OWNER'S MANUAL

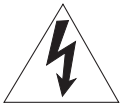
IMPORTANT SAFETY INSTRUCTIONS

CAUTION

RISK OF ELECTRIC SHOCK DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

- Explanation of Graphical Symbols



The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert you to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert you to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Note to CATV system installer:

This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

1 Read these instructions.
2 Keep these instructions.
3 Heed all warnings.
4 Follow all instructions.
5 Do not use this apparatus near water.
6 Clean only with dry cloth.
7 Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8 Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9 Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10 Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11 Only use attachments/accessories specified by the manufacturer.
12 Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.

13 Unplug this apparatus during lightning storms or when unused for long periods of time.
14 Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

FCC INFORMATION (for US customers)

1 IMPORTANT NOTICE: DO NOT MODIFY THIS UNIT!
This product, when installed as indicated in the instructions contained in this manual, meets FCC requirements. Modifications not expressly approved by Yamaha may void your authority, granted by the FCC, to use the product.

2 IMPORTANT: When connecting this product to accessories and/or another product use only high quality shielded cables. Cable/s supplied with this product MUST be used. Follow all installation instructions. Failure to follow instructions could void your FCC authorization to use this product in the USA.

3 NOTE: This product has been tested and found to comply with the requirements listed in FCC Regulations, Part 15 for Class "B" digital devices. Compliance with these requirements provides a reasonable level of assurance that your use of this product in a residential environment will not result in harmful interference with other electronic devices.
This equipment generates/uses radio frequencies and, if not installed and used according to the instructions found in the users manual, may cause interference harmful to the operation of other electronic devices.

Compliance with FCC regulations does not guarantee that interference will not occur in all installations. If this product is found to be the source of interference, which can be determined by turning the unit "OFF" and "ON", please try to eliminate the problem by using one of the following measures:

Relocate either this product or the device that is being affected by the interference.

Utilize power outlets that are on different branch (circuit breaker or fuse) circuits or install AC line filter/s.

In the case of radio or TV interference, relocate/reorient the antenna. If the antenna lead-in is 300 ohm ribbon lead, change the lead-in to coaxial type cable.

If these corrective measures do not produce satisfactory results, please contact the local retailer authorized to distribute this type of product. If you can not locate the appropriate retailer, please contact Yamaha Electronics Corp., U.S.A. 6660 Orangethorpe Ave, Buena Park, CA 90620.

The above statements apply ONLY to those products distributed by Yamaha Corporation of America or its subsidiaries.

Caution: Read this before operating your unit.

1 To assure the finest performance, please read this manual carefully. Keep it in a safe place for future reference.

2 Install this sound system in a well ventilated, cool, dry, clean place – away from direct sunlight, heat sources, vibration, dust, moisture, and/or cold. Allow ventilation space of at least 30 cm on the top, 20 cm on the left and right, and 20 cm on the back of this unit.

3 Locate this unit away from other electrical appliances, motors, or transformers to avoid humming sounds.

4 Do not expose this unit to sudden temperature changes from cold to hot, and do not locate this unit in an environment with high humidity (i.e. a room with a humidifier) to prevent condensation inside this unit, which may cause an electrical shock, fire, damage to this unit, and/or personal injury.

5 Avoid installing this unit where foreign objects may fall onto this unit and/or this unit may be exposed to liquid dripping or splashing. On the top of this unit, do not place:
- Other components, as they may cause damage and/or discoloration on the surface of this unit.
- Burning objects (i.e. candles), as they may cause fire, damage to this unit, and/or personal injury.
- Containers with liquid in them, as they may fall and liquid may cause electrical shock to the user and/or damage to this unit.

6 Do not cover this unit with a newspaper, tablecloth, curtain, etc. in order not to obstruct heat radiation. If the temperature inside this unit rises, it may cause fire, damage to this unit, and/or personal injury.

7 Do not plug in this unit to a wall outlet until all connections are complete.

8 Do not operate this unit upside-down. It may overheat, possibly causing damage.

9 Do not use force on switches, knobs and/or cords.

10 When disconnecting the power cable from the wall outlet, grasp the plug; do not pull the cable.

11 Do not clean this unit with chemical solvents; this might damage the finish. Use a clean, dry cloth.

12 Only voltage specified on this unit must be used. Using this unit with a higher voltage than specified is dangerous and may cause fire, damage to this unit, and/or personal injury. Yamaha will not be held responsible for any damage resulting from use of this unit with a voltage other than specified.

13 To prevent damage by lightning, keep the power cord and outdoor antennas disconnected from a wall outlet or the unit during a lightning storm.

14 Do not attempt to modify or fix this unit. Contact qualified Yamaha service personnel when any service is needed. The cabinet should never be opened for any reasons.

15 When not planning to use this unit for long periods of time (i.e. vacation), disconnect the AC power plug from the wall outlet.

16 Install this unit near the AC outlet and where the AC power plug can be reached easily.

17 Be sure to read the "Troubleshooting" section on common operating errors before concluding that this unit is faulty.

18 Before moving this unit, press Ⓐ**MAIN ZONE ON/OFF** to set this unit to the standby mode, and disconnect the AC power plug from the wall outlet in the main room and Zone2.

19 VOLTAGE SELECTOR (Asia and General models only)
The VOLTAGE SELECTOR on the rear panel of this unit must be set for your local main voltage BEFORE plugging into the AC wall outlet. Voltages are:
.....AC 110/120/220/230–240 V, 50/60 Hz (General model)
.....AC 220/230–240 V, 50/60 Hz (Asia model)

20 The batteries shall not be exposed to excessive heat such as sunshine, fire or like.

21 Excessive sound pressure from earphones and headphones can cause hearing loss.

22 When replacing the batteries, be sure to use batteries of the same type. Danger of explosion may happen if batteries are incorrectly replaced.

WARNING
TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS UNIT TO RAIN OR MOISTURE.

As long as this unit is connected to the AC wall outlet, it is not disconnected from the AC power source even if you turn off this unit by Ⓐ**MAIN ZONE ON/OFF**. In this state, this unit is designed to consume a very small quantity of power.

FOR CANADIAN CUSTOMERS
To prevent electric shock, match wide blade of plug to wide slot and fully insert.
This Class B digital apparatus complies with Canadian ICES-003.

POUR LES CONSOMMATEURS CANADIENS
Pour éviter les chocs électriques, introduire la lame la plus large de la fiche dans la borne correspondante de la prise et pousser jusqu'au fond.
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

IMPORTANT
Please record the serial number of this unit in the space below.
MODEL:
Serial No.:
The serial number is located on the rear of the unit.
Retain this Owner's Manual in a safe place for future reference.

INTRODUCTION

Features

■ Built-in 7-channel power amplifier

- Minimum RMS Output Power (1 kHz, 0.9% THD, 8 Ω)
- FRONT L/R: 90 W + 90 W
- CENTER: 90 W
- SURROUND L/R: 90 W + 90 W
- SURROUND BACK L/R: 90 W + 90 W

■ Speaker/Preout outputs

- Speaker jacks (7-channel), preout output jacks (7.1-channel)

■ Input/Output terminals

Input terminals

- HDMI input x 4
- Audio/Visual input
  [Audio] Digital input (coaxial) x 2, digital input (optical) x 2, analog input x 2
  [Video] Component video x 2, composite video x 4
- Audio input (analog) x 2
- Dock input x 1
- V-AUX input
  [Audio] Analog x 1
  [Video] Composite video x 1

Output terminals

- Monitor output
  [Audio/Video] HDMI x 1
  [Video] Component video x 1, Composite video x 1
- Audio/Visual output
  [Audio] Analog x 1
  [Video] Composite video x 1
- Audio output
  Analog x 1
- Zone2 output
  Analog x 1

Other terminals

Remote input x 1, Remote output x 1
Trigger output x 1

■ Proprietary Yamaha technology for the creation of sound fields

- CINEMA DSP 3D
- Compressed Music Enhancer mode
- Virtual CINEMA DSP
- SILENT CINEMA

■ Digital audio decoders

- Dolby TrueHD, Dolby Digital Plus decoder
- DTS-HD Master Audio, DTS-HD High Resolution Audio, DTS Express
- Dolby Digital/Dolby Digital EX decoder
- DTS, DTS 96/24 decoder, DTS-ES Matrix 6.1, DTS-ES Discrete 6.1
- Dolby Pro Logic/Dolby Pro Logic II/Dolby Pro Logic IIx decoder
- DTS NEO:6 decoder
- Neural Surround decoder (U.S.A. model only)

■ Radio tuners

- FM/AM tuning capability
- XM Satellite Radio tuning capability, using XM Mini-Tuner and Home Dock, sold separately (U.S.A. model only).
- SIRIUS Satellite Radio tuning capability, using SiriusConnect tuner, sold separately (U.S.A. model only).

■ HDMI™ (High-Definition Multimedia Interface)

- HDMI interface for standard, enhanced or high-definition video as well as multi-channel digital audio.
  – Automatic audio and video synchronization (lip sync) information capability
  – Deep Color video signal (30/36 bit) transmission capability
  – "x.v.Color" video signal transmission capability
  – High refresh rate and high resolution video signals capability
  – High definition digital audio format signals capability
- Analog video to HDMI digital video up-conversion (composite video → HDMI, component video → HDMI) capability for monitor out
- Analog video input up-scaling for HDMI digital video output 480i or 480p → 720p, 1080i or 1080p

■ DOCK terminal

- DOCK terminal to connect a Yamaha iPod universal dock (such as YDS-11, sold separately) or Bluetooth wireless audio receiver (such as YBA-10, sold separately)

■ Automatic speaker setup features

- "YPAO" (Yamaha Parametric Room Acoustic Optimizer) for automatically optimizing speaker outputs suitable for listening environments.

■ Other features

- 192-kHz/24-bit D/A converter
- OSD (on-screen display) menus that allow you to optimize this unit to suit your individual audiovisual system
- Pure Direct mode for pure hi-fi sound for all sources
- Adaptive dynamic range controlling capability
- Sleep timer
- Multi-zone function

About this manual

- ☼ indicates a tip for your operation.
- Some operations can be performed by using either the keys on the front panel or the ones on the remote control. In case the key names differ between the front panel and the remote control, the key name on the remote control is given in parentheses.
- This manual is printed prior to production. Design and specifications are subject to change in part as a result of improvements, etc. In case of differences between the manual and product, the product has priority.
- "Ⓐ**MAIN ZONE ON/OFF**" or "8**HDMI 1**" (example) indicates the name of the parts on the front panel or the remote control. Refer to the attached sheet or the pages at the end of this manual for the information about each position of the parts.
- ☞ indicates the page describing the related information.

SIRIUS, XM and all related marks and logos are trademarks of Sirius XM Radio Inc. and its subsidiaries. All rights reserved. **Service not available in Alaska and Hawaii.**

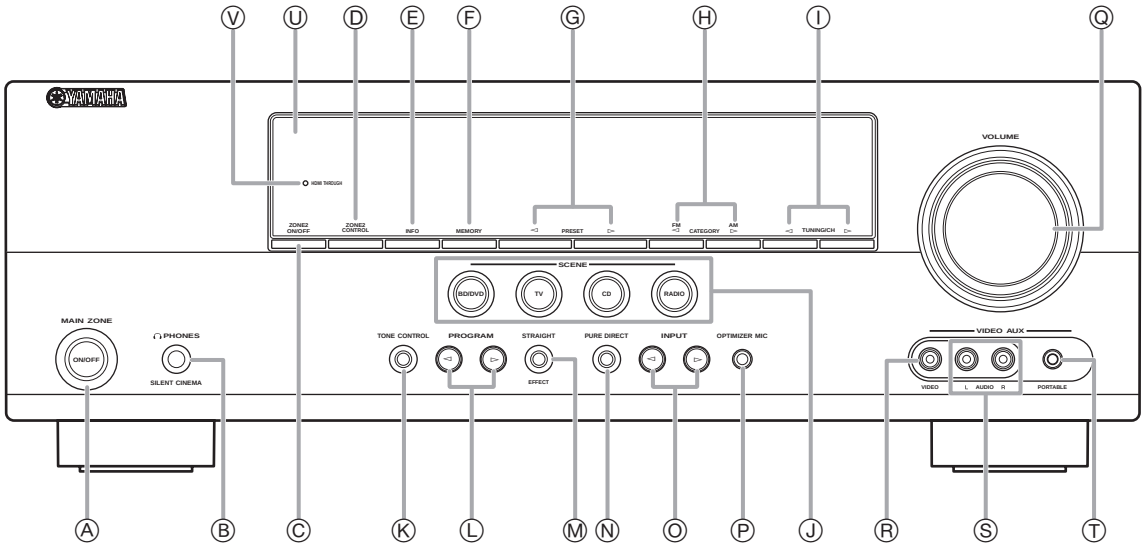
Supplied accessories

Check that you received all of the following parts.

- Remote control
- Batteries (2) (AAA, R03, UM-4)
- Optimizer microphone
- AM loop antenna
- Indoor FM antenna

Part names and functions

Front panel



Ⓐ **MAIN ZONE ON/OFF**
Switches this unit between on and off (see page 18).

Ⓑ **PHONES jack**
For plugging headphones (see page 23).

Ⓒ **ZONE2 ON/OFF**
Switches the zone function on and off (see page 58).

Ⓓ **ZONE2 CONTROL**
Enables operation of a receiver set in Zone2, including input source switching, volume control and tuner operation, with the main amplifier or remote control after this key is pressed.

Ⓔ **INFO**
Changes information display screens on the front panel display (see page 24).

Ⓕ **MEMORY**
Registers FM/AM stations as preset stations (see page 30) or XM/SIRIUS channels as preset channels (see page 33).

Ⓖ **PRESET ⊲ / ⊳**
Selects an FM/AM preset station (see page 30) or an XM/SIRIUS preset channel (see page 33).

Ⓗ **FM/AM (CATEGORY ⊲ / ⊳)**
Change the tuner bands between FM and AM.
Select a channel category for a XM/SIRIUS.

Ⓘ **TUNING/CH ⊲ / ⊳**
Changes FM/AM frequencies or XM/SIRIUS tuner channels.

Ⓙ **SCENE**
Switches between linked sets of input sources and sound field programs (see page 22).

Ⓚ **TONE CONTROL**
Adjusts high-frequency/low-frequency output of speakers (see page 22).

Ⓛ **PROGRAM ⊲ / ⊳**
Changes sound field programs (see page 25).

Ⓜ **STRAIGHT**
Changes a sound field program to straight decoding mode (see page 28).

Ⓝ **PURE DIRECT**
Changes mode to Pure Direct mode (see page 23). This key lights up when Pure Direct mode is on.

Ⓞ **INPUT ⊲ / ⊳**
Selects an input source (see page 22).

Ⓟ **OPTIMIZER MIC jack**
For connecting the supplied optimizer microphone and adjusting output characteristics of speakers (see page 19).

Ⓠ **VOLUME control**
Controls the volume of this unit (see page 22).

Ⓡ **VIDEO (VIDEO AUX) jack**
For connecting the video output cable of a camcorder or game console (see page 17).

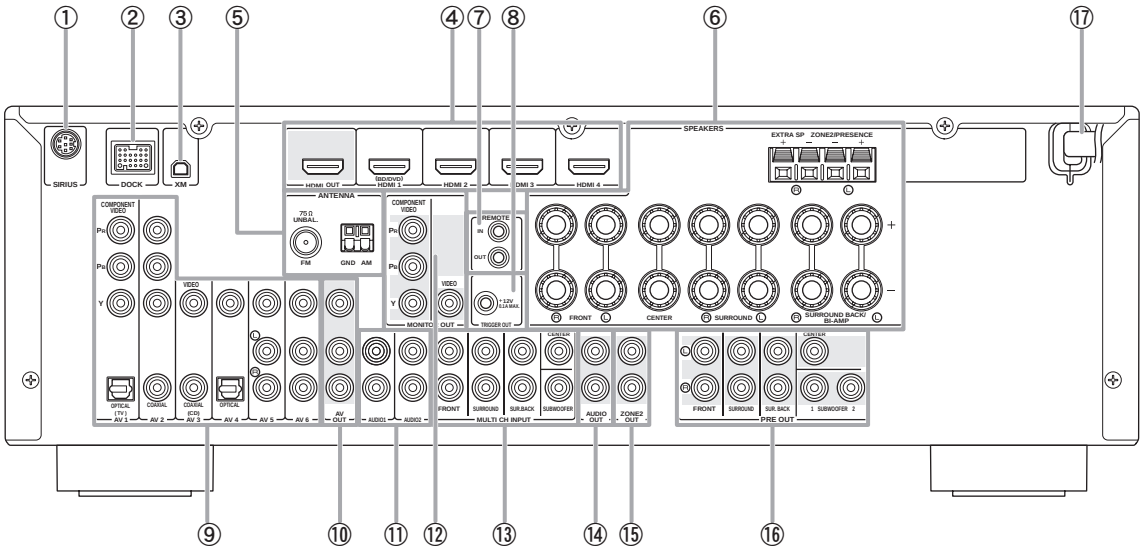
Ⓢ **AUDIO L/R (VIDEO AUX) jack**
For connecting the audio output cable of a camcorder or game console (see page 17).

Ⓣ **PORTABLE (VIDEO AUX) jack**
For connecting the audio output cable of a portable music player (see page 17).

Ⓤ **Front panel display**
Displays information on this unit (see page 6).

Ⓥ **HDMI THROUGH**
Lights up during pass-through output of an HDMI signal input to this unit while this unit is on standby (see page 54).

Rear panel



① **SIRIUS terminal**
For connecting a SiriusConnect tuner (separately sold) (see page 35).

② **DOCK terminal**
For connecting an optional Yamaha iPod universal dock (YDS-11) or Bluetooth wireless audio receiver (YBA-10) (see page 17).

③ **XM terminal**
For connecting XM Mini-Tuner in XM Mini-Tuner Home Dock (separately sold) (see page 31).

④ **HDMI OUT/HDMI 1-4**
For connecting an HDMI-compatible video monitor or external components for HDMI inputs 1-4 (see page 15).

⑤ **ANTENNA jack**
For connecting supplied FM and AM antennas (see page 18).

⑥ **SPEAKERS terminal**
For connecting front right and left, center, surround and surround back speakers (see page 11). Connect the presence speakers (see page 11) or the speakers for Zone2 (see page 57) to EXTRA SP terminals.

⑦ **REMOTE IN/OUT terminals**
For connecting an external component that supports the remote control function (see page 17).

⑧ **TRIGGER OUT terminal**
For connecting an external terminal with a trigger input terminal to operate it linked with operation of this unit. For example, when an electric screen that supports a trigger input is connected, it opens and closes linked with operation of an input source selected in this unit.

⑨ **AV 1-6**
For connecting external components for audio/visual inputs 1-6 (see page 15).

⑩ **AV OUT**
Outputs audio/visual signals from a selected analog input source to an external component (see page 16).

⑪ **AUDIO 1/2**
For connecting external components for audio inputs 1-2 (see page 16).

⑫ **MONITOR OUT**
Outputs visual signals from this unit to a video monitor, such as a TV (see page 14).

⑬ **MULTI CH INPUT terminals**
For connecting a player that supports a multi-channel output (see page 16).

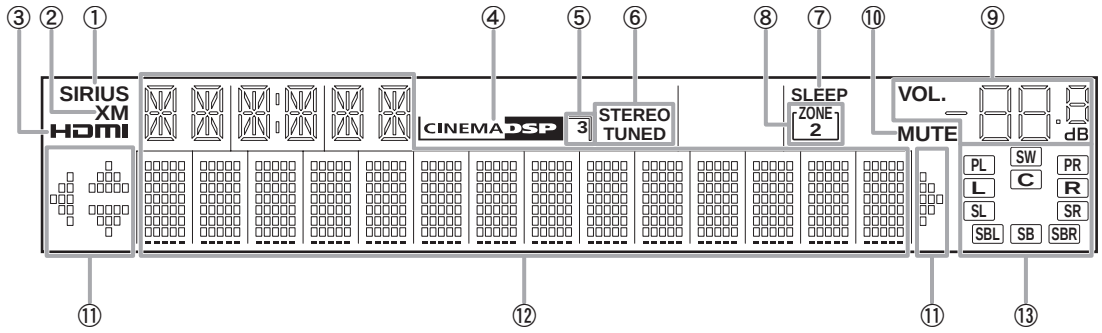
⑭ **AUDIO OUT**
Outputs audio signals from a selected analog input source to an external component (see page 16).

⑮ **ZONE2 OUT jacks**
Outputs sound of this unit to an external amplifier set in a different zone.

⑯ **PRE OUT**
Outputs multi-channel signals from up to 7.1 channels to an external amplifier (see page 16).

⑰ **Power Cable**
Connect this cable to an AC wall outlet (see page 18).

Front panel display



① **SIRIUS indicator**
Lights up when a SiriusConnect tuner is selected as an input source.

② **XM indicator**
Lights up when an XM tuner is selected as an input source.

③ **HDMI indicator**
Lights up during normal communication when HDMI is selected as an input source.

④ **CINEMA DSP indicator**
Lights up when a sound field program that uses CINEMA DSP is selected.

⑤ **CINEMA DSP 3D indicator**
Lights up when CINEMA DSP 3D is activated.

⑥ **Tuner indicator**
Lights up during receiving radio broadcast signals from an FM/AM station (see page 29).

⑦ **SLEEP indicator**
Lights up when the sleep timer is activated (see page 24).

⑧ **ZONE2 indicator**
Lights up when the zone functions is turned on.

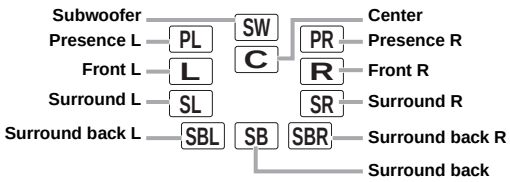
⑨ **VOLUME indicator**
Displays volume levels.

⑩ **MUTE indicator**
Flashes when audio is muted.

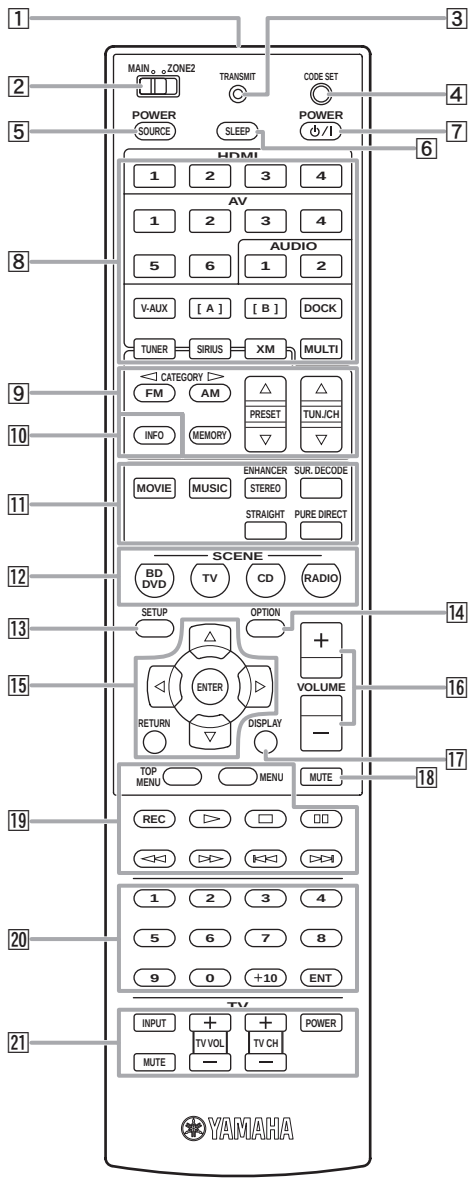
⑪ **Cursor indicators**
Light up if corresponding cursors on the remote control are available for operations.

⑫ **Multi information display**
Displays menu items and settings for the current operation.

⑬ **Speaker indicators**
Indicate speaker terminals from which signals are currently output.



Remote control



1 **Remote control signal transmitter**
Transmits infrared signals.

2 **MAIN/ZONE2**
Switches amplifiers (Main or Zone2) to be operated by the remote control (see page 58).

3 **TRANSMIT**
Lights up when a signal is output from the remote control.

4 **CODE SET**
Sets remote control codes for external component operations (see page 59).

5 **SOURCE POWER**
Switches an external component on and off.

6 **SLEEP**
Switches the sleep timer operations (see page 24).

7 **POWER**
Switches this unit on and standby.

8 **Input selection keys**

HDMI 1-4	Selects HDMI inputs 1 through 4.
AV 1-6	Selects AV inputs 1 through 6.
AUDIO 1/2	Selects AUDIO inputs 1 and 2.
V-AUX	Selects the V-AUX jack on the front panel of this unit.
[A]/[B]	To control external components using the external control keys separately from operations of this unit (see page 59).
DOCK	Selects a Yamaha iPod universal dock/Bluetooth wireless audio receiver connected to the DOCK jack.
TUNER	Selects the FM/AM tuner.
SIRIUS	Selects a SiriusConnect tuner as an input source.
XM	Selects an XM tuner as an input source.
MULTI	Selects a signal input from the MULTI CH INPUT jack on the rear panel as an input source.

9 **Tuner keys**

FM	Switches a band between FM and AM.
AM	
(CATEGORY ◁ / ▷)	Select a channel category for a XM/SIRIUS.
MEMORY	Presets radio stations.
PRESET △ / ▽	Selects a preset station.
TUN./CH △ / ▽	Changes FM/AM frequencies or XM/SIRIUS tuner channels.

10 **INFO**
Changes the information shown on the front panel display (see page 24).

11 **Sound selection keys**
Selects sound field programs (see page 25).

12 **SCENE**
Switches between linked sets of input sources and sound field programs (see page 22).

13 **SETUP**
Displays the setup menu (see page 51).

14 **OPTION**
Displays the option menu (see page 43).

15 **Cursors △ / ▽ / ◁ / ▷/ENTER/RETURN**

Cursors △ / ▽ / ◁ / ▷	Select menu items displayed on the front panel display or on a video monitor, or change settings.
ENTER	Confirms a selected item.
RETURN	Returns to the previous screen or ends the menu display.

16 **VOLUME +/–**
Adjust the volume of this unit (see page 22).

17 **DISPLAY**
Displays or not display the OSD on the video monitor
When an iPod is connected: Changes the operation mode of the iPod connected to the Yamaha iPod universal dock (see page 40).

18 **MUTE**
Turns the mute function of the sound output on and off (see page 23).

19 **External component operation keys**
Operate recording, playback etc. of external components (see page 59).

20 **Numeric keys**
Enter numbers.

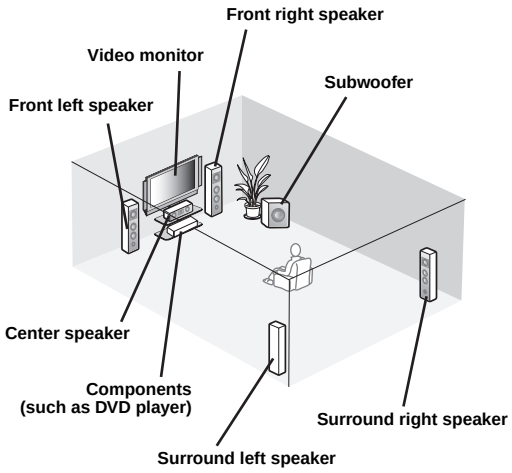
21 **TV control keys**
Enables operations of a monitor such as a TV and a projector.

Quick start guide

When you use this product for the first time, perform setup following the steps below. See the related pages for details on operations and settings.

Step 1: Prepare items for setup

Prepare speakers, DVD player, cables, and other items necessary for setup.
For example, prepare the following items for setting up a 5.1-channel sound system.



Requirements		qty.
Speakers	**Front speaker**	2
	Center speaker	1
	Surround speaker	2
Active subwoofer		1
Speaker cable		5
Subwoofer cable		1
Reproduction component such as DVD player		1
Video monitor such as TV		1
Video cable or HDMI cable		2
Audio cable		2

- Prepare two magnetically shielded speakers (for front). The priority of the requirement of other speakers is as follows:
  1 Two surround speakers
  2 One center speaker
  3 One (or two) surround back speaker(s)
- If your video monitor is a CRT, we recommend that you use magnetically shielded speakers.

Step 2: Set up your speakers

Place your speakers in the room and connect them to this unit.

