixel defects within industry specifications are inherent to this type of product and do not constitute a defective product.	
You can see a picture but you cannot hear sound.		
The TV has pixels that are always dark or colored.		
You see "noise" or "trash" on the screen.		
You switch to a different input and the volume changes.	The TV remembers the volume level from the last time you adjusted it. If the sound level is higher or lower from another source, then the loudness will change.	
Tips for High-Definition Users. The LCD HDTV is an ideal platform for viewing High Definition Con Best Image Quality will be achieved by the HDMI Input, then YPbP However, due to variances in broadcast practices, it is poss distortions can occur.		

Problem	Solution
Tips for Letterbox Content Users.	Letterboxed (or "Widescreen") versions of DVD movies are most commonly formatted for standard 4:3 Televisions. The LCD HDTV has the capability of expanding this content so the entire screen is filled at the expense of image accuracy. To use this function, press the "WIDE" key on the remote control and cycle among the available options.

Telephone & Technical Support

Products are often returned due to a technical problem rather than a defective product that may result in unnecessary shipping charges billed to you. Our trained support personnel can often resolve the problem over the phone. For more information on warranty service or repair, after the warranty period, please contact our Support Department at the number below.

Customer support and quality service are integral parts of VIZIO's commitment to service excellence.

For technical assistance contact our VIZIO Technical Support Department via e-mail or phone.

FCC Class B Radio Interference Statement

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- 1. Reorient or relocate the receiving antenna.
- 2. Increase the separation between the equipment and receiver.
- 3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- 4. Consult the dealer or an experienced radio/TV technician for help.

Notice:

- 1. The changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- 2. Shielded interface cables and AC power cord, if any, must be used in order to comply with the emission limits.
- The manufacturer is not responsible for any radio or TV interference caused by unauthorized modification to this equipment. It is the responsibilities of the user to correct such interference.

Chapter 6 Miscellaneous Information

Specifications

Specifications		
Panel	47" Diagonal, 16:9 Aspect Ratio	
Resolution	1920 x 1080 pixels	
Pixel (Dot) Pitch	0.5415mm (H) x 0.5415mm (V)	
Display Compatibility	1080P (Full HDTV)	
Colors	1.07 Billion	
Brightness	500 cd/m² (typical)	
Contrast	1300 :1 (typical), 6500 :1 (with DCR)	
Response Time	5ms (typical)	
Viewing Angle	Horizontal and Vertical 178° (typical)	
Inputs	1x Coaxial RF (ATSC/QAM/NTSC),4x HDMI™** with HDCP (1 with Stereo Audio RCA), 2x Component YPbPr plus Stereo Audio, 1x RGB PC plus Stereo Audio (1/8" stereo jack), 2x Composite Video plus Stereo Audio, 1x S-Video with shared Stereo Audio	
Outputs	1x Optical Audio (SPDIF Optical), 1x Stereo Audio (RCA)	
Features	1080P FHDTV, HDMI v1.3, 3D comb filter, Zero bright pixel guarantee, Dynamic Contrast Ratio technology, HD game port, Noise reduction, 10-bit panel, MTS stereo decoder, Digital amplifier, Dolby Digital for ATSC/QAM, Channel skip, Video/input naming capability, Closed caption, Parental control/V-Chip 2.0, Programmable Timer, Freeze, PIP/POP, SRS TSXT. ATSC/Clear QAM tuner, NTSC video decoding via RF or composite video, 3:2 or 2:2 reverse pull-down, Motion adaptive de-interlace, Progressive video scan via component video/VGA/HDMI, HDTV via HDMI or component video, FHDTV via HDMI or component video, Color temperature adjustments of 5400K/6500K/9300K, Independent Red/Green/Blue adjustments for color temperature fine tuning, Signal Compatibility 480i (SDTV), 480P (EDTV), 720P (HDTV), 1080i (HDTV), 1080P (FHDTV), Computer support at 640x480/800x600/1024x768/1920x1080 via VGA/HDMI	
Speakers	2 x 10 W	
Panel Life	50,000 hours to half the original brightness	
Power		
Input	IEC Connector for direct power line connection	
Voltage Range	100 ~ 240Vac at 50/60Hz	
Power Consumption	Power Consumption 157W (average); Standby: 0.4W	
Environmental Conditions		
Operating	Temperature: 5°C~35°C, Relative Humidity: 20~80%, Altitude: 0~14,000 ft	
Non-Operating		
Dimensions		
Net Weight	57.9 lbs with stand, 52.6 lbs without stand	
Gross Weight	71.1 lbs	
Certifications	CSA, CSA-us, FCC class B, BETS-7	

^{*}Product specifications may change without notice or obligation.