- Placing speakers ☞P. 10
- Connecting speakers ☞P. 11

- This unit has a YPAO (Yamaha Parametric Room Acoustic Optimizer) that automatically optimizes this unit based on room acoustic characteristics (audio characteristics of the speakers, speaker positions, and room acoustics, etc.).
  You can enjoy good balanced sound without special knowledge by using the YPAO technology (see page 19).

Step 3: Connect your components

Connect your TV, DVD player, or other components.

- Connecting a TV monitor or projector ☞P. 14
- Connecting other components ☞P. 15
- Connecting a multi-format player or an external decoder ☞P. 16
- Connecting an external amplifier ☞P. 16
- Connecting a Yamaha iPod universal dock or Bluetooth wireless audio receiver ☞P. 17
- Connecting the FM and AM antennas ☞P. 18
- Connecting an XM Mini-Tuner Home Dock ☞P. 31
- Connecting a SiriusConnect tuner ☞P. 35

Step 4: Turn on the power

Connect the power cable and turn on this unit.

- Connecting the power cable ☞P. 18
- Turning this unit on and off ☞P. 18

Step 5: Select the input source and start playback

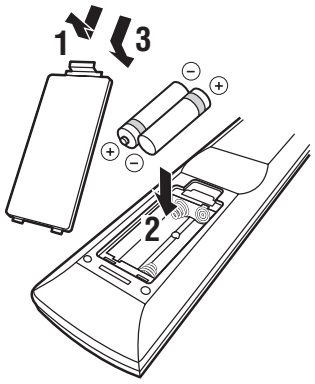
Select the component connected in the step 3 as an input source and start playback.

- Basic procedure ☞P. 22
- Selecting sound field programs ☞P. 25

- This unit supports the SCENE function that changes the input source and sound field program at one time. Four scenes are preset for different purposes for Blu-ray disc, DVD and CD, and you can select from a scene from those just by pressing a remote control key. See page 22 for details.

Preparing remote control

Installing batteries in the remote control



1 Take off the battery compartment cover.

2 Insert the two supplied batteries (AAA, R03, UM-4) according to the polarity markings (+ and –) on the inside of the battery compartment.

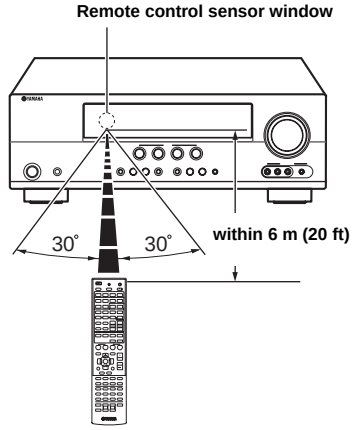
3 Snap the battery compartment cover back into place.

Notes

- Change all batteries if you notice the following conditions:
  – the operation range of the remote control narrows
  – the transmit indicator does not flash or is dim
- Do not use old batteries together with new ones.
  This may shorten the life of the new batteries or cause old batteries to leak.
- Do not use different types of batteries (such as alkaline and manganese batteries) together. Specification of batteries may be different even though they look the same.
- If you find leaking batteries, discard the batteries immediately, taking care not to touch the leaked material. If the leaked material comes into contact with your skin or gets into your eyes or mouth, rinse it away immediately and consult a doctor. Clean the battery compartment thoroughly before installing new batteries.
- Dispose of the old batteries correctly in accordance with your local regulations.
- If the remote control is without batteries for more than 2 minutes, or if exhausted batteries remain in the remote control, the contents of the memory may be cleared. In such a case, install new batteries and set the remote control code.

Using the remote control

The remote control transmits a directional infrared ray. Be sure to aim the remote control directly at the remote control sensor on this unit during operation.



Notes

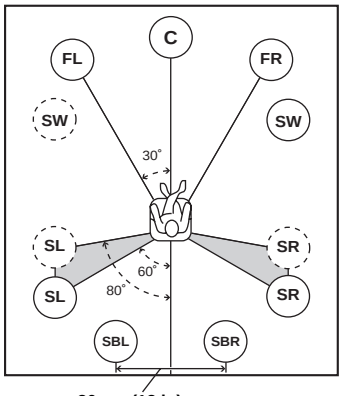
- Do not spill water or other liquids on the remote control.
- Do not drop the remote control.
- Do not leave or store the remote control in the following conditions:
  – places of high humidity, such as near a bath
  – places of high temperatures, such as near a heater or stove
  – places of extremely low temperatures
  – dusty places

- You can operate external components with this remote control by setting the remote control code. See page 59 for details.

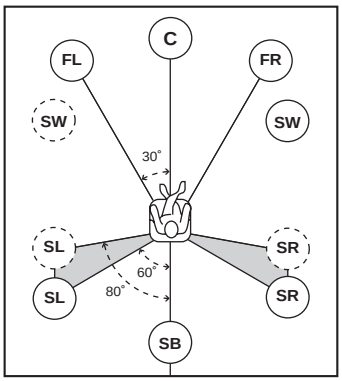
Placing speakers

This unit supports up to 7.1-channel surround. We recommended the following speaker layout in order to obtain the optimum surround effect.

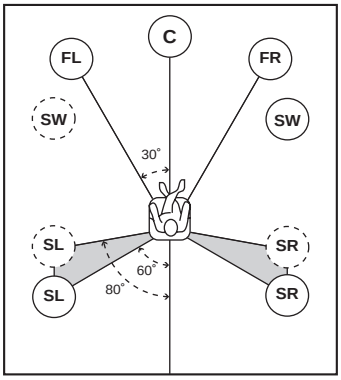
7.1-channel speaker layout



6.1-channel speaker layout



5.1-channel speaker layout



Speaker channels

■ Front left and right speakers (FL and FR)

The front speakers are used for the front channel sounds (stereo sound) and effect sounds. Place these speakers at an equal distance from the ideal listening position. When using a screen, the appropriate top positions of the speakers are about 1/4 of the screen from the bottom.

■ Center speaker (C)

The center speaker is for the center channel sounds (dialog, vocals, etc.). Place it halfway between the left and right speakers. When using a TV, place the speaker just above or just under the center of the TV with the front surfaces of the TV and the speaker aligned. When using a screen, place it just under the center of the screen.

■ Surround left and right speakers (SL and SR)

The surround speakers are used for effect and surround sounds.
Place them at the rear left and rear right facing the listening position.
To obtain a natural sound flow in the 5.1-channel speaker layout, place them slightly further back than in the 7.1-channel speaker layout.

■ Surround back left and right speakers (SBL and SBR) / Surround back speaker (SB)

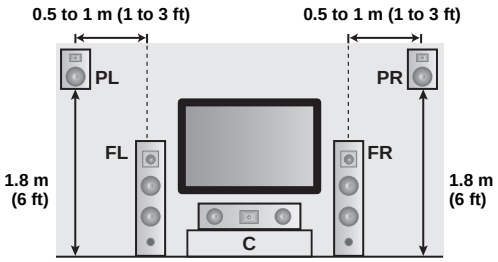
The surround back left and right speakers are used for rear effect sounds. Place them at the rear of the room facing the listening position at least 30 cm away from each other, ideally at the same distance as that between the front left and right speakers.
In the 6.1-channel speaker layout, surround back left and right channel sound signals are mixed down and output from the single surround back speaker.
In the 5.1-channel speaker layout, surround back left and right channel sound signals are output from the surround left and right speakers.

■ Subwoofer (SW)

The subwoofer speaker is used for bass sounds and low-frequency effect (LFE) sounds included in Dolby Digital and DTS signals. Use a subwoofer with a built-in amplifier, such as the Yamaha Active Servo Processing Subwoofer System. Place it exterior to the front left and right speakers facing slightly inward to reduce reflections from a wall.

■ Presence left and right speakers (PL and PR)

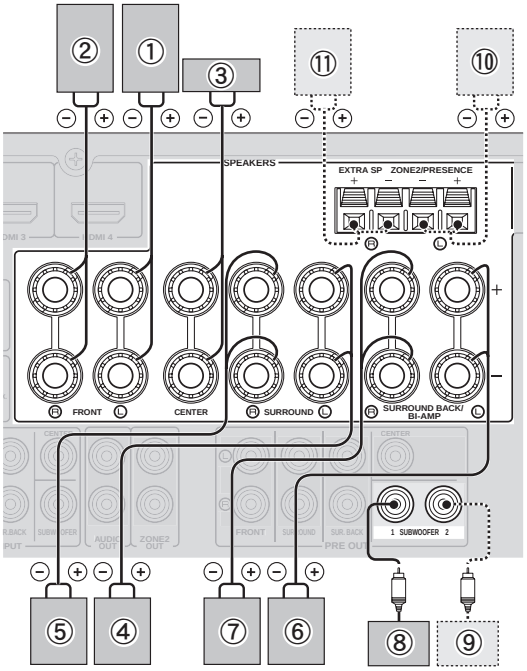
The presence speakers supplement the sound from the front speakers with extra ambient effects produced by the sound field programs (see page 25). We recommend that you use the presence speakers especially for the CINEMA DSP sound field programs. To use the presence speakers, connect the speakers to EXTRA SP terminals and then set "Extra SP Assign" to "Presence" (see page 51).



Connecting speakers

When you connect speakers, connect them to the respective terminals as follows, according to your speaker layout.

- Connect optional presence speakers or Zone2 speakers (see page 57) to the EXTRA SP jacks.
- You can connect up to two subwoofers. When two subwoofers are connected, the same sound is output from them.



■ 9.1-channel (When using presence speakers)

	Speakers	Jacks on this unit
①	Front speaker L	**FRONT (L)**
②	Front speaker R	**FRONT (R)**
③	Center speaker	**CENTER**
④	Surround speaker L	**SURROUND (L)**
⑤	Surround speaker R	**SURROUND (R)**
⑥	Surround back speaker L	**SURROUND BACK/BI-AMP (L)**
⑦	Surround back speaker R	**SURROUND BACK/BI-AMP (R)**
⑧	Subwoofer 1	**SUB WOOFER 1**
⑨	Subwoofer 2 (optional)	**SUB WOOFER 2**
⑩	Presence speaker L (optional)	**EXTRA SP (L)**
⑪	Presence speaker R (optional)	**EXTRA SP (R)**

■ 6.1-channel (When using the Multi-zone function)

	Speakers	Jacks on this unit
①	Front speaker L	**FRONT (L)**
②	Front speaker R	**FRONT (R)**
③	Center speaker	**CENTER**
④	Surround speaker L	**SURROUND (L)**
⑤	Surround speaker R	**SURROUND (R)**
⑥	Surround back speaker	**SURROUND BACK/BI-AMP (L)**
⑧	Subwoofer 1	**SUB WOOFER 1**
⑨	Subwoofer 2 (optional)	**SUB WOOFER 2**
⑩	Zone2 speaker L (optional)	**EXTRA SP (L)**
⑪	Zone2 speaker R (optional)	**EXTRA SP (R)**

■ 5.1-channel (When using the Multi-zone function)

	Speakers	Jacks on this unit
①	Front speaker L	**FRONT (L)**
②	Front speaker R	**FRONT (R)**
③	Center speaker	**CENTER**
④	Surround speaker L	**SURROUND (L)**
⑤	Surround speaker R	**SURROUND (R)**
⑧	Subwoofer 1	**SUB WOOFER 1**
⑨	Subwoofer 2 (optional)	**SUB WOOFER 2**
⑩	Zone2 speaker L (optional)	**EXTRA SP (L)**
⑪	Zone2 speaker R (optional)	**EXTRA SP (R)**

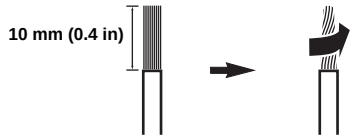
Connecting the speaker cable

Caution

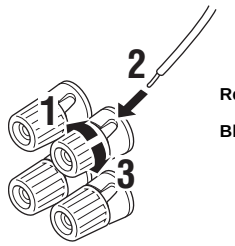
- A speaker cable is a pair of insulated cables running side by side in general. One of the cables is colored differently or striped to indicate a polarity. Connect one end of the colored/striped cable to the "+" (red) terminal of this unit and the other end to that of your speaker, and connect one end of the other cable to the "–" (black) terminal of this unit and the other end to that of your speaker.
- Before connecting the speakers, be sure to disconnect the power cable.
- Do not let the bare speaker wires touch each other or any metal part of this unit. This could damage this unit and/or speakers. If the circuit shorts out, "CHECK SP WIRES!" appears on the front panel display when this unit is turned on.
- Use magnetically shielded speakers. If images on the monitor are still distorted even when you use the magnetically shielded speakers, place the speakers away from the monitor.
- Use speakers with an impedance of 6-ohm or larger. Set speaker impedance in "ADVANCED SETUP" before connecting the speakers (see page 60).

■ Connecting to the FRONT, CENTER, SURROUND and SURROUND BACK/BI-AMP terminals

1 Remove approximately 10 mm (0.4 in) of insulation from the end of each speaker cable and then twist bare wires of the cable together so that they will not cause a short circuits.



2 Loosen the knob, insert the twisted bare wires into the hole, and then tighten the knob.

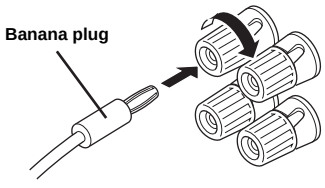


Red: positive (+)

Black: negative (–)

Connecting the banana plug (Except U.K., Europe, Asia and Korea models)

Tighten the knob, and then insert the banana plug into the end of the terminal.



■ Connecting to the EXTRA SP terminals

1 Press down the tab and insert the bare end of the speaker cable into the hole in the terminal.

Red: positive (+)

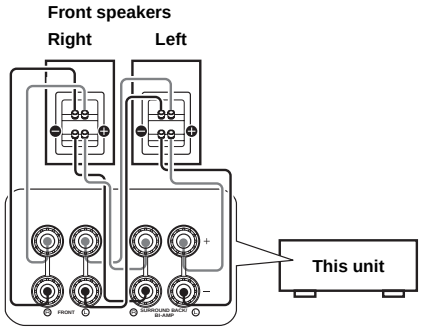
Black: negative (–)

- You can connect the presence speakers (see page 11) or the speakers in the second zone (Zone2) (see page 57) to EXTRA SP terminals.

2 Release the tab to secure the wire.

Using bi-amplification connections

You can connect speakers that support bi-amplification connections to this unit. Before connecting the speakers, set this unit to enable bi-amplification connections in "ADVANCED SETUP" (see page 60), and connect the speakers to this unit as shown below.



Caution

Before making bi-amplification connections, remove any or cables that connect a woofer with a tweeter. Refer to the instruction manuals of speakers for details. When not making bi-amplification connections, make sure that the brackets or cables are connected before connecting the speaker cables.

Information on jacks and cable plugs

This unit has the following input and output jacks. Use jacks and cables appropriate for components that you are connecting.

■ Audio jacks

Jack and cables	Description
AUDIO jacks 	To transmit conventional analog left and right audio signals. Use stereo pin cables. Connect red plugs to red jacks (R) and white plugs to white jacks (L).
COAXIAL jacks 	To transmit coaxial digital audio signals. Use pin cables for digital audio signals.
OPTICAL jacks 	To transmit optical digital audio signals. Use optical fiber cables for optical digital audio signals.

■ Video jacks

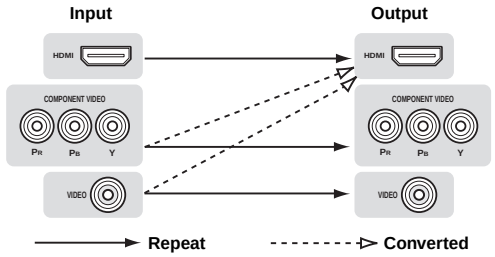
Jack and cables	Description
VIDEO jacks 	To transmit conventional composite video signals. Use video pin cables.
COMPONENT VIDEO jacks 	To transmit component video signals that include luminance (Y), chrominance blue (PB) and chrominance red (PR) components. Use component video cables.

■ Video/audio jacks

Jack and cables	Description
HDMI jacks 	To transmit digital video and digital audio signals. Use HDMI cables.

- We recommend that you use a commercially available 19-pin HDMI cable no longer than 5 meters (16 feet) with the HDMI logo printed on it.
- You can check the potential problem about the HDMI connection (see page 74).
- You can check error information on HDMI connections (see page 74).

A video signal input to this unit is output from the output terminals in MONITOR OUT for the same kind of signal as the input signal.
For example, if a VCR with a composite output signal and a DVD player with a COMPONENT VIDEO output signal are connected, connect both VIDEO jack and COMPONENT VIDEO jack in MONITOR OUT to the video monitor.
If an HDMI input compatible monitor is connected, this unit automatically converts an analog signal that is input from a video input terminal to a digital video signal, and then output it from the HDMI OUT jack.

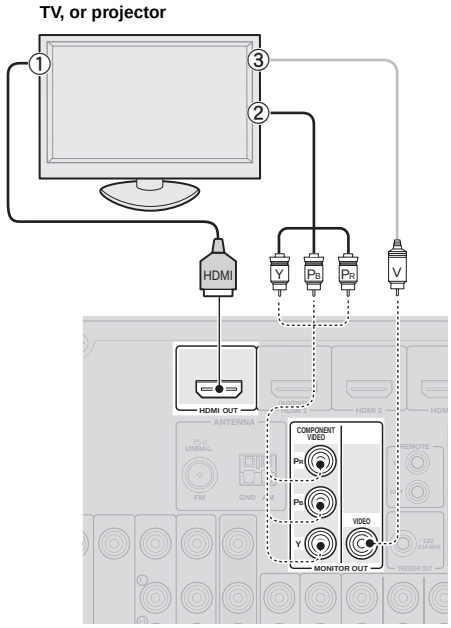


Connecting a TV monitor or projector

Connect a video monitor such as a TV or projector to an output terminal of this unit. You can select one of the following three types according to the input signal format supported by the video monitor.

Note

- When you connect this unit to the video monitor, make sure that this unit is on standby.



■ To connect an HDMI video monitor

Jacks on components	Jacks on this unit
① HDMI input	HDMI OUT

■ To connect component video monitor

Note

- Only video signals input from this unit via the component input terminal are output from the component output terminal.

Jacks on components	Jacks on this unit
② Component video output	MONITOR OUT (COMPONENT VIDEO)

■ To connect composite video monitor

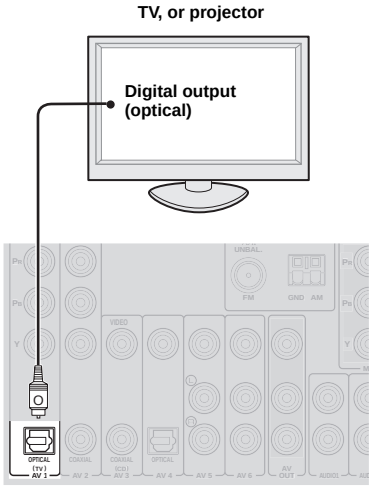
Note

- Only video signals input from this unit via the composite video input terminal are output from the composite video output terminal.

Jacks on components	Jacks on this unit
③ Video input (composite)	MONITOR OUT (VIDEO)

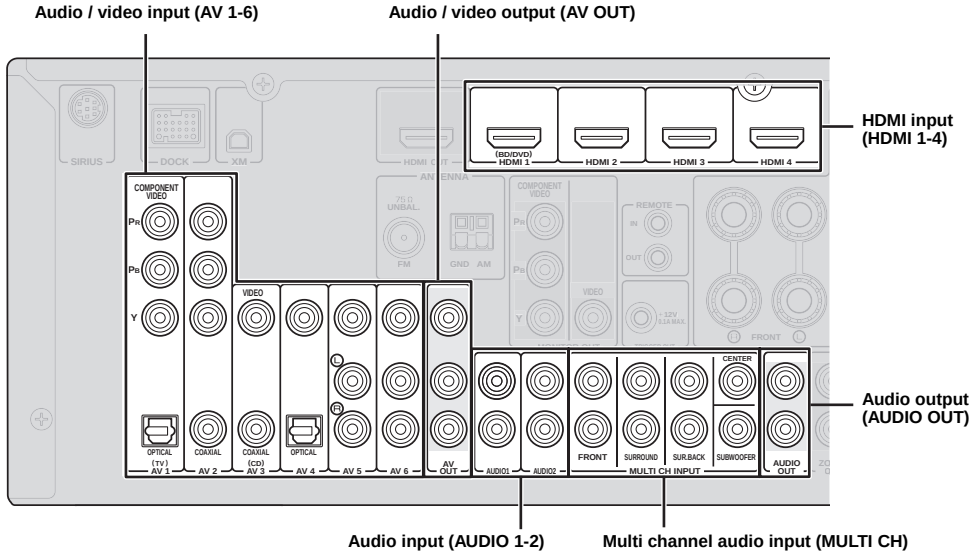
Outputting sound of a TV from this unit

To output sound of a TV from this unit, make connection between the AV input 1-6 and an audio output terminal. If the TV supports an optical digital output, we recommend that you use the AV input 1. Connecting to the AV input 1 allows you to switch an input source to the AV input 1 with a just a single key operation using the SCENE function (see page 22).



Connecting other components

This unit has input and output terminals for respective input and output sources. You can reproduce sound and movies from input sources selected with the front panel display or remote control.



■ Audio and video player / Set-top box

Output jacks on the connected external component			Input sources/jacks of this unit	
External components	**Signals**	**Output jacks**		
External component with HDMI output	Audio/Video	HDMI output	HDMI 1 (BD/DVD)	HDMI 1
			HDMI 2	HDMI 2
			HDMI 3	HDMI 3
			HDMI 4	HDMI 4
External component with component video output	Audio	Optical digital output	AV 1 (TV)	OPTICAL
	Video	Component video		COMPONENT VIDEO
	Audio	Coaxial digital output	AV 2	COAXIAL
	Video	Component video output		COMPONENT VIDEO
External component with composite video output	Audio	Coaxial digital output	AV 3 (CD)	COAXIAL
	Video	Composite output		VIDEO
	Audio	Optical digital output	AV 4	OPTICAL
	Video	Composite output		VIDEO
	Audio	Analog audio output	AV 5	AUDIO
	Video	Composite output		VIDEO
	Audio	Analog audio output	AV 6	AUDIO
	Video	Composite output		VIDEO

- Input sources in parentheses are recommended to connect to the respective jacks. If your Yamaha component has the Remote in/out terminal, you can switch the input source to that component with a single key operation using the SCENE function (see page 22).
- You can change the name of the input source displayed on the front panel display or the OSD on the video monitor as necessary (see page 55).
- See page 57 on how to use ZONE2 OUT terminals.

■ Audio player

Output jacks on the connected external component		Input sources/jacks of this unit	
External components	Output jacks		
External component with optical digital output	Optical digital output	AV 1 (TV)	OPTICAL
		AV 4	OPTICAL
External component with coaxial digital output	Coaxial digital output	AV 2	COAXIAL
		AV 3 (CD)	COAXIAL
External component with analog audio output	Analog audio output	AV 5	AUDIO
		AV 6	AUDIO
		AUDIO 1	AUDIO
		AUDIO 2	AUDIO

- We recommend connecting the coaxial digital output terminal of a CD player to the AV3 jack.

About audio/video output terminals

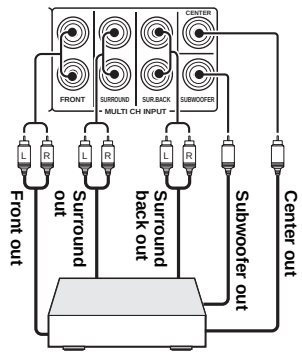
Among the analog audio and analog video signals input to this unit via input terminals, the audio/video signals of the selected input sources are output from the AV OUT jack and AUDIO OUT jack. An HDMI input signal, COMPONENT VIDEO input signal or digital audio input signal cannot be output.
When using the AV OUT jack: connect an external component to the composite or analog audio terminal.
When using the AUDIO OUT jack: connect an external component to the analog audio terminal.

Connecting a multi-format player or an external decoder

This unit is equipped with 8 additional input jacks (Front L/R, Center, Surround L/R, Surround Back L/R and SUBWOOFER) for discrete multi-channel input from a multi-format player, external decoder, etc. If you set input source to “MULTI CH,” the analog audio input jacks assigned as “Front Input” can be used as the front channel input jacks.

Notes

- When you select “MULTI CH” as the input source, the digital sound field processor is automatically disabled.
- Since this unit does not redirect signals input at the MULTI CH INPUT jacks to accommodate for missing speakers, connect at least a 5.1-channel speaker system when using this feature.
- When the input source is switched to “MULTI CH,” images input from a component connected to “AV1-6” or “V-AUX” (see page 45). If your DVD player does not support multi-channel digital output, connect it to these input jacks.



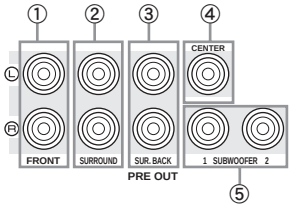
Multi-format player/External decoder (7.1-channel output)

Connecting an external amplifier

This unit has more than enough power for any home use. However, if you want to add more power to the speaker output or if you want to use another amplifier, connect an external amplifier to the PRE OUT jacks. Each PRE OUT jack outputs the same channel signals as the corresponding SPEAKERS terminals.

Note

- When you make connections to the PRE OUT jacks, do not make any connections to the SPEAKERS terminals.



① **FRONT PRE OUT jacks**
Front channel output jacks.

② **SURROUND PRE OUT jacks**
Surround channel output jacks.

③ **SUR. BACK PRE OUT jacks**
Surround back output jacks. When you only connect one external amplifier for the surround back channel, connect it to the single SUR. BACK jack.

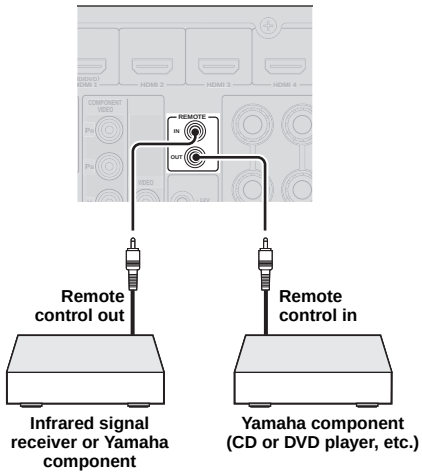
- To output surround back channel signals at these jacks, set “Sur. Back” to any parameter except “None” (see page 52).

④ **CENTER PRE OUT jack**
Center channel output jack.

⑤ **SUBWOOFER PRE OUT 1/2 jack**
Connect a subwoofer with a built-in amplifier.

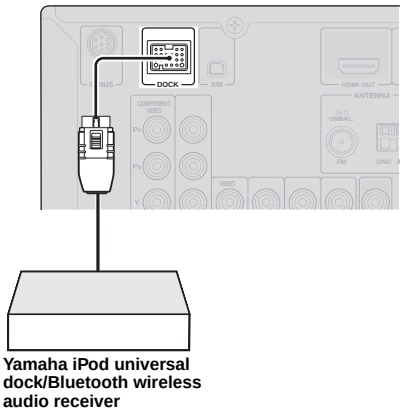
Using REMOTE IN/OUT jacks

When the components are the Yamaha products and have the capability of the transmission of the remote control signals, connect the REMOTE IN and REMOTE OUT jacks to the remote control input and output jack with the monaural analog mini cable as follows.



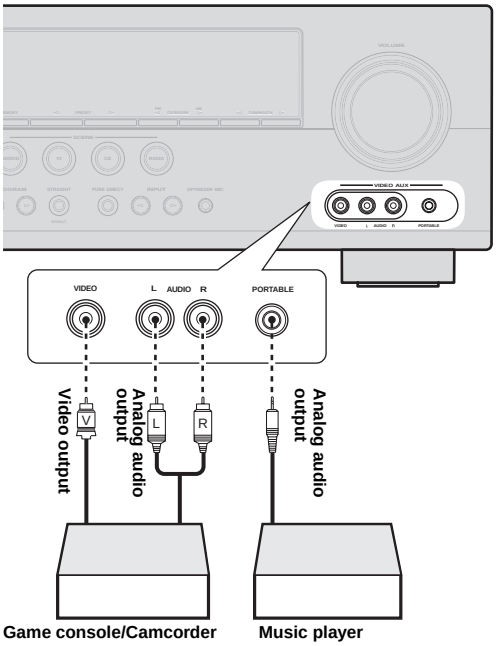
Connecting a Yamaha iPod universal dock or Bluetooth™ wireless audio receiver

This unit has the DOCK jack, to which you can connect a Yamaha iPod universal dock (YDS-11, sold separately) or a Bluetooth wireless audio receiver (YBA-10, sold separately). You can play an iPod or a Bluetooth component with this unit by connecting it to the DOCK jack.
Use a dedicated cable for connection between the dock/receiver and this unit.



Using the VIDEO AUX jacks on the front panel

Use the VIDEO AUX jacks on the front panel to connect a game console or a video camera to this unit. Be sure to turn down the volume of this unit and other components before making connections.

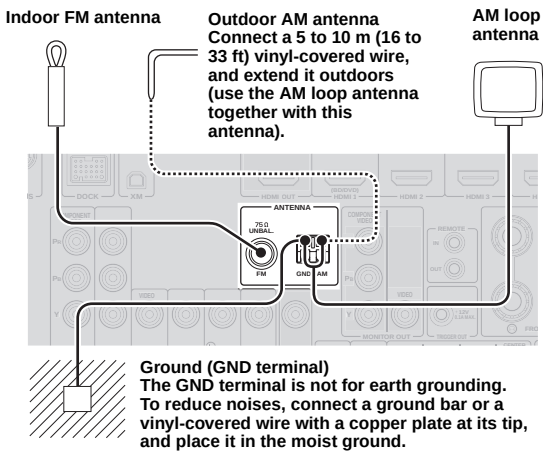


Note

- When external components are connected both the PORTABLE jack and AUDIO jack, sound input from the PORTABLE jack is output.

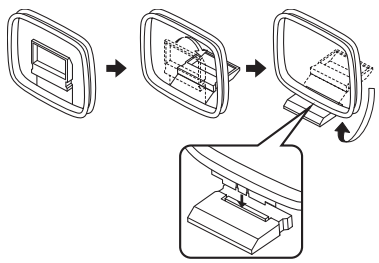
Connecting the FM and AM antennas

An indoor FM antenna and an AM loop antenna are supplied with this unit. Connect these antennas properly to the respective jacks.



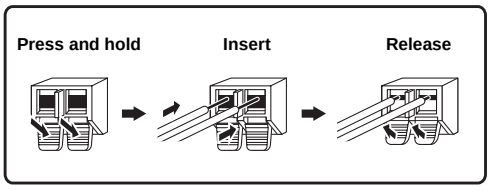
- The supplied antennas are normally sensitive enough to obtain good reception.
- Position the AM loop antenna away from this unit.
- If you cannot get good reception, we recommend that you use an outdoor antenna. For more details, consult the nearest authorized Yamaha dealer or service center.
- Always use the AM loop antenna even when the outdoor antenna is connected.

Assembling the AM loop antenna



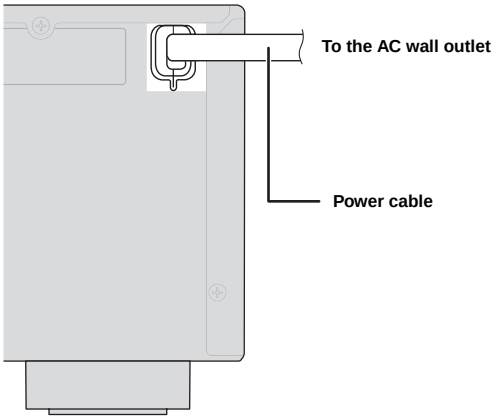
Connecting the AM loop antenna

The wires of the AM loop antenna have no polarity. You can connect either wire to the AM terminal and the other to the GND terminal.



Connecting the power cable

After all connections are complete, plug the AC power cable of this unit into an AC wall outlet.



Turning this unit on and off

1 **Press ⒶMAIN ZONE ON/OFF on the front panel (or 7POWER on the remote control) to turn on this unit.**

2 **Press ⒶMAIN ZONE ON/OFF (or 7POWER) again to turn off this unit (standby mode).**

- The unit needs a few seconds until ready to play back.
- You can also turn on this unit by pressing ⒿSCENE (or 12SCENE).
- This unit consumes a small amount of electricity even in the standby mode. We recommend disconnecting the power cable from the AC wall outlet.

Caution

Do not unplug this unit while it is turned on. Doing so may damage this unit or cause the settings of this unit to be saved incorrectly.

Optimizing the speaker setting for your listening room (YPAO)

This unit has a Yamaha Parametric Acoustic Optimizer (YPAO). With the YPAO, this unit automatically adjusts the output characteristics of your speakers based on speaker position, speaker performance, and the acoustic characteristics of the room. We recommend that you first adjust the output characteristics with the YPAO when you use this unit.

Caution

- Be advised that it is normal for loud test tones to be output during the "Auto Setup" procedure. Do not allow small children to enter the room during the procedure.
- To achieve the best results, make sure the room is as quiet as possible while the "Auto Setup" procedure is in progress. If there is too much ambient noise, the results may not be satisfactory.

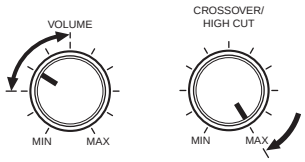
• See page 51 for the "Manual Setup" procedure.

Using Auto Setup

1 Check the following points.

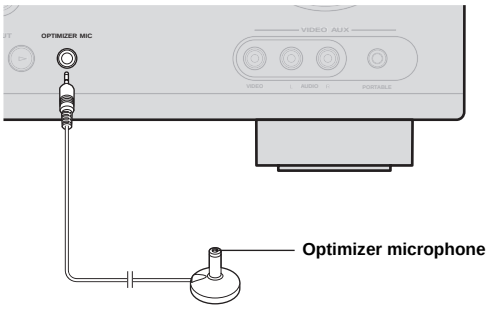
Before starting the automatic setup, check the following.

- All speakers and subwoofer are connected properly.
- Headphones are disconnected from this unit.
- The video monitor is connected properly.
- This unit and the video monitor are turned on.
- This unit is selected as the video input source of the video monitor.
- The connected subwoofer is turned on and the volume level is set to about half way (or slightly less).
- The crossover frequency controls of the connected subwoofer are set to the maximum.



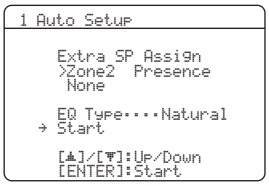
Subwoofer

2 Connect the supplied optimizer microphone to the OPTIMIZER MIC jack on the front panel.



Optimizer microphone

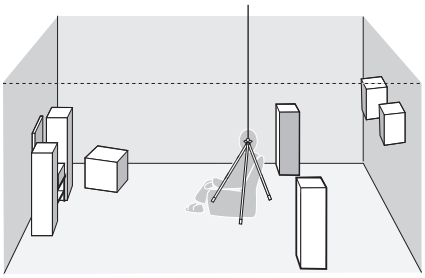
"MIC ON. View OSD MENU" appears on the front panel display.
The following menu screen appears on the video monitor.



- You can bring up the above menu screen from the setup menu (see page 51).

3 Place the optimizer microphone at your normal listening position on a flat level surface with the omni-directional microphone heading upward.

Optimizer microphone



- It is recommended that you use a tripod or something similar to fix the optimizer microphone at the same height as your ears would be when seated in your listening position. You can fix the optimizer microphone to the tripod with the attaching screw of the tripod.

4 When the speakers are connected to EXTRA SP terminals, press 15**Cursor** △ repeatedly to select "Extra SP Assign," and then press 15**Cursor** ◁ / ▷ to select how to use EXTRA SP terminals from "Zone2," "Presence" or "None."

If this unit does not work when you press 15**Cursor**, press 13**SETUP** once and then operate this unit.

5 To select a sound character for adjustment, press 15Cursor ▽ to select "EQ Type" and then press 15Cursor ◁ / ▷.

If this unit does not work when you press 15**Cursor**, press 13**SETUP** once and then operate this unit.
This unit has a parametric equalizer that adjusts the output levels for each frequency range. The equalizer is adjusted to produce a cohesive sound field based on automatically measured speaker characteristics.
In "EQ Type," you can select the following parametric equalizer characteristics suitable for the desired sound characteristics.

Natural

This adjusts all speakers to achieve natural sound. Select this if sounds in the high frequency range seem too strong when "EQ Type" is set to "Flat."

Flat

This adjusts each speaker to obtain the same characteristics. Select this if your speakers have similar qualities.

Front

This adjusts each speaker to obtain the same characteristics as the front left and right speakers. Select this if your front left and right speakers have significantly better qualities than the other speakers.

6 Press 15Cursor ▽ to select "Start" and then press 15ENTER to start the setup procedure.

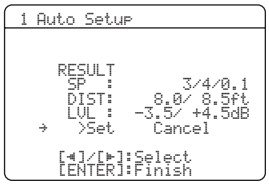
A countdown starts and a measurement starts in 10 seconds. A loud test tone is output during measurement.

Notes

- During the automatic setup procedure, do not perform any operation on this unit.
- Press 15**Cursor** △ to cancel the automatic setup procedure.

Measurement takes about 3 minutes. To obtain precise results, stay where you will not disturb the measurement, such as to the side of or behind the speakers or outside the room.

When measurement is successfully completed, "YPAO Complete" appears on the front panel display and the results appear on the monitor.



SP

Displays the number of speakers connected to this unit in the following order:
Total of Front and Center/Total of Surround and Surround Back/Subwoofer

DIST

Displays the speaker distance from the listening position in the following order:
Closest speaker distance/Farthest speaker distance

LVL

Displays the speaker output levels in the following order:
Lowest speaker output level/Highest speaker output level

Notes

- If "ERROR" appears on the video monitor during "Auto Setup," measurement is canceled and the type of error is displayed. For details, see "When an error message is displayed during measurement" (page 21).
- If problems occur during measurement, "WARNING (XX)" (xx indicates the number of warning) appears above "RESULT" (see page 21).

7 Press 15ENTER to confirm the settings.

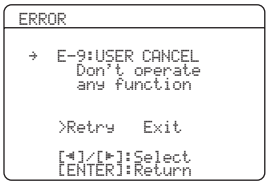
The speaker characteristics are adjusted according to measurement results.
To cancel the operation, press 15**Cursor** ◁ / ▷ to select "Cancel" and press 15**ENTER**.
When the following screen appears, remove the optimizer microphone. "Auto Setup" is now complete.

The optimizer microphone is sensitive to heat. Store it in a cool place and away from direct sunlight after measurement. Do not leave it in a place where it will be subjected to high temperatures such on an AV component.

- If you do not want to apply the measurement results, select "Cancel."
- Perform "Auto Setup" again if you change the number or positions of speakers.
- If you press 15**ENTER** before removing the optimizer microphone, "1 Auto Setup" of "Speaker Setup" in the setup menu (see page 51) is displayed.

When an error message is displayed during measurement

Select “Retry” or “Exit” using 15Cursor ⊲ / ⊳ and then press 15ENTER.



Retry

Performs “Auto Setup” again.

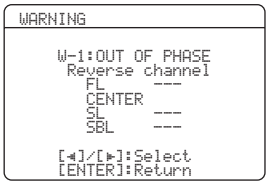
Exit

Terminates the measurement and “Auto Setup.”

- See page 69 for details on error messages.
- When “E-5:NOISY” appears, you can continue measurement. To continue measurement, select “Proceed.” However, we recommend that you solve the problem first and then perform measurement again.

When a warning message is displayed after measurement

If a problem occurs during measurement, “WARNING” is displayed on the result display screen. Check the error and solve the problems.



- See page 70 for details on warning messages.
- Optimization will not be performed while a warning message is displayed. We recommend that you solve the problem and perform “Auto Setup” again.

1 Check if “→” is displayed on the left of “WARNING” and press 15ENTER.

Details of the warning message are displayed. If there are multiple warning messages, you can display the next message using 15Cursor ⊳.

2 To return to the top result display, press 15ENTER again.

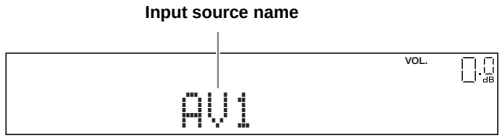
Playback

Basic procedure

1 Turn on external components (TV, DVD player, etc.) connected to this unit.

2 Press ⓄINPUT ◁ / ▷ (or 8Input selection keys) to select an input source.

The name of the selected input source is displayed for a few seconds.



- You can change the input source name displayed on the front panel display or the OSD on the video monitor as necessary (see page 55).

3 Play the external component that you have selected as the source input, or select a radio station on the tuner.

Refer to the operating instructions of the external component for details on playback. For selecting radio stations or playback of an iPod or Bluetooth component using this unit, see the following.

- FM/AM radio tuning (see page 29)
- Bluetooth component playback (see page 42)
- iPod playback (see page 40)

4 Turn the ⓆVOLUME control to adjust the volume (or press 16VOLUME +/–).

Note

When you play back a DTS-CD, noise may be output in some conditions, which may cause a speaker malfunction. Make sure that the volume is set to low before starting playback. If noise is output, do the following.

1) When only noise is output
If a DTS bitstream signal is not properly input to this unit, only noise is output. Connect the playback component to this unit by digital connection and play back the DTS-CD. If the condition is not improved, the problem may results from the playback component. Consult the manufacturer of the playback component.

2) When noise is output during playback or skip operation
Before playing back the DTS-CD, display the option menu after selecting the input source and set "Decoder Mode" to "DTS" (see page 44).

Using the SCENE function

This unit has a SCENE function that allows you to change input sources and sound field programs with one key. Four scenes are available for different usages, such as playing movies or music. The following input sources and sound field programs are provided as the initial factory settings.

	Input source	Sound field program
BD/DVD	HDMI 1	Straight
TV	AV 1	Straight
CD	AV 3	Straight
RADIO	TUNER	7ch Enhancer

- When this unit is on standby, you can turn on this unit by pressing the SCENE key.
- When connecting a Yamaha DVD/CD player that has the REMOTE OUT jack of this unit, you can play back a DVD/CD on the player by selecting BD/DVD or CD SCENE function.

Selecting a SCENE

Press ⒿSCENE (or 12SCENE).

Registering input source/sound field program

Select the desired input source/sound field program, and press down ⒿSCENE (or 12SCENE) until "SET Complete" appears on the front panel display.

While display in the OPTION menu or SETUP menu, "SCENE Setting Complete" appears on the video monitor (OSD).

Switching remotely controlled external components linked to scene selections

You can operate an external component with the remote control of this unit by setting a remote control code for the external component for each input source. Setting remote control codes for desired input sources allows you to switch between external components linked to scene selections.

1 Register the remote control code of an external component to the desired input source (see page 59).

Note

- Remote control codes cannot be registered to TUNER, SIRIUS, or XM input sources.

2 Press [8]Input selection keys on the remote control for the input source whose remote control code was registered in step 1 for about 3 seconds while pressing down [12]SCENE key whose assignment you want to change. The external component can now be controlled remotely just by selecting a scene.

From now on the external component can be remotely controllable just by selecting a scene.

Muting audio output temporarily (MUTE)

1 Press [18]MUTE on the remote control to mute the audio output.

The MUTE indicator on the front panel display flashes while audio output is muted.

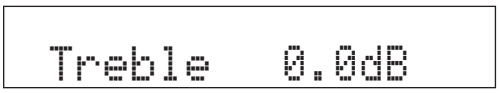
2 Press [18]MUTE again to resume audio output.

Adjusting high/low frequency sound (tone control)

You can adjust the balance of the high frequency range (Treble) and low frequency range (Bass) of sounds output from the front left and right speakers to obtain desired tone.

1 Press ⓀTONE CONTROL on the front panel repeatedly to select "Treble" or "Bass."

The current setting is displayed on the front panel display.



2 Adjust the frequency range using ⓁPROGRAM ◁ / ▷.

Control range: –10.0 dB to +10.0 dB

The display returns the previous screen soon after you release the key.

Notes

- The tone control settings are not effective during playback in Pure Direct mode.
- If you set the balance extremely off, sounds may not match those from other channels well.

Enjoying pure hi-fi sound

Use Pure Direct mode to enjoy the pure high fidelity sound of the selected source. When Pure Direct mode is activated, this unit plays back the selected source with the least circuitry.

Press ⓃPURE DIRECT (or [11]PURE DIRECT) to turn the Pure Direct mode on or off.

ⓃPURE DIRECT lights up when you set Pure Direct mode on.

The front panel display turns off while the Pure Direct mode is on. It turns on temporarily when you control this unit (such as volume control). The front panel display turns on again once you set the Pure Direct mode to off.

The following features are disabled in Pure Direct mode.

– sound field program, tone control
– display and operation of the option menu and setup menu
– mulit-zone function

Using your headphones

Plug your headphones in the ⒷPHONES jack on the front panel.

When you select a sound field program while using the headphones, the mode is automatically set to SILENT CINEMA mode.

Notes

- When you connect headphones, no signals are output at the speaker terminals.
- When multi-channel signals are processed, sounds in all channels are divided to left and right channels. When the input source is set to "MULTI CH," only front L/R sound is output from the headphones.

Displaying input signal information

When HDMI1-4 or AV1-4 is selected as the input source, you can display audio/video signal information.

- Input signal information is displayed on both a video monitor and the front panel display.
- Information on the input signal is also displayed on the front panel display. You can select the desired item using 15**Cursor** △ / ▽.

1 Select the desired input source, and press 14OPTION.

The option menu for the selected input source is displayed (see page 43).

2 Press 15Cursor △ / ▽ to select "Signal Info," and press 15ENTER.

Information on input signals is displayed. See page 44 on messages displayed on the screen.

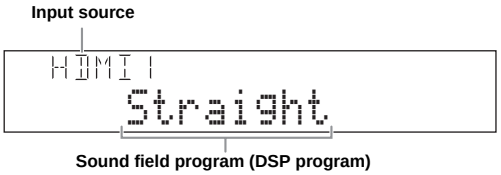
Note

- If an HDMI related error occurs, error information is displayed at the bottom of the screen.
- Information on the input signal is also displayed on the front panel display. You can select the desired item using 15**Cursor** △ / ▽.

3 To end the information display, press 14OPTION.

Changing information on the front panel display

Information displayed on the front panel display can be changed by pressing ⒺINFO (or 10**INFO**).
The following information can be displayed according to the input source.
For example, if you select HDMI1 input and display "DSP Program," the following screen appears on the front panel display.



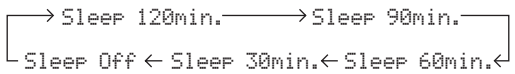
HDMI1-4:	Input, DSP Program, Audio Decoder
AV1-6:	Input, DSP Program, Audio Decoder
AUDIO1-2:	Input, DSP Program, Audio Decoder
MULTI CH:	Input
V-AUX:	Input, DSP Program, Audio Decoder
FM/AM:	Frequency, DSP Program, Audio Decoder
XM:	Channel, Category, Song, Antenna, DSP Program, Audio Decoder
SIRIUS:	Channel, Category, Artist / Song, Composer, Antenna, DSP Program, Audio Decoder
iPod (Simple remote mode):	Input, DSP Program, Audio Decoder
iPod (Menu browse mode):	(in PlayInfo displayed) Artist, Album, Song, DSP Program, Audio Decoder (in Play menu displayed) List
Bluetooth:	Input, DSP Program, Audio Decoder

Using the sleep timer

The sleep timer is useful if you want to go to sleep while this unit is playing or recording a source.

Press 6SLEEP repeatedly to set the amount of time.

Each time you press 6**SLEEP**, the front panel display changes as shown below.



When the sleep timer is set, the SLEEP indicator on the front panel display lights up.
Press 6**SLEEP** on the remote control repeatedly until "Sleep Off" appears on the front panel display.

Enjoy the sound field programs

This unit is also equipped with a Yamaha digital sound field processing (DSP) chip. You can enjoy multi-channel sounds for almost all input sources using various sound field programs stored on the chip and a variety of surround decoders.

Selecting sound field programs

■ Selecting a sound field program on the front panel

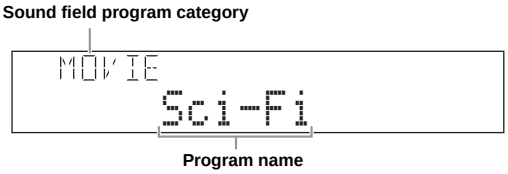
Press Ⓛ**PROGRAM** ⊲ / ⊳ repeatedly to select a desired sound field program.

■ Selecting a sound field program with the remote control

Perform the following operations depending on the category of the sound field programs.

Sound field programs for movies/TV programs..... Press 11**MOVIE** repeatedly.
Sound field programs for music ..... Press 11**MUSIC** repeatedly.
Stereo reproduction ..... Press 11**STEREO** repeatedly.
Multi-channel stereo reproduction ..... Press 11**STEREO** repeatedly.
Compressed music enhancer ..... Press 11**STEREO** repeatedly.
Surround decoder ..... Press 11**SUR.DECODE** repeatedly.

For example, if you select “Sci-Fi” in “movie/TV program,” the following screen appears on the front panel display.



Notes

- Sound field programs are stored for each input source. When you change the input source, the sound field program previously selected for that input source is applied again.
- When you play back the Dolby Digital Plus, Dolby TrueHD, DTS Express, DTS-HD Master Audio, or DTS-HD High Resolution Audio sources, this unit does not apply any sound field program other than the surround decoder and they are played back in straight decode mode.
- If the sampling frequency of an input source is higher than 96 kHz, this unit does not apply any sound field programs.

Sound field program descriptions

This unit provides sound field programs for multiple categories including music, movies and stereo reproduction. Select a sound field program based on your listening preference, not merely on the name of the program, etc.

- You can check what speakers are currently outputting signals with the speaker indicators on the front panel display (see page 6).
- Each program can adjust sound field elements (sound field parameters). For details, see page 46.
- CINEMA DSP in the table indicates the sound field program with CINEMA DSP.

For movie/TV program sources CINEMA DSP

Program	Descriptions
Standard	This program creates a sound field emphasizing the surrounding feeling without disturbing the original acoustic positioning of multi-channel audio such as Dolby Digital and DTS. It has been designed with the concept of “an ideal movie theater,” in which the audience is surrounded by beautiful reverberations from the left, right and rear.
Spectacle	This program represents the spectacular feeling of large-scale movie productions. It reproduces a broad theater sound field matching the cinemascope and wider-screen movies with an excellent dynamic range from very small to extremely large sound.
Sci-Fi	This program clearly reproduces the finely elaborated sound design of the latest science fiction and special effects-featuring movies. You can enjoy a variety of cinematographically created virtual spaces reproduced with clear separation between dialog, sound effects and background music.
Adventure	This program is ideal for precisely reproducing the sound design of action and adventure movies. The sound field restrains reverberations but puts emphasis on reproducing a powerful space expanded widely to the left and right. The reproduced depth is also restrained relatively to ensure the separation between audio channels and the clarity of the sound.

Program	Descriptions
Drama	This sound field features stable reverberations that match a wide range of movie genres from serious dramas to musicals and comedies. The reverberations are modest but offer an optimum 3D feeling, reproducing effects tones and background music softly but cubically around clear words and center positioning in a way that does not fatigue the listener even after long hours of viewing.
Mono Movie	This program is provided for reproducing monaural video sources such as a classic movie in an atmosphere of a good old movie theater. The program produces the optimum expansion and reverberation to the original audio to create a comfortable space with a certain sound depth.
Sports	This program allows the listeners to enjoy stereo sport broadcasts and studio variety programs with enriched live feeling. In sports broadcasts, the voices of the commentator and sportscaster are positioned clearly at the center while the atmosphere of the stadium expands in an optimum space to offer the listeners with a feeling of presence in the stadium.
Action Game	This sound field has been suitable for action games such as car racing and FPS games. It uses the reflection data that limits the effects range per channel in order to offer a powerful playing environment with a being-there feeling by enhancing various effects tones while maintaining a clear sense of directions.
Roleplaying Game	This sound field has been suitable for role-playing and adventure games. It combines the sound field effects for movies and the sound field designs for “Action Game” to represent the depth and 3D feeling of the field during play, while offering movie-like surround effects in the movie scenes in the game.

For audio music sources CINEMA DSP

Program	Descriptions
Hall in Munich	This sound field simulates a concert hall with approximately 2500 seats in Munich, using stylish wood for the interior finishing as normal standards for European concert halls. Fine, beautiful reverberations spread richly, creating a calming atmosphere. The listener’s virtual seat is at the center left of the arena.
Hall in Vienna	This is an approximately 1700-seated, middle-sized concert hall with a shoebox shape that is traditional in Vienna. Pillars and ornate carvings create extremely complex reflections from all around the audience, producing a very full, rich sound.
Chamber	This program creates a relatively wide space with a high ceiling like an audience hall in a palace. It offers pleasant reverberations that are suitable for courtly music and chamber music.
Cellar Club	This program simulates a live house with a low ceiling and homey atmosphere. A realistic, live sound field features powerful sound as if the listener is in a row in front of a small stage.
The Roxy Theatre	This is the sound field of a rock music live house in Los Angeles, with approximately 460 seats. The listener’s virtual seat is at the center left of the hall.
The Bottom Line	This is the sound field at stage front in The Bottom Line, that was a famous New York jazz club once. The floor can seat 300 people to the left and right in a sound field offering real and vibrant sound.
Music Video	This sound field offers an image of a concert hall for live performance of pop, rock and jazz music. The listener can indulge oneself in a hot live space thanks to the presence sound field that emphasizes the vividness of vocals and solo play and the beat of rhythm instruments, and to the surround sound field that reproduces the space of a big live hall.

For stereo reproduction

Program	Descriptions
2ch Stereo	Use this program to mix down multi-channel sources to 2 channels.

- When multi-channel signals (Dolby Digital and DTS) are input, they are downmixed to 2 channels and output from the front left and right speakers.

For Multi-channel stereo reproduction CINEMA DSP

Program	Descriptions
7ch Stereo	Use this program to output sound from all speakers. When you play back multi-channel sources, this unit downmixes the source to 2 channels, and then outputs the sound from all speakers. This program creates a larger sound field and is ideal for background music at parties, etc.

The Compressed Music Enhancer

Program	Descriptions
Straight Enhancer	Use this program to enhance the sound nearest to the original depth and width of the 2-channel or multi-channel compression artifacts.
7ch Enhancer	Use this program to play back compression artifacts in 7-channel stereo.

Surround decode mode

Select this program to playback sources with selected decoders. You can playback 2-channel sources on multi-channels. See page 45 for details.

Decoder	Descriptions
Pro Logic	Dolby Pro Logic decoder suitable for all kinds of sources.
PLIIx Movie / PLII Movie	Dolby Pro Logic IIx (or Dolby Pro Logic II) decoder suitable for movies. If your listening environment is as follows, you cannot select the Dolby Pro Logic IIx decoder. • When the surround back speakers are not connected • When headphones are connected
PLIIx Music / PLII Music	Dolby Pro Logic IIx (or Dolby Pro Logic II) decoder suitable for music. If your listening environment is as follows, you cannot select the Dolby Pro Logic IIx decoder. • When the surround back speakers are not connected • When headphones are connected
PLIIx Game / PLII Game	Dolby Pro Logic IIx (or Dolby Pro Logic II) decoder suitable for games. If your listening environment is as follows, you cannot select the Dolby Pro Logic IIx decoder. • When the surround back speakers are not connected • When headphones are connected
Neo:6 Cinema	DTS decoder suitable for movies.
Neo:6 Music	DTS decoder suitable for music.
Neural Sur. (U.S.A. model only)	Neural Surround processing for any sources. The Neural Surround decoder is compatible with PCM signals and analog 2-channel input sources. When Neural Surround-incompatible signals are being input while the Neural Surround decoder is selected, multi-channel sources are decoded straight into the appropriate channels without any additional effect processing and the Neural Surround-incompatible PCM signals are reproduced in stereo. The Neural Surround decoder is especially suitable for the XM HD Surround program of XM Satellite Radio.

• An input source is played back in straight decode mode (see page 28) when multi-channel audio signal is input.

Enjoying unprocessed input sources (Straight decoding mode)

In straight decoding mode, sounds are reproduced without sound field effect. 2-channel stereo sources are output from only the front left and right speakers. Multi-channel input sources are decoded straight into the appropriate channels and multi-channel sounds are reproduced without a sound field effect.

1 To enable straight decoding mode, press ⓂSTRAIGHT (or 11STRAIGHT).

"Straight" appears on the front panel display.