Glossary - Standard Definitions

Analog TV: Today's TV system using radio frequency waves to transmit and display pictures and sound.

Aspect Ratio (4x3): Traditional TV "aspect ratio", that is, the screen's width as compared to its height. For example, a "32 inch TV screen" would be 25 inches wide and 19 inches tall.

Aspect Ratio (16x9): "Wide screen TV" aspect ratio which is more like a movie screen than a traditional TV. For example, a "32 inch TV screen" would be 28 inches wide and 16 inches tall.

Digital TV (DTV): Television delivered and displayed using radio frequency waves that contain information that is digitally encoded for improved quality and efficiency.

Enhanced Definition TV (EDTV): A better digital television transmission than SDTV with at least 480P, in a 16x9 or 4x3 display and Dolby digital surround sound. 480P is the quality used by most DVD players. EDTV provides 300-400,000 pixels.

HDTV Monitor (sometimes called HDTV Ready): A set that can display HDTV programming if you have a separate HDTV tuner, HD Cable Set-Top Box or HD Satellite Set-Top-Box Receiver.

HDTV Tuner (also decoder, receiver, set-top box): A device capable of receiving and outputting HDTV signals for display. It may be stand-alone or integrated in the set.

High-Definition Television (HDTV): The best quality picture, wide screen (16x9) display with at least 720 progressively scanned lines (720P) or 1080 interlaced lines (1080i) and Dolby digital surround sound. HDTV provides 900,000-2.1 million pixels.

Integrated HDTV: An HDTV that has the digital tuner built into the set. It does not need a separate settop box to receive over-the-air DTV signals.

Interlace Scan: A way to scan vertical lines onto a TV picture by scanning all the odd lines first, then filling the in the even lines (this happens instantaneously).

Plug-and-Play or Digital Cable Ready: A DTV or other device for digital cable consumers that plugs directly into the cable jack and does not require a separate set-top box. Plug-and-Play TV owners must obtain a CableCARD from their cable company in order to view scrambled programming services.

Progressive Scan: A way to scan vertical lines onto a TV picture by scanning all the lines consecutively (progressively).

Standard Definition TV (SDTV): Basic digital television transmission that may be displayed with fewer than 480 progressively scanned lines (480P) in 16×9 or 4×3 format. 480 interlaced (480i) is the quality of today's analog TV system.

Source: Buying a Digital Television, CEA, HDTV Guide, 2005

Note: The Federal Communications Commission (FCC), the Consumer Electronics Association (CEA) and the Consumer Electronics Retailers Coalition (CERC) have made a new tip sheet available for digital television (DTV) retailers to reproduce and distribute to consumers on the sales floor. The file may be downloaded online at www.dtv.gov. While you're there, check out the other useful information in the FCC is making available to consumers interested in learning more about the analog to digital transition.

Limited Product Warranty

VIZIO provides a "ONE-YEAR LIMITED WARRANTY" against manufacturing defects in materials and workmanship to the original purchaser of a new VIZIO display purchased from an authorized VIZIO U.S. reseller and used in the fifty (50) United States or Puerto Rico.

VIZIO's Responsibility

VIZIO displays purchased new from an authorized VIZIO U.S. reseller and that are used in the fifty (50) United States or Puerto Rico are warranted to be free from manufacturing defects in materials and workmanship for one (1) year from the date of the original retail purchase. If the display fails to conform to this limited warranty, VIZIO will, at its option and sole discretion, repair or replace the display.

Labor

During the one-year limited warranty period, VIZIO will provide, when needed, service labor to repair a manufacturing defect. Repairs required on displays which are thirty (30) inches and larger generally will be made "on-site" where the display is installed. The determination for performing the on-site repair is dependent upon the manufacturing defect and is at VIZIO's option and sole discretion. Repairs required on displays which are less than thirty (30) inches generally will be performed at a VIZIO service center.

Parts

Repairs may be made with new or recertified parts, or the entire unit may be replaced with a new or recertified unit, at VIZIO's option and sole discretion. Replacement parts or replacement units provided under this limited warranty are warranted for the remaining portion of the original warranty period, or for ninety (90) days from warranty service or replacement, whichever is later.