2 To cancel straight decoding mode, press ⓂSTRAIGHT (or 11STRAIGHT) again.

A sound field program name appears on the front panel display, and sound is reproduced with that sound field effect.

Enjoying sound field programs without surround speakers (Virtual CINEMA DSP)

Virtual CINEMA DSP allows you to enjoy DSP sound field surround effects even without any surround speakers by using virtual surround speakers. You can even enjoy Virtual CINEMA DSP using a minimal two-speaker system that does not include a center speaker.
When "Sur. L/R SP" in the setup menu is set to "None" (see page 52), this unit operates in Virtual CINEMA DSP mode.

Note

- Virtual CINEMA DSP is not available in the following conditions even if you set "Sur. L/R SP" to "None" (see page 52).
  – headphone plug is connected to the PHONES jack.
  – 7ch Stereo of the field sound program is selected.
  – Pure Direct mode or straight decoding mode is used.

Enjoy sound field programs with headphones (SILENT CINEMA™)

SILENT CINEMA allows you to enjoy multi-channel sources with your headphones. SILENT CINEMA mode is automatically selected when you connect the headphone plug to the PHONES jack.

Note

- SILENT CINEMA mode is not available in the following conditions.
  – 2ch Stereo of the sound field program is selected.
  – Pure Direct mode or straight decoding mode is selected.

Using CINEMA DSP 3D mode

CINEMA DSP 3D mode creates the intensive and accurate stereoscopic sound field in the listening room. To use this unit in CINEMA DSP 3D mode, presence speakers are required. Connect the presence speakers to the EXTRA SP jacks, perform the following settings and select a CINEMA DSP related sound field program.

- Set the "Extra SP Assign" to "Presence" (see page 51).
- Enables the CINEMA DSP 3D in the setup menu (see page 47).
- Disconnect the headphones from the PHONES jack.

When the sound field program runs in CINEMA DSP 3D mode, the 3D indicator on the front panel lights up.

FM/AM tuning

The FM/AM tuner of this unit provides the following two modes for tuning.

■ **Frequency tuning mode (Auto tuning/Manual tuning)**

You can tune in to a desired FM/AM station by searching or specifying its frequency.

■ **Preset tuning mode (Preset tuning)**

You can preset the frequencies of FM/AM stations by registering them to specific numbers, and later just select those numbers to tune in.

Note

• Adjust the FM/AM antennas connected to this unit for the best reception.

Tuning in to the desired FM/AM station (Frequency tuning)

1 Press ⓄINPUT ◁ / ▷ (or 8TUNER) repeatedly and switch the input source to "TUNER."

2 Press ⒽFM (9FM) or ⒽAM (9AM) to select a band.

"FM" or "AM" appears on the front panel display according to the band that you have selected.

3 Press ⓘTUNING/CH ◁ / ▷ (or 9TUN./CH △ / ▽) to specify the frequency.

To adjust the frequency to a higher range, press ▷ (or △). To adjust it to the lower range, press ◁ (or ▽). The TUNED indicator on the front panel display lights up when the tuner is tuned in to a station. The STEREO indicator also lights up if the program being broadcasted is in stereo.

The frequency changes in the following manner according to how you press ⓘTUNING/CH ◁ / ▷ (or 9TUN./CH △ / ▽).

When you press the key more than 1 second

The tuner searches the frequency of a station that is detectable around the current frequency. This is effective when the tuner can receive strong signals without any interference. Once the search starts, release the key. When you keep holding the key, the search continues even when a station is detected. This is useful when you want to tune in to a specific station.

When you press and release the key

The tuner increases or decreases the frequency in steps. Use this method when the tuner cannot receive strong signals and stations are skipped during the search. You can listen to better quality sound even when the tuner cannot receive a strong signal.

• You can switch between stereo and monaural for FM broadcast in the option menu (see page 44).

4 To tune in by direct frequency tuning, enter the frequency of the desired station using the numeric keys on the remote control.

Enter only integers. For example, if you want to set the frequency to 88.9 MHz, enter "889" using 20**Numeric keys**.

Note

• "Wrong Station!" appears on the front panel display when you enter a frequency that is out of receivable range. Make sure that the entered frequency is correct.

Registering FM/AM stations and tuning in (Preset tuning)

You can register up to 40 FM/AM stations (Preset) using "Automatic station preset" or "Manual station preset."

Registering stations by automatic station preset

The tuner automatically detects FM stations with strong signals and registers up to 40 stations. AM stations cannot be automatically registered. Use manual station preset.

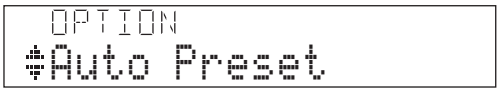
1 Press ⓄINPUT ◁ / ▷ repeatedly (or press 8TUNER) to switch the input source to "TUNER."

2 Press 14OPTION on the remote control.

The option menu screen for setting options of tuner input appears on the front panel display.

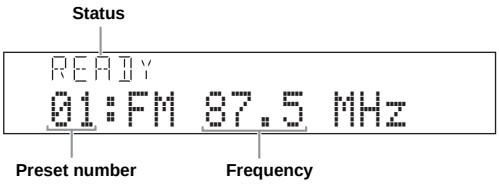
• For details on the option menu, see page 43.
• The option menu is displayed on monitor components.

3 Select "Auto Preset," and press 15ENTER.



Automatic station preset starts about 5 seconds later from the lowest frequency upwards.

• You can select the preset number at which the preset starts by pressing 9PRESET △ / ▽ or 15Cursor △ / ▽ while the front panel display is in the state as shown in the below figure.
• To cancel registration, press 15RETURN on the remote control.



BASIC OPERATION

English

During the automatic station preset, the upper area of the screen changes as follows: READY → SEARCH → MEMORY each time a station is registered. When registration is complete, "FINISH" appears and the option menu screen automatically reappears. When you press [14]**OPTION** on the remote control, the screen returns to the original state.

Registering stations by manual station preset

You can manually register AM stations or FM stations with weak signals.

1 Tune in to a station referring to "Tuning in to the desired FM/AM station (Frequency tuning)" (see page 29).

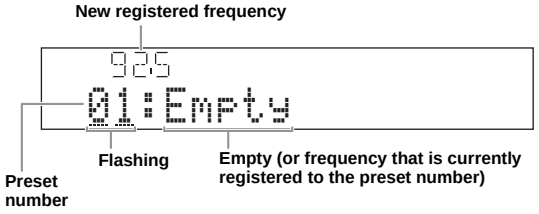
2 Press Ⓕ MEMORY (or [9] MEMORY).

"Manual Preset" appears on the front panel display, followed soon by the preset number to which the station will be registered.

- By pressing down Ⓕ **MEMORY** (or [9] **MEMORY**) for more than 2 seconds, you can skip step 3 and register the preset number to be one higher than the last preset number.

3 Press Ⓖ PRESET ◁ / ▷ (or [9] PRESET △ / ▽) on the remote control to select the preset number to which the station will be registered.

When you select a preset number to which no station is registered, "Empty" appears on the display. When you select a registered preset number, a registered frequency is displayed on the right of the preset number.



- You can select a preset number using the [20] **Numeric keys**.

4 Press Ⓕ MEMORY (or [9] MEMORY) again to register.

When registration is complete, the screen returns to the original state.

To end the operation, press [14] **OPTION**.

- To cancel registration, press [15] **RETURN** on the remote control or leave the tuner without any operations for about 30 seconds.

Calling a preset station (Preset tuning)

You can call preset stations registered by automatic station preset or manual station preset.

Press Ⓖ PRESET ◁ / ▷ (or [9] PRESET △ / ▽) to select a preset number.

- Preset numbers to which no stations are registered will be skipped.
- When "No Presets" or "No Presets in Memory" is displayed it means that no stations are registered. See page 29 and register stations.
- You can directly select a preset number by pressing a [20] **Numeric keys** while calling a preset station. "Empty" appears on the display if you enter a preset number to which no station is registered. "Wrong Num." appears if you enter an invalid number.

Clearing the preset station

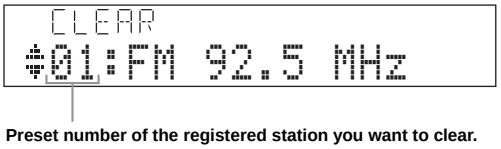
1 Press Ⓞ INPUT ◁ / ▷ repeatedly (or press [8] TUNER) to switch the input source to "TUNER."

2 Press [14] OPTION on the remote control.

The option menu screen for setting options of tuner input appears on the front panel display.

3 Display "Clear Preset" using the [15] Cursor △ / ▽ and press [15] ENTER.

The following screen appears on the display.



- You can cancel the operation and return to the option menu screen by pressing [15] **RETURN** on the remote control.

4 Select the preset number of the registered station you want to clear using the [15] Cursor △ / ▽ and press [15] ENTER.

The preset station registered to the selected preset number is cleared. To clear the registration of multiple preset numbers, repeat the above steps.

To end the operation, press [14] **OPTION**.

XM® Satellite Radio tuning (U.S.A. model only)

Listening to Satellite Radio

To listen to Satellite Radio, you'll need to connect either a SIRIUS or XM Satellite Radio tuner (sold separately) to your satellite-ready receiver. Satellite Radio is available to residents of the US (except Alaska and Hawaii).

Satellite Radio delivers a variety of commercial-free music from categories ranging from Pop, Rock, Country, R&B, Dance, Jazz, Classical and many more plus coverage of all the top professional and college sports including play by play games from select leagues and teams. Additional programming includes expert sports talk, uncensored entertainment, comedy, family programming, local traffic and weather and news from your most trusted sources.

Whether you purchase a SIRIUS or XM tuner, you'll need to activate and subscribe to begin enjoying the service. Easy to follow installation and setup instructions are provided with the satellite tuners. Whichever service you choose, there are a variety of programming packages available, including the option of adding "The Best of SIRIUS" programming to your XM tuner or "The Best of XM" programming to your SIRIUS tuner, enabling you to enjoy the most popular programming among both services. Family friendly packages are also available to restrict channels featuring content that may be inappropriate for children.

To subscribe to XM, U.S. customers should visit xmradio.com or call 1-800-XMRADIO (1-800-967-2346).

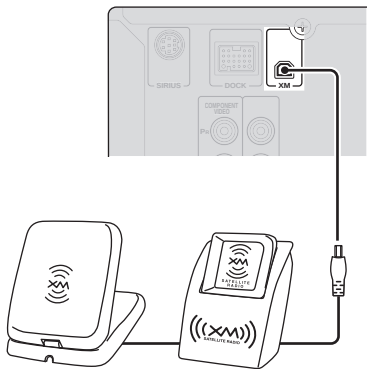
To subscribe to SIRIUS, U.S. customers can call 1-888-539-SIRI (1-888-539-7474) or visit sirius.com (US).

SIRIUS XM Radio Legal

SIRIUS, XM and all related marks and logos are trademarks of Sirius XM Radio Inc. and its subsidiaries. All other marks and logos are the property of their respective owners. All rights reserved. SIRIUS and XM subscriptions sold separately. Taxes and a one-time activation fee may apply. XM tuners and home docks or SIRIUS tuners (each sold separately) are required to receive the SIRIUS or XM satellite radio service. All programming and fees subject to change. It is prohibited to copy, decompile, disassemble, reverse engineer, hack, manipulate or otherwise make available any technology or software incorporated in receivers compatible with the SIRIUS or XM Satellite Radio Systems. **Service not available in Alaska and Hawaii.**

Connecting XM Mini-Tuner Home Dock

Connect XM Mini-Tuner and XM Mini-Tuner Home Dock (sold separately) to the XM jack on the rear panel of this unit. For details, see the operating instructions provided with the XM Mini-Tuner Home Dock.



XM Mini-Tuner and XM Mini-Tuner Home Dock (sold separately)

- To ensure optimal reception of the XM Satellite Radio signals, the XM Mini-Tuner Home Dock must be placed at or near a southerly facing window with no obstacles in the path to the sky. You can mount it indoors or outdoors. Use the "Antenna" information on the front panel display or on the OSD screen (see page 34) to check the antenna reception level and adjust the orientation of the antenna.

Notes

- If "CHECK ANTENNA," "CHECK XM TUNER" or "NO SIGNAL" appears on the front panel display, the connection and setting of the antenna, XM Mini-Tuner Home Dock, or XM Mini-Tuner may not be correct.
- When "UPGRADE XM TUNER" is displayed, it means that the connected antenna is old. See page 65 for details.

Activating XM Satellite Radio

Once you have installed the XM Mini-Tuner Home Dock, inserted the XM Mini-Tuner, connected the XM Mini-Tuner Home Dock to your XM Ready® home audio system, and installed the antenna, you are ready to subscribe and begin receiving XM programming. There are three places to find your eight character XM Radio ID: on the XM Mini-Tuner, on the XM Mini-Tuner package, and on XM Channel 0. Record the XM Radio ID in the following eight squares for reference.

☐ ☐ ☐ ☐ ☐ ☐ ☐ ☐

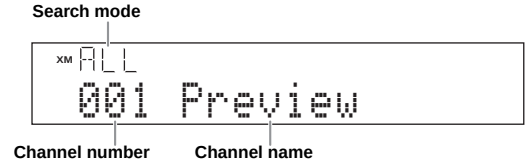
Note

- The XM Radio ID does not use the letters "I," "O," "S" or "F." Activate your XM Satellite Radio service in the U.S. online at http://activate.xmradio.com/ or call 1-800-XM-RADIO (1-800-967-2346). You will need a major credit card. XM will send a signal from the satellites to activate the full channel lineup. Activation normally takes 10 to 15 minutes, but during peak busy periods you may need to keep your XM Ready home audio system on for up to an hour. When you can access the full lineup on your XM Ready home audio system you are done.

XM Satellite Radio® operations

1 Press the ⓄINPUT ◁ / ▷ (or press 8XM) to select "XM" as the input source.

The XM Satellite Radio information (such as channel number, channel name, category, artist name, or song title) for the currently selected channel appears on the front panel display and video monitor (see page 34).



- When you select "XM" as the input source, this unit automatically recalls the previously selected channel.

Note

- If a status message or an error message appears on the front panel display or on the OSD, see "XM Satellite Radio" (see page 65).

2 Search for a channel by using one of the XM Satellite Radio search modes.

- To select a channel from the all channel list, see "All Channel Search mode" on this page.
- To select a channel by category, see "Category Search mode" on this page.
- To select the desired channel directly by entering the channel number, see "Direct number access mode" on this page.
- To select a channel from the preset channels, see "Calling a preset channel (Preset Search mode)" (page 33).

- You can display the XM Satellite Radio information on the front panel display or in the video monitor (see page 34).
- You can set the XM Satellite Radio preset channels (see page 33).

■ All Channel Search mode

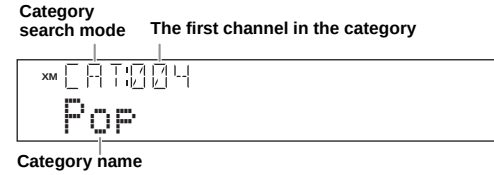
Press ⓘTUNING/CH ◁ / ▷ (or 9TUN./CH △ / ▽) repeatedly to search for a channel within all channels.

- You can search for a channel quickly by pressing and holding ⓘTUNING/CH ◁ / ▷ (or 9TUN./CH △ / ▽).
- You can skip channels to the previous or next category by pressing ⒽCATEGORY ◁ / ▷ (or 9CATEGORY ◁ / ▷).

■ Category Search mode

1 Press ⒽCATEGORY ◁ / ▷ (or 9CATEGORY ◁ / ▷) to select the channel category.

"CAT" is displayed on the front panel display during the channel category selection. When you select the category, the first channel in the category is selected.



Note

- If you don't operate within 10 seconds, the category search mode returns to "ALL (All Channel Search)."

2 While "CAT" is displayed on the front panel display, press ⓘTUNING/CH ◁ / ▷ (or 9TUN./CH △ / ▽) repeatedly to search for a channel within the selected channel category.

- You can search for a channel quickly by pressing and holding ⓘTUNING/CH ◁ / ▷ (or 9TUN./CH △ / ▽).

Note

- This unit skips the channels when this unit is in the All Channel Search mode or Category Search mode in the following cases (it is not malfunction of this unit):
  – the channel is out of service.
  – you do not subscribe to the channel.

■ Direct number access mode

Press the 20Numeric keys to enter the desired three-digit channel number.

For example, to enter the number 123, press the 20Numeric keys as "1," "2" and "3."

- To display the Radio ID number displayed on the front panel display, select channel "0."
- To enter a one-digit or two-digit channel number, press the 20Numeric keys on the remote control and then press 20ENT to confirm the input number.
- Instead of pressing 20ENT to tune into the channel immediately, you can wait a few seconds until this unit confirms the entered channel number.
- If no key is pressed within a few seconds after you enter a one-digit or two-digit number, this unit automatically confirms the entered channel number.
- If the selected channel is not available, an advisory message may appear. For details, see "XM satellite radio" on page 65.
- If you operate 20Numeric keys in preset search mode (see next page), a preset number is selected. If you want to directly select a channel number, press ⓘTUNING/CH ◁ / ▷ (or 9TUN./CH △ / ▽) to switch to All Channel Search mode and enter the number.

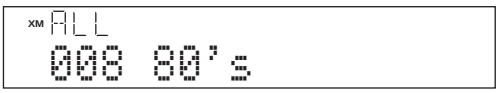
Registering XM Satellite Radio channels

You can use this feature to store up to 40 XM Satellite Radio channels. You can then recall any preset channel easily by selecting the preset channel as described in "Calling a preset channel (Preset Search mode)" on this page.

Registering preset channels

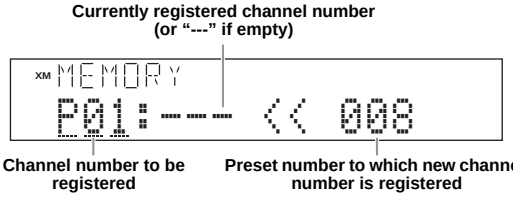
1 Search a channel you want to set as a preset channel in one of the XM Satellite Radio search modes.

For details, see "XM Satellite Radio operations" (see page 32).



2 Press ⒻMEMORY (or 9MEMORY).

The indicator on the front panel display changes as follows.



- To store the selected channel under an empty preset number automatically, press and hold Ⓕ**MEMORY** (or 9**MEMORY**) for more than 2 seconds instead of step 2. In this case, the following steps are unnecessary.
- To cancel the preset operation, press 15**RETURN**.

3 Press ⒼPRESET** ⊲ / ⊳ (or 9**PRESET** △ / ▽) to select the stored preset station number.**

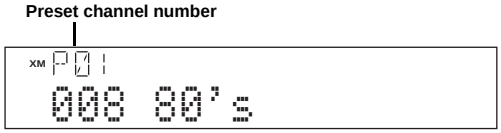
Note

- You can also select a preset number by pressing the 20**Numeric keys**.

4 Press ⒻMEMORY (or 9MEMORY).

Calling a preset channel (Preset Search mode)

Prior to selecting a preset channel in the Preset Search mode, you must preset XM channels. For details, see "Registering preset channels" on this page.



Press ⒼPRESET ⊲ / ⊳ (or 9PRESET △ / ▽) repeatedly to change the preset channel number (1 to 40).

- You can directly select a preset number by pressing a 20**Numeric keys** while calling a preset channel.

Clearing preset channels

You can clear the assignments of preset XM Satellite Radio channels.

1 Press 14OPTION on the remote control.

The option menu is displayed on the front panel display.

2 Press 15Cursor ▽ repeatedly to select "Clear Preset" and then press 15ENTER.

3 Press 15Cursor △ / ▽ to select the preset station number that you want to clear.

4 Press 15ENTER to execute the clearing of the selected preset channel.

To clear the registration of multiple preset numbers, repeat the above steps. To end the operation, press 14**OPTION**.

Displaying the XM Satellite Radio™ information

Use this feature to display the XM Satellite Radio information on the front panel display or on the OSD.

Note

- If a status message or an error message appears on the front panel display or video monitor, see "XM Satellite Radio" (see page 65).

■ Front panel display

Press Ⓔ**INFO** (or 10**INFO**) repeatedly to toggle the following XM Satellite Radio information display modes.

Channel
Channel number, channel name

↓

Category
Channel category, channel number

↓

Artist / Song
Artist name, song title, channel number

↓

Antenna
Antenna reception level, channel number

↓

DSP Program
Current sound field program (see page 25)

↓

Audio Decoder
Current Audio Decoder (see page 27)

↓

Back to "Channel"

Front Panel Display (example)

- If the XM Satellite Radio information contains a character that cannot be recognized by this unit, the character will be displayed with a space.
- When an information is unavailable, "——" appears.

■ Video monitor (OSD)

The following information is displayed on the OSD.

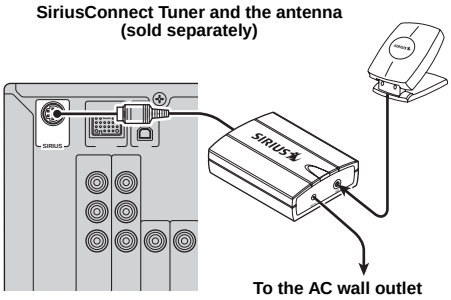
① **Search mode (see page 32)**
② **Channel category**
③ **Song title**
④ **Antenna reception level**
⑤ **Channel number/name**
⑥ **Artist name**

- To turn off the OSD, press 17**DISPLAY**.
- You can hold the music information screen or release it by 15**ENTER**.

SIRIUS Satellite Radio™ tuning (U.S.A. model only)

Connecting the SiriusConnect™ tuner

Connect the SiriusConnect tuner (sold separately) to the SIRIUS jack on the rear panel of this unit. For details, see the operating instructions provided with the SiriusConnect tuner.



- To ensure optimal reception of the SIRIUS Satellite Radio signals, the antenna of the SiriusConnect tuner must be placed at or near a window with no obstacles in the path to the sky. The orientation of the antenna for the best reception differs depending on the area. Refer to the instruction manuals supplied with the SiriusConnect tuner for the installation of the antenna. You can mount it indoors or outdoors.
- Use the "Antenna" information in the front panel or "SIRIUS Information" screen in the video monitor (see page 39) to check the antenna reception level and adjust the orientation of the antenna.
- You need to connect the SiriusConnect tuner to the AC wall outlet.

Notes

- If "CHECK SR TUNER" or "ANTENNA ERROR" appears on the front panel display, the connection of the SiriusConnect tuner or antenna is incorrect. In such cases, check the connection of the SiriusConnect tuner and the antenna.
- If "NOT SUPPORTED" appears on the front panel display, this unit does not support the connected SiriusConnect tuner.

Activating SIRIUS Satellite Radio™ subscription

Before using the SIRIUS Satellite Radio feature, you need to activate your SIRIUS Satellite Radio subscription. To activate the subscription you need the Sirius ID which is uniquely assigned to the SiriusConnect tuner. Sirius ID is 12-digit number and it appears on the package of the SiriusConnect tuner, on the label of the SiriusConnect tuner, and when you tune into the SIRIUS Satellite Radio channel "0" (see below).

Displaying the Sirius ID of your SiriusConnect tuner

1 Press the ⓞ/⏻**INPUT ◁ / ▷ (or press 8 SIRIUS) to select "SIRIUS" as the input source.**

2 Press 20 0 and then 20 ENT to display the Sirius ID of your SiriusConnect tuner.

"000 Sirius ID" and "xxxxxxxxxxxx" ("xxxxxxxxxxxx" indicates the 12-digit Sirius ID of your SiriusConnect tuner) appears alternately on the front panel display.

Write the Sirius ID below.

ID:_____

3 Contact SIRIUS Satellite Radio to activate your subscription.

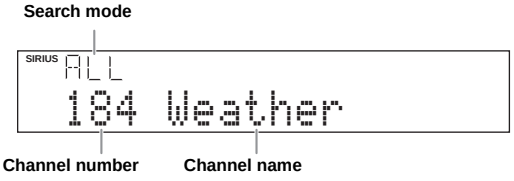
SIRIUS Satellite Radio online information
Contact for activation
URL: https://activate.siriusradio.com/
Phone: 1-888-539-SIRIUS (1-888-539-7474)

- Status messages appear on the front panel display or OSD during the activation. For details, see "SIRIUS Satellite Radio" (see page 66). Once the activation is finished, "SUB UPDATED" appears.

SIRIUS Satellite Radio™ operations

1 Press the ⓞ/⏻**INPUT ◁ / ▷ (or press 8 SIRIUS) to select "SIRIUS" as the input source.**

The cursor on the left of the SIRIUS indicator lights up on the front panel display and the SIRIUS Satellite Radio information (such as channel number, channel name, category, artist name, or song title) for the currently selected channel appears on the front panel display.



- When you select "SIRIUS" as the input source, this unit automatically recalls the previously selected channel.

Notes

- When you have not activated your subscription yet, you can only select "184" or "000."
- If a status message or an error message appears on the front panel display or on the OSD, see "SIRIUS Satellite Radio" (see page 66).

2 Search for a channel by using one of the SIRIUS Satellite Radio search modes.

- To select a channel from the all channel list, see "All Channel Search mode" on this page.
- To select a channel by category, see "Category Search mode" on this page.
- To select the desired channel directly by entering the channel number, see "Direct number access mode" on this page.
- To select a channel from the preset channels, see "Calling a preset channel (Preset Search mode)" (page 37).

- You can display the SIRIUS Satellite Radio information on the front panel display or in the video monitor (see page 39).
- If you tune into a channel that you do not subscribe, "CALL SIRIUS on the front panel display" or "CALL 888-539-SIRIUS TO SUBSCRIBE on the OSD" appears.
- You can set the SIRIUS Satellite Radio preset channels (see page 37).

■ All Channel Search mode

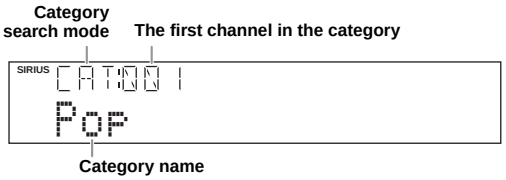
Press ⓘTUNING/CH ◁ / ▷ (or 9TUN./CH △ / ▽) repeatedly to search for a channel within all channels.

- You can search for a channel quickly by pressing and holding ⓘTUNING/CH ◁ / ▷ (or 9TUN./CH △ / ▽).
- You can skip channels to the previous or next category by pressing ⒽCATEGORY ◁ / ▷ (or 9CATEGORY ◁ / ▷).

■ Category Search mode

1 Press ⒽCATEGORY ◁ / ▷ (or 9CATEGORY ◁ / ▷) to select the channel category.

"CAT" is displayed on the front panel display during channel category selection. When you select the category, the first channel in the category is selected.



Note

- If you don't operate within 10 seconds, the category search mode returns to "ALL (All Channel Search)."

2 While "CAT" is displayed on the front panel display, press ⓘTUNING/CH ◁ / ▷ (or 9TUN./CH △ / ▽) repeatedly to search for a channel within the selected channel category.

- You can search for a channel quickly by pressing and holding ⓘTUNING/CH ◁ / ▷ (or 9TUN./CH △ / ▽).

Note

- This unit skips the channels when this unit is in the All Channel Search mode or Category Search mode in the following cases (it is not malfunction of this unit):
  – the channel is locked (see page 38).
  – the channel is out of service.
  – you do not subscribe to the channel.

■ Direct number access mode

Press the 20Numeric keys to enter the desired three-digit channel number.

For example, to enter the number 123, press the 20Numeric keys as "1," "2" and "3."

- To display the Sirius ID number displayed on the front panel display, select channel "0."
- To enter a one-digit or two-digit channel number, press the 20Numeric keys on the remote control and then press 20ENT to confirm the input number.
- Instead of pressing 20ENT to tune into the channel immediately, you can wait a few seconds until this unit confirms the entered channel number.
- If no key is pressed within a few seconds after you enter a one-digit or two-digit number, this unit automatically confirms the entered channel number.
- If the selected channel is locked, "PIN:___" appears on the front panel display. Enter the four-digit Parental Lock code number by using the 20Numeric keys or press 20ENT to cancel (see page 38).
- If the selected channel is not available, an advisory message may appear. For details, see "SIRIUS Satellite Radio" on page 66.
- If you operate 20Numeric keys in preset search mode (see next page), a preset number is selected. If you want to directly select a channel number, press ⓘTUNING/CH ◁ / ▷ (or 9TUN./CH △ / ▽) to switch to All Channel Search mode and enter the number.