How to Obtain Warranty Service

To obtain warranty service, contact VIZIO Technical Support via email at TechSupport@VIZIO.com, via phone at 877-MYVIZIO (877-698-4946), or via postal mail at VIZIO Technical Support, 39 Tesla, Irvine, CA 92618. You must provide the model, serial number, and date of purchase. VIZIO Technical Support is available from 6:00AM to 9:00PM Pacific Time, Monday through Friday, and 10:00AM to 2:00PM Pacific Time, Saturday and Sunday. Please note that holiday hours may vary. For up to date information, please visit www.VIZIO.com.

VIZIO reserves the right to assess all warranty claims and to determine if defects or damages are covered by this limited warranty. In case of a claim that is not covered by this warranty, you will be contacted to determine whether VIZIO should repair the damage for a fee or whether the product should be returned to you as received by the service technician or service center.

Parts and service labor that are VIZIO's responsibility under this limited warranty will be provided without charge. All other service is at the customer's expense. VIZIO reserves the right to charge the customer for any service call for anything not covered by this limited warranty. Before you ask for warranty service, please review your User Manual. You may avoid a service call and a service charge.

Please refer to the reverse side of this page for additional information regarding how to obtain warranty service.

PLEASE DO NOT RETURN YOUR UNIT TO VIZIO WITHOUT PRIOR AUTHORIZATION.

Not Covered

This limited warranty does not cover the following: cosmetic defects; damage, malfunctions or failures resulting from shipping or transit, improper or faulty installation, abuse, operation contrary to furnished instructions, operation on incorrect power supplies, products not supplied by VIZIO, modification, alteration, improper servicing or tampering; damage from fire, water, lightning, power surges, abnormal environmental conditions or other acts of nature; normal wear and tear; unsatisfactory visual or audio performance not caused by a manufacturing defect; or displays with a missing or unreadable serial number. Operation of the display for commercial purposes or in applications or uses for which the display is not intended is not covered by this limited warranty. "Image Sticking", caused by static images on the screen for extended periods and or excessive brightness and contrast levels, is not covered by this

limited warranty. Installation, removal, transportation and reinstallation of a display, and routine maintenance and cleaning, are not covered by this limited warranty.

THERE ARE NO EXPRESS WARRANTIES OTHER THAN THOSE LISTED OR DESCRIBED ABOVE. ANY IMPLIED WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, SHALL BE LIMITED IN DURATION TO THE PERIOD OF TIME SET FORTH ABOVE. VIZIO'S TOTAL LIABILITY FOR ANY AND ALL LOSSES AND DAMAGES RESULTING FROM ANY CAUSE WHATSOEVER, INCLUDING VIZIO'S NEGLIGENCE, ALLEGED DAMAGE, OR DEFECTIVE GOODS, WHETHER SUCH DEFECTS ARE DISCOVERABLE OR LATENT, SHALL IN NO EVENT EXCEED THE PURCHASE PRICE OF THE DISPLAY. VIZIO SHALL NOT BE RESPONSIBLE FOR LOSS OF USE, COMMERCIAL LOSS, LOST REVENUE OR LOST PROFITS, OR OTHER INCIDENTAL OR CONSEQUENTIAL DAMAGES. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS OR THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU.

This warranty gives you specific legal rights, and you may also have other rights, which vary from state to state. This is the only warranty applicable; no one is authorized to extend or modify it or to grant any other warranty on VIZIO's behalf.

Owner's Responsibility

To ensure warranty service, keep the dated bill or sales receipt as evidence of the purchase date and location. This limited warranty applies only to original purchaser and is non-transferable.

Note: Warranty service conditions are subject to change. For the latest Warranty Terms and Conditions and additional information regarding VIZIO's Limited Product Warranty, please see complete details online at www.VIZIO.com.

VIZIO Return Policy

VIZIO's return policy allows for products purchased directly from VIZIO to be returned by the original purchaser during the initial thirty (30) day period following the date of purchase. A VIZIO return authorization number must first be obtained as provided below. The refund will be the purchase price actually paid by the purchaser less a ten percent (10%) restocking fee per each item returned. Shipping and handling are not refundable.

The return authorization number must first be obtained from VIZIO's Customer Service by emailing CustomerSupport@VIZIO.com or by calling 949-428-2525, 6:00AM to 9:00PM Pacific Time, Monday through Friday, and 10:00AM to 2:00PM Pacific Time, Saturday and Sunday. Please note that holiday hours may vary. For up to date information, please visit www.VIZIO.com.