Registering the SIRIUS Satellite Radio™ channels

You can use this feature to store up to 40 SIRIUS Satellite Radio channels. You can then recall any preset channel easily by selecting the preset channel group and number as described in "Calling a preset channel (Preset Search mode)" on this page.

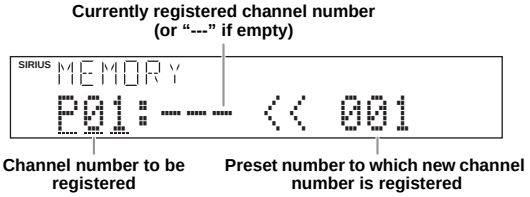
Registering preset channels

1 Search a channel you want to set as a preset channel in one of the SIRIUS Satellite Radio search modes.

For details, see "SIRIUS Satellite Radio operations" (see page 35).

2 Press ⓕ MEMORY (or 9 MEMORY).

The indicator on the front panel display changes as follows.



- To store the selected channel under an empty preset number automatically, press and hold ⓕ **MEMORY** (or 9 **MEMORY**) for more than 2 seconds instead of step 2. In this case, the following steps are unnecessary.
- To cancel the preset operation, press 15 **RETURN**.

3 Press ⓖ PRESET ◁ / ▷ (or 9 PRESET △ / ▽) to select the stored preset station number.

Notes

- You can also select a preset number by pressing the 20 **Numeric keys**.
- If you select a preset number being used ("*" appears next to the preset number), the current preset channel will be overwritten.

4 Press ⓕ MEMORY (or 9 MEMORY).

The selected channel is stored as a preset channel.

Calling a preset channel (Preset Search mode)

Prior to selecting a preset channel in the Preset Search mode, you must preset SIRIUS channels. For details, see "Registering preset channels" on this page.

Press ⓖ PRESET ◁ / ▷ (or 9 PRESET △ / ▽) repeatedly to change the preset channel number (1 to 40).

Clearing preset channels

You can clear the assignments of preset SIRIUS Satellite Radio channels.

1 Press 14 OPTION on the remote control.

The option menu is displayed on the front panel display.

2 Press 15 Cursor ▽ repeatedly to select "Clear Preset" and then press 15 ENTER.

3 Press 15 Cursor △ / ▽ to select the preset station number that you want to clear.

4 Press 15 ENTER to execute the clearing of the selected preset channel.

To clear the registration of multiple preset numbers, repeat the above steps. To end the operation, press 14 **OPTION**.

Setting the Parental Lock

You can use the Parental Lock feature to limit the access to the desired SIRIUS Satellite channels. This unit automatically skips the locked channels when this unit is in the All Channel Search mode or Category Search mode and you search a channel by pressing ⓘ**TUNING/CH** ◁ / ▷ (or 9**TUN./CH** △ / ▽).

Setting the code number and the locking channels

Use this feature to set the Parental Lock code number (PIN) and select the channels to be locked.

1 Press 14OPTION on the remote control.

The option menu is displayed on the front panel display and video monitor.

2 Press 15Cursor ▽ repeatedly to select "Parental Lock" and then press 15ENTER.

3 Enter the desired 4-digit code number by using the 15Cursor △ / ▽ ◁ / ▷.

If you have entered a code number before, enter the same code number.

The entered code number is needed for tuning in the channel or unlocking the channel. Write it down the space provided below.
Code number: _____

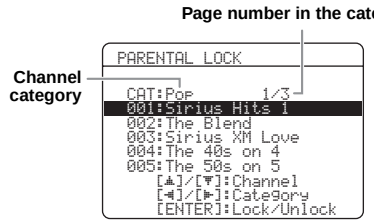
4 Press 15ENTER twice to confirm the code number.

A confirmation screen appears with the first press. When you press again, "OK" and then the SIRIUS Satellite Radio channel list appears.

Note

- If a code number is already registered and you enter the different number, "Wrong" appears and the screen returns to step 3. Enter the correct code number.

5 Press 15Cursor ◁ / ▷ to select a category of that channel and a channel you want to lock.



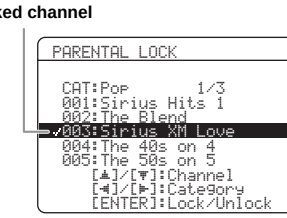
6 Press 15Cursor △ / ▽ to select a channel you want to lock.

Notes

- You can also select a channel by using 9**CATEGORY** ◁ / ▷ or 9**TUN./CH** △ / ▽.
- While the SIRIUS Satellite Radio channel list screen is displayed, sound of the selected channel is output even the channel is locked.

7 Press 15ENTER to lock the selected channel.

A check mark appears next to the locked channel on the video monitor. You can toggle channel lock and unlock as you press 15**ENTER**.



8 Repeat steps 5 and 7 to lock all the desired channels.

9 Press 15RETURN repeatedly to exit the "PARENTAL LOCK" screen.

This unit is tuned into the last channel you select in the "PARENTAL LOCK" screen. If the channel is locked, this unit is tuned into "184 SIRIUS Weather & Emergency" or "000 Sirius ID."

- If you forget the Parental lock code or want to change it, reset it using "SR PIN" (see page 60).

Tuning into the locked channels

If you want to tune in the locked channels, set this unit to Direct number access mode or preset tuning mode. When you tune into the locked channel, "LOCKED" appears on the front panel display and video monitor, followed by the following message. Enter the set Parental lock code by using the 20**Numeric keys**. To cancel this operation, press 20**ENT**.

Note

- If an incorrect number is entered, "Wrong" appears on the front panel display or the video monitor and this unit is tuned into the previously selected channel.

Displaying the SIRIUS Satellite Radio™ information

Use this feature to display the SIRIUS Satellite Radio information on the front panel display or on the OSD.

Note

- If a status message or an error message appears on the front panel display or video monitor, see "SIRIUS Satellite Radio" (see page 66).

■ Front panel display

Press ⒺINFO (or 10INFO) repeatedly to toggle the following SIRIUS Satellite Radio information display modes.

Channel
Channel number, channel name

↓

Category
Channel category, channel number

↓

Artist/Song
Artist name, song title, channel number

↓

Composer
Composer name, channel number

↓

Antenna
Antenna reception level, channel number

↓

DSP Program
Current sound field program (see page 25)

↓

Audio Decoder
Current Audio Decoder (see page 27)

↓

Back to "Channel"

Front Panel Display (example)

- If the SIRIUS Satellite Radio information contains a character that cannot be recognized by this unit, the character will be displayed with a space.
- When the antenna of the SiriusConnect tuner cannot receive the signals, "ACQUIRING" appears on the front panel display.
- When an information is unavailable, "——" appears.

■ Video monitor (OSD)

Press 17DISPLAY on the remote control to turn on or off the information display.

The following information is displayed on the OSD.

① **Search mode (see page 35)**
② **Channel category**
③ **Song title**
④ **Antenna reception level**
⑤ **Channel number/name**
⑥ **Artist name**
⑦ **Composer name**

- To turn off the OSD, press 17**DISPLAY**.
- You can hold the music information screen or release it by 15**ENTER**.

BASIC OPERATION

English

Using iPod™

Once you have stationed your iPod in a Yamaha iPod universal dock (such as the YDS-11, sold separately) connected to the DOCK terminal on the rear panel of this unit (see page 17), you can enjoy playback of your iPod using the supplied remote control or the menu displayed on the video monitor. You can also use the Compressed Music Enhancer mode of this unit to improve the sound quality of the compression artifacts (such as MP3 format) stored on your iPod (see page 27).

Notes

- iPod touch, iPod (Click and Wheel including iPod classic), iPod nano, and iPod mini are supported.
- Some features may not be compatible depending on the model or the software version of your iPod.
- Some features may not be available depending on the model of Yamaha iPod universal dock. The following sections describe the procedure when using the YDS-11.

- Once the connection between your iPod and this unit is complete, "iPod connected" appears on the front panel display.
- For a complete list of status messages that appear on the front panel display and on the video monitor, see the "iPod" section on page 68.

Controlling iPod™

You can control your iPod when you set it in the iPod universal dock and switch the input source to DOCK. The operations of your iPod can be done with the aid of the video display (menu browse mode) or without it (simple remote mode).
When you connect your iPod to this unit, you can perform the following operations with the remote control.

	key	Function
15	ENTER	Subsequent menu
	△	Menu up
	▽	Menu down
	◁	Previous menu
	▷	Subsequent menu
19	◁◁	Search backward (Press and hold)
	▷▷	Search forward (Press and hold)
	▷▷|	Skip forward
	|◁◁	Skip backward
	□	Stop
	▯▯	Pause (Menu browse mode) Play/Pause (Simple remote mode)
	▷	Play (Menu browse mode) Play/Pause (Simple remote mode)
17	DISPLAY	Switch between Menu browse mode and Simple remote mode

Controlling iPod in simple remote mode

You can perform basic iPod operations (play, stop, skip, etc.) using the supplied remote control without displaying the menu on the video monitor. You can also directly control your iPod in this mode.

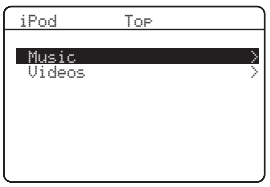
Controlling iPod in menu browse mode

You can perform advanced iPod operations using the remote control while looking at the menu displayed on the video monitor. You can browse the song files or video files stored on your iPod and displayed on the monitor, and change the settings of your iPod to suit your personal preferences. You cannot directly control your iPod in this mode.

- "_"(underscore) is displayed for characters that this unit cannot display.

1 Change the input source to "iPod (DOCK)" using ⓪INPUT ◁ / ▷ (or 8DOCK).

2 Press 17DISPLAY on the remote control.
The following screen appears on the video monitor.



3 Press 15Cursor △ / ▽ to select "Music," "Videos" or "Settings" and press 15Cursor ▷.

- Select "Music" to browse music files.
- Select "Videos" to browse video files.

Note

- "Videos" will not be displayed when your iPod or Yamaha iPod universal dock do not support the browser function for browsing video files.

4 Press [15]Cursor △ / ▽ / ◁ / ▷ to select a menu item and then [15]ENTER to start playback.

Menu items of "Music"

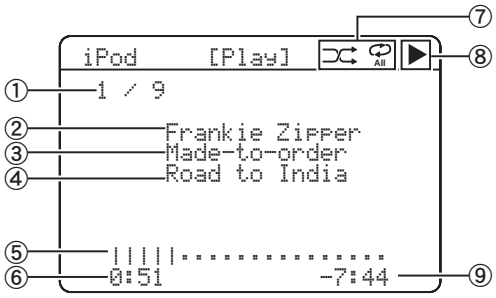
Playlists, Artists, Albums, Songs, Genres, Composers

- Playlists > Songs
- Artists > Albums > Songs
- Albums > Songs
- Songs
- Genres > Artists > Albums > Songs
- Composers > Albums > Songs

Menu items of "Videos"

Menu items vary depending on the files stored on your iPod.

■ Description of the play information display



① Track number/total tracks
② Artist name
③ Album title
④ Song title
⑤ Progress bar
⑥ Elapsed time
⑦ Shuffle and repeat icons
⑧ ▶ (playback), ⏸ (pausing), ⏩ (search forward) and ⏪ (search backward)
⑨ Remaining time

- You can change information screens on the front panel display using ⒺINFO (or [10]INFO) (see page 24). Items displayed on the front panel display vary depending on mode that is currently selected.

Shuffle/repeat playback

You can use a special playback function such as shuffle playback and repeat playback by setting the option menu.

1 Press [17]DISPLAY to switch to menu browse mode while "DOCK" is selected as the input source.

The option menu can be displayed only in menu browse mode. Press [17]DISPLAY to switch to menu browse mode before starting shuffle or repeat playback.

2 Press [14]OPTION.

The option menu is displayed.

3 Press [15]Cursor △ / ▽ to select the desired playback function, Shuffle or Repeat, then press [15]ENTER.

The following playback styles are available depending on the playback function selected.

Shuffle: Plays back songs or albums in random order (Choices: Off, Songs, Albums).

- Select "Off" if you do not want to play back in random order.
- Select "Songs" to play back songs in random order.
- Select "Albums" to play back albums in random order.

Repeat: Plays back songs or albums repeatedly (Choices: Off, One, All).

- Select "Off" if you do not want to play back repeatedly.
- Select "One" to repeat each song.
- Select "All" to repeat all songs.

4 Select the desired style using [15]Cursor ◁ / ▷.

The style is selected. Playback starts with the function selected in step 2.
To return to the previous screen, press [15]RETURN.
To return to the previous playback function, redo the above steps.

- When the shuffle function is on, "⇄" appears on the video monitor.
- When "Repeat" is set to "One" or "All," "↻1" or "↻All" appears on the video monitor.

BASIC OPERATION

English

Using Bluetooth™ components

You can connect a Yamaha Bluetooth wireless audio receiver (such as YBA-10, sold separately) to the DOCK terminal of this unit and enjoy the music contents stored in your Bluetooth component (such as a portable music player) without wiring between this unit and the Bluetooth component. You need to perform "Pairing" the connected Bluetooth wireless audio receiver and your Bluetooth component in advance.

Note

- This unit supports A2DP (Advanced Audio Distribution Profile) of the Bluetooth profile.

Pairing the Bluetooth™ wireless audio receiver and your Bluetooth component

"Pairing" refers to the operation of registering a Bluetooth component for Bluetooth communications. Pairing must be performed when using a Bluetooth component with the Bluetooth wireless audio receiver connected to this unit for the first time or if the pairing data has been deleted.

- You only need the pairing operation for the first time that you use the Bluetooth component with the Bluetooth wireless audio receiver.
- Pairing requires operations on this unit and on the other component with which Bluetooth communications are to be established. If necessary, refer to the other component's operating instructions.

■ Pairing the Bluetooth™ wireless audio receiver and your Bluetooth™ component

To ensure security, a time limit of 8 minutes is set for the pairing operation. You are recommended to read and fully understand all the instructions before starting.

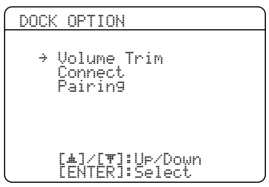
1 Change the input source to "DOCK" using ⓄINPUT ◁ / ▷ (or 8DOCK).

2 Turn on the Bluetooth component you want to pair with and set it to pairing mode.

For details on operation of the Bluetooth component, refer to its operating instructions.

3 Press 14OPTION.

The option menu for DOCK input appears on the video monitor.



4 Press 15Cursor ▽ to select "Pairing" and press 15ENTER.

"Searching" appears on the front panel display and the pairing operation starts.

- To cancel pairing, press 15RETURN.
- You can also start pairing operation by pressing and holding ⒻMEMORY on the front panel.

5 Make sure the Bluetooth component recognizes the Bluetooth wireless audio receiver.

If the Bluetooth have recognized the Bluetooth wireless audio receiver, "YBA-10 YAMAHA," for instance, is displayed in the Bluetooth device list.

6 Select the Bluetooth wireless audio receiver from the Bluetooth device list, and enter a path key "0000" into the Bluetooth component.

When pairing is complete, "Completed" appears on the front panel display.

- The Yamaha Bluetooth wireless audio receiver can be paired with up to eight Bluetooth components. When pairing is conducted successfully with a ninth component and the pairing data is registered, the pairing data for the least recently used other component is cleared.

Playback of the Bluetooth™ component

1 Change the input source to "DOCK" using ⓄINPUT ◁ / ▷ (or 8DOCK).

2 Press 14OPTION.

3 Press 15Cursor ▽ repeatedly to select "Connect" and press 15ENTER.

After you execute "Connect," communication with the Bluetooth component is established. When the connected Bluetooth wireless audio receiver recognizes the Bluetooth component, "BT Connected" appears on the front panel display.

- When you press 15ENTER on the remote control, the connected Bluetooth wireless audio receiver searches and connects to the last connected Bluetooth component. If the Bluetooth wireless audio receiver cannot find the Bluetooth component, "Not found" appears on the front panel display.
- To disconnect the Bluetooth wireless audio receiver from the Bluetooth component, display the option menu again, select "Disconnect," and press 15ENTER.

4 Start playback of the Bluetooth component.

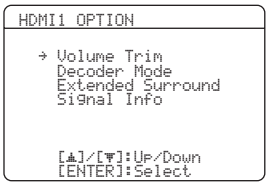
Setting the option menu for each input source (OPTION menu)

This unit has an OPTION menu of frequently used menu items for input sources compatible with this unit. The procedure for setting the OPTION menu items is described below.

1 Select an input source using ⓄINPUT ◁ / ▷ (or 8Input selection keys).

2 Press 14OPTION on the remote control.

The OPTION menu appears. The displayed OPTION menu items differ depending on the input source. For details, see the following section.



3 Select the desired menu item using 15Cursor △ / ▽, and press 15ENTER.

Parameters of the selected menu item are displayed.

4 Change the setting of the selected menu item (or enable a function) using 15Cursor △ / ▽ / ◁ / ▷ and 15ENTER.

Details of the selected menu item are displayed. Parameters you can set differ depending on the menu items.

5 To close the OPTION menu, press 14OPTION.

You can also use 15RETURN to return to the previous screen or close the OPTION menu.

- When 15Cursor or other keys do not work after completing the menu, select the input source again using 8Input selection keys.

OPTION menu items

The following menu items are provided for each input source.

Input Source	Menu item			
HDMI1-4	Volume Trim	Decoder Mode	Extended Surround	Signal Info
AV1-4	Volume Trim	Decoder Mode	Extended Surround	Signal Info
AV5-6	Volume Trim			
AUDIO1-2	Volume Trim			
V-AUX	Volume Trim			
TUNER	Volume Trim	FM Mode	Auto Preset	Clear Preset
XM	Volume Trim	Clear Preset		
SIRIUS	Volume Trim	Parental Lock	Clear Preset	
iPod (DOCK)	Volume Trim	Shuffle	Repeat	
Bluetooth (DOCK)	Volume Trim	Connect/ Disconnect	Pairing	
MULTI CH	Volume Trim	Video Out		

Details of the menu items are as follows:

- The default settings are marked with "*."

■ Volume Trim

Input source: All
Adjustable range: -6.0 dB to 0.0 dB* to +6.0 dB (in 0.5 dB steps)

Reduces any change in volume when switching input sources by correcting volume differences between input sources.
You can set this parameter for each input source.

■ Decoder Mode

Input source: HDMI1-4, AV1-4
Choices: Auto*/DTS

Selects DTS digital audio signals for reproduction.

Auto	Automatically selects audio input signals.
DTS	Selects DTS signals only. Other input signals are not reproduced.

■ Extended Surround

Input source: HDMI1-4, AV1-4
Choices: Auto*/PLIIxMovie/PLIIxMusic/EX/ES/Off

Selects whether to reproduce multi-channel input signals in 6.1- or 7.1-channel when surround back speakers are used.

Auto	Automatically selects the most suitable decoder according to whether a flag for reproducing surround back channel is present, and reproduces the signals in 6.1- or 7.1-channel.
PLIIx Movie	Always reproduces signals in 6.1- or 7.1-channel using the PLIIxMovie decoder whether or not surround back channel signals are contained. You can select this parameter when one or two speakers are connected.
PLIIx Music	Always reproduces signals in 6.1- or 7.1-channel using the PLIIxMusic decoder whether or not surround back channel signals are contained. You can select this parameter when one or two speakers are connected.
EX/ES	Automatically selects the most suitable decoder for input signals whether or not the flag for reproducing surround back channel is present, and always reproduces signals in 6.1-channel.
Off	Always reproduces signals in 5.1-channel whether or not the flag for reproducing surround back channel is present.

■ Signal Info

Input source: HDMI1-4, AV1-4

Displays information on audio and video signals on the video monitor and front panel display. You can change items to be displayed using 15 **Cursor** △ / ▽.

Signal Info parameters

■ Audio information

Information	Description
Format	Format of digital audio signals.
Channel	The number of input signal channels (front/surround/LFE). For example, if input signal channels are 3 front channels, 2 surrounds and LFE, "3/2/0.1" is displayed. If a channel that cannot be expressed as the above, a total number of channels such as "5.1ch" may be displayed.
Sampling	The sampling frequency per second in analog-to-digital conversion.
Bitrate	The bit rate of input signal per second.

Notes

- "No Signal" is displayed when no signals are input and "---" is displayed when signals that this unit cannot recognize are input.
- The bit rate may vary during playback.

■ Video information

Information	Description
In	Format and resolution of video input signal.
Out	Format and resolution of video output signal.
Message	Error messages about HDMI signals and HDMI components. See the following for details of the error messages.

HDMI error message (appears only when an error has occurred)

HDCP Error	HDCP authentication failed.
Device Over	The number of HDMI components connected is over the limit.
Out of Res.	The connected monitor is not compatible with the video input signal.

■ FM Mode

Input source: TUNER
Choices: Stereo*/Mono

Sets FM broadcasting receiving mode.

Stereo	Receives in stereo mode.
Mono	Receives in monaural mode. You can get a better reception in MONO mode.

■ Auto Preset

Input source: TUNER

Automatically detects radio stations in the FM frequency band and registers them as preset stations (see page 29).

■ Clear Preset

Input source: TUNER, XM, SIRIUS

When TUNER is selected: See page 30.
When XM is selected: See page 33.
When SIRIUS is selected: See page 37.

■ Parental Lock

Input source: SIRIUS

Set the Parental Lock (see page 38).

■ Shuffle

Input source: iPod (DOCK)
Choices: Off*/Songs/Albums

Changes the shuffle playback style (see page 41).

■ Repeat

Input source: iPod (DOCK)
Choices: Off*/One/All

Changes the repeat playback style (see page 41).

■ Connect / Disconnect

Input source: Bluetooth (DOCK)

Switches communication with a Bluetooth component on and off (see page 42).

■ Pairing

Input source: Bluetooth (DOCK)

Performs pairing of this unit and a Bluetooth component (see page 42).

■ Video Out

Input source: MULTI CH
Choices: AV1 to 6/V-AUX/Off*

When the multi-channel input is selected, an input signal input from another terminal is outputted to the video monitor. See "Outputting a video signal input from another input source during reproducing a multi-channel audio signal" on this page.

Outputting a video signal input from another input source during reproducing a multi-channel audio signal

When "MULTI" is selected as the input source, a video signal input from another terminal can be output to the video monitor. For example, even if an audio and video component such as a DVD player that does not support a multi-channel digital audio output, the video signal can be output to the video monitor while reproducing a multi-channel analog audio signal.

1 **Press ⓪INPUT ◁ / ▷ (or 8MULTI) to change the input source to "MULTI CH."**

2 **Press 14OPTION on the remote control.**
The OPTION menu appears.

3 **Press 15Cursor △ / ▽ to display "Video," and press 15ENTER.**

4 **Press 15Cursor ◁ / ▷ to select a video input terminal from the following to input a video signal that is output to the video monitor during reproducing a multi-channel audio signal.**
–AV1-2 (COMPONENT VIDEO terminal)
–AV3-6 (COMPOSIT terminal)
–V-AUX (COMPOSIT terminal)
–Off (no video output)

5 **To end the setting, press 14OPTION.**

Editing surround decoders/sound field programs

Selecting a decoder used with a sound field program

When using sound field programs for movies or TV programs (except for Mono Movie), you can select a surround decoder to be used with the sound field program after setting the parameters from the following decoders. To set the parameters for sound field programs, see the following section.

Decoders that can be used with a sound field program

- PLIIx Movie (PLII Movie)
- Neo:6 Cinema

Setting sound field parameters

Although the field sound programs would satisfy you as they are with the default parameters, you can arrange sound effect or decoders suitable for acoustical conditions of sources or rooms by setting the parameters (sound field elements).

- You can protect the sound field against the changes of parameters the sound filed parameters when "Memory Guard" of the setup menu is set to "On" (see page 56). To change the parameters, set it to "Off."

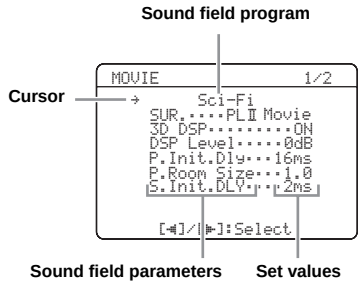
1 Turn on the video monitor connected to this unit.

2 Press 13SETUP on the remote control.

The setup menu appears on the monitor.

3 Press 15Cursor △ / ▽ to select "DSP Parameter" and press 15ENTER.

The screen changes as follows.



4 Press 15Cursor △ / ▽ to move "→" to the sound field program and press 15Cursor ◁ / ▷ to select the sound field program.

5 Press 15Cursor △ / ▽ to select the parameter that you want to change, and press 15Cursor ◁ / ▷ to change the parameter.

An asterisk (*) appears on the left of the sound field parameter name displayed on the monitor when you change the parameter from its default setting. For details on functions and adjustable ranges of the sound field parameters, see "Sound field parameters" on this page.

- Repeat steps 4 and 5 to change other sound field program parameters.
- A complete list of the parameters of some sound field programs may exceed one page. In this case, press 15Cursor △ / ▽ to scroll through pages.

6 To end the edit, press 13SETUP.

To initialize the parameters of the selected sound field program, 15Cursor ▽ repeatedly to select "Initialize" and then press, 15Cursor ▷. When the confirmation screen appears on the monitor, press 15Cursor ▷ to confirm the initialization or 15Cursor ◁ to cancel it.

Sound field parameters

- The default settings are marked with "*."

CINEMA DSP basic parameters

DSP Level

Adjustable range: -6 dB to 0 dB* to +3 dB

Fine adjusts an effect level (level of the sound field effect to be added). You can adjust the level of the sound field effect while checking sound levels. Adjust "DSP Level" as follows.

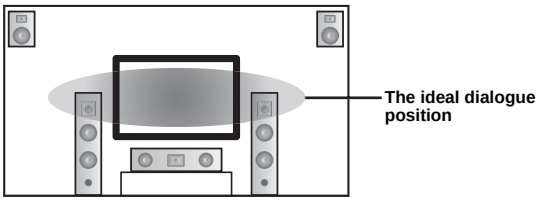
- The effect sound is too soft.
- There are no differences between effects of the sound field programs.
  →Increase the effect level.

- The sound is dull.
- The sound field effect is added too much.
  →Reduce the effect level.

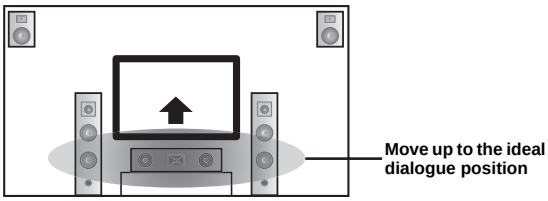
Dialog Lift

Choices: 0* to 5

Use this feature to adjust the vertical position of the dialogues in movies. The ideal position of the dialogues is at the center of the video monitor screen.



If the dialogues are heard at the lower position of the video monitor screen, increase the value of "Dialog Lift."



When the value is set to zero, the position is at the lowest. The position gets higher as you increase the value.

Notes

- "Dialog Lift" is displayed only when the presence speakers are available.
- You cannot the move the dialogue position loser than the default setting.

Sound field parameters for the advanced configurations

■ Parameter for CINEMA DSP 3D

3D DSP

Choices: On* / Off

When CINEMA DSP 3D is enabled, sets whether to use sound field programs in 3D mode.

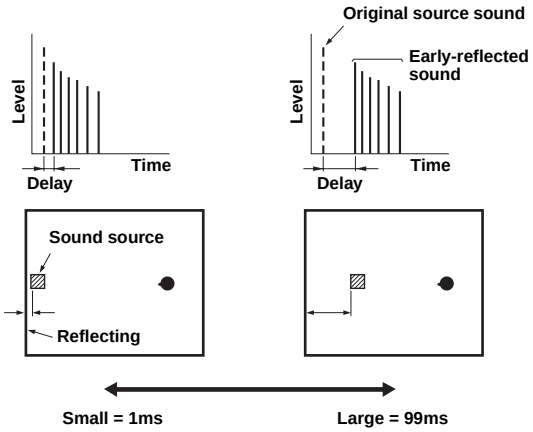
Note

- When the presence speakers are not used, the 3D DSP parameters are not displayed.

■ Parameters for adjusting early-reflected sound

Parameter	Adjustable range
Init.Dly	1 to 99ms
P.Init.Dly	1 to 99ms
S.Init.Dly	1 to 49ms
SB Init.Dly	1 to 49ms

Adjusts attenuation characteristics of early-reflected sound. You can create a lively sound field (with a high reverberant sound level) as you increase the value, and a dead sound field (with a low reverberant sound level) as you decrease the value. Creating either a lively sound field or a dead sound field in an actual music hall is determined by the acoustic absorption characteristics of reflection surfaces. A dead sound field is created when the attenuation time is short while a lively sound field is created when the attenuation time is long.

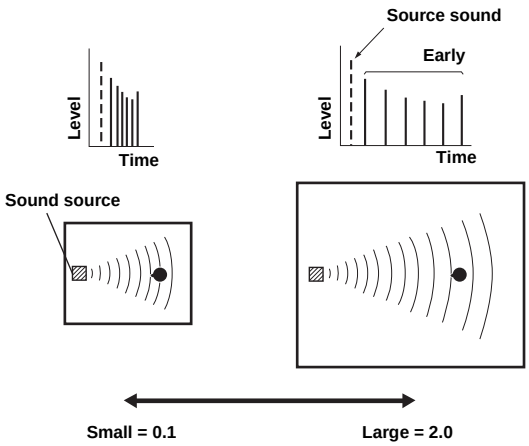


- We recommended that you adjust the size of corresponding sound field when you adjust the delay time.

■ Parameters for specifying room size

Parameter	Adjustable range
Room Size, P.Room Size, S.Room Size, SB Room Size	0.1 to 2.0

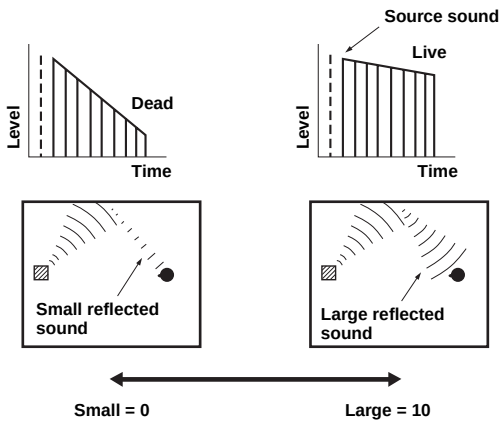
Produces different senses of sound expansion according to room sizes specified. In a large size room such as a music hall, the duration from when reflected sound is heard until when the next reflected sound is heard is long. Thus, different senses of sound expansion can be created by changing the duration. 1.0 is the original room size. When this parameter is set to 2.0, each side of the room is defined as twice larger than the original room size.



■ Parameters for defining attenuation characteristics of early-reflected sound

Parameter	Adjustable range
Liveness	0 to 10
S.Liveness	0 to 10
SB Liveness	0 to 10

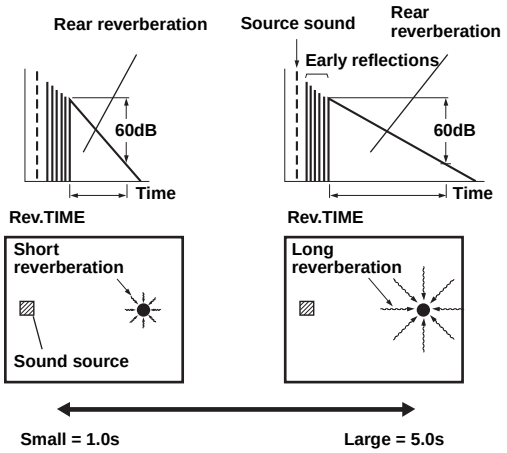
Adjusts the attenuation of reflected sound. You can create a lively sound field (with a high reverberant sound level) as you increase the value, and a dead sound field (with a low reverberant sound level) as you decrease the value. Creating either a lively sound field or a dead sound field in an actual music hall is determined by the acoustic absorption characteristics of reflection surfaces. A dead sound field is created when the attenuation time is short while a lively sound field is created when the attenuation time is long.



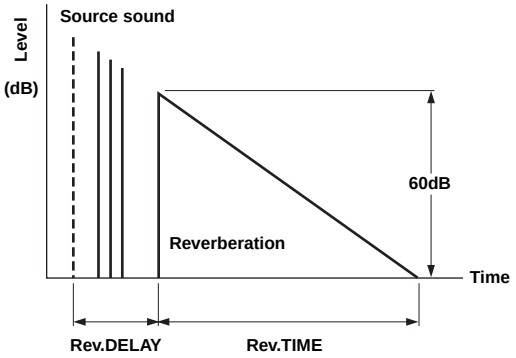
■ Parameters for adjusting reverberant sound

Parameter	Adjustable range
Rev.Time	1.0 to 5.0s
Rev.Delay	0 to 250ms
Rev.Level	0 to 100%

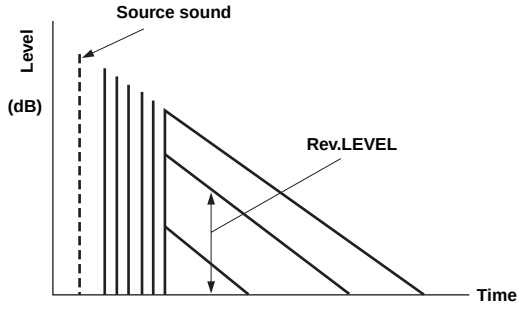
Rev.Time parameter adjusts the attenuation time of the rear reverberant sound based on the time that about 1kHz reverberant sound takes for 60dB of attenuation. Reverberant sound attenuates faster as you decrease the value. Rev.Time adjustment allows you to create a natural reverberant sound, by setting the attenuation time longer for a sound source or room with less echo, or shorter for a sound source or room with more echo.



Rev.Delay parameter adjusts the time difference between the beginning of the direct sound and the beginning of the reverberation sound. The larger the value, the later the reverberation sound begins. Increasing the value of Rev.Delay allows you to create a reverberant sound in a wider area for the same Rev.Time.



Rev.Level parameter adjusts the reverberation sound level. Increasing the value of Rev.Level makes the reverbration sound level higher, which allows you to create more echo.



Parameters only usable in certain sound field programs

2ch Stereo only

Direct

Choices: Auto*/Off

Automatically bypasses the DSP circuit and tone control circuit when an analog sound source is selected as the input source. You can enjoy a higher quality sound.

Auto Outputs sound by bypassing the DSP circuit and tone control circuit when the “Bass” and “Treble” tone controls are both set to 0 dB.

Off Do not bypass the DSP circuit and tone control.

7ch Stereo only

CT Level/SL Level/SR Level/ SB Level

Adjustable range: 0 to 100%

Adjusts the volume ofthe center (CT), surround L (SL) surround R (SR) and surround back (SB) channels in the 7ch Stereo program. The available parameters differ depending on the setting of the speakers.

Straight Enhancer/7ch Enhancer only

Effect Level

Choices: High*/Low

Adjusts the Compressed Music Enhancer effect level. When the high-frequency signals of the source is emphasized too much, set the effect level to “Low.” To reduce the effect, set this parameter to “Low.” To increase the effect, set it to “High.”

Decoder parameters

You can customize decoder effects by setting the following parameters. For kinds of decoders, see page 27.

When PLIIx Music/PLII Music is selected

Panorama

Choices: Off*/On

Adjusts the soundscape of the front sound field. Sends stereo signals to the surround speakers as well as the front speakers for a wraparound effect.

Dimension

Adjustable range: −3 to STD* to +3

Adjusts the difference in level between the front sound field and the surround sound field. You can adjust the difference in level created by the software being played back to obtain the preferred sound balance. The surround sound gets stronger as you make the value more negative and the front sound gets stronger as you make the value more positive.

Center Width

Adjustable range: 0 to 3* to 7

You can spread the center sound toward left and right according to your preference. Set this parameter to 0 for outputting the center sound from the center speaker only, or to 7 for outputting it from the front left/right speaker.

When Neo:6 Music is selected

C.Image

Adjustable range: 0.0 to 0.3* to 1.0

Adjusts the front left and right channel output relative to the center channel to make the center channel more or less dominant as necessary.

Operating various settings for this unit (Setup menu)

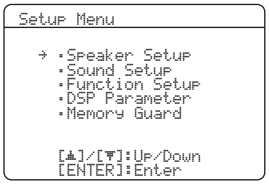
You can call the setup menu using the remote control and change the settings of various menus.
You can change the following settings in the setup menu. For details, read “Basic operation of the setup menu” first, and see the respective pages.

Menu/Submenu	Function	Page
Speaker Setup	Sets items for speakers.	51
1 Auto Setup (YPAO)	Automatically adjusts output characteristics of speakers.	51
2 Manual Setup	Manually adjusts output characteristics of speakers.	51
A)Config	Sets speaker configurations, such as connection status of speaker and a size of the connected speaker (sound reproduction capacity), suitable for the listening environment.	51
B)Level	Separately adjusts volume of each speaker.	53
C)Distance	Adjusts timing at which each speaker outputs sound based on distances between speakers and the listening position.	53
D)Equalizer	Selects an equalizer that adjusts speaker output characteristics.	53
E)Test Tone	Generates test tones.	53
Sound Setup	Sets various items for sound outputs.	53
1 Dynamic Range	Adjusts dynamic ranges of speakers and headphones.	53
2 Lipsync	Adjusts delay in output timing between video signals and audio signals.	54
HDMI Auto	Sets on or off of automatic adjustments for delay between output timing between video signals input from the HDMI jack and audio signals.	54
Auto Delay	Fine adjusts a delay time of HDMI Auto.	54
Manual Delay	Manually fine adjusts the delay of audio and visual output.	54
Function Setup	Set various items for HDMI and display.	54
1 HDMI	Sets various items for input sources.	54
Standby Through	Selects on or off of output of HDMI signals input from the HDMI IN jack to the HDMI OUT jack when this unit is on standby.	54
Audio Output	Selects this unit or a component connected to this unit via the HDMI OUT jack of this unit for reproducing sound signals input from the HDMI IN jack.	54
Resolution	Sets resolution of the HDMI output that is converted from analogy visual input signals.	54
Aspect	Set an aspect ratio of images reproduced by HDMI signals converted from analog video input signals.	54
2 Display	Set items for a monitor or the front panel display.	55
Dimmer	Sets brightness of the front panel display.	55
FL Scroll	Selects the way to display characters on the front panel display.	55
OSD Shift	Adjusts top and bottom positions of the screen displayed on the video monitor.	55
3 Volume	Sets items for volumes.	55
Adaptive DRC	Adjust the dynamic range (difference between the maximum volume and the minimum volume) in conjunction with the volume level.	55
Max Volume	Sets the maximum volume level so that the volume will not be accidentally increased.	55
Init. Volume	Sets the volume at the time this unit is turned on.	55
4 Input Rename	Changes input source names to be displayed on a video monitor or the front panel display.	55
5 Zone2	Sets the maximum volume level and initial volume level of Zone2.	56
Max Volume	Sets the maximum volume level so that the volume will not be accidentally increased.	56
Init. Volume	Sets the volume at the time this unit is turned on.	56
DSP Parameter	Sets parameters for the sound field programs.	56
Memory Guard	Protects some settings against accidental alteration.	56

Basic operation of the setup menu

The setup menu screen appears on both video display (OSD) and front panel display.

Video display (OSD)



Front panel display

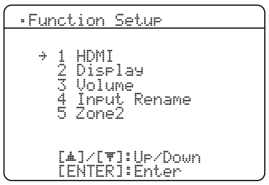
In this section, procedures of setting menus using the video monitor are described.

1 Press 13SETUP on the remote control.

The setup menu screen appears.

2 Select a menu using 15Cursor △ / ▽, and press 15ENTER.

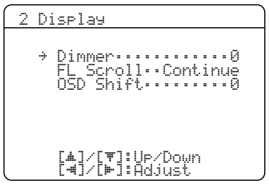
Items of the selected menu are displayed. For example, the following screen appears when you select "Function Setup."



- You can return to the previous screen by pressing 15**RETURN**.

3 To display submenus, select a menu that you want to set using 15Cursor △ / ▽, and press 15ENTER.

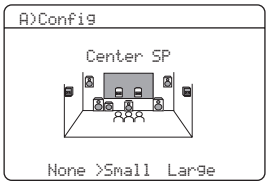
For example, the following screen appears when you select "2 Display."



4 Select an item using 15Cursor △ / ▽, and change the setting of the item using 15Cursor ◁ / ▷.

Some items in the Manual Setup menu of Speaker Setup take up a full screen. To display other items in the Manual Setup menu, press 15**Cursor** △ / ▽.

"A)Config" display (example)



- You can change other items by repeating step 4.

5 To finish the setting, press 13SETUP.

- When 15**Cursor** or other keys do not work after completing the menu, select the input source again using 8**Input selection keys**.

Speaker Setup

You can set various items for speakers. Two kinds of adjustments are available. One is "Auto Setup (YPAO)" for automatic adjustment and another is "Manual Setup" for manual adjustment.

- The default settings are marked with "*."

1 Auto Setup

Automatically adjusts output characteristics of speakers to obtain optimum balance for the output sound based on positions and performances of the speakers and acoustic characteristics or the room, which are automatically measured. For details on operations, see page 19.

2 Manual Setup

Adjusts output characteristics of speakers based on manually set parameters.
After Auto Setup (YPAO) is performed, you can check automatically adjusted parameters in the Manual Setup menu. Fine adjust the parameters for your preference if necessary.

■ A)Config

Sets speaker configurations, such as connection status of speaker and a size of the connected speaker (sound reproduction capacity), suitable for the listening environment.

- The speaker configuration includes items for defining a speaker size: Large or Small. Large and Small refer to speakers with woofer diameters 16 cm or larger and smaller than 16 cm, respectively.

Extra SP Assign

Choices: Zone2/Presence/None*

Selects the application for EXTRA SP terminals.

Zone2	Assigns the EXTRA SP terminals for the speakers in the second zone.
Presence	Assigns the EXTRA SP terminals for the Presence speaker.
None	Disables the EXTRA SP terminals.

Note

- When setting "Extra SP Assign" to "Zone2" or "Presence," the surround back channel signals for main output is separately output from other channels.

LFE/Bass Out

Choices: SWFR/Front/Both*

Selects speaker(s) for outputting low-frequency components of the LFE (low-frequency effect sound) channel or other channels. The output status is as follows.

LFE channel signals

Parameter	Subwoofer	Front speakers	Other speakers
Both	Output	Not output	Not output
SWFR	Output	Not output	Not output
Front	Not output	Output	Not output

Low-frequency components of other channel signals

Parameter	Subwoofer	Front speakers	Other speakers
Both	[1]	[2]	[3]
SWFR	[4]	[3]	[3]
Front	Not output	[1]	[3]

[1] Outputs low-frequency components of the front left and right channels and the channel of speaker, the size of which is set to "Small."

[2] Outputs low-frequency components of the front left and right channels.

[3] Outputs low frequency components when the sizes of speakers are set to "Large."

[4] Outputs low-frequency components of the channel of speaker, the size of which is set to "Small."

Front SP

Choices: Small/Large*

Sets the sizes of front left and right speakers.

Small — Select this when small speakers are connected. Low-frequency components of the front left and right channels are output from a subwoofer.

Large — Select this when large speakers are connected.

Note

- When "LFE/Bass Out" is set to "Front," you can only select "Large." If "LFE/Bass Out" is changed to "Front," "Front SP" automatically switches to "Large" even when it is set to "Small."

Center SP

Choices: None/Small*/Large

Sets the size of center speaker.

None — Select this when no center speaker is connected. Center channel signals are spread to front left and right speakers.

Small — Select this when a small center speaker is connected. Low-frequency components of center channel are output from a subwoofer. If a subwoofer is not connected they are output from front speakers.

Large — Select this when a large center speaker is connected.

Sur. L/R SP

Choices: None/Small*/Large

Sets sizes of left and right surround speakers.

None — Select this when no surround speakers are connected. Surround channel signals are spread to front left and right speakers. "Sur.B L/R SP" automatically switches to "None" when this is selected.

Small — Select this when small surround speakers are connected. Low-frequency components of surround channels are output from a subwoofer. If a subwoofer is not connected they are output from front speakers.

Large — Select this when large surround speakers are connected.

- When "None" is selected, the sound field programs automatically enter the Virtual CINEMA DSP mode.

Sur.B L/R SP

Choices: None/SMLx1/SMLx2*/LRGx1/LRGx2

Sets sizes of left and right surround back speakers.

None — Select this when no surround back speaker are connected. Surround back channel signals are output from the surround L/R speakers and subwoofer. If the subwoofer is disabled, they are output from the surround L/R speakers and front speakers.

SMLx1 — Select this when one small surround back speaker is connected.

SMLx2 — Select this when two small surround back speakers are connected.

LRGx1 — Select this when one large surround back speaker is connected.

LRGx2 — Select this when two large surround back speakers are connected.

- When "None" is selected, "PLIIx Movie" or "PLIIx Music" cannot be selected.

Crossover Freq.

Choices: 40Hz/60Hz/80Hz*/90Hz/100Hz/110Hz/120Hz/160Hz/200Hz

Sets the lower limit of the low frequency component output from a speaker with a size set to "Small (SMLx1/SMLx2)." Sound with a frequency below that limit is output from a subwoofer or front speakers.
If your subwoofer has a volume control or a crossover frequency control, set the volume to half or the crossover frequency at the maximum.

Subwoofer Phase

Choices: Normal*/Reverse

Sets the phase of your subwoofer if bass sounds are lacking or unclear.

Normal	Select this not to change the phase of your subwoofer.
Reverse	Select this to reverse the phase of your subwoofer.

■ B)Level

Adjustable range: −10.0dB to +10.0dB (0.5 dB step)
Defaults: "FR.L/FR.R/SWFR" 0dB*
"CNTR/SUR.L/SUR.R/SBL/SBR" −1.0dB

Separately adjusts volume of each speaker so that the sounds form speakers are at the same volume at the listening position. Items to be displayed vary depending on the number of speakers connected.

- When only one surround back speaker is connected, "SB" appears instead of "SBL" and "SBR."
- You can adjust the volume listening to test tones when you set "Test Tone" to "On" (see page 53).
- If your subwoofer has a volume control or a crossover frequency control, set the volume to half or the crossover frequency at the maximum.

■ C)Distance

Adjusts timing at which each speaker outputs sound so that sounds from speakers reach the listening position at the same time. Set unit (Unit) first and set the distance of each speaker.

Unit

Choices: meters (m)/feet (ft)*

meters (m)	Displays the speaker distance in meters.
feet (ft)	Displays the speaker distance in feet.

Front L/Front R/Center/Sur. L/Sur. R/Sur.B L/Sur.B R/SWFR/PRNS L/PRNS R

Adjustable range: 0.30m to 24.00m (1.0ft to 80.0ft)
Defaults: 3.00m (10.0ft) "Front L/Front R/SWFR"
2.60m (8.5ft) "Center"
2.40m (8.0ft) "Sur. L/Sur. R/Sur.B L/Sur.B R/PRNS L/PRNS R"

- Different items are displayed depending on settings of "A)Config" (see page 51).
- When only one surround back speaker is connected, "Sur.B" appears instead of "Sur.B L" and "Sur.B R."

■ D)Equalizer

Adjusts sound quality and tone using a parametric graphic equalizer.

EQ Type Select

Choices: Auto PEQ/GEQ*/Off

Select an equalizer type.

Auto PEQ	Uses a parametric equalizer selected in "Auto Setup." Characteristics of the currently used parametric equalizer (see page 19) are displayed below "Auto PEQ."
GEQ	Uses a graphic equalizer. Press [15]**ENTER** to adjust the characteristics of the graphic equalizer.
Off	Not use a graphic equalizer.

GEQ

Choices: 63Hz/160Hz/400Hz/1kHz/2.5kHz/6.3kHz/16kHz
Adjustable range: −6.0dB to 0dB* to +6.0dB (0.5 dB step)

Adjusts sound quality of each speaker using a graphic equalizer. The graphic equalizer of this unit can adjust signal levels in 7 frequency ranges.
To adjust the signal level within each range, select the desired speaker with [15]**Cursor** ◁ / ▷ while "→" is displayed next to "Channel," then the desired frequency band with [15]**Cursor** △ / ▽, and adjust the signal level with [15]**Cursor** ◁ / ▷.

■ E)Test Tone

Choices: Off*/On

Switches between on and off of an oscillator that generates test tones. To turn on the oscillator, select "On" using [15]**Cursor** ◁ / ▷. When "On" is selected, you can adjust the settings of "2 Manual Setup" while listening to a test tone.

Off	Not generate test tones.
On	Generates test tones.

Sound Setup

You can set various items for sound outputs.

■ 1 Dynamic Range

Choices: Min/Auto/STD/Max*

Selects the dynamic range adjustment method for reproducing bitstream signals.

Min/Auto	(Min) Sets the dynamic range suitable for low volume or a quiet environment, such as at night, for bitstream signals except for Dolby TrueHD signals. (Auto) Adjusts the dynamic range for Dolby TrueHD signals based on input signal information.
STD	Sets the standard dynamic range recommended for regular home use.
Max	Outputs sound without adjusting the dynamic range of the input signals.

■ 2 Lipsync

Adjusts delay between video output and audio output.

HDMI Auto

Choices: Off*/On

Automatically adjusts output timing of audio and video signals when a monitor that supports an automatic lip-sync function is connected to this unit.

Off	Select this when the connected monitor does not support the automatic lip-sync function or you do not use the automatic lip-sync function. Set the correction time in "Manual Delay."
On	Select this when the connected monitor supports the automatic lip-sync function. Fine adjust the correction time in "Auto Delay."

Auto Delay

Adjustable range: 0* to 240ms (1 ms step)

Fine adjust the correction time when "HDMI Auto" is set to "On." The actual correction time is displayed under in "Auto Delay" field and an offset time set by the user in "Offset" field.

Manual Delay

Adjustable range: 0* to 240ms (1 ms step)

Manually fine adjusts the correction time. Select this when the connected monitor does not support the automatic lip-sync function or you set "HDMI Auto" to "Off."

Function Setup

You can set various items for HDMI and display.

1 HDMI

You can set items for HDMI.

■ Standby Through

Choices: On/Off*

Selects on or off of output of HDMI signals input from the HDMI IN jack to the HDMI OUT jack when this unit is on standby. When this parameter is set to "On" signals input from the HDMI 1-4 jacks can be output to a monitor component.

On	Outputs the HDMI signals to the HDMI OUT jack.
Off	Not output the HDMI signals to the HDMI OUT jack.

- To enables pass-through output, any one of the input sources connected to the HDMI1-4 must be selected before switching to standby.
- When Standby Through turns on, the HDMI THROUGH indicator on the front panel display lights up. While the indicator lights up, this unit consumes up to 3W of power even on standby.

■ Audio Output

Choices: Amp*/TV/Amp+TV

Selects this unit or a component connected to this unit via the HDMI OUT jack of this unit for reproducing sound signals input from the HDMI IN jack.

Amp	Outputs HDMI sound signals form the speakers connected to this unit.
TV	Outputs HDMI sound signals from the speakers of a TV connected to this unit. Sound output from the speakers connected to this unit is muted.
Amp+TV	Outputs HDMI sound signals from the speakers connected to this unit and the speakers of a TV connected to this unit.

Note

- Signal formats of audio and visual signals output from this unit to the monitor vary depending on specifications of the monitor.

■ Resolution

Choices: Through*/480p/720p/1080i/1080p

Upscales the resolution of HDMI output that is converted from analog video input signals and output from the HDMI OUT jack.

Notes

- Resolution of the HDMI output converted from 720p or 1080i analog video signals cannot be upscaled.
- When a video monitor is connected to this unit via the HDMI jack, this unit automatically detects a resolution that the monitor supports. An asterisk (*) appears on the left of the detected resolution.
- If this unit cannot detect the resolution that the monitor supports, set "MON.CHK" in the advanced setup menu to "SKIP" (see page 60) and try it again.

■ Aspect

Choices: Thrgh*/16:9/Smart

Set a horizontal to vertical ratio (aspect ratio) of images reproduced by HDMI signals output from the HDMI OUT jack when the HDMI signals are converted from analog video input signals by a video conversion function.

Thrgh	Outputs the video signals without changing the aspect ratio.
16:9	Outputs the video signals that displays 4:3 images on a 16:9 monitor with black bands on the right and left sides of the monitor screen.
Smart	Outputs the video signals that displays 4:3 images on a 16:9 monitor by stretching right and left of images to fit on the monitor screen.

Notes

- You cannot change the aspect ratio of the screen when "Resolution" is set to "Thrgh."
- The setting is not effective for inputs with the aspect ratio other than 4:3.
- You cannot obtain an effect of the aspect ratio when visual signals are input from the HDMI IN jack or 720p, 1080i or 1080p signals are input.

2 Display

You can set items for a monitor or the front panel display.

■ Dimmer

Adjustable range: –4 to 0*

Sets brightness of the front panel display. As the value is lowered, the brightness of the front panel display is darkened.

Note

- The brightness of display does not become bright in Pure Direct mode even if the value is increased.

■ FL Scroll

Choices: Continue*/Once

Selects the way to scroll the screen when a total number of characters exceed a display area of the front panel display.

Continue	Repeatedly displays all characters by scrolling.
Once	Displays all characters by scrolling once, halts scrolling, and then displays first 14 characters.

■ OSD Shift

Adjustable range: –5 to 0* to +5

Adjusts top and bottom positions of the screen displayed on the video monitor. To move up the screen, set this value larger. To move down the screen, set it smaller.

3 Volume

You can set items for volumes.

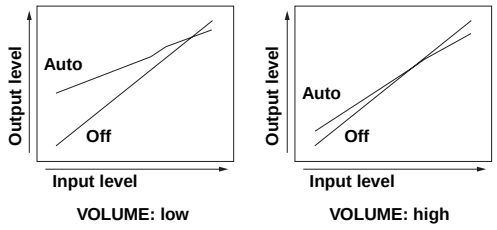
■ Adaptive DRC

Choices: Auto/Off*

Adjust the dynamic range in conjunction with the volume level. This feature is useful when you are listening at lower volumes or at night. When this function is enabled, the dynamic range is adjusted as follows.

If the VOLUME setting is low: the dynamic range is narrow

If the VOLUME setting is high: the dynamic range is wide



Auto	Adjusts the dynamic range automatically.
Off	Not adjust the dynamic range automatically.

- The Adaptive DRC setting is effective for headphones.

■ Max Volume

Adjustable range: –30.0dB to +15.0dB/+16.5dB* (5.0 dB step)

Sets the maximum volume level so that the volume will not be accidentally increased. For example, you can adjust the volume between –80.0 dB and –5.0 dB when you set this parameter to "–5.0dB." The volume increases to the maximum level when this parameter is set to +16.5 dB (default).

■ Init. Volume

Choices: Off*/Mute/–80.0dB to +16.5dB (0.5 dB step)

Sets the volume at the time this unit is turned on. When this parameter is set to "Off," the volume is set to a level that last time this unit is set to standby.

Note

- When you set "Max Volume" and "Init. Volume," the setting of "Max Volume" becomes effective. For example, when you set "Max Volume" to "–30.0dB" and "Init. Volume" to "0.0dB," the volume is automatically set to "–30.0dB" at the next time this unit is turned on.

4 Input Rename

Changes input source names to be displayed on the front panel display.

You can select an input source that you want to change the name to be displayed using 15**Cursor**.

Selecting a name to be displayed from templates

Select an input source that you want to change the name, and select a name from the following templates using Cursor.

- Blu-ray
- DVD
- SetTopBox
- Game
- TV
- DVR
- CD
- CD-R
- Satellite
- VCR
- Tape
- MD
- PC
- iPod
- HD DVD
- "blank"

Entering an original name

Select an input source that you want to name, and press 15**ENTER**. You can enter up to 9 characters by selecting one character at a time with the following keys according to the following operation.

15**Cursor** ◁ / ▷	For selecting characters that you want to change
15**Cursor** △ / ▽	For selecting characters to be entered
15**ENTER**	For entering the selected characters

The following characters are available for input.

A to Z, 0 to 9, a to z, symbols (#, *, –, +, etc.) and space

5 Zone2

Sets the maximum volume level and initial volume level of Zone2.

- This item is displayed only when "Extra SP Assign" is set to "Zone2."

■ Max Volume

Adjustable range: –30.0dB to +15.0dB / +16.5dB* (5.0 dB step)

Sets the maximum volume level of Zone2, so that the volume will not be accidentally increased. For example, you can adjust the volume between –80.0 dB and –5.0 dB when you set this parameter to "–5.0dB."