Products must be returned to the address specified by VIZIO Customer Service and must be shipped in the original packaging, with freight prepaid to VIZIO, and must be received in new and unused condition. The return authorization number must be included in the packaging. VIZIO reserves the right to assess fees for any damaged or missing parts in addition to the ten percent (10%) restocking fee.

Return authorization numbers are valid for only fifteen (15) days from issuance. The customer is responsible for and must prepay all shipping charges and shall assume all risk of loss or damage to the product while in transit to VIZIO. If the product is returned to VIZIO (i) without a VIZIO return authorization number, and/or (ii) beyond the fifteen (15) day period, and/or (iii) without proper packaging, VIZIO retains the right to refuse delivery of such return or may return the unit to the customer at the customer's expense and with no refund issued. This return policy does not apply to defective products. Please read VIZIO's Limited Product Warranty for warranty terms and conditions.

On-Site Warranty Repair Procedure

On-Site Warranty Repair generally is performed on repairable displays which are 30 inches and larger.

If VIZIO Technical Support determines that a problem with a display unit may be within the terms and conditions of the VIZIO Limited Product Warranty and that an on-site repair may be performed, the customer will be provided with an on-site repair authorization number and on-site repair instructions. The

determination for performing the on-site repair may be dependent upon the manufacturing defect and is at VIZIO's option and sole discretion. Proof of purchase is required to confirm the product is within the one-year limited warranty period and meets the terms and conditions of the VIZIO Limited Product Warranty.

On-site repair service is requested through VIZIO's third-party service provider. After VIZIO provides the customer with the on-site repair (OSR) authorization number, the third-party service provider will contact the customer and will schedule the repair at the customer's location. The total approximate time for the repair process, which includes the repair diagnosis, dispatching the technician, shipping the replacement part(s), and arranging the appointment with the customer, is completed within approximately 3 to 5 business days, pending availability of these factors.

If it is determined the product can not be repaired on-site, the customer will be required to ship the unit to VIZIO's service center, per the below warranty replacement procedure.

VIZIO is not responsible for the de-installation or re-installation of the product. However, some standard installation may be performed during the on-site repair, at VIZIO's option and sole discretion. Please read VIZIO's Limited Product Warranty for warranty terms and conditions.

Warranty Replacement Procedure

Warranty Replacement generally is performed on displays which are determined to be economically unrepairable.

If VIZIO Technical Support determines that a problem with a display unit may be within the terms and conditions of the VIZIO Limited Product Warranty and that a repair is not economically possible, based on certain manufacturing defects in materials and/or workmanship, and/or at VIZIO's option and sole discretion, the customer will be provided with a return authorization number and replacement instructions. Proof of purchase is required to confirm the product is within the one-year limited warranty period and meets the terms and conditions of the VIZIO Limited Product Warranty.

For displays forty-two inches (42") and larger, VIZIO will generally cover the transportation charges to perform an on-site swap of the original unit with the replacement unit. For displays under forty-two inches (42"), the customer is responsible for the transportation charges to VIZIO's service center. VIZIO will be responsible for the return transportation charges from the service center to the customer. Please read VIZIO's Limited Product Warranty for warranty terms and conditions.

Mail-In Warranty Repair Procedure

Mail-In Warranty Repair generally is performed on displays which are smaller than 30 inches.

If VIZIO Technical Support determines that a problem with a display unit may be within the terms and conditions of the VIZIO Limited Product Warranty and that a mail-in repair may be performed, the customer will be provided with a return authorization number and mail-in repair instructions. Proof of purchase is required to confirm the product is within the one-year limited warranty period and meets the terms and conditions of the VIZIO Limited Product Warranty.

The customer will be provided with instructions for packing and shipping the unit to the VIZIO service center. The original carton box and packing material, or an equivalent as designated by VIZIO, must be utilized. The cost of shipping to VIZIO's service center is at the customer's expense. After the product is repaired and tested, the VIZIO service center will ship the unit back to the customer at VIZIO's expense. VIZIO is not responsible for the de-installation or re-installation of the product. Please read VIZIO's Limited Product Warranty for warranty terms and conditions.

PLEASE DO NOT RETURN YOUR UNIT TO VIZIO WITHOUT PRIOR AUTHORIZATION.