■ Init. Volume

Choices: Off*/Mute/–30.0dB to +16.5dB (0.5 dB step)

Use this feature to set the volume level of Zone2 when the power of Zone2 unit is turned on.

Note

- When you set "Max Volume" and "Init. Volume," the setting of "Max Volume" becomes effective. For example, when you set "Max Volume" to "–30.0dB" and "Init. Volume" to "0.0dB," the volume is automatically set to "–30.0dB" at the next time this unit is turned on.

DSP Parameter

You can set parameters for the sound field programs. For details, see page 46.

Memory Guard

Choices: Off*/On

Protects settings of setup menu against accidental alteration.

Off	Not protect settings.
On	Protects the settings of the setup menu (except for the Memory Guard setting).

Note

- When this parameter is switched to "On," "G" appears while the setup menu is displayed on the video monitor.

Using multi-zone configuration

This unit allows you to configure a multi-zone audio system. The Zone2 feature allows you to set this unit to reproduce separate input sources in the main zone and the second zone (Zone2). You can control this unit from the second zone using the supplied remote control.

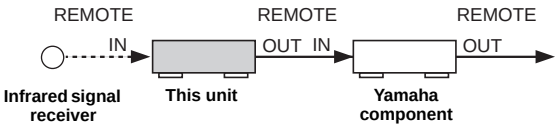
Only analog signal can be sent to Zone2. If you want to output the sound from Zone2, connect an external component to AV5-6 or AUDIO1-2 by analog connection. For example, if you want to output sound from an HDMI DVD player in Zone2, you must connect the component to this unit by both HDMI and analog connections.

Connecting Zone2

You need the following additional equipment to use the multi-zone functions of this unit:

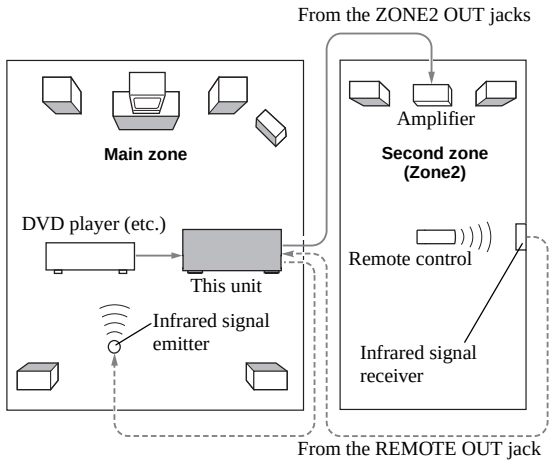
- An infrared signal receiver in the second zone.
- An infrared signal emitter in the main zone. This emitter transmits infrared signals from the remote control to a CD player or a DVD player, etc. in the main zone via the infrared signal receiver in the second zone.
- An amplifier and speakers in the second zone.

- Since there are many possible ways to connect and use this unit in a multi-zone configuration, we recommend that you consult with your nearest authorized Yamaha dealer or service center about the Zone2 connections that best meet your requirements.
- Some Yamaha models can be directly connected to the REMOTE jacks of this unit. You may not need use an infrared signal emitter for these products. Up to 6 Yamaha components can be connected as shown below.



Using the external amplifier

Connect the amplifier/receiver in the second zone and other components to this unit as follows.



Note

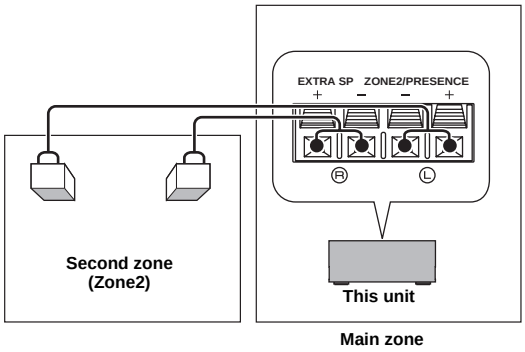
- To avoid unexpected noise, DO NOT USE the Zone2 feature with CDs encoded in DTS.

Using the internal amplifier of this unit

Important safety notice

The EXTRA SP speaker terminals of this unit should not be connected to a Passive Loudspeaker Selector Box or more than one loudspeaker per channel. Connection to a Passive Loudspeaker Selector Box or multiple speakers per channel could create an abnormally low impedance load resulting in amplifier damage. See this owner's manual for correct usage. Compliance with minimum speaker impedance information for all channels must be maintained at all times. This information is found on the back panel of your unit.

Connect the speakers in the second zone to the EXTRA SP terminals and then set the "Extra SP Assign" to "Zone2" (see page 51).



- You can use the speakers connected to EXTRA SP speaker terminals as the front speaker system of another zone. Set "EXTRA SP ASSIGN" to "Zone2" (see page 51).
- When you use the internal amplifiers for the Zone2 speakers, you can adjust the volume level and set the initial volume and maximum volume of the Zone2 speakers (see page 56).

Controlling Zone2

You can select and control Zone2 by using the control keys on the front panel or on the remote control. The available operations are as follows:

- Selecting the input source (AV5-6, AUDIO1-2, V-AUX) of Zone2.
- Adjusting the volume of Zone2 (when a Zone2 speaker is connected to the EXTRA SP jack).
- Tuning into FM or AM when "TUNER" is selected as the input source of Zone2 (see page 29).
- Tuning into XM Satellite Radio when "XM" is selected as the input source of Zone2 (see page 31) (U.S.A. model only).
- Tuning into SIRIUS Satellite Radio when "SIRIUS" is selected as the input source of Zone2 (see page 35) (U.S.A. model only).
- Playing back music stored on your iPod stationed in a Yamaha iPod universal dock (such as YDS-10 sold separately) connected to the DOCK terminal.

Note

- You must complete each step while the ZONE2 indicator is flashing on the front panel display. Otherwise, the Zone2 mode is automatically canceled and this unit returns to the normal operation mode. In this case, repeat the Zone2 selection procedure.

Controlling Zone2 with the front panel

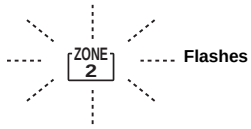
■ Turning on Zone2

Press ⓒ ZONE2 ON/OFF to turn on Zone2.

■ Activating the Zone2 operation mode

Press ⓓ ZONE2 CONTROL to control Zone2.

The ZONE2 indicator flashes on the front panel display for approximately 10 seconds.



■ Operating Zone2

Press ⓞ INPUT ◁ / ▷ to select the desired input source while the ZONE2 indicator is flashing on the front panel display.

- When AV5-6, AUDIO1-2 or V-AUX is selected, you can listening to the input source in Zone2.
- Select "TUNER" as the input source to use the TUNER features in Zone2. For details about the TUNER operations, see "FM/AM tuning" on page 29.
- Select "XM" as the input source to use the XM Satellite Radio features in Zone2. For details about the XM Satellite Radio operations, see "XM Satellite Radio tuning" on page 31.
- Select "SIRIUS" as the input source to use the SIRIUS Satellite Radio features in Zone2. For details about the SIRIUS Satellite Radio operations, see "SIRIUS Satellite Radio tuning" on page 35.
- Select "DOCK" as the input source to use iPod features in Zone2. For details about the iPod operations, see "Using iPod" on page 40.
- Select "DOCK" as the input source to use Bluetooth component features in Zone2. For details about the Bluetooth component operations, see "Using Bluetooth components" on page 42.

■ Set Zone2 to the standby mode

Press ⓒ ZONE2 ON/OFF to set Zone2 to the standby mode.

Controlling Zone2 with the remote control

■ Turning on Zone2

Switches 2 MAIN/ZONE2 to ZONE2 position, and press 7 POWER.

■ Operating Zone2

Switches 2 MAIN/ZONE2 to ZONE2 position, and press one of the input selection keys to select the desired input source of Zone2.

Note

- 18 MUTE and 16 VOLUME +/– are available to control Zone2 with same procedure as mentioned above.

■ Setting Zone2 to the standby mode

Switches 2 MAIN/ZONE2 to ZONE2 position, and press 7 POWER and to set ZONE2 to the standby mode.

Controlling other components with the remote control

You can control external components for a selected input source with the remote control. The keys available for controlling external components are as follows:

5 SOURCE POWER
Turns on and off an external component.

15 Cursor, ENTER, RETURN
Operates the menus of external components.

17 DISPLAY
Switches between the screens of external components.

19 External component operation keys
Function as a recording or playback key of an external component, or a menu display key.

20 Numeric keys
Function as numeric keys of an external component.

21 TV control keys

INPUT	Switches visual inputs of TV
MUTE	Mute audio of TV
TV VOL +/–	Controls the volume of TV
TV CH +/–	Switches channels of TV
POWER	Turns on and off TV

- You can use 21 **TV control keys** only for controls of TV regardless of selected input sources.
- You need to set the remote control code first to control external components.
- The remote control keys for controlling external components are available only when the external components have corresponding control keys.

The following remote control codes are assigned to input sources as factory default settings. For a complete list of available remote control codes, refer to “List of remote control codes” at the end of this manual.

■ Default remote control code settings

Input source	Category	Manufacturer	Default code
[HDMI1]	Blu-ray Disc	Yamaha	2018
[HDMI2]	—	—	—
[HDMI3]	—	—	—
[HDMI4]	—	—	—
[AV1]	—	—	—
[AV2]	—	—	—
[AV3]	CD	Yamaha	5013
[AV4]	—	—	—
[AV5]	—	—	—
[AV6]	—	—	—
[AUDIO1]	—	—	—
[AUDIO2]	—	—	—
[V-AUX]	—	—	—
[TUNER]	Tuner	Yamaha	5007
[DOCK]	DOCK	Yamaha	5011
[A]/[B]	—	—	—

“—” indicates no assignment

- An external component that is controlled by the remote control can be automatically selected according to selection of the scenes (see page 22).

Setting remote control codes

You can control other components by setting the appropriate remote control codes. For a complete list of available remote control codes, refer to “List of remote control codes” at the end of this manual.

1 **Press 4 CODE SET on the remote control using a pointed object such as the tip of a ballpoint pen.**
3 **TRANSMIT** on the remote control blinks twice.

2 **Press 8 Input selection keys.**

3 **Enter a remote control code using 20 Numeric keys.**
Once the remote control code is registered, 3 **TRANSMIT** on the remote control blinks twice. If it fails, 3 **TRANSMIT** blinks six times. Repeat from step 1.

Resetting all remote control codes

You can clear all the remote control codes previously set, and reset all of them to the initial factory settings.

1 **Press 4 CODE SET on the remote control using a pointed object such as a tip of a ballpoint pen.**
3 **TRANSMIT** on the remote control blinks twice.

2 **Press 13 SETUP on the remote control.**

3 **Enter “9981” using 20 Numeric keys.**
Once the initialization is complete, 3 **TRANSMIT** on the remote control blinks twice. If it fails, 3 **TRANSMIT** blinks six times. Repeat from step 1.

Advanced setup

In the advanced setup, you can set basic operations of this unit, such as on and off of a bi-amp connection, or initialize user settings. Perform the following steps to change settings.

1 Set this unit to the standby mode.

2 Press ⒶMAIN ZONE ON/OFF while pressing and holding ⓂSTRAIGHT on the front panel.

The advanced setup menu appears on the front panel display.

```
ADVANCED SETUP
```

3 Press ⓁPROGRAM ⊲ / ⊳ repeatedly to select the parameter you want to change.

The default setting are marked with "*."

- Set values are placed in XXX of the following parameters on an actual display screen.

`SP IMP. -XXX`

Choices: 6ΩMIN/8ΩMIN*

Selects output impedance of this unit according to connected speakers.

`REMOTE ID -XXX`

Choices: ID1*/ID2

Sets a remote control ID. When using multiple Yamaha AV receivers, you can operate them with a single remote control by setting the receiver IDs to the same setting.

`SR PIN -XXX`

Choices: RESET/CANCEL

Resets Parental lock cord when using SIRIUS Satellite tuner.

`BI AMP - XXX`

Choices: ON/OFF*

Switches on and off of bi-amp connection of main speakers. For bi-amp connection, see page 12.

`SCENE IR -XXX`

Choices: ON*/OFF

Selects whether or not to transmit the control signals to an external component connected to the REMOTE jacks on this unit when BD/DVD or CD SCENE function is selected.

`MON.CHK - XXXX`

Choices: YES*/SKIP

Adds upscaling limitation on output signals to a video monitor connected to this unit via the HDMI OUT jack.

`INIT-XXXXXXXXX`

Choices: DSP PARAM/VIDEO/ALL/CANCEL

Initializes various settings stored in this unit. You can select an initialization method from the following.

DSP PARAM:	All parameters of sound field programs
VIDEO:	Video conversion settings (resolution/ aspect) in the setup menu and the OSD display position
ALL:	Reset this unit to initial factory settings
CANCEL:	Cancellation of initialization

4 Press ⓂSTRAIGHT a few times to select the value you want to change.

The value selected here becomes effective when this unit is turned on the next time. You can change multiple settings by repeating steps 3 and 4.

5 Press ⒶMAIN ZONE ON/OFF, turns off this system, and press ⒶMAIN ZONE ON/OFF again.

The value set in step 3 becomes effective, and this unit turns on. When you select initialization in step 3, the initialization is performed.

Setting a remote control ID

Two IDs are provided for the remote control of this unit. If another Yamaha amplifier is in the same room, setting a different remote control ID to this unit prevents unwanted operation of the other amplifier.

ID1 is set for both remote control and amplifier by default. When you change the remote control ID, display "Advance Setup" (see the previous section) and change the ID for the amplifier too.

1 Press 4CODE SET on the remote control using a pointed object such as the tip of a ballpoint pen.

3**TRANSMIT** blinks twice.

2 Press 13SETUP on the remote control.

3 Enter the desired remote control ID code.

To switch to ID1:
Enter "5019" using 20**Numeric keys**.
To switch to ID2:
Enter "5020" using 20**Numeric keys**.
Once the remote control code is registered, 3**TRANSMIT** blinks twice.
If it fails, 3**TRANSMIT** blinks six times. Repeat from step 1.

- Initializing the remote control code (see page 59) returns it to ID1.

APPENDIX

Troubleshooting

Refer to the table below when this unit does not function properly. If the problem you are experiencing is not listed below or if the instruction below does not help, turn off this unit, disconnect the power cable, and contact the nearest authorized Yamaha dealer or service center.

General

Problem	Cause	Remedy	See page
This unit fails to turn on or enters the standby mode soon after the power is turned on.	The power cable is not connected or the plug is not completely inserted.	Connect the power cable properly to an AC wall outlet.	—
	The speaker impedance setting is incorrect.	Set the speaker impedance to match your speakers.	60
	(When this unit is turned back on and "CHECK SP WIRES!" is displayed.) The protection circuitry has been activated because this unit was turned on while a speaker cable was shorted.	Make sure that all speaker cables between this unit and speakers are connected properly.	11
This unit cannot be turned off.	The internal microcomputer is frozen due to an external electric shock (such as lightning or excessive static electricity) or by a drop in power supply voltage.	Disconnect the power cable from the AC wall outlet, wait about 30 seconds and then plug it in again.	—
No sound.	"Audio Output" in "1 HDMI" Function Setup is set to "TV."	Select a choice for "Audio Output" (Function Setup → 1 HDMI → Audio Output) other than "TV."	54
	A proper audio decoder is not selected.	Display the OPTION menu and set "Decoder Mode" to "Auto."	44
	Incorrect input or output cable connections.	Connect the cables properly. If the problem persists, the cables may be defective.	14-17
	No appropriate input source has been selected.	Select an appropriate input source with ⓪**INPUT** ◁ / ▷ or the 8**Input selector keys** on the remote control.	22
	Speaker connections are not secure.	Secure the connections.	11
	The volume is turned down or muted.	Turn up the volume.	—
	Signals this unit cannot reproduce are being input from a source component, such as a CD-ROM.	Display Signal info of the option menu and check the input signal format. If "No Signal" is displayed, check if the playback component is properly connected to this unit (or a proper input source is selected). If "___" is displayed, the input signal in that format cannot be reproduced by this unit.	—
	The HDMI components connected to this unit do not support the HDCP copy protection standards.	Connect HDMI components that support the HDCP copy protection standards.	74

Problem	Cause	Remedy	See page
No.picture.	An appropriate video input is not selected on the monitor.	Select an appropriate video input on the monitor.	—
	The composite output terminals are used to output a component video signal, or the COMPONENT VIDEO jacks are used to output a composite video signal.	If your monitor does not support the HDMI connection, connect it to the COMPONENT OUT jacks or the composite output terminals and select an appropriate video input on the monitor.	14
	This unit outputs the video signals are not supported on the video monitor connected to the HDMI OUT jack.	Displays the advanced setup menu and select “VIDEO” in “INIT” to reset the video parameters.	60
		Displays the advanced setup menu and set “MON.CHK” to “YES.”	60
	Non-standard video signals are input.	Connect the monitor to this unit via the COMPONENT OUT jacks or the composite output terminals.	14
The sound suddenly goes off.	The protection circuitry has been activated because of a short circuit, etc.	Check that the speaker impedance setting is correct.	60
		Check that the speaker wires are not touching each other and then turn this unit back on.	—
	The sleep timer has turned off this unit.	Turn on this unit, and play the source again.	—
Sound is heard from the speaker on one side only.	The playback component or speakers are not connected properly.	Connect the cables properly. If the problem persists, the cables may be defective.	11
	The speaker level settings are incorrect.	Adjust “B)Level” settings.	53
Only the center speaker outputs substantial sound.	When a monaural source sound field program is applied, sound of all channels are output from the center speaker for some surround decoders.	Try another sound field program.	25
No sound is output from a specific speaker.	Output from that speaker is disabled.	Check the Speaker indicators on the front panel display. If the corresponding indicator is turned off, try the following. 1) Change the input source to another one. 2) With the selected sound field program, sound is not output from that speaker. Select another sound field program. 3) “None” may have been selected for that speaker on this unit. Display Speaker Setup in the Setup menu and enables output of that speaker.	6, 22, 25, 52
	The volume of that speaker is set to minimum in Speaker Setup in the Setup menu.	Display Speaker Setup in the Setup menu and adjust the volume (Manual Setup → B)Level).	53
	This unit or speaker is malfunction.	Check the Speaker indicators on the front panel display. If the corresponding indicator lights up, connect another speaker and check if sound is output. If sound is not output, this unit may be malfunction.	6, 10
No sound is heard from the presence speakers.	This unit is in the STRAIGHT” mode.	Press Ⓜ**STRAIGHT** or the 11**STRAIGHT** on the remote control to turn off the “STRAIGHT” mode.	28
	Sound may not be output from certain channels depending on the input source or sound field program.	Try another sound field program.	25

Problem	Cause	Remedy	See page
No sound is heard from the surround speakers.	This unit is in the "STRAIGHT" mode and a monaural source is being played back.	Press Ⓜ**STRAIGHT** or the 11**STRAIGHT** on the remote control to turn off the "STRAIGHT" mode.	28
	Sound may not be output from certain channels depending on input sources or sound field programs.	Try another sound field program.	25
No sound is heard from the subwoofer.	"LFE/Bass Out" of "A)Config" in "Speaker Setup" of the setup menu (Speaker Setup→Manual Setup→A)Config) is set to "Front" when a Dolby Digital, DTS or AAC signal is being played.	Set "LFE/Bass Out" to "SWFR" or "Both."	52
	"LFE/Bass Out" of "A)Config" in "Speaker Setup" of the setup menu (Speaker Setup→Manual Setup→A)Config) is set to "SWFR" or "Front" when a 2-channel source is being played.	Set "LFE/Bass Out" to "Both."	52
	The source does not contain low frequency signals.		
No sound is heard from the surround back speakers.	"Extended Surround" in the OPTION menu is set to "Off," or an input signal does not contain a surround back flag with "Extended Surround" set to "Auto."	Set "Extended Surround" other than "Off" or "Auto."	44
The audio input sources cannot be played in the desired digital audio signal format.	The connected component is not set to output the desired digital audio signals.	Set the playback component properly referring to its operating instructions.	—
Noise/hum noise is heard.	Incorrect cable connection.	Connect the audio cables properly. If the problem persists, the cables may be defective.	—
	A DTS-CD is being played back.	1) When only noise is output If a DTS bitstream signal is not properly input to this unit, only noise is output. Connect the playback component to this unit by digital connection and play back the DTS-CD. If the condition is not improved, the problem may results from the playback component. Consult the manufacturer of the playback component. 2) When noise is output during playback or skip operation Before playing back the DTS-CD, display the option menu after selecting the input source and set "Decoder Mode" to "DTS."	15, 44
"Memory Guard!" is displayed and the setting cannot be changed.	"Memory Guard" in "Set Menu" is set to "On."	Set "Memory Guard" to "Off."	56
This unit does not operate properly.	The internal microcomputer is frozen due to an external electric shock (such as lightning or excessive static electricity) or by a drop in power supply voltage.	Disconnect the power cable from the AC wall outlet, wait about 30 seconds and then plug it in again.	—

Problem	Cause	Remedy	See page
"CHECK SP WIRES!" appears on the front panel display.	Speaker cables are short-circuited.	Make sure all speaker cables are connected correctly.	12
There is noise interference from digital or radio frequency equipment.	This unit is too close to other digital or radio frequency equipment.	Move this unit further away from such equipment.	—
The picture is disturbed.	The video software is copy-protected.		
This unit suddenly enters the standby mode.	The internal temperature becomes too high and the overheat protection circuitry has been activated.	Wait about 1 hour for this unit to cool down and then turn it back on.	—

HDMI

Problem	Cause	Remedy	See page
No picture or sound.	The number of the connected HDMI components is over the limit.	Disconnect some of the HDMI components.	—
	The connected HDMI component does not support high-bandwidth digital copyright protection (HDCP).	Connect an HDMI component that supports HDCP.	15

Tuner (FM/AM)

	Problem	Cause	Remedy	See page
FM	**FM stereo reception is noisy.**	You are too far from the station transmitter or the input from the antenna is weak.	Check the antenna connections.	18
			Replace the outdoor antenna with a more sensitive multi-element antenna.	—
			Switch to monaural mode.	44
	There is distortion, and clear reception cannot be obtained even with a good FM antenna.	There is multi-path interference.	Adjust the antenna height or orientation, or place it in a different location.	—
	The desired station cannot be tuned into with the automatic tuning method.	You are in an area far from a station or an input from the antenna is weak.	Replace an outdoor antenna with more sensitive multi element antenna.	—
			Tune in manually or by direct frequency tuning.	29

	Problem	Cause	Remedy	See page
AM	**The desired station cannot be tuned into with the automatic tuning method.**	The signal is weak or the antenna connections are loose.	Adjust the AM loop antenna orientation.	18
			Use the manual tuning method.	29
	There are continuous crackling and hissing noises.	Supplied AM loop antenna is not connected.	Connect the AM loop antenna correctly even if you use an outdoor antenna.	18
		The noises may be caused by lightning, fluorescent lamps, motors, thermostats and other electrical equipment.	It is difficult to completely eliminate noise, but it can be reduced by installing and properly grounding an outdoor AM antenna.	18
	There are buzzing and whining noises.	A TV set is being used nearby.	Move this unit away from the TV set.	—

XM Satellite Radio (U.S.A. model only)

If an operation takes longer than usual or an error occurs, one of the following messages may appear on the front panel display. In this case, read the cause and follow the corresponding remedies.

Status message	Cause	Remedy	See page
CHECK XM TUNER	The XM Mini-Tuner is not installed in the XM Mini-Tuner Home Dock or the XM Mini-Tuner Home Dock is not connected to this unit.	Confirm the XM Mini-Tuner is fully seated in the dock and check the XM Mini-Tuner Home Dock cable is connected to this unit.	31
CHECK ANTENNA	The XM antenna is not connected to the XM Mini-Tuner Home Dock or the XM antenna cable has become damaged.	Check that the XM antenna is securely connected to the XM Mini-Tuner Home Dock and check the antenna cable for damage. Replace the XM antenna if the cable is damaged.	31
LOADING XM	The XM Mini-Tuner is acquiring audio or program information from the XM satellite signal. This message can also occur in weak XM signal conditions. Note that this unit may not respond to some operations while this message is displayed.	This message should disappear in a few seconds in good signal conditions. If you see this message often, reposition the XM antenna to get better signal reception. Use the “ANTENNA INFO” information on the front panel display or “XM Information” screen in the video monitor to check the antenna reception level.	34
NO SIGNAL	The XM Mini-Tuner is not receiving the XM satellite signal. Something may be blocking the XM antenna’s view of the satellites or the antenna is not properly aimed.	Check for antenna obstructions and reposition the XM antenna to get better signal reception. Use the “ANTENNA INFO” information on the front panel display or “XM Information” screen in the video monitor to check the antenna reception level. See instructions supplied with the XM Mini-Tuner and Dock for antenna installation information.	34
CH OFF AIR	The XM channel you selected is not currently broadcasting.	Check back at a later time; in the meantime, select another channel.	—
CH UNAUTH	You may be attempting to tune to an XM channel that is blocked or that you cannot receive with your XM subscription package.	Consult the latest channel guide at http://www.xmradio.com/ for the current list of channels. For information on receiving this channel, visit http://www.xmradio.com/ or contact XM Satellite Radio at 1-800-967-2346.	31

Status message	Cause	Remedy	See page
CH UNAVAIL	The selected channel is not available. The channel may have been reassigned to a different channel number. This message may occur initially with a new XM Mini-Tuner or an XM Mini-Tuner that has not received XM's signal for an extended period.	Consult the latest channel guide at http://www.xmradio.com/ for the current list of channels. For cases of a new XM Mini-Tuner or an XM Mini-Tuner that has not received XM's signal for an extended period, allow the XM Mini-Tuner to receive the XM satellite signal for at least 5 minutes and then try to select the channel again.	—
UPGRADE XM TUNER	This unit has detected a XM CNP1000 which is not compatible with this unit.	If you have connected the XM Mini-Tuner (CNP2000) and see this message, set this unit to standby, disconnect and reconnect the XM Mini-Tuner Home Dock and re-install the Mini-Tuner in the Home Dock and turn on this unit. If you continue to see this message with the XM Mini-Tuner, contact XM Satellite Radio at http://xmradio.com/ or 1-800-XMRADIO (1-800-967-2346). If you have an incompatible XM CNP1000, contact XM for information on upgrading to the XM Mini-Tuner.	—
- - - -	No artist name or song title is available for this selection.	No action required.	—

SIRIUS Satellite Radio (U.S.A. model only)

If an operation takes longer than usual or an error occurs, one of the following messages may appear on the front panel display. In this case, read the cause and follow the corresponding remedies.

Status message	Cause	Remedy	See page
ANTENNA ERROR	The antenna is not connected to the SiriusConnect tuner properly.	Check the connection of the antenna and SiriusConnect tuner.	35
SIRIUS LOADING	This unit is communicating with the SiriusConnect tuner.	The message disappears normally within several tens of seconds.	—
CHECK SR TUNER	The SiriusConnect tuner is not connected to the SIRIUS jack of this unit correctly.	Check the connection of the SiriusConnect tuner and this unit.	35
	The SiriusConnect tuner is not connected to the AC wall outlet.	Connect the power cable of the SiriusConnect tuner to the AC wall outlet.	35
NOT SUPPORTED	This unit does not support the connected SIRIUS Satellite Radio tuner.	Connect the SiriusConnect tuner that this unit supports,	35
ACQUIRING	The signal is too weak.	Adjust the orientation of the antenna of the SiriusConnect tuner. Use the "Antenna" information on the front panel display or "SIRIUS Information" screen in the video monitor to check the antenna reception level.	39
UPDATING	The SiriusConnect tuner is updating the channel list.	Wait until the updating is complete.	—
	The period of the subscription is end.	Contact SIRIUS Satellite Radio to renew the subscription.	35
F/W UPDATING	The SiriusConnect tuner is updating the firmware.	Wait until the updating is complete.	—

Status message	Cause	Remedy	See page
CALL SIRIUS (CALL 888-539-SIRIUS TO SUBSCRIBE)	The selected channel is not subscribed.	Contact SIRIUS Satellite Radio to subscribe the selected channel. URL: https://activate.siriusradio.com/ Phone: 1-888-539-SIRIUS (1-888-539-7474)	35
		Select another channel.	35
SUB UPDATED	The subscription information is updated.		
INVALID	The selected channel is currently out of service.	Select another channel.	35
Not Available	The operation you made is not available.		

Remote control

Problem	Cause	Remedy	See page
The remote control does not work or function properly.	Wrong distance or angle.	The remote control will function within a maximum range of 6 m (20 ft) and no more than 30 degrees offaxis from the front panel.	9
	Direct sunlight or lighting (from an inverter type of fluorescent lamp, strobe light, etc.) is striking the remote control sensor of this unit.	Adjust the lighting angle or reposition this unit.	—
	The batteries are weak.	Replace all batteries.	9
	The remote control ID of the remote control and this unit do not match.	Match the remote control ID of this unit and the remote control.	60
	The remote control code is not correctly set.	Set the remote control code correctly using “List of remote control codes” at the end of this manual.	59
		Try setting another code of the same manufacturer using “List of remote control codes” at the end of this manual.	59
		If this unit does not work when you press 15**Cursor**, do the following. When the key does not work during DVD disc menu operation: press the 8**Input selection keys** on the remote control again. When the key does not work during OPTION menu/ SETUP menu operation: press the key applicable for the current menu operation again.	—
	Even if the remote control code is correctly set, there are some models that do not respond to the remote control.		

iPod™

Note

- In case of a transmission error without a status message appearing on the front panel display and on the OSD, check the connection of your iPod (see page 17).

Problem	Cause	Remedy	See page
Loading...	This unit is in the middle of recognizing the connection with your iPod.		
	This unit is in the middle of acquiring song lists from your iPod.		
Connect error	There is a problem with the signal path from your iPod to this unit.	Turn off this unit and reconnect the Yamaha iPod universal dock to the DOCK terminal of this unit.	17
		Remove your iPod in the Yamaha iPod universal dock and then place it back in the dock.	17
Unknown iPod	The iPod being used is not supported by this unit.	This unit supports iPod (Click Wheel), iPod nano and iPod mini.	—
iPod Connected	Your iPod is properly placed in the Yamaha iPod universal dock.		
Disconnected	Your iPod is removed from the Yamaha iPod universal dock.	Place your iPod in the Yamaha iPod universal dock.	17
Unable to play	This unit cannot play back the songs currently stored on your iPod.	Check that the songs currently stored on your iPod are playable.	—
		Store some other playable music files on your iPod.	—

Bluetooth™

Problem	Cause	Remedy	See page
Searching...	The Bluetooth wireless audio receiver and the Bluetooth component are in the middle of the pairing.		
	The Bluetooth wireless audio receiver and the Bluetooth component are in the middle of establishing the connection.		
Completed	The pairing is completed.		
Canceled	The pairing is canceled.		
BT Connected	The connection between the Yamaha Bluetooth wireless audio receiver and the Bluetooth component is established.		
Disconnected	The Bluetooth component is disconnected from the Yamaha Bluetooth wireless audio receiver.		

Auto Setup (YPAO)

Notes

- If the “ERROR” or “WARNING” screen appears, resolve the problem and then run “Auto Setup” again.
- Warning message “W-2” or “W-3” indicates that the adjusted settings may not be optimal.
- Depending on the speakers, warning message “W-1” may appears even if the speaker connections are correct.
- If error message “E-10” occurs repeatedly, contact a qualified Yamaha service center.

Before Auto Setup

Error message	Cause	Remedy	See page
Connect MIC!	Optimizer microphone is not connected.	Connect the supplied optimizer microphone to the OPTIMIZER MIC jack on the front panel.	19
Unplug HP!	Headphones are connected.	Unplug the headphones.	—
Memory Guard!	The parameters of this unit are protected.	Set “Memory Guard” to “Off.”	56

During Auto Setup

Error message	Cause	Remedy	See page
E-1:NO FRONT SP	Front L/R channel signals are not detected.	Check the front L/R speaker connections.	11
E-2:NO SUR. SP	Only a signal from one of the surround channels are detected.	Check the surround L/R speaker connections.	11
E-3:NO PRNS SP	Only signals from one of the presence L/R channels are detected.	Check the presence L/R speaker connections.	11
E-4:SBR->SBL	Only right surround back channel signal is detected.	If you connect only one surround back speaker, connect it to the L-side (SINGLE) terminal.	11
E-5:NOISY	Measurement cannot be performed accurately due to loud ambient noise.	Try running “Auto Setup” in a quiet environment.	—
		Turn off noisy electric equipment like air conditioners or move them away from the optimizer microphone.	—
E-6:CHECK SUR.	Surround back speakers are connected, though surround L/R speakers are not.	When using surround back speakers, you need to connect surround L/R speakers.	11
E-7:NO MIC	The optimizer microphone was unplugged during the “Auto Setup” procedure.	Do not touch the optimizer microphone during “Auto Setup.”	19
E-8:NO SIGNAL	The optimizer microphone does not detect test tones.	Check whether the microphone is properly placed.	19
		Check whether the speakers are properly placed and connected.	11
		The optimizer microphone or OPTIMIZER MIC jack may be defective. Contact the nearest Yamaha dealer or service center.	19
E-9:USER CANCEL	“Auto Setup” was cancelled due to an inappropriate user operation.	Run “Auto Setup” again.	19
E-10:INTERNAL ERROR	An internal error occurred.	Run “Auto Setup” again.	19

After Auto Setup

Error message	Cause	Remedy	See page
W-1:OUT OF PHASE	Speaker polarity is not correct. This message may appear depending on the speakers even when the speakers are connected correctly.	Check the polarities (+, –) of the displayed speaker. If they are correct, the speakers work properly even when this message is displayed.	11
W-2:OVER 24m (80ft)	The distance between the speaker and the listening position is over 24 m (80 ft).	Bring the speaker within 24 m (80 ft.) area around the listening position.	—
W-3:LEVEL ERROR	The difference of volume level among speakers is excessive.	Recheck the speaker positions and make sure all speakers are placed in a similar environment.	—
		Check the polarities (+, –) of the speakers.	11
		We recommended that you use speakers with the same or similar specifications.	—
		Adjust the output volume of the subwoofer.	—
W-4:CHECK PRNS	Presence speakers were not detected during measurement with “Extra SP Assign” set to “Presence.”	Check the presence speaker connections and perform measurement again. If presence speakers are not connected, set the “Extra SP Assign” to other than “Presence.”	51
		If presence speakers are connected, set the “Extra SP Assign” to “Presence,” and retry Auto Setup.	51

Glossary

■ Audio and video synchronization (lip sync)

Lip sync, an abbreviation for lip synchronization, is a technical term that involves both a problem and a capability of maintaining audio and video signals synchronized during post-production and transmission. Whereas the audio and video latency requires complex end-user adjustments, HDMI version 1.3 incorporates an automatic audio and video syncing capability that allows devices to perform this synchronization automatically and accurately without user interaction.

■ Bi-amplification connection

A bi-amplification connection uses two amplifiers for a speaker. One amplifier is connected to the woofer section of a loudspeaker while the other is connected to the combined mid and tweeter section. With this arrangement each amplifier operates over a restricted frequency range. This restricted range presents each amplifier with a much simpler job and each amplifier is less likely to influence the sound in some way.

■ Component video signal

With the component video signal system, the video signal is separated into the Y signal for the luminance and the PB and PR signals for the chrominance. Color can be reproduced more faithfully with this system because each of these signals is independent. The component signal is also called the “color difference signal” because the luminance signal is subtracted from the color signal. A monitor with component input jacks is required in order to output component signals.

■ Composite video signal

With the composite video signal system, the video signal is composed of three basic elements of a video picture: color, brightness and synchronization data. A composite video jack on a video component transmits these three elements combined.

■ Deep Color

Deep Color refers to the use of various color depths in displays, up from the 24-bit depths in previous versions of the HDMI specification. This extra bit depth allows HDTVs and other displays go from millions of colors to billions of colors and eliminate on-screen color banding for smooth tonal transitions and subtle gradations between colors. The increased contrast ratio can represent many times more shades of gray between black and white. Also Deep Color increases the number of available colors within the boundaries defined by the RGB or YCbCr color space.

■ Dolby Digital

Dolby Digital is a digital surround sound system that gives you completely independent multi-channel audio. With 3 front channels (front L/R and center), and 2 surround stereo channels, Dolby Digital provides 5 full-range audio channels. With an additional channel especially for bass effects, called LFE (Low Frequency Effect), the system has a total of 5.1-channels (LFE is counted as 0.1 channel). By using 2-channel stereo for the surround speakers, more accurate moving sound effects and surround sound environment are possible than with Dolby Surround. The wide dynamic range from maximum to minimum volume reproduced by the 5 full-range channels and the precise sound orientation generated using digital sound processing provide listeners with unprecedented excitement and realism.
With this unit, any sound environment from monaural up to a 5.1-channel configuration can be freely selected for your enjoyment.

■ Dolby Digital Surround EX

Dolby Digital EX creates 6 full-bandwidth output channels from 5.1-channel sources.
For the best results, Dolby Digital EX should be used with movie sound tracks recorded with Dolby Digital Surround EX. With this additional channel, you can experience more dynamic and realistic moving sound especially with scenes with “fly-over” and “fly-around” effects.

■ Dolby Digital Plus

Dolby Digital Plus is an advanced audio technology developed for high-definition programming and media including HD broadcasts, and Blu-ray Disc. Selected as an optional audio standard for Blu-ray Disc, this technology delivers multichannel sound with discrete channel output. Supporting bitrates up to 6.0 Mbps, Dolby Digital Plus can carry up to 7.1 discreet audio channels simultaneously. Supported by HDMI version 1.3 and designed for the optical disc players and AV receivers/amplifiers of the future, Dolby Digital Plus also remains fully compatible with the existing multichannel audio systems that incorporate Dolby Digital.

■ Dolby Pro Logic II

Dolby Pro Logic II is an improved technique used to decode vast numbers of existing Dolby Surround sources. This new technology enables a discrete 5-channel playback with 2 front left and right channels, 1 center channel, and 2 surround left and right channels instead of only 1 surround channel for conventional Pro Logic technology. There are three modes available: “Music mode” for music sources, “Movie mode” for movie sources and “Game mode” for game sources.

■ Dolby Pro Logic IIx

Dolby Pro Logic IIx is a new technology enabling discrete multichannel playback from 2-channel or multi-channel sources. There are three modes available: “Music mode” for music sources, “Movie mode” for movie sources (for 2-channel sources only) and “Game mode” for game sources.

■ Dolby Surround

Dolby Surround is widely used with nearly all video tapes and laser discs, and in many TV and cable broadcasts as well. Dolby Surround uses a 4-channel analog recording system to reproduce realistic and dynamic sound effects: 2 front left and right channels (stereo), a center channel for dialog (monaural), and a surround channel for special sound effects (monaural). The surround channel reproduces sound within a narrow frequency range. The Dolby Pro Logic decoder built into this unit employs a digital signal processing system that automatically stabilizes the volume on each channel to enhance moving sound effects and directionality.

■ Dolby TrueHD

Dolby TrueHD is an advanced lossless audio technology developed for high-definition disc-based media including Blu-ray Disc. Selected as an optional audio standard for Blu-ray Disc, this technology delivers sound that is bit-for-bit identical to the studio master, offering a high-definition home theater experience.
Supporting bitrates up to 18.0 Mbps, Dolby TrueHD can carry up to 8 discrete channels of 24-bit/96 kHz audio simultaneously.
Dolby TrueHD also remains fully compatible with the existing multichannel audio systems and retains the metadata capability of Dolby Digital, allowing dialog normalization and dynamic range control.

■ DSD

Direct Stream Digital (DSD) technology stores audio signals on digital storage media, such as Super Audio CDs. Using DSD, signals are stored as single bit values at a high-frequency sampling rate of 2.8224 MHz, while noise shaping and oversampling are used to reduce distortion, a common occurrence with very high quantization of audio signals. Due to the high sampling rate, better audio quality can be achieved than that offered by the PCM format used for normal audio CDs. The frequency is equal to or higher than 100 kHz and the dynamic range is 120 dB. This unit can transmit or receive DSD signals via the HDMI jack.

■ DTS 96/24

DTS 96/24 offers an unprecedented level of audio quality for multi-channel sound on DVD video, and is fully backward-compatible with all DTS decoders. “96” refers to a 96 kHz sampling rate compared to the typical 48 kHz sampling rate. “24” refers to 24-bit word length. DTS 96/24 offers sound quality transparent to the original 96/24 master, and 96/24 5.1-channel sound with full-quality full-motion video for music programs and motion picture soundtracks on DVD video.

■ DTS Digital Surround

DTS digital surround was developed to replace the analog soundtracks of movies with a 5.1-channel digital sound track, and is now rapidly gaining popularity in movie theaters around the world. DTS, Inc. has developed a home theater system so that you can enjoy the depth of sound and natural spatial representation of DTS digital surround in your home. This system produces practically distortion-free 6-channel sound (technically, front left and right, center, surround left and right, and LFE 0.1 (subwoofer) channels for a total of 5.1 channels). This unit incorporates a DTS-ES decoder that enables 6.1-channel reproduction by adding the surround back channel to the existing 5.1-channel format.

■ DTS Express

This is an audio format for next-generation optical discs such as Blu-ray discs. It uses optimized low bit rate signals for network streaming. In the case of a Blu-ray disc, this format is used with secondary audio, enabling you to enjoy the commentary of the movie producer via the Internet while playing the main program.

■ DTS-HD High Resolution Audio

DTS-HD High Resolution Audio is a high resolution audio technology developed for high-definition disc-based media including Blu-ray Disc. Selected as an optional audio standard for Blu-ray Disc, this technology delivers sound that is virtually indistinguishable from the original, offering a high-definition home theater experience. Supporting bitrates up to 6.0 Mbps for Blu-ray Disc, DTS-HD High Resolution Audio can carry up to 7.1 discrete channels of 24-bit/96 kHz audio simultaneously.
DTS-HD High Resolution Audio also remains fully compatible with the existing multichannel audio systems that incorporate DTS Digital Surround.

■ DTS-HD Master Audio

DTS-HD Master Audio is an advanced lossless audio technology developed for high-definition disc-based media including Blu-ray Disc. Selected as an optional audio standard for Blu-ray Disc, this technology delivers sound that is bit-for-bit identical to the studio master, offering a high-definition home theater experience. Supporting bitrates up to 24.5 Mbps for Blu-ray Disc, DTS-HD Master Audio can carry up to 7.1 discrete channels of 24-bit/96 kHz audio simultaneously. Supported by HDMI version 1.3 and designed for the optical disc players and AV receivers/amplifiers of the future, DTS-HD Master Audio also remains fully compatible with the existing multichannel audio systems that incorporate DTS Digital Surround.

■ HDMI

HDMI (High-Definition Multimedia Interface) is the first industry-supported, uncompressed, all-digital audio/video interface. Providing an interface between any source (such as a set-top box or AV receiver) and an audio/video monitor (such as a digital television), HDMI supports standard, enhanced or high-definition video as well as multi-channel digital audio using a single cable. HDMI transmits all ATSC HDTV standards and supports 8-channel digital audio, with bandwidth to spare to accommodate future enhancements and requirements.
When used in combination with HDCP (High-bandwidth Digital Content Protection), HDMI provides a secure audio/video interface that meets the security requirements of content providers and system operators. For further information on HDMI, visit the HDMI website at “http://www.hdmi.org/.”

■ LFE 0.1 channel

This channel reproduces low-frequency signals. The frequency range of this channel is from 20 Hz to 120 Hz. This channel is counted as 0.1 because it only enforces a low-frequency range compared to the full-range reproduced by the other 5/6 channels in Dolby Digital or DTS 5.1/6.1-channel systems.

■ Neural Surround

Neural Surround represents the latest advancement in surround technology and has been adopted by XM Satellite Radio for digital radio broadcast of surround recordings and live events in surround sound. Neural Surround employs psychoacoustic frequency domain processing which allows delivery of a more detailed sound stage with superior channel separation and localization of audio elements. System playback is scalable from 5.1 to 7.1 multi-channel surround playback.

■ Neo:6

Neo:6 decodes the conventional 2-channel sources for 6- channel playback by the specific decoder. It enables playback with the full-range channels with higher separation just like digital discrete signal playback. There are two modes available: “Music mode” for music sources and “Cinema mode” for movie sources.

■ PCM (Linear PCM)

Linear PCM is a signal format under which an analog audio signal is digitized, recorded and transmitted without using any compression. This is used as a method of recording CDs and DVD audio. The PCM system uses a technique for sampling the size of the analog signal per very small unit of time. Standing for “Pulse Code Modulation,” the analog signal is encoded as pulses and then modulated for recording.

■ Sampling frequency and number of quantized bits

When digitizing an analog audio signal, the number of times the signal is sampled per second is called the sampling frequency, while the degree of fineness when converting the sound level into a numeric value is called the number of quantized bits. The range of rates that can be played back is determined based on the sampling rate, while the dynamic range representing the sound level difference is determined by the number of quantized bits. In principle, the higher the sampling frequency, the wider the range of frequencies that can be played back, and the higher the number of quantized bits, the more finely the sound level can be reproduced.

■ “x.v.Color”

A color space standard supported by HDMI version 1.3. It is a more extensive color space than sRGB, and allows the expression of colors that could not be expressed before. While remaining compatible with the color gamut of sRGB standards, “x.v.Color” expands the color space and can thus produce more vivid, natural images. It is particularly effective for still pictures and computer graphics.

Sound field program information

■ Elements of a sound field

What really creates the rich, full tones of a live instrument are the multiple reflections from the walls of the room. In addition to making the sound live, these reflections enable us to tell where the player is situated as well as the size and shape of the room in which we are sitting. There are two distinct types of sound reflections that combine to make up the sound field in addition to the direct sound coming straight to our ears from the playerfs instrument.

Early reflections

Reflected sounds reach our ears extremely rapidly (50 ms to 100 ms after the direct sound), after reflecting from one surface only (for example, from a wall or the ceiling). Early reflections actually add clarity to the direct sound.

Reverberations

These are caused by reflections from more than one surface (for example, from the walls, and/or the ceiling) so numerous that they merge together to form a continuous sonic afterglow. They are nondirectional and lessen the clarity of the direct sound.

Direct sound, early reflections and subsequent reverberations taken together help us to determine the subjective size and shape of the room, and it is this information that the digital sound field processor reproduces in order to create sound fields.
If you could create the appropriate early reflections and subsequent reverberations in your listening room, you would be able to create your own listening environment.
The acoustics in your room could be changed to those of a concert hall, a dance floor, or a room with virtually any size at all. This ability to create sound fields at will is exactly what Yamaha has done with the digital sound field processor.

■ CINEMA DSP

Since the Dolby Surround and DTS systems were originally designed for use in movie theaters, their effect is best felt in a theater having many speakers designed for acoustic effects. Since home conditions, such as room size, wall material, number of speakers, and so on, can differ so widely, it is inevitable that there are differences in the sound heard.
Based on a wealth of actually measured data, Yamaha CINEMA DSP provides the audiovisual experience of a movie theater in the listening room of your own home by using the Yamaha original sound field technology combined with various digital audio systems.

■ CINEMA DSP 3D

The actually measured sound field data contain the information of the height of the sound images. CINEMA DSP 3D feature achieves the reproduction of the accurate height of the sound images so that it creates the accurate and intensive stereoscopic sound fields in a listening room.

■ SILENT CINEMA

Yamaha has developed a natural, realistic sound effect DSP algorithm for headphones. Parameters for headphones have been set for each sound field so that accurate representations of all the sound field programs can be enjoyed on headphones.

■ Virtual CINEMA DSP

Yamaha has developed a Virtual CINEMA DSP algorithm that allows you to enjoy DSP sound field surround effects even without any surround speakers by using virtual surround speakers. It is even possible to enjoy Virtual CINEMA DSP using a minimal two-speaker system that does not include a center speaker.

■ Compressed Music Enhancer

The Compressed Music Enhancer feature of this unit enhances your listening experience by regenerating the missing harmonics in a compression artifact. As a result, flattened complexity due to the loss of high-frequency fidelity as well as lack of bass due to the loss of low-frequency bass is compensated, providing improved performance of the overall sound system.

Information on HDMI™

■ HDMI signal compatibility

Audio signals

Audio signal types	Audio signal formats	Compatible media
2ch Linear PCM	2ch, 32-192 kHz, 16/20/24 bit	CD, DVD-Video, DVD-Audio, etc.
Multi-ch Linear PCM	8ch, 32-192 kHz, 16/20/24 bit	DVD-Audio, Blu-ray Disc, HD DVD, etc.
DSD	2/5.1ch, 2.8224 MHz, 1 bit	SA-CD, etc.
Bitstream	Dolby Digital, DTS	DVD-Video, etc.
Bitstream (High definition audio)	Dolby TrueHD, Dolby Digital Plus, DTS-HD Master Audio, DTS-HD High Resolution Audio, DTS Express	Blu-ray Disc, HD DVD, etc.

- If the input source component can decode the bitstream audio signals of audio commentaries, you can play back the audio sources with the audio commentaries mixed down by using the following connections:
  – multi-channel analog audio input (see page 16)
  – DIGITAL INPUT OPTICAL (or COAXIAL)
- Refer to the supplied instruction manuals of the input source component, and set the component appropriately.

Notes

- When CPPM copy-protected DVD-Audio is played back, video and audio signals may not be output depending on the type of the DVD player.
- This unit is not compatible with HDCP-incompatible HDMI or DVI components.
- To decode audio bitstream signals on this unit, set the input source component appropriately so that the component outputs the bitstream audio signals directly (does not decode the bitstream signals on the component). Refer to the supplied instruction manuals for details.
- This unit is not compatible with the audio commentary features (for example, the special audio contents downloaded via Internet) of Blu-ray Disc or HD DVD. This unit does not play back the audio commentaries of the Blu-ray Disc or HD DVD contents.

Video signals

This unit is compatible with the video signals of the following resolutions:

- 480i/60 Hz
- 576i/50 Hz
- 480p/60 Hz
- 576p/50 Hz
- 720p/60 Hz, 50 Hz
- 1080i/60 Hz, 50 Hz
- 1080p/60 Hz, 50 Hz, 24 Hz

Specifications

AUDIO SECTION

- Minimum RMS Output Power for Front, Center, Surround, Surround back
  [U.S.A. and Canada models]
  1 kHz, 0.9% THD, 8 Ω ..... 90 W
  [Other models]
  1 kHz, 0.9% THD, 6 Ω ..... 90 W
- Dynamic Power (IHF)
  [U.S.A. and Canada models]
  Front Speakers 8/6/4/2 Ω ..... 95/110/130/150 W
  [Other models]
  Front Speakers 6/4/2 Ω ..... 100/110/125 W
- Maximum Useful Output Power (JEITA) [Australia, General and Asia models]
  1 kHz, 10% THD, 6 Ω ..... 115 W
- Maximum Output Power [Russia and Asia models]
  1 kHz, 0.7% THD, 4 Ω ..... 105 W
- Dynamic Headroom [U.S.A. and Canada models]
  8 Ω ..... 0.23 dB
- IEC Output Power [Russia and Asia models]
  Front Speakers 1 kHz, 0.9% THD, 6 Ω ..... 90 W
- Input Sensitivity/Input Impedance
  PHONO [Russia, Australia, General and Asia models] ..... 3.5 mV/47 kΩ
  AV5, etc. ..... 200 mV/47 kΩ
  MULTI CH INPUT ..... 200 mV/47 kΩ
- Maximum Input Voltage
  PHONO (1 kHz, 0.1% THD)
  [Russia, Australia, General and Asia models] ..... 60 mV or more
  AV5, etc. (1 kHz, 0.5% THD) ..... 2.0 V or more
- Rated Output Voltage/Output Impedance
  AUDIO OUT ..... 200 mV/1.2 kΩ
  PRE OUT ..... 1.0 V/1.2 kΩ
  SUBWOOFER (2ch Stereo & Front: Small) ..... 1.0 V/1.2 kΩ
  ZONE2 OUT ..... 200 mV/1.2 kΩ
- Headphone Jack Rated Output/Impedance
  AV5, etc. (1 kHz, 50 mV, 8 Ω) ..... 100 mV/470 Ω
- Frequency Response
  AV5 to FRONT ..... 10 Hz to 100 kHz, +0/–3 dB
- RIAA Equalization Deviation
  [Russia, Australia, General and Asia models]
  PHONO ..... 0 ± 0.5 dB
- Total Harmonic Distortion
  PHONO to AUDIO OUT
  [Russia, Australia, General and Asia models]
  (20 Hz to 20 kHz, 1 V) ..... 0.02% or less
  AV5, etc. to FRONT, Pure Direct
  [U.S.A. and Canada models]
  (1 kHz, 50 W, 8 Ω) ..... 0.06% or less
  [Other models]
  (1 kHz, 50 W, 6 Ω) ..... 0.06% or less
- Signal to Noise Ratio (IHF-A Network)
  PHONO Input Shorted (5.0 mV to AUDIO OUT)
  [General model] ..... 80 dB or more
  PHONO Input Shorted (5.0 mV to AUDIO OUT)
  [Russia, Australia and Asia models] ..... 86 dB or more
  AV5, etc. Input Shorted (250 mV to Front Speakers) ..... 100 dB or more
- Residual Noise (IHF-A Network)
  Front Speakers ..... 150 µV or less
- Channel Separation (1 kHz/10 kHz)
  PHONO (Input Shorted)
  [Russia, Australia, General and Asia models] ..... 60 dB/55 dB or more
  AV5, etc. (5.1 kΩ shortened) ..... 60 dB/45 dB or more
- Volume Control ..... MUTE / –80 dB to +16.5 dB
- Tone Control (Front Speakers)
  BASS Boost/Cut ..... ±10 dB at 50 Hz
  BASS Turnover Frequency ..... 350 Hz
  TREBLE Boost/Cut ..... ±10 dB at 20 kHz
  TREBLE Turnover Frequency ..... 3.5 kHz
- Filter Characteristics (fc=40/60/80/90/100/110/120/160/200 Hz)
  H.P.F. (Front, Center, Surround, Surround back: Small) ..... 12 dB/oct.
  L.P.F. (Subwoofer) ..... 24 dB/oct.

VIDEO SECTION

- Video Signal Type (Gray Back)
  [U.S.A., Canada and General models] ..... NTSC
  [Other models] ..... PAL
- Video Signal Type (Video Conversion) ..... NTSC/PAL
- Signal Level
  Composite ..... 1 Vp-p/75 Ω
  S-video [Russia models] ..... 1 Vp-p/75 Ω (Y), 0.286 Vp-p/75 Ω (C)
  Component ..... 1 Vp-p/75 Ω (Y)
- Maximum Input Level (Video Conversion Off) ..... 1.5 Vp-p or more
- Signal to Noise Ratio ..... 50 dB or more
- Frequency Response [MONITOR OUT]
  Component (Video Conversion Off) ..... 5 Hz to 60 MHz, –3 dB

FM SECTION

- Tuning Range
  [U.S.A. and Canada models] ..... 87.5 to 107.9 MHz
  [Asia and General models] ..... 87.5/87.50 to 108.0/108.00 MHz
  [Other models] ..... 87.50 to 108.00 MHz
- 50 dB Quieting Sensitivity (IHF)
  Mono ..... 3.0 µV (20.8 dBf)
- Signal to Noise Ratio (IHF)
  Mono/Stereo ..... 74 dB/69 dB
- Harmonic Distortion (1 kHz)
  Mono/Stereo 0.3/0.3%
- Antenna Input (unbalanced) ..... 75 Ω

AM SECTION

- Tuning Range
  [U.S.A. and Canada models] ..... 530 to 1710 kHz
  [Asia and General models] ..... 530/531 to 1710/1611 kHz
  [Other models] ..... 531 to 1611 kHz

GENERAL

- Power Supply
  [U.S.A. and Canada models] ..... AC 120 V, 60 Hz
  [General model] ..... AC 110/120/220/230–240 V, 50/60 Hz
  [Australia model] ..... AC 240 V, 50 Hz
  [Russia model] ..... AC 230 V, 50 Hz
  [Asia model] ..... AC 220/230–240 V, 50/60 Hz
- Power Consumption
  [U.S.A. and Canada models] ..... 270 W/320 VA
  [Other models] ..... 280 W
- Standby Power Consumption
  Standby through off ..... 0.2 W or less
  Standby through on ..... 3 W or less
- Maximum Power Consumption
  [Asia and General models] ..... 490 W
- Dimensions (W x H x D) ..... 435 x 151 x 364 mm (17-1/8 x 6 x 14-3/8 in)
- Weight ..... 8.5 kg (18.7 lbs)
